Prior to making an investment decision, prospective investors should carefully consider all of the information contained in this Red Herring Prospectus, including Financial Statements included in this Red Herring Prospectus beginning on page no. 122. Unless stated otherwise, the financial data in this section is as per our financial statements prepared in accordance with Indian GAAP.

Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other implications of any of the risks mentioned herein.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some events may not be material individually but may be found material collectively.
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material at present but may be having material impacts in future.

INTERNAL RISK FACTORS

1. Project Related Risk Factors

a. *Our Company is expanding capacity without firm commitments / orders.*

As stated in the Objects of this Issue beginig on page no. 27 of this Red herring Prospectus, our Company is expanding its capacity, which will require a larger customer base. In the absence of guaranteed customers for the increased production, there can be no assurance that we will be successful in selling the increased production. This may result in lower capacity utilization and adversely affect the operations and financial results.

b. *Our fund requirement has not been appraised by any bank or financial institution.*

The funding requirements as mentioned under “the Objects of the Issue” have not been appraised by any bank or financial institution and are based on the estimation of our management.

c. *We have not placed orders for all the plant and machineries to be acquired pursuant to the expansion proposed in the Objects of this Issue.*

We have estimated the requirement of plant, equipment and machinery based on quotations or internal estimates based on prevailing market prices of manufacturers/ suppliers of equipment. However, as on date of filing this Red Herring Prospectus with SEBI, we have not placed orders amounting to Rs. 2266.05 lakhs or 64.32 % of the total value of plant and/or machinery to be financed from the proceeds of the issue. We cannot assure that we would be able to acquire the plant and machinery required for the same, or acquire them at the prices as quoted/estimated in this Red Herring Prospectus. Any delay in acquisition of the plant and/or machinery required to be acquired herein could lead to time and cost overruns, and may have a material adverse effect on our business, results of operations and financial condition.

- d. *We have not yet identified or entered into any specific written agreement or arrangement for acquisition of land for setting up service and distribution centres at Hubli. Any delay in finalizing agreements for acquisition of land may delay our expansion plans.***

We have not yet definitively identified or entered into any written agreement or arrangement for acquisition of the land required to setup service and distribution centres at Hubli, since transactions for land acquisition have to be typically completed as soon as possible due to vendors availing multiple sale options and frequent price changes. However, identification of the suitable land may take a longer time than anticipated, and such delay(s) may defer our expansion plans.

- e. *Our expansion plans are subject to the risk of cost and time overruns***

Our plan for capacity expansion and diversification as referred to in the section titled “Objects of this Issue” on page no. 27 of this Red Herring Prospectus, contains project costs and implementation schedules. We intend to utilize the net proceeds of the Issue to increase the production capacity, to setup service and distribution centres and diversifying into other products, for which we are yet to acquire some of the lands, machinery etc. Our expansion plans are subject to a number of contingencies, including changes in laws and regulations, government action, delays in obtaining approvals, delays in getting requisite land, inability to obtain machinery and other supplies at quoted or at acceptable terms, accidents, natural calamities, terrorist activity and other factors, many of which may be beyond our control. We, therefore, cannot assure you that the costs incurred or time taken for implementation of these plans will not vary from our estimated parameters.

- f. *Most of the regulatory approvals for the proposed expansion are yet to be applied and any delay or non-receipt of such approvals may delay the Proposed Expansion Project.***

As on date of filing this Red Herring Prospectus, we have not applied for most of the licenses in relation to the objects of this Issue. We cannot assure that we would be able to apply for these licenses/approvals/permissions in a timely manner or at all, or that we would be granted such licenses/approvals/permissions in a timely manner. Such grant may also be subject to restrictions and/or permissions which may not be acceptable to us, or which may prejudicially affect our operations, and would have a material adverse effect on our business, results of operations and financial condition. For further details pertaining to the said licenses / approvals / permissions, please refer to the chapter titled ‘Government/Statutory and other Business Approvals’ beginning on page no. 206 of this Red Herring Prospectus.

- g. *We have not identified alternate sources of financing for the Proposed Expansion Projects as stated in the Objects of this Issue.***

The total requirement of funds is proposed to be funded by the net proceeds from this Issue. We have not identified alternate sources of financing for proposed expansion projects. Any delay on our part to raise money through this Issue will delay the proposed implementation of our plans. For details, please refer to chapter titled “Objects of this Issue” beginning on page 27 of this Red Herring Prospectus

2. Other Risk Factors

- a. *Our Company is involved in a number of legal proceedings which, if decided against us could impact our income and financial condition.***

Our Company is involved in various legal proceedings, which are pending at various stages of adjudication before the City Courts, High Courts, and various tribunals. Should any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to establish reserves in our financial statements, which could increase our expenses and our current liabilities. Further, if a claim is determined against us and we are required to pay all or a portion of the disputed amount, it could have a material effect on our results of operations and cash flows. For further information regarding litigation, please refer to the chapter entitled ‘Outstanding Litigation, Material Developments and Other Disclosures’ beginning on page no. 187 of this Red Herring Prospectus.

- c. *Our business and profitability will suffer if we fail to anticipate and develop new products and enhance existing products in order to keep pace with rapid changes in technology and the industries on which we focus.*

The market we operate in is characterized by rapid technological change, evolving industry standards, and new product and service introductions. Our future success will depend on our ability to anticipate these advances and develop new product to meet client needs. We may not be successful in anticipating or adequately responding to these advances in a timely basis, or, if we do respond, product we develop may not be successful in the marketplace. Further, products, that are developed by our competitors may render our offerings non-competitive or force us to reduce prices, thereby adversely affecting our margins.

- d. *We could become liable to customers, suffer adverse publicity and incur substantial costs as a result of defects in our products or services, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity.*

Any failure or defect in our products could result in a claim against us for damages, regardless of our responsibility for such a failure or defect. We currently carry no products liability insurance with respect to our products. Although we attempt to limit our liability for defects if any in the products sold, we cannot be assured that our liability will be restricted to those mentioned in the warranty clause of the products or that they will otherwise be sufficient to protect us from consequential damages.

Also, our business is dependent on the trust our customers have in the quality of our products. Any negative publicity regarding our company, brand, or products, including those arising from a drop in quality of merchandise from our vendors, mishaps resulting from the use of our products, or any other unforeseen events could affect our reputation and our results from operations.

- e. Our company has taken Land on Lease from Karnataka Industrial Area Development Board (KIADB) on certain terms and conditions. In the event of any breach of the terms and conditions by our Company, KIADB has a right to terminate the lease, by giving a notice thereof and to resume possession of the entire plot leased or part thereof.***

Our company has taken a land from Karnataka Industrial Area Development Board (KIADB) vide a Lease cum Sale agreement dated 11th June, 2007 for setting up a service cum distribution centre in Bangalore as stated in the heading titled “Objects of this Issue” on page no. 27 of this Red Herring Prospectus. The right of our Company to acquire ownership of plot of land covered by the Agreement is subject to and conditional upon our Company observing all the terms and conditions of lease of the plot during the lease period including the completion of civil works and installation of machineries within 12 months from 6th June 2007 or within such extended time as may be permitted by KIADB, subject to the conditions specified in the Agreement. In the event of any breach by our Company, KIADB has a right to terminate the lease, by giving a notice thereof and to resume possession of the entire plot leased or part thereof. In the event the lease is terminated and KIADB resumes possession of the entire land or part thereof prior to sale, KIADB has a right to forfeit 25% of the allotment consideration paid, together with rents payable, interest due and payable on the unpaid rents and earnest money deposit. In addition, our Company will not be entitled to any compensation by KIADB on account of building constructed thereon or any improvements made on the plot.

For further details on the agreement, please refer section titled Other Agreements beginning on page no. 103 of this Red Herring Prospectus.

- f. Our failure to accurately forecast and manage inventory could result in an unexpected shortfall and/or surplus of products, which could harm our business.***

We monitor our inventory levels based on our own projections of future demand. Because of the length of time necessary to produce commercial quantities of our products, we must make production decisions well in advance of sales. An inaccurate forecast of demand for any product can result in the unavailability/surplus of products. This unavailability of products in high demand may depress sales volumes and adversely affect customer relationships. Conversely, an inaccurate forecast can also result in an over-supply of products, which may increase costs, negatively impact cash flow, reduce the quality of inventory, erode margins substantially and ultimately create write-offs of inventory. Any of the aforesaid circumstances could have a material adverse effect on our business, results of operations and financial condition.

- g. Any future equity offerings or issue of options under our employee stock option scheme may lead to dilution of your shareholding in our company.***

Investors of Equity Shares in this Issue may experience dilution of their shareholding to the extent of equity offerings and to the extent of additional shares being offered through employee stock option scheme.

- h. The Trade Marks, which our Company have acquired is pending transfer in the records of the trademark Registry.***

Our promoter Mr. Koucheseph Chittilappilly as the absolute owner of the Trade Mark “V Guard” had registered the Trade Mark in his name in various classes under the relevant provisions of Trade Mark Act 1999 as amended from time to time. Mr. Koucheseph Chittilappilly had also made applications for registration of the above Trade Mark in various other classes which are pending registration. Our company, vide applications dated 12th November 2007 has applied to the

Trade Mark Registry for registering our company as the subsequent proprietor of the trademark which are already registered in the name of Mr. Kochouseph Chittilappilly and for substituting the name of our company as the applicant in respect of the trademarks under various classes which are pending registration. The registration of Trade Mark under various classes for which applications are pending is subject to there being no opposition for registration of the Trade Mark in the name of our company. For further details on our trade mark registrations and applications, please refer to the headings titled 'Registered Trade Marks' and 'Licenses applied for but not yet received' in the chapter titled 'Government / Statutory Approvals & Other Business Approvals' beginning on page no. 206 of this Red Herring Prospectus.

- i. *The trademarks acquired by our Company for a consideration of Rs. 1000 lakhs from our Promoter have not been valued by any external/independent agency***

The trademarks acquired by our Company for a consideration of Rs. 1000 lakhs from Mr. Kochouseph Chittilappilly pursuant to an agreement of Assignment dated 1st August, 2005 was based on internal management assessment and was not valued by any external/ independent agency. We therefore cannot assure you that the said acquisition value was at Fair Market Value.

- j. *Our Promoters will continue to hold a majority of our Equity Shares after the Issue and can significantly influence our corporate actions.***

Following the completion of the Issue, our Promoters and Promoter Group will own an aggregate of 66.51 % of our issued and paid-up Equity Share Capital. As a result, our promoter Group will have the ability to exercise significant influence over all matters requiring shareholder's approval, including the election of directors and approval of significant corporate transactions. Our Promoter Group will also be in a position to influence any shareholder action or approval requiring a majority vote, except where it is required by applicable laws to abstain from voting. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control.

Our Promoters and/or the members of our Promoter Group will also continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests and/or the interests of our minority shareholders, and there can be no assurance that such actions will not have an adverse effect on our future financial performance and the price of our Equity Shares.

For further details, see the sections titled "Capital Structure" and "Our Promoters" beginning on pages 14 and 118 respectively in this Red Herring Prospectus.

- k. *We may not be able to sustain effective implementation of our business and growth strategy.***

As a part of our growth strategy, we are planning to make investments designed to increase sales of our products, especially those where our presence is currently limited.

There can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. Our growth strategy is subject to and involves risks and difficulties, many of which are beyond our control and, accordingly, there can be no assurance that we will be able to implement our strategy or growth plans, or complete them within the budgeted cost and timelines. Any inability on our part to manage our growth or implement our strategy effectively could have a material adverse effect on our business, results of operations and financial condition. Further, we operate in a dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands.

- l. *Our inability to maintain the stability of our distribution network and attract additional distributors may have an adverse affect on our results of operations and financial condition.***

The challenge in our business lies in reaching a geographically dispersed end-user at the right time at the right place with the right product. We rely on our distribution network and dealerships to reach the end customer and sell our products in each of the regions in which we operate. Competition for cables and other electronic and electro mechanical durables dealers is intense. Hence, our business is dependent on maintaining good relationships with our distributors and dealers and ensuring that our distributors and dealers find our products to be commercially remunerative and have continuing demand from customers. Furthermore, our growth as a business depends on our ability to attract additional distributors to our distribution network. There can be no assurance that our current distributors and dealers will continue to do business with us, or that we can continue to attract additional distributors and dealers to our network. If we do not succeed in maintaining the stability of our distribution network and attracting additional distributors to our distribution network, our market share may decline and our products may not reach the end customers, materially affecting our results of operations and financial condition.

- m. *We are highly dependent on our markets in the states of Kerala, Andhra Pradesh, Karnataka and Tamil Nadu and our products, stabilizers, pumps and cables. Further, the occurrence of any of the circumstances enumerated below may adversely affect our business, results of operations and financial condition.***

Our initial focus was on developing our markets in the states of *Kerala, Andhra Pradesh, Karnataka and Tamil Nadu*. These states still contribute a very significant percentage of our revenues *i.e.* 44.53%, 11.70%, 20.25% and 19.24% of our total revenues for the FY 2006-2007. Further, 41.48 %, 19.09 % and 20.09 % of our total revenues for the FY 2006-2007 have accrued from three products, *viz.* Stabilizers, Pumps and Cables respectively. Our business, results of operations and financial condition may be adversely affected if one or more of the following factors occur:

- a. Negative demand for our products in these states
- b. Our competitors' further penetration in these states
- c. Enactment of any legislation which may not be favourable to our industry in these states

We cannot further assure you that we will be able to de-risk our product portfolio or our dependence on these four states, or that such dependence will not increase in the future.

- n. *Any inability to attract, recruit and retain skilled personnel could adversely affect our business and results of operations.***

Our ability to meet future business challenges depends on our ability to attract, recruit and retain talented and skilled personnel. We are highly dependent on our senior management, our Directors and other key personnel, including skilled project management personnel. A significant number of our employees are skilled engineers and we face strong competition to recruit and retain skilled and professionally qualified staff. Due to the limited pool of available skilled personnel, competition for senior management and skilled engineers in our industry is intense. We may experience difficulties in attracting, recruiting and retaining an appropriate number of managers and engineers for our business needs. We may also need to increase our pay structures to attract and retain such personnel. Our future performance will depend upon the continued services of these persons. The loss of any of the members of our senior management, our Directors or other key personnel or an inability to manage the attrition levels in different employee categories may materially and adversely impact our business and results of operations.

- o. *Intense competition in the market for our products could affect our cost advantages, which may adversely impact our revenues and profitability.***

Our current expansion plan contemplates substantial increase in the capacity of our existing product and diversification into manufacturing of new products. The prospects for profitability in the business could lead to other companies entering into this segment.

While we have historically been able to provide our products and services in our principal markets at competitive prices and on a cost-efficient basis, there can be no assurance that we will be able to do so in the future, as our competitors may be able to offer products and services that are more effective than ours.

Growing competition may force us to reduce the prices of our products, which may reduce our revenues and margins and/or decrease our market share, any of which could have a material adverse effect on our business, financial condition and results of operations.

- p. *We require several licenses, approvals and permissions for carrying on our business. If our Company is unable to obtain the required approvals and licenses in a timely manner, our business and operations may be adversely affected.***

In order for our Company to carry out its business operations, we are required to obtain certain approvals, licenses, registrations and permissions, some of which our Company has either received, applied for or is in the process of application. For further details pertaining to the said licenses / approvals / permissions, please refer to the chapter titled 'Government/Statutory and other Business Approvals' beginning on page no. 206 of this Red Herring Prospectus. In the event that our Company fails to obtain these approvals/registrations/licenses/permissions, or renewals thereof, in a timely manner, or at all, our Company's operations would be adversely affected, having a material adverse effect on our business, results of operations and financial condition.

- q. *Our cash flow has been negative in some years. In the event that our future cash flows continue to be negative, it may hamper our ability to meet our financial obligations.***

In the preceding three financial years, i.e. 2005-06, 2004-05 and 2003-04, we had a negative net cash flow of Rs. 41.00 lakhs, Rs. 18.53 lakhs and Rs.22.48 lakhs respectively. On account of the aforesaid or other factors, our cash flows in the future may be negative, which may hamper our ability to meet our financial obligations.

- r. *We are significantly dependent on copper, which is the primary raw material for our cable segment. An increase in the prices of raw materials will raise our manufacturing costs and could adversely affect our profitability.***

We have no control on the prices of our basic raw material for manufacturing of cables viz. copper. The prices of Copper could fluctuate due to uncertain prices world over. In the recent past, there have been wide fluctuations in the prices of copper both at domestic and international levels. Such fluctuations in prices of raw material and our inability to negotiate at optimum market rates may affect our profitability. In case we are unable to procure the requisite quantities on a timely basis and at reasonable prices, this may have an adverse impact on our financials and may affect our future growth.

- s. *We have entered into a number of related party transactions which may involve conflicts of interest.***

We have entered into a number of related party transactions. The total amount of related party transaction for the period ended August 31, 2007 amounted to Rs. 13108.76 lakhs. Such transactions or any future transactions with related parties may potentially involve conflicts of interest and impose certain liabilities on our Company. For further details, see the section titled "Financial Statements" beginning on page no. 122 of this Red Herring Prospectus.

- t. *We operate our business from leased premises.***

Some of the offices through which we operate our business are leased/ rented by us from third parties. Also our registered cum corporate office is leased to us by our promoter, Mr. Kochouseph Chittilappilly. We may in future also enter into such transactions with third parties. Any adverse impact on the title /ownership rights/ development rights of our landlords from whose premises we operate our offices or breach of the contractual terms of such lease and license agreements may impede our Company's effective operations. In the event, these leases are not renewed, our operations and in turn profitability will be adversely impacted.

- u. *Our insurance policies do not cover all risks, specifically risks like product defect/liability risk, loss of profits etc. In the event of the occurrence of such events, our insurance coverage may not adequately protect us against possible risk of loss.***

In addition to risks arising from natural disasters and risks to properties and personnel (like personal injury/loss of life), in the course of our business, our operations are also subject to the risks arising from or as a result of product defects etc.

While we believe that we maintain insurance coverage in amounts consistent with industry norms, our insurance policies do not cover all risks, specifically risks like product defect/liability risk, loss of profits etc, and are subject to exclusions and deductibles. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

- v. ***Due to the absence of any written agreements with our vendors/suppliers, we are exposed to risks due to supply obligations not clearly specified in writing.***

We do not have written agreements with our vendors/suppliers and operate on a purchase order system. Due to the absence of any formal contract with our vendors/suppliers, we are exposed to the risks of irregular supplies or no supplies at all and delayed supplies which would materially affect our results of operations.

- w. ***Our Company has made issuances of Equity Shares during the last 12 months at a price that may be lower than the Issue Price, Such issuances may be detrimental to our prospective investors as they may have to pay more for subscribing to our Equity Shares than the price at which allotments have been made to the allottees in the last twelve months.***

Our Company has, in the last 12 months made issuances of Equity Shares at a price that could be lower than the Issue Price. a. A slowdown in economic growth in India and other unfavourable changes in political and economic factors may adversely affect our business and results of operations.

All our business facilities are located in India. The market price and liquidity of our Company's Equity Shares, may be adversely affected by fluctuations in foreign exchange rates and controls, interest rates, changes in Government policy, taxation, social and civil unrest and other negative political developments like any abrupt change in the Central or any State Government wherever we have business interests, etc., economic developments like very high rate of inflation, slow down in growth, decrease in foreign investments, etc. or other developments in or affecting India. Particularly slow down in economic growth may make the Government spends relatively less on agriculture and agricultural growth is also linked to overall economic growth, which may ultimately be unfavourable to our Company's business. During the past decade, the Government has pursued policies of economic liberalization, including significantly relaxing restrictions on the private sector. Nevertheless, the role of Government and State Governments in the Indian economy in relation to producers, consumers and regulators has remained significant. It cannot be assured that the liberalization policies will continue in future. A change in Central Government may lead to change in certain liberalization policies like disinvestment in public sector enterprises, capital account convertibility *etc.* and the impact of such changes cannot be currently estimated. The Government may also pursue other policies which could have a material adverse effect on our business. The rate of economic liberalization could change, and specific laws and policies affecting our business, suppliers, foreign investment, currency exchange rates and other matters affecting our business are also subject to change. A significant change in the Government's or Indian State Governments' economic liberalization and deregulation policies could adversely affect business and economic conditions in India generally and our business and financial condition and prospects in particular.

b. *Changes in Government policies may affect our operations adversely.*

Increase in taxes and other levies imposed by the Central or State Governments in India may have an adverse effect on the profitability of our Company. Since 1991, the Government of India has pursued policies of economic liberalization. We cannot assure you that these liberalization policies will continue in future. Protest against liberalization could slowdown the pace of economic development. The rate of economic liberalization could change, specific laws and policies could change, and foreign investment, currency exchange rates and other matters affecting investing in our securities could change as well. There could be political instability, which may have an adverse impact on capital markets and investor confidence. Taxes and levies affect the cost of production and prices of our Company's products and hence the demand for its products. An increase in any of taxes or levies or the imposition of new taxes or levies in the future may have an adverse impact on our Company's business and financial condition.

c. *After this Issue, the prices of our Equity Shares may be highly volatile, or an active trading market for our Equity Shares may not develop*

The price of our Equity Shares may be highly volatile as a result of several factors, including:

- volatility in the Indian and Global Securities market;
- our results of operations and performance;
- perceptions about our future performance or the performance of Consumer durables/ Electronic Equipment companies generally;
- performance of our competitors in the industry and the perception in the market about investments in the Consumer durables/ Electronic Equipment sector;
- adverse media reports on our Company or the Indian Consumer durables/ Electronic Equipment industry;
- changes in the estimates of our performance or recommendations by financial analysts;
- significant developments in India's economic liberalization and deregulation policies;
- changes in the applicable tax incentives;
- significant development in India's fiscal and environmental regulations.
- the exchange rate of USD or any other relevant currency; and
- general political and security environment in the country and across the globe.

d. *Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.*

India has experienced natural calamities such as earthquakes, a tsunami, floods and drought in the past few years. Natural calamities could have a negative impact on the Indian economy, adversely affecting our business and our results of operations.

Credit Rating

As this is an issue of Equity Shares there is no credit rating for this Issue.

IPO Grading

CRISIL has assigned a CRISIL IPO Grade “3/5” (pronounced “three on five”) to the proposed initial public offer of V-Guard Industries Ltd (V-Guard). This grade indicates that the fundamentals of the issue are average in relation to the other listed equity securities in India.

The rationale for the Grade assigned to our Company's IPO by CRISIL, has been set out in its report. The rationale set out therein is as follows:

Grading Rationale

The grading assigned reflects the company’s dominance in the stabilizer business in South India and its growing presence in the small ticket electronic and electrical goods industry in general. The grading also factors in the high brand recall enjoyed by V-Guard in South India and the strengths of its unique manufacturing model, which has ensured high margins for the company. However, the grading is tempered by the fact that the company’s success in products other than stabilizers has been limited and the fact that the planned expansions into the northern market and the new business segment of LT power cables will be much more challenging than the existing businesses. Moreover, the company will find it difficult to replicate its current manufacturing (outsourcing) model in North India. While the management has managed to build a strong presence in South India, it has displayed a rather reactive attitude in capturing potential and showing growth. Success in its planned expansion strategies would call for greater aggressiveness and dynamism on the part of the management.

A copy of the report provided by CRISIL Limited, furnishing the rationale for its grading is available for inspection at the registered office of our Company from 10.00 am to 4.00 pm on working days from the date of the Red Herring Prospectus until the Bid/Issue Closing Date.

Illustration of Book Building and Price Discovery Process *(Investors should note that the following is solely for the purpose of illustration and is not specific to this Issue)*

Bidders can bid at any price within the price band. For instance, assuming a price band of Rs. 200 to Rs. 240 per share, issue size of 3,000 equity shares and receipt of five bids from bidders details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the websites of the BSE (www.bseindia.com) and NSE (www.nseindia.com) during the bidding period. The illustrative book as shown below shows the demand for the shares at various prices and is collated from bids from various investors.

Number of Equity Shares Bid for	Bid Price (Rs.)	Cumulative Equity Shares Bid for	Subscription
500	240	500	16.67%

2000	210	5000	166.67%

The Issuer, in consultation with the BRLMs will finalise the issue price at or below such cut off price *i.e.* at or below Rs. 220. All bids at or above this issue price and cut off bids are valid bids and are considered for Allocation in respective category.

1. Setting up of facilities for Cable manufacturing in Coimbatore and Uttaranchal

With expansions taking place in power sector, demand for power cables is likely to remain buoyant. This buoyancy in the sector is likely to be further contributed by the boom in housing & construction sector. Keeping these in mind we intend to setup a manufacturing facility for LT Power cables in Coimbatore, Tamil Nadu and a Building Cable Manufacturing facility in Kashipur, Uttaranchal.

a. L.T. Power cable unit at Coimbatore, Tamil Nadu:

We presently have a facility for manufacturing "Building Cables" using copper as the main raw material.

Our Company intends to setup a manufacturing unit for LT Power cables with an installed capacity to process 3000 metric tonnes of Aluminum and 300 metric tonnes of Copper per annum. As Aluminum cables are used for industrial purposes/ large commercial constructions and distribution of electricity through underground cables, our company would be able to market this product through institutional sales channel along with its present sales channel. Moreover, this new product line would create synergy as our company will be able to satisfy the institutions/ large commercial constructions by offering them both domestic and industrial cables.

Our Company already has 23.84 acres of land located at survey nos. 569/2A, 566/2, 570/1, 576/1, 36, 35, 566/1, 567/2, 566/2B, 570/1B, 570/2B, 571/1A1 and 571/1B2 at Ettimadai Village, Coimbatore, South Taluk, Tamil Nadu, out of which 4 acres is currently being used for its existing facility and 6 acres would be allotted for the proposed facility.

b. Kashipur Unit, Uttarakhand.

Presently, our company is having a Building cable manufacturing facility at Coimbatore, Tamil Nadu having a capacity to manufacture 1,38,000 coils per month of standard length of 90 meters. For its future plans and to meet its sales demand, our company proposes to setup a second manufacturing facility at Kashipur, Uttaranchal. The proposed factory will have a capacity to produce 2,00,000 coils per month of standard length of 90 metres.

The machinery which will be used for this plant will have a higher productivity. The wire drawing machine being used in the existing unit can draw a maximum of 8 wires simultaneously whereas the new wire drawing machine would be able to draw 16 wires simultaneously. Similarly, the insulating line we propose to use has the capacity to insulate 17 mts of cable per second against 10 mts of cable per second of the existing unit.

Further, setting up the unit for manufacturing in Uttaranchal would help us in attaining tax benefits in the form of exemption of excise duty for the finished products for the first ten years vide Central Excise Notification no. 55/2003 dated 10th March, 2003 and exemption of Income Tax for the first five years vide CBDT circular no. 177/2004 dated 28th June, 2004.

2. Setting up of Enameling Plant at Coimbatore.

Enameled copper wire is one of the main raw materials used in the manufacture of stabilizers, Pumps and electric fans.

As per industry sources the Indian pump industry is expected to sustain strong growth momentum given the strong investment under pipeline in fluid handling industries and irrigation, urban utilities and infrastructure projects. Also as per estimates by IMRB, 80% of the new sales of air conditioners, 50% of refrigerators and 18% of TV are accompanied with separate stabilizers. With consumer appliance sector recording a growth of 25% in 2006-07, the stabilizer market has also witnessed a growth of about 20% during the year.

The present average consumption of enameled wire by our suppliers for products manufactured for us itself is 60 metric tones per month. This requirement is expected to increase further. To meet the market demand for enameled

copper wires, we propose to start an enameling plant at Coimbatore having a capacity to process 100 metric tones of enameled copper per month.

Our Company already has 23.84 acres of land at survey nos. 569/2A, 566/2, 570/1, 576/1, 36,35, 566/1, 567/2, 566/2B, 570/1B, 570/2B, 571/1A1 and 571/1B2 at Ettimadai Village, Coimbatore, South Taluk, Tamil Nadu out of which 4 acres is currently being used for its cable manufacturing factory and 1 acre would be allotted for the proposed facility.

4. Investment for setting up Service and Distribution Centres at Bangalore, Hubli and Vijaywada

(i) Distribution cum Service Centre at Bangalore

Due to non-availability of ideal storage space, we are now operating from two different locations in Bangalore. This is causing operating difficulty and additional cost to our Company. In this regard, we propose to setup our own distribution cum service centre in Bangalore for which we have already entered into a lease cum sale agreement with Karnataka Industrial Areas Development Board (KIADB) dated 11th June 2007 for a total cost of Rs.46.33 lakhs.

We estimate a cost of Rs. 329.15 lakhs towards the construction of the building. M/s Roy Antony Architects, Chartered Engineers, have given their certificate dated 18th September, 2007.

The company does not propose to acquire any new/second hand machinery for the proposed setup. The existing machinery in our present setups would be used for the proposed distribution cum service centre.

The estimated cost of land and building required for the proposed setup is as follows:

Particulars	Amount (in Rs. Lakhs)
(a) Bangalore, Karnataka	
Land – 1.21 Acres	46.33*
Building – 41930 sq. ft. @ 785 per sq. ft.	329.15

Total (A)	394.25

* - the cost of land includes an amount of Rs.3.82 lakhs paid towards stamp duty.

(ii) Distribution cum service centers at Hubli and Vijayawada

One of the Objects of this issue is to manufacture L.T. Power cables. This product requires very large storage space. The company currently operates its distribution cum service centre in a leased premise in Hubli and Vijayawada which does not have the adequate storage space for storage of LT cables. Considering the high storage cost in cities like Bangalore and Hyderabad, we propose to make Hubli as a storage hub for parts of Karnataka and Goa and Vijayawada as a storage hub for parts of Andhra Pradesh for cities like Vishakapatnam, Tirupathi, Chittoor, Guntur etc. Towards this, our Company proposes to have its own Distribution set up in Vijayawada and Hubli. Moreover all these service and distribution centers will have a transit house facility which will contribute towards substantial reduction in the traveling expenses.

With regards to the Distribution Centre in Vijaywada, our company has acquired the land at a cost of Rs. 99.40 lakhs where we propose to setup the distribution centre. Our company is yet to identify the land for setting up the Distribution Centre in Hubli and is in the process of identifying suitable land to setup the distribution cum service centre. However, we have estimated a cost of Rs. 100 lakhs towards the acquisition of land in Hubli. Also, we have relied upon the estimates given by M/s Roy Antony Architects, Chartered Engineers for construction of building for these distribution cum service centres at Hubli and Vijaywada.

We do not propose to acquire any new/second hand machinery for the proposed setup. The existing machinery in our present setups would be used for the proposed distribution cum service centres.

The estimated cost of land and building required for the proposed setup is as follows:

However, if the assessee transfers or converts the long term specified asset into money within a period of three years from the date of their acquisition, the amount of capital gains exempted earlier would become chargeable to tax as long-term capital gains in the year in which the long term specified asset is transferred or converted into money.

3. As per section 10(38) of the Act, long term capital gains arising to the shareholder from the transfer of a long term capital asset being an equity share in the Company or a unit of an equity oriented fund, where such

In such a case, the cost of such long term specified asset will not qualify for deduction under section 80C of the Act. However, if the assessee transfers or converts the long term specified asset into money within a period of three years from the date of their acquisition, the amount of capital gains exempted earlier would become chargeable to tax as long-term capital gains in the year in which the long term specified asset is transferred or converted into money.

A “long term specified asset” means any bond, redeemable after three years and issued on or after the 1st day of April 2007:

 - (ii) As per section 115F of the Act, long-term capital gains (in cases not covered under section 10(38) of the Act) arising to a Non-Resident Indian from the transfer of shares of the company subscribed to in convertible foreign exchange shall be exempt from income tax, if the net consideration is reinvested in specified assets within six months of the date of transfer. If only part of the net consideration is so reinvested, the exemption shall be

proportionately reduced. The amount so exempted shall be chargeable to tax subsequently, if the specified assets are transferred or converted into money within three years from the date of their acquisition.

(iii) As per section 115G of the Act, Non-Resident Indians are not obliged to file a return of income under section 139(1) of the Act, if their only source of income is income from specified investments or long term capital gains earned on transfer of such investments or both, provided tax has been deducted at source from such income as per the provisions of Chapter XVII-B of the Act.

(iv) As per section 115H of the Act, where the Non Resident Indian becomes assessable as a resident in India, he may furnish a declaration in writing to the Assessing Officer, along with his return of income, for the assessment year in which he is first assessable as a Resident, under section 139 of the Act to the effect that the provisions of the Chapter XII-A shall continue to apply to him in relation to such investment income derived from the specified assets for that year and subsequent assessment years until such assets are converted into money.

(v) As per the provisions of section 115-I of the Act, a Non-Resident Indian may elect not to be governed by the provisions of Chapter XII-A for any assessment year by furnishing his return of income for that assessment year under section 139 of the Act, declaring therein that the provisions of Chapter XII-A shall not apply to him for that assessment year and accordingly his total income for that assessment year will be computed in accordance with the other provisions of the Act.

7. The tax rates and consequent taxation mentioned above shall be further subject to any benefits available under the Tax Treaty, if any, between India and the country in which the non-resident has fiscal domicile. As per the provisions of section 90(2) of the Act, the provisions of the Act would prevail over the provisions of the Tax Treaty to the extent they are more beneficial to the non-resident.

IV. Foreign Institutional Investors (FIIs)

1. As per section 10(34) of the Act, any income by way of dividends referred to in section 115-O (i.e. dividends declared, distributed or paid on or after 1 April 2003) received on the shares of the Company is exempt from tax.
2. As per section 10(38) of the Act, long term capital gains arising to the FIIs from the transfer of a long term capital asset being an equity share in the Company or a unit of equity oriented fund where such transaction is chargeable to securities transaction tax would not be liable to tax in the hands of the FIIs.
3. As per section 115AD of the Act, FIIs will be taxed on the capital gains that are not exempt under the section 10(38) of the Act at the following rates:

Nature of Income	Rate of tax (%)
Long term capital gains	10
Short term capital gains (other than referred to section 111A)	30

The above tax rates have to be increased by the applicable surcharge and education cess.

In case of long term capital gains, (in cases not covered under section 10(38) of the Act), the tax is levied on the capital gains computed without considering the cost indexation and without considering foreign exchange fluctuation.

4. As per section 54EC of the Act and subject to the conditions and to the extent specified therein, long-term capital gains (in cases not covered under section 10(38) of the Act) arising on the transfer of a long-term capital asset will be exempt from capital gains tax if the capital gains, subject to a maximum of Rs.5 millions per year, are invested in a “long term specified asset” within a period of 6 months after the date of such transfer. However, if the assessee transfers or converts the long term specified asset into money within a period of three years from the date of their acquisition, the amount of capital gains exempted earlier would become chargeable to tax as long-term capital gains in the year in which the long term specified asset is transferred or converted into money.

A “long term specified asset” means any bond, redeemable after three years and issued on or after the 1st day of April 2007:

- (i) by the National Highways Authority of India constituted under section 3 of the National Highways Authority of India Act, 1988; or
 - (ii) by the Rural Electrification Corporation Limited, a company formed and registered under the Companies Act, 1956.
5. Section 88E provides that where the total income of a person includes income chargeable under the head “Profits and gains of business or profession” arising from taxable securities transactions, he shall get rebate of Securities Transactions Tax (STT) paid by him in the course of his business. Such rebate is to be allowed from the amount of income tax in respect of such transactions calculated by applying average rate of income tax.
6. The tax rates and consequent taxation mentioned above shall be further subject to any benefits available under the Tax Treaty, if any, between India and the country in which the FII has fiscal domicile. As per the provisions of section 90(2) of the Act, the provisions of the Act would prevail over the provisions of the Tax Treaty to the extent they are more beneficial to the FII.

V. Venture Capital Companies/Funds

As per section 10(23FB) of the Act, all venture capital companies/funds registered with the Securities and Exchange Board of India, subject to the conditions specified, are eligible for exemption from income tax on all their income, including income from sale of shares of the Company. However, income received by a person out of investment made in a venture capital company or in a venture capital fund shall be chargeable to tax in the hands of such person.

VI. Mutual Funds

As per section 10(23D) of the Act, any income of Mutual Funds registered under the Securities and Exchange Board of India Act, 1992 or Regulations made thereunder, Mutual Funds set up by public sector banks or public financial institutions and Mutual Funds authorized by the Reserve Bank of India would be exempt from income tax, subject to such conditions as the Central Government may by notification in the Official Gazette specify in this behalf.

SECTION IV – ABOUT US

INDUSTRY OVERVIEW

Indian Economy and Consumer Market

India's economic growth has accelerated significantly over the past two decades and so, too, has the spending power of its citizens. Real average household disposable income has roughly doubled since 1985. Indian Economy is in a much stronger position than it was a few years ago. The economy has experienced rapid growth in recent years and according to the advance estimates released by the Central Statistical Organisation (CSO), real Gross Domestic Product at factor cost (GDP) growth is expected to accelerate from 9.0 per cent in 2005-06 to 9.2 per cent in 2006-07.

(Source: May, 2007 Monthly Bulletin, Reserve Bank of India)

Analysis shows that if India continues on its current high growth path, over the next two decades the Indian market will undergo a major transformation. Income levels will almost triple and India will climb from its position as the 12th largest consumer market today to become the world's fifth-largest consumer market by 2025. As Indian incomes rise, the shape of the country's income pyramid will also change dramatically. (Source McKinsey Global Institute, May 2007)

The products that are manufactured by us in the Consumer Durable, Electro-Mechanical and Electric Equipments Industry are as under:

Stabilizers

A voltage regulator is an electrical regulator designed to automatically maintain a constant voltage level. It may use an electromechanical mechanism, or passive or active electronic components. Depending on the design, it may be used to regulate one or more AC or DC voltages.

At many industrial automatization processes, measurement and control installations and also at network PCs it is necessary to supply different types of electrical devices with stabilized AC voltage. It is very important that the stabilized AC voltage not to be depended by external variations such as: supply voltage, frequency and load.

Indian Scenario

Voltage Stabilizers are considered to be a necessity in most parts of India to protect consumer appliances like TV, refrigerators, air conditioners etc as many regions in India face problem of poor quality power supply-Fluctuation &

high voltage. Though some models of these appliances are sold with built in stabilizers, many consumers still prefer to employ stabilizers for complete protection.

The total market size for the consumer durable market is about Rs. 13600 crore in which CTV has the highest market share with 30% or 8.1m units followed by refrigerators with 18% in 2006-07 compared to 2005-06. (Source: IMRB International Survey – August 2007)

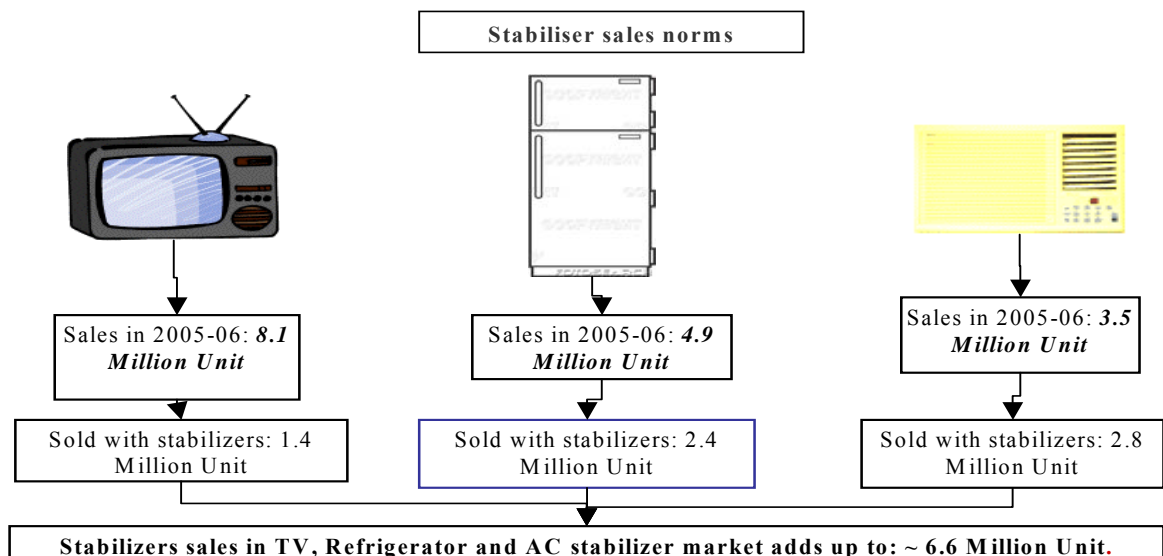

Market Share of Consumer Durables

(Source: IMRB International Survey – August 2007)

The consumer durables sector has witnessed an overall growth of 25.22% in 2006-07 compared to the corresponding previous year 2005-06. The sectors which have recorded excellent growth rates in terms of quantity produced are Air conditioners which have reached 35 lakh units during 2005-06 from 12 lakh units in 2004-05. The Refrigeration Industry has reached 49 lakh units in 2005-06 from 39 lakh units in 2004-05 with a growth of 25 per cent. Also, the Indian Colour Television industry has grown by reaching 81 lakh units in 2005-06. Riding on the 25% growth of consumer durable market, the stabilizers market has grown tremendously, though there are only a few organised players. (Source: FICCI, Consumer Durable Goods Survey, October 2005 and IMRB International Survey – August 2007)

As per estimates by IMRB, 80% of the new sales of air conditioners, 50% of refrigerators and 18% of TV are accompanied with separate stabilizers. With consumer appliance sector recording a growth of 25% in 2006-07, the stabilizer market has also witnessed a growth of about 20% during the year. (Source: IMRB International Survey – August 2007)

(Source: IMRB International Survey – August 2007)

The voltage stabilizer industry is highly fragmented with more than 250 manufacturers spread across the country. There are few large players in the stabilizers market. The organised segment is estimated to contribute only 25-30% of the market. Based on the survey among leading manufactures of Voltage stabilizer all over India conducted by IMRB international during the month of August, 2007, the total market for voltage stabilizer was estimated to be about 700 crores. This corresponds to 5-6% of total consumer durable market. (Source: *IMRB International Survey – August 2007*)

Cables

Cables are one of the basic inputs therefore they are very critical for the entire industrial sector. Whether made of copper, aluminium or other non-ferrous materials - cables and wires play decisive role in our daily lives and in almost every industry. Cables are used by Power, Steel, Cement, Refineries, Petro-Chemicals, Fertilizers and Communication Sector as well as Railways including Metro Rail.

The Indian cable industry is highly fragmented with large number of cable producers. Many of these companies are small-scale cable producers, the smallest of which are family-run operations which use the most basic production equipments. There has been very limited consolidation amongst the major players in the industry. The tendency of cable companies to grow organically, rather than by acquisition of competitors, means that no dominant groups have emerged in the industry.

Annual average growth of the Wire and Cable industry during 2002-03 was approximately 5.6%. In 2003-04, the non-SSI sector has reported production of 8.33 lakh core kms, which was 7% higher than previous year. In 2004-05 the non-SSI sector has reported production of 7.40 lakh core kms; which was 11% lower than the previous year. In 2005-06 the non-SSI sector have reported production of 8.86 lakh core kms, showing healthy growth of 19.65%. Cables Industry:

Power cables are segregated into high, medium and low tension cables. Industrial cables include control and instrumentation, LT cables, HT cables and speciality cables whereas telecom cables are classified as high capacity cables (Optical Fibre Cables -OFCS) and Low capacity cables (Jelly Filled Telecom Cables - JFTCS).

The Indian Cable Industry is approximately Rs 8000 crore, and is divided more or less equally between the LT Cable and HT cable segments. The LT Cable segment is represented by a large number of players and is highly competitive with an equal presence of organized players as well as unorganized players.

Demand drivers

Low voltage copper conductor PVC cables are extensively used for domestic home appliances wiring, house wiring and internal wiring for lighting circuits in factories, power supply for office automation, in control, instrumentation, submarine, mining, ship wiring applications etc. due to its high tensile strength, superior conductivity, better flexibility and ease of jointing.

The HT power Cable segment is represented by a few large organized players due to pre-qualification and approvals barriers. The Cables industry has been highly benefited from the APDRP Scheme and the Rajiv Gandhi Grameen Vidyutikaran Yojna. As a thumb rule, 3-3.5% of the total cost of a power project is spent on power cables; this will generate a huge demand for cables as the government strives to achieve the target of “power to all”.

Market Potential

Power cables are utilized in all three stages of power sector - generation, transmission and distribution. The government has planned massive investment in all three stages to achieve its 'power for all' objective by 2012. Government is targeting to add about 100000 MW of power generation capacity in X & XI plan. The government targets to increase the inter-regional transmission capacity from 9,500MW at end- FY2005 to 37,150MW by FY2012. With massive expansion taking place in power sector, demand for power cables is likely to remain buoyant.

The buoyancy in the sector is likely to be further contributed by boom in housing & construction sector and Special Freight Corridor being planned by Railway Ministry. Further demand will be created replacing old signaling infrastructure and installing new signaling equipment. (Source: *Capitaline, May 31, 2006*)

Backed by massive demand from user industry, the 8000 crore cable industry has been growing at 20-25%. Key growth driver for cable industry has been new capex in Power, Infrastructure, SEZ, and Industrial expansion. According to industry source, a capex in power sector, Infrastructure, SEZ, and Industrial Expansion of about Rs 900000 crore are going on which is likely to ensure strong demand for cable industry. As a thumb rule wire and cable requirement is approximately 2-3% of cost of the project. Thus demand for cable worth Rs 18000 – 27000 crore is likely to unveiled in near future. According to industry source, in the current financial year demand is very strong on account of massive capex planned in user industry.

It is expected that old well established players will be key beneficiaries of strong demand from user industry as, if any new company start manufacturing cable it will take at least 7 years to get it registered with vendors. This acts as an entry barrier for the industry. Thus major sale to institutions are from organized players for HT and LT cable. According to available estimates organized player's account for 75-80% of market with top 10 players having share of around 45%. (Source: *Capitaline, July 07, 2006*)

Outlook

Power Cables Industry is likely to witness healthy growth in revenues on account of the strong demand drivers. Government initiatives on power sector reforms have resulted in an increase in demand for power related products, including cables.

Backed by strong demand drivers, the industry is likely to witness strong volume growth. Though surge in input cost may create some challenges for the industry. However it is expected that industry will be able to partly pass on rise in raw material cost to their customers on account of strong demand. Also, cost of cable forms a small percentage of the total project cost of the user industry. Thus, customers would not mind paying a little more rather than having the project delayed. Thus it is expected that benefit of volume growth would percolate into profitability for the industry. (*Capitaline, July 07, 2006*)

Pump Industry

A pump is a service equipment but has a role in almost every sector of national economy. Pumps are the vital elements in an enormous range of fluid handling applications & range from small household pumps to immense units utilized in the water, chemical and energy industries. Pump performance requirements and duties vary considerably in terms of material of construction, wide range of temperature, pressure, viscosity, density etc.

In terms of sectors of economy, small-size water-handling pumps cater to agriculture, domestic and village water supply; medium-size water handling pumps cater to major irrigation, urban water supply, public health and sanitation, mine-dewatering, fire-fighting, etc. Large size water-handling pumps serve cooling water circulation in power-generation. In chemical, petroleum, petrochemicals, fertilizers, etc. pumps handling process fluids are made for a host of specific applications.

In India the manufacture of pumps has by now a history of nearly 100 years. Pumps being the basic equipment for every sphere of the national economy, the Indian pump industry have in its own growth, contributed immensely to the economic growth of the country. The industry has over the years built up great potentials to meet challenges. It has also worked with good foresight and resilience to adapt to emerging trends, be it the compliance with the requirements of the Quality systems as per the ISO 9000 series of standards or the exposure to the global competition, prompted by the liberalisation of the economy.

Budget impact

The thrust on agriculture and irrigation continues in this budget as well, as evident from the increased outlay on irrigation to Rs 11000 crore. Further, farm credit has been raised to Rs 225000 crore from Rs 175000 crore in the previous year. This is a boost to the pump industry as pumps find major use in irrigation system and agriculture pumps form a bulk of the total pumps manufactured every year. Moreover, the government has provided increased thrust on

water resources management and has further enhanced agricultural insurance, fertilizer subsidies and rural finance schemes which will provide impetus to agriculture. Also, the allocation towards rural electrification has been augmented which will have a cascading affect on the pumps industry, increasing the demand for power-driven pumps.

Moreover, peak customs duty has been cut to 10% from 12.5%. This coupled with the already reduced duties on copper, aluminium and alloy steel at 5% would aid in bringing down the raw material costs

Growth drivers:

Industrial Revolution: Pump industry had been fueled by the massive demands of the industrial revolution that built our modern society.

Post World War II Expansion: In order to satisfy the pent-up demand that had gone unfulfilled in war years. Here the emphasis was on large, multistage electric utility boiler feed water pumps & oil-field injection & pipeline pumps.

Energy Crisis: Energy crisis all over world led to lot of research & development work for developing energy efficient pumps & systems.

Environmental Challenges: Curbing emissions was the paramount concern. This influence has led to better sealing of pumps including sealless, magnetically coupled chemical pumps. The ultimate product in this regard could be 'integral motor pump'.

Globalization: The fluid engineering & other technical challenges are assumed to be solvable by the MNC who emphasize quality, productivity & faster delivery of the product in order to battle global market share. The apparently mature pump product has a lot of room for improvement. The technical improvements will continue to be necessary to maintain global competitiveness.

Applications of pumps

Indian pump industry at present met the pump requirements of 95% of applications.

Various applications of pumps are listed below :

- Transportation: It is a prime function.
- Circulation: For homogenizing the temperature and/or composition of fluid.
- Mixing: Two or more streams can be connected at the suction of pump & mixing can be achieved.
- Injecting: High pressure can be developed by using pump and fluid can be injected in pipe or tank.
- Metering: Pumps can be used as metering device.
- Pressure Reducing Device: Rotary pumps can be used for reducing the pressure in polymers.
- Agitator Pump: Submersible pump keep the solids in suspension & prevent setting.
- Vacuum Generation: Liquid ring vacuum pumps are well known. Dry vacuum pumps are also developed.
- Reactor: When two liquids are to be reacted with very small residence time then pump can be used.
- Cavitation Reactor: When one liquid and another in vapor form are to be reacted, the principle of cavitation can be used.

(Source: www.impeller.net)

With strong demand from fluid handling industry, infrastructure and irrigation sector, the demand growth for pumps continues to be northbound. The strong recovery in agricultural segment coupled with the upswing in investment climate in the economy has driven the growth in pumps during FY06. The output of power driven pumps during the period Apr-Mar'06 has turned around sharply by 9.6% yoy to 711.382 thousand numbers as against a negative growth of 2.1% (649.249 thousand nos.) in 2004-05. Similarly, the production of mono-blocks was higher by 16.5% to 186979 numbers for the period April-Mar'06, as against a negative growth of 10.5% in 2004-05. (Source: *Capitaline, May 31, 2006*)

Outlook

Going forward the pump industry in India continue to get growth momentum from the increased activity in agriculture/irrigation, industrial and infrastructure including water supply, power projects. While strong growth in fluid handling industry drives demand for specialized industrial pumps, the accelerated development of infrastructure and irrigation sector drives demand for pumping solutions.

The Indian pump industry is expected to sustain strong growth momentum given the strong investment under pipeline in fluid handling industries and irrigation, urban utilities and infrastructure projects. The continued higher budgetary allocation for sectors like water supply and sanitation, petrochemicals, oil & gas, power, housing etc in recent budget are likely to stand in good stead. The greater participation of private sector in power sector is likely to add strength. The booming service sector that is spiraling the demand for construction of office spaces, malls, entertainment amenities are likely to trigger demand for power efficient pumps resulting in boosting the demand along with industrial sector.

Uninterrupted Power Supply (UPS)

Electronic equipment, process control, medical equipment and computers often require highly reliable power supply. Also the supply should be without fluctuations. Even a well-designed power supply system cannot ensure a level of reliability. In India, the electric power projections depict a shortfall in power generation. The quality of power is also not as desired. Therefore, a suitable power conditioning system is needed to buffer the equipment from electric utility supply variations and fluctuations.

The UPS are categorized in to two types as on line UPS and offline UPS. Online UPS systems are the UPS which is in operation constantly. It also compensates power discrepancies, if any and provides a pure sine waved AC supply. Off-line UPS on the other hand are normally on standby status and are manually or automatically switched on. The mains are fed directly to the load through a transfer switch. The value addition is more in the on line UPS system than the offline system as the former is used by sophisticated users and hence is equipped with all sort of mechanisms to solve

the power related problem of quality and frequent failure. More over in the on line system the control and maintenance has shifted to browser base and has enhanced the value for the manufacturer further due to lot of convenience to the user.

UPS can be conveniently classified into two segments; those systems with power output greater than 1 kVA and those with less than 1 KVA. The former finds applications in mainframes, hospitals, defence, process industry, telephone exchanges, remote microwave relays and so on, the latter largely caters to single PC users.

Performance of the Industry

Earlier the UPS were largely being used in Railways, Textile and Telecom industries, particularly where there is a continued operating process is required. But with the rapid development of IT application in all works of life the growth of UPS has become synonymous with the growth of computer application. Today, the UPS systems are considered to be the lifeline for all major activities of IT / Software / Banking/ Insurance / Education etc where the microprocessors are widely used.

The demand for UPS is largely dependant on the computer market. It is observed that the consumer UPS market, that is widely used by single PC users, is currently closely connected with the growth of the PC sales. The UPS market has not grown commensurate with the growth in the computer market due to high costs and lack of availability of reliable indigenous components. In 2003 it was 60 to 70 percent of the PC sales, which has gone up to almost 100% of the PC sales in 2004. The consumer UPS that is below 1KVA is witnessing a large number of unorganised players, so competition is heavy. Although the figures are not comparable but the trend shows a better prospect for the UPS market.

The total Indian UPS market in the organized sector is estimated to be Rs. 60-70 crores. According to the industry sources the entire market of UPS has crossed Rs 1000 crore in 2004 and the market is growing at the pace of around 20 to 25% per annum. The major chunk of the market comes from the SME segment, which is at around 60 to 70% of the total market. With in that the small UPS segment (below 1KVA UPS) is growing faster at a rate of more than 40%. As far as the cost goes out of the total cost 25% constitute the cost related to imported items basically the semiconductor items. Recently the prices of other materials like lead, copper and steel has risen considerably during 2004. But the players have reduced its impact by undertaking suitable cost cutting exercises. (*Source: Capitaline June 29, 2005*)

Outlook

India has a good potential for growth in high-end UPS models. This is due to the fact that Indian enterprises tend to have large single locations for business. Large enterprise customers like IT enabled players want high levels of uptime. The IT infrastructure in these cases are well integrated with UPS and precision air-conditioning systems.

IT enabled players are also ramping up and continuously increasing their head count. IT enabled and corporate data centers are buying high-end online UPS models. Sectors like manufacturing, telecom, and energy are also expected to make large high-end on line UPS purchases as the IT system is getting more and more sophisticated and miniaturised.

BFSI companies however are expected to use a mix of high- and low-end UPS systems. Indian banks have a large number of branches and ATMs spread across the country. Banks tend to have a large central data center that requires a high-end UPS model of around 40 KVA capacity. An ATM, on the other hand, can get by with a 2 to 3 KVA UPS system. Since low and medium range UPS systems are used in bulk by the banking, financial services and insurance segment, this will drive both the high- and low-end UPS market in India.

The manufacturers on the other hand after a long period of bad period, have now become more focused and efficient in their product delivery. So going forward the players would pocket a good return by serving well the high end and low end UPS market as the service will become the differentiating point as compared to the unorganised players particularly in the low end UPS market. Electric Fans

Due to simple technology and relatively long durability, fans are not getting good replacement demand. But with boom in housing construction, and increasing industrial activity, and rising disposable incomes, the demands for fans remain healthy.

According to a published report of NCAER, Electric fan, which is an item of necessity and mass consumption, is the second 'most wanted' consumer durable in rural India after bicycle. It features in the high-market penetration product category and is very high in terms of purchase priority amongst entry level / basic necessity category durable.

Being a tropical country the electric fan is an essential item for the lower to middle class people of the country. But due to involvement of lesser technological input and low entry barrier the market is equally divided among the organized and unorganized players. The increase of input prices like copper and alloy steel along with stiff competition from the SSI manufacturers (who are exempt from excise duty), the manufacturers are currently undergoing severe margin pressure

The electrical fans primarily include the ceiling and table fans along with the modified versions like the exhaust fans, cooling fans or fresher fans etc. This market is segmented based on price, quality and aesthetics. In total market ceiling fan has the largest share with 70% market, Table, Pedestal and wall fans with 20% market and fresher fans occupy the rest 10%.

The organised sector with 50% share is dominated by national brands that have built their brand image over a period of time, through sustained advertising and a good dealer network.

Unorganized market continues to dominate with half the market share. Low technology manufacturing process, quality norms, lower overheads and tax evasion methods have enabled the unorganized sector to sustain larger share of the market by ensuring a significant price difference. The local/unorganized brands are still quite appealing to a large section of the price-conscious Indian consumers, for their lower price points.

Though the margins of players are witnessing pressure from rising input prices and competition from unorganised players, the rising demand for electric fans triggered by the uptrend in the housing sector and the rising affordability of consumers is driving volumes and therefore churning out good revenues for the players. With the boom in the housing sector likely to continue, the demand for electric fans will continue to grow. (*Source: Capitaline April 30, 2006*)

According to the data published by the Central Statistical Organization the production of the electric fans by the organized sector has increased by 21% to 857320 fans in the month of March 2006 from 705640 fans produced during the corresponding previous period. The total production of the electric fans during the period April 2005 – March 2006 has improved by 16% to 6923008 fans. (*Source: Capitaline May 31, 2006*)

Rate of growth in production has been more in terms of quantity or in volume growth rather than the growth in value terms for a number of products in the electric fans industry. This has happened because of constantly falling prices over the years due to competition among the major players, aggressive marketing strategies, declining import tariffs. The industry is hopeful that the demand growth will be healthier than the previous years. To capitalise on the growing demand, the players are planning to expand retail network, introduce new value added products and variants. But being a price sensitive product, it remains to be seen how the players are able to pass on the relatively sharp spurt in input costs in general, and non ferrous metals in particular.

The frontline players are witnessing impressive growth in revenues on the back of rising demand for electric fans driven by higher disposable income and boom in housing sector. (*Source: Capitaline April 30, 2006*)

Solar Water Heater

Solar hot water refers to water heated by solar energy. Solar heating systems are generally composed of solar thermal collectors, a fluid system to move the heat from the collector to its point of usage, and a reservoir or tank for heat storage and subsequent use. The systems may be used to heat domestic hot water, swimming pool water, or for space

heating. The heat can also be used for industrial applications or as an energy input for other uses such as cooling equipment.

Solar water heaters can be either active or passive. An active system uses an electric pump to circulate the heat-transfer fluid; a passive system has no pump. The amount of hot water a solar water heater produces depends on the type and size of the system, the amount of sun light available at the site, proper installation, and the tilt angle and orientation of the collectors. (Source: www.indiasolar.com)

Market

There are two distinct market segments for solar water heating systems (SWHS) in India, namely, (i) domestic and (ii) commercial and industrial. In commercial sector SWHS are used to meet the hot water demand e.g. in hotels and hospitals etc. while in industrial sector, these systems are used for preheating boiler feed water or to meet the process heating requirements. In domestic sector, SWHS are used to meet household hot water requirements.

So far, the majority of installations in India are in the commercial and industrial sector, with 80% of the collector area installed in commercial and industrial sector, unlike Europe where the focus is mainly on the domestic sector. But as result of improved economics of solar systems, due to increase in electrical prices, the domestic market is increasing in India. As per MNES, the potential of solar water heating systems in the country is around 30 million m² of collector area. The MNES policy (draft) has set the goal of installing 5-million m² collector area during 2000-2012, with equal distribution of collector area in domestic as well as commercial and industrial sector. (Source: Report- Status of Solar Thermal Technologies and Markets in India and Europe)

Industrial Growth

The manufacturing base of solar water heating systems has since been improved substantially with a total number of 49 manufacturers securing Bureau of Indian Standards (BIS) certification for their products.

More than 550000 sq.m. of collector area has been installed so far in the country for water heating . During the recent years, the annual business generated in the country is around 550000 sq.m. of collector area. There is also a steady increase in number of manufacturers having BIS certification. (Source: www.mnes.nic.in)

Industrial Policy

From 1st October, 1997, only those manufacturers of solar flat plate collectors for solar water heating systems who have secured BIS certification for their products are eligible for available government incentives like soft loan from public sector banks or the Indian Renewable Energy Development Agency (IREDA).

To encourage quality manufacturers and also with a view to collecting necessary information on production/sale of solar water heaters, the Ministry provides 50% reimbursement of the BIS certification charges (charged by BIS for its testing and marking) to manufacturers for solar water heating systems and solar cookers.

Indian Renewable Energy Development Agency (IREDA) provides loans at reduced interest rates to the manufacturers for setting up production facilities of solar water heating systems and related components and also for market development.

In India some States offer subsidies on domestic as well as commercial solar water heating systems installations. Government of India offers 100% depreciation claim in the first year itself on installation of commercial solar water heating systems. (Source: www.mnes.nic.in)

Wind Mill

Wind power has emerged as the biggest renewable energy source in the world. So far wind turbines of total combined capacity of 25,000 MW have been installed in the world. Germany is the largest and India the 4th largest producer of wind power in the world. Government of India has estimated the potential of 45,000 MW of wind power throughout the country. So far about 2,500 MW capacity of wind power has been installed. All this power is obtained through big

wind turbines from 250 kWh to 1,250 kWh capacity. The modern trend to make bigger wind turbines and 2 MW wind turbine has become very common in Europe and soon 5 MW capacity wind turbines are likely to be produced. (Source: www.renewingindia.org)

Power generation from wind has emerged as one of the most successful programmes in the renewable energy sector, and has started making meaningful contributions to the overall power requirements of some States in India. The total installed capacity of power from renewables today stands at nearly 1350 MW with contribution from wind power of nearly 1000 MW.

The State of the World 1998, a world-watch Institute Report on progress toward a sustainable society, released earlier this year, has noted that renewable energy production in the world is expanding rapidly. Wind generation is the fastest growing energy source in this decade and is expanding at 25% per year. The Report recognises India as a new "Wind Superpower". With declining trend of cost and increase in the scale of wind turbine manufacturing, wind promises to become a major power source globally in the first few decades of the new millennium.

MNES (Ministry of Non-conventional Energy Sources) are implementing the world's largest wind resource assessment programme, which forms the backbone of their wind exploitation efforts. Preliminary estimates indicate a potential of about 20,000 MW. Scientific surveys are being intensified to identify specific viable and potential sites. A recent study undertaken to re-assess the potential, places it at about 45,000 MW. Assuming a grid penetration of 20%, a technical potential of about 9,000 MW is already available for exploitation in the potential States. 160 sites have so far been identified in 13 States. Survey work is in progress in 24 States / UTs. The States of Rajasthan and West Bengal have also shown wind potential recently. (Source: www.indianwindpower.com)

Current scenario

Today, we have a wind power installed capacity of 992 MW in the country, out of which about 940 MW is accounted for by commercial installations. About 3.5 billion units of electricity have been fed to the grid so far. A good local production base for wind turbines now exists in the country, with 15 manufacturing companies active in this sector

Today, the capital cost of wind power projects range between Rs. 4 to 5 crores per MW. This gives a levelised cost of energy generation in the range of Rs. 2.00 to Rs. 2.50 KWh, taking into consideration the fiscal benefits extended by the Government.

(Source: www.indianwindpower.com)

Government Policies/Incentives

The government has introduced a package of incentives which includes tax concessions such as 100% accelerated depreciation, tax holidays for power generation projects, soft loans, customs and excise duty relief's, liberalized foreign investment procedures, etc. The Indian Renewable Energy Development Agency (IREDA) is playing a significant role in promoting Renewable Energy Projects, in general and Wind Energy Projects in particular.

(Source: www.indianwindpower.com)

Future growth

Renewal energy is expected to create maximum impact in the production of electricity. Projections indicate that by the end of the first decade of the new century, it would be cost effective to generate and supply renewable electricity, aggregating to several thousand megawatts, as it's efficiencies and costs are decreasing, while the costs of conventional electricity are increasing. No other renewable energy based electricity producing technology has attained the same level of maturity as wind power. There are no major technical barriers to large scale penetration of wind power

As per projections made by Ministry of Non-Conventional Energy Sources, 10% of the 2, 40,000MW (i.e 24,000MW) installed capacity requirement by the year 2012 A.D. will come from renewables. It is envisaged that 50% of this capacity or 12,000MW may come from wind power. India has now gained sufficient technical and operational experience, and is now on the threshold of "taking off" in wind power. It offers a viable option in the energy supply mix, particularly in the context of the present constraints on conventional sources. It also offers an attractive

investment option to the private sector, in the context of the recently announced policies and drive towards private sector generation.

The key components of our strategy to drive profitable growth and to maximize value are to continuously enhance customer satisfaction, engage in continuous research and development, attract, develop, and retain qualified employees, and maintain stringent standards of environmental safety and corporate responsibility.

Keeping in view the above, our Company has devised a strategy to take the advantage of the growing Consumer Durable market and Housing and Infrastructure Sector.

To achieve these objectives, we have formulated certain strategies pertaining to various aspects of our business as described below:

Sales and Marketing

The sales and marketing strategy is based on building upon strengths and results already achieved. Accordingly, our strategy is to consolidate our position in South India and penetrate in northern and eastern parts of the country. In parallel, we would also strive to build credible partnerships as an entry strategy and build on the same for a full-scale penetration in future.

Continued focus on consistently meeting quality standards so as to ensure product acceptance by customers

We have created a reputation with our suppliers who can consistently supply quantity without compromising on the quality and delivery schedules. We intend to continue to focus on this besides being innovative in the products. As we are using one of the best technologies in various products manufactured by us, we intend to continue this for the new projects of our company as well.

Focus on expansion of capacity so as to attain economies of scale

To maintain our position in the Cable Industry, our company is aiming to enhance our manufacturing capacity of cable to cater the northern and central regions of India. This is in line with our belief that maximum values can be created by way of making products at the locations where customers/markets currently exists or will grow in future.

Backward areas benefits and achieve cost efficiency

Our company plans to set up a unit for manufacturing building cables in Uttaranchal. This would help in attaining tax benefits in the form of exemption of excise duty for the finished products for the first ten years vide Central Excise Notification no. 55/2003 dated 10th March, 2003 and exemption of Income Tax for the first five years vide CBDT circular no. 177/2004 dated 28th June, 2004.

Mix of Organic and Inorganic Models of Growth

PRODUCTS

Products marketed under the brand name 'V-GUARD' are:

- Electronic Voltage Stabilizers
- Monobloc, Jet, Submersible Pumps and Electric Motors.
- Insulated Electrical Cables (House Wiring & Industrial)
- Electric Storage & Instant Water Heaters
- Solar Water Heaters.
- UPS.
- Electric Fans.
- Generation of power through wind mills.

The products are not only well recognized in all southern states and especially in Kerala, but also enjoy good demand in markets across India.

Our company was also into marketing of products namely water level controllers, wall clocks, electric motor starters and Water purifiers, which were discontinued recently.

Electronic Voltage stabilizers:

A voltage regulator is an electrical regulator designed to automatically maintain a constant voltage level. It may use an electromechanical mechanism, or passive or active electronic components. Depending on the design, it may be used to regulate one or more AC or DC voltages.

At many industrial automatization processes, measurement and control installations and also at network PCs it is necessary to supply different types of electrical devices with stabilized AC voltage. It is very important that the stabilized AC voltage not to be depended by external variations such as: supply voltage, frequency and load.

With the exception of shunt regulators, all modern electronic voltage regulators operate by comparing the actual output voltage to some internal fixed reference voltage. Any difference is amplified and used to control the regulation element. If the output voltage is too low, the regulation element is commanded to produce a higher voltage. For some regulators if the output voltage is too high, the regulation element is commanded to produce a lower voltage; however, many just stop sourcing current and depend on the current draw of whatever it is driving to pull the voltage back down. In this way, the output voltage is held roughly constant. The control loop must be carefully designed to produce the desired tradeoff between stability and speed of response.

During the year 1977 the stabilizer unit was started by Mr. Kochouseph Chittilappilly for manufacture of Electronic Voltage Stabilizers. V-Guard stabilizers provide protection against voltage fluctuations, and are used to safeguard electronic equipments and home appliances such as televisions, refrigerators and air-conditioners. They come in various power capacities with features like auto restart, time delay system and high-low voltage cut off which provide reliable protection for electronic appliances against voltage fluctuations.

Over the period of years, our business acumen made us to successfully move from Own In-House Manufacturing to Strategic Outsourcing, which not only helped to maximize our revenues thereby benefiting our shareholders, but also helped to diversify into various segments under the same brand umbrella.

We have tie-ups with more than 68 units spread across the southern states which manufacture products as per our needs and requisite. Most of these units are attached to charitable institutions/ social welfare organizations. Through this arrangement, we are able to attain social objective of generating maximum employment to women and rural unemployed.

The initial model of our stabilizers is being developed by our in house product development team which is then passed on to the units for commercial production. Depending on the Purchase order which we normally give one month in advance, these products are then manufactured in these units. Every unit comes with its own expertise which gels with our brand proposition creating a quality product. As part of our quality drive, we not only assist the unit to purchase the raw material, but also have placed our quality assurance team at the units who scan each and every product before embossing it with our brand. The products also undergo random verification at our godowns. Apart from that we also conduct internal process audit every 6 months to strengthen the quality of our products.

We are one of the few recognized brand in the stabilizer market with stabilizer being the major driver of our revenues, contributing more than 40% of the total turnover of Rs.22,227.48 lakhs for the year ended March 31st 2007. This recognition is due to the fact that our customers recognize our brand “V-Guard’ because of its quality and its presence in the market for more than three decades. During the financial year ended 31st March, 2007 we have achieved a sale of Rs. 9,508.54 lakhs and one million in numbers, thus creating a milestone for our company. The other players operating in this market are far behind this mark. (*IMRB International Survey – August 2007*)

V-Guard had the best geographical spread covering a substantial proportion of dealers in south, west, central and north of India. V-Guard also enjoys the largest geographical spread as compared to the next competitor brand. V-Guard is thrice the size in value to the second largest stabilizer players and almost 15 times than the third largest. (*Source: IMRB International Survey – August 2007*)

Despite our product diversification, Voltage Stabilisers has still remained as the major product of our Company crossing the 1 million mark in number of stabilizers sold in the financial year 2006-07. Currently we produce around 35 models with the capacity ranging from 100 V to 5 KV.

Pumps

During the year 1992 Mr. Kochouseph Chittilappilly entered the electro-mechanical arena by marketing monobloc pumps under the brand name “V-Guard” in the year 1992. The Electro Mechanical Works Division at Peelamedu, Coimbatore was set up during the year 2000 for R& D and pilot production plant of Pumps. These pumps ideally find application in domestic as well as for agricultural purposes.

We follow the same business model as the stabilizers, catering to the customer needs through products manufactured through many of our strategic outsourced units.

Our R & D and product development team depending on the feed back and demand received from the marketing team develop product after testing on various parameters and condition. These products are then introduced in the market to test against the field conditions. This period can anywhere be between 4-5 months during which the modifications and improvement on the product are made as per the market feedback and field report. If the product senses a wide acceptance, the model is then outsourced. We have tie-ups with more than 15 units across India which manufactures products as per our needs and requisite. Depending on the Purchase order which we normally give one month in advance, these products are then outsourced to these units. These units are generally managed by technocrats who find it difficult to run the show under their banner or brand. As in case of stabilizers, these products also undergo quality test before it is introduced under our brand. As part of our quality drive we have placed our quality assurance team at the units who scan each and every product before embossing it with our brand. Apart from that we also conduct process audit on a regular basis to strengthen the quality of our products.

Over a period of years our R & D team has successfully launched more than 150 different models catering to different market needs. We understand the wear and tear which is bound to be borne by these products, so have aptly supported our concern by various service centre’s catering to this cause.

The typical manufacturing process of a Pump is as given below:

V-Guard pumps are manufactured according to ISI standards and specifications using quality components which meet performance standards. The technology used in our products ensures better efficiency and lower running costs. Presently we have around 150 different models of submersible, centrifugal, self prime, compressor and jet type pumps available in the market with capacities ranging from 0.25 HP to 7.5 HP. IS8472 for prime and self prime models, IS 9079 for Centrifugal models, IS8034 for submersible pumps and IS12225 for jet pump models are some of the models which are in demand in the market. With the buoyancy in the agricultural and housing sector, we believe that there is a lot of potential market waiting to be tapped.

Directly competing with market giants like Crompton Greaves, Kirloskar and numerous other small manufacturers, V-Guard pumps commands good demand in Southern parts of India. During the year ended 31st March, 2007 gross sales has crossed Rs. 4600 lakhs, constituting 19% of the gross revenue earned for the Company.

Cables

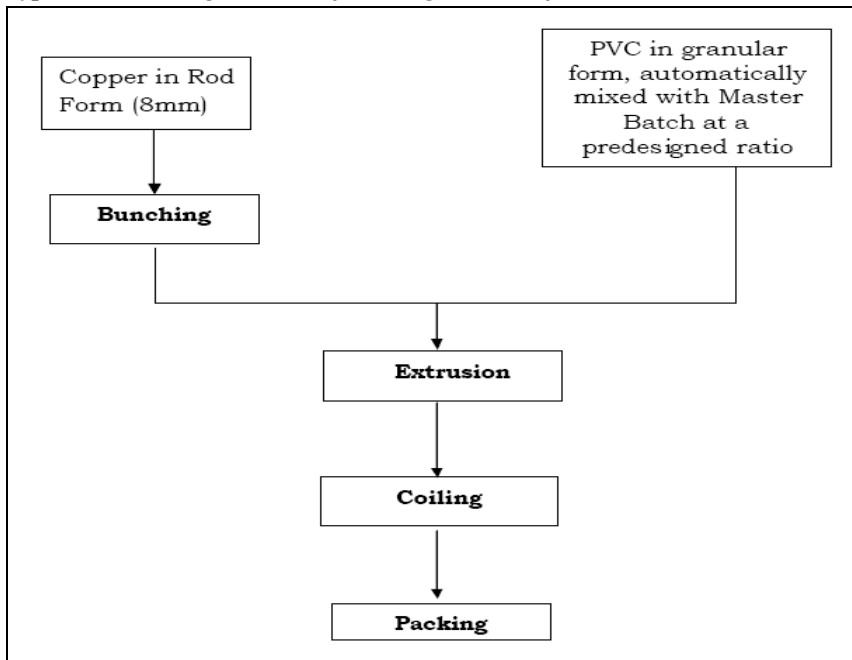

As part of its diversifying plans, our Company started manufacturing Insulated Electric Cables in the year 1999 by setting up a factory at Coimbatore in Tamil Nadu with an initial investment of Rs. 1500 lakhs. V-Guard’s cables are manufactured in conformity with ISI standards and is ISO 9001 certified with a fully-automated manufacturing unit. All major machineries required for production of cables have been imported.

Our ISI marked cables comes with High Flexible Triple Extrusion Technology and length assurance seal at every 90 metres. These cables come in the range of 0.5 sq. mm to 25 sq. mm. Multi-core flat, Multi-core round cables and house wiring cables are some of the products manufactured which find both domestic as well as industrial applications.

Cables do not follow the business model which is followed by stabilizers and pumps. It is manufactured in our own manufacturing unit located at Coimbatore. As we always believe to deliver the best, keeping in mind the shareholders interest, the nature of the product and financial viability makes us to follow this business model

Typical Block Diagram Manufacturing Process of Cable

Electrical cables are manufactured using high-speed wire drawing and insulating machinery. The Basic major raw materials used in the manufacturing of cables are copper, PVC and master batch (Colour agent for PVC).

Manufacturing process

8 MM copper wires are drawn in two passes reduced to 1.5 MM thickness which is further drawn using multi wire drawing machine, to make strands of 0.3 MM thickness. These strands are then bunched together in required numbers/ combinations to make different sizes of cables. The bunched wires are subsequently passed through insulating line where copper wires are insulated with PVC and coated with different colours. These are then cut into required sizes by using coiler machines. These insulated single core cables are marked as such as house wiring cables. Parts of the same wires are then passed through further bunching and insulation process for manufacture of multi core sheathed cables. Sheathed cables are used for industrial process or as power cords for various electrical and other appliances.

In short, Manufacturing process of Insulated cables mainly consists of the processes such as; **Wire Drawing** (Breaking down the Copper Rod to the required strand size), **Bunching** (Bunching the required number of copper strands together so as to form the required size of cable in terms of cross sectional area of the conductor), **Extrusion** (Where the PVC insulating material is coated over the bunched copper strands), **Coiling** (Winding of the cables to the required size and cut to 90/45 Mtrs length), **End Seal Printing** (Sealing both ends of the cable to assure 90/45 Mtrs of length).

Sales of Cables have increased steadily over the years. During the year ended 31.3.07 sale of cables have crossed Rs.4600.00 lakhs contributing 19% of the total turnover of the Company. The major competitors in this segment are Finolex cables, Polycab and Havells.

Electric Water Heaters

Electric water Heaters is another range of product unveiled by V-GUARD during the year 1997. V-guard offers a wide range of instant and storage model water heaters that combine quality and technology. V-Guard water heaters are available in 28 models with capacities ranging from 1, 6, 10, 15, 25, 35 and 50 litre in different shapes and sizes.

Typical Block Diagram Manufacturing Process of Electric Water Heater

Since the beginning, we have been sourcing this product from small and medium manufacturers who have been provided R& D support by our technical team. Each product has to pass through microscopic lens of our QA team before it is embossed with our brand to maintain our worthiness in the market. During the previous year ended 31st March 2007 the turnover of Electric water heaters crossed Rs. 1650 lakhs which contributes to more than 7% to the gross revenue of the company. V-GUARD Water heater – IS 8978 for instant models and IS 2082 for storage models have found wide acceptance in the market. Major competition comes in the form of players such as Racold, Bajaj, Venus etc.

SOLAR WATER HEATERS

As part of promoting the use of non-conventional energy, we have ventured into the manufacture of solar water heaters with our own Manufacturing unit located at K.G.Chavadi Coimbatore. V-guard solar water comes with an international ETC (Evacuated Tube Collector) technology which facilitates efficient absorption and utilization of solar energy, with minimal heat loss.

Our Products are not only eco-friendly and non-polluting but also approved by the Ministry of New & Renewable Energy (MNRE). They are available in almost 23 different models with capacity ranging from 100, 125, 200, 300, 500, 1000, 1500, 2000, 2500, 3000, 4000 and 5000 LPD which is well received by the market for domestic and commercial purpose.

Manufacturing Process of a Solar Water Heater

Evacuated Tube Collector (ETC) Type Solar Water Heater

The different stages of manufacturing solar water heaters are explained under.

The manufacturing process of solar water heater consists of the manufacturing of its three main parts i.e., Storage Tank, Collector and Supports. Storage tanks are manufactured by a combination of various processes mainly, Shearing, Flaring, Rolling, Sheet Edge Bending and Lapping, Grooving etc. Other processes are spot welding, seam welding, TIG welding, pressure testing and Puff filling etc. The tanks are manufactured using stainless steel sheets. These are subsequently insulated using Rock-Wool and the outer cover for the tank is made with aluminum sheets.

The storage tank has two parts, viz, Outer Shell and Inner Tank.

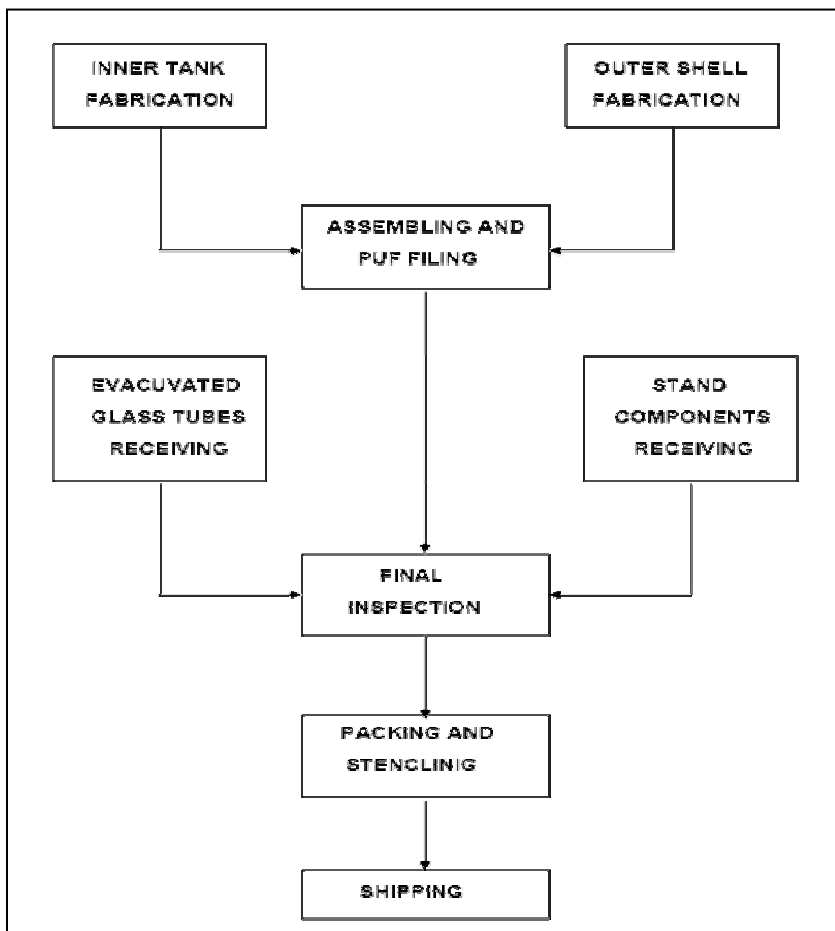

The two different types of materials used for making outer shells are;

- i) Stucco Embossed Aluminium Sheet.
- ii) 304 Grade Mirror Finish Stainless Steel coil.

The Stucco embossed coils of 99.5 % pure and 0.7 mm thick is purchased from M/s.Hindalco Industries Ltd. Mirror finished Stainless Steel coils are imported from Countries like Japan, Korea, etc.

The inner tank of solar water heaters are made up of 304 grade, 2B finish stainless steel coils of thickness varying from 0.4 mm to 1.4 mm according to the capacity of the system and its operating pressure. The outer tank is made up of Stucco Embossed Aluminium Sheet.

Typical Block Diagram of the Manufacturing Process of Solar Water Heater

The process of Tank Manufacturing consists of the following steps:

1. Shearing: Here also the process starts with shearing of sheets into required length and size. The required length is marked in the sheet and cut by operating the Shearing Machine.

2. Flaring and Flanging Operation: For this the required Press Tool is loaded in the press and holes are flared on the sheet. The number of holes are decided according to the capacity of the water heater. After flaring is completed, flanging is done in flared holes in the same machine.

3. Straight Grooving: The flanged sheet is straight grooved at both the sides of the flaring to increase its strength.

4. Rolling: The straight grooved SS sheets are rolled to cylindrical shape in Rolling Machine.

5. Spot Welding: The rolled sheets are assembled using jigs and fixtures and spot welded at regular intervals in Spot Welding Machine.

6. Seam Welding: The spot welded inner tank is linear seam welded.

7. Circular Grooving: Circular grooves are made in inner tank at regular intervals in grooving machine to increase its strength.

8. End Dish Spot Welding: The SS End Dish is fitted to the tank using jig and fixtures. The End Dish is Spot-welded at regular intervals.

9. End Dish Seam Welding: Spot welded End Dish is seam welded in 75 KVA seam welding machine.

10. TIG Welding: The Input, Out Pipes, and Heater Collar are welded to the tank in TIG Welding machine.

11. Pressure Testing: The inner tank is Hydrostatic Pressure tested at 0.6 bar pressure to identify any water leakages. If any leakage is found, it will be corrected and tested again to confirm that the tank is leak proof before going to the next process.

12. PUF Filling: During day time, the water inside the water heater absorbs heat from sun through Collectors. Since there is no sun at night time, the temperature of the water may get reduced. To retain the temperature of the water, a layer of Polyurethane, known as PUF is applied between inner and outer tanks.

The outer shell and inner tank are assembled in PUF filling jig using corresponding Jigs and Nylon plugs. The PUF is filled into the cavity between inner and outer tanks using imported PUF Filling Machine.

13. Packing: The tank is thoroughly cleaned using Methyl Die Chloride (MDC) and proper stickers are pasted wherever required. Now the tank is inspected for different parameters like tube eccentricity, aesthetics of the tank, shrinkage of PUF, etc. If all the inspection parameters are OK, the tank is QC approved and sends for packing in wooden crates.

14. Wooden Crate Packing: The inspected tank is packed in wooden crates with Thermocol Supports and transferred to store for despatch.

Our quality assurance activity starts with raw material stage. Each raw material is inspected and tested for its conformity towards specified parameters and forwarded to production only if it satisfies the specified requirements. Similarly each main stages of production is quality inspected and tested and approved before it goes to the next stage. Our Quality Management System is certified by Det Norske Veritas (DNV) as per ISO 9001:2000.

To ascertain the quality and performance of the solar water heaters, we have tested our solar water heater systems in Regional Solar Energy Testing Centre, Madurai Kamaraj University, Madurai.

Our in-house R&D department continuously monitors and studies the performance of the solar water heaters. Any new system will be thoroughly tested and its performance is studied before introducing it to the market. Our in-house QA and R&D divisions ensure the trouble free and safe operation of our water heaters throughout its life span.

With regard to this product, we are following a different Delivery model. Instead of channelising it through our distributor-dealer network we are routing the product through various Direct Sales Agents, giving a personalized approach to it. These DSA's are appointed and provided relevant training by the Company, who work hand in hand with distributor, thereby helping in cross selling.

During the previous year ended 31.3.07 the sale of SWH crossed Rs. 940 lakhs which contributed more than 4% to the gross revenue of the company. Major competition comes in the form of players such as Tata BP etc.

Uninterrupted Power supply systems

UPS (Uninterrupted Power Supply) is a power conditioning equipment that allows for a smooth changeover to mains operation on resumption of power. It also has the capability of taking care of the problems like, brown outs, voltage sags, voltage surges, transient surges, impulses, noises and harmonic distortions. Normally an UPS consists of a battery, a battery charger/ converter and an inverter. The battery charger has an input isolation/step-down transformer whose output is rectified to get a required DC output, which is used to charge the battery. The same output is used, in most cases, as input for the inverter, which converts DC into AC output.

This product 'UPS' was also introduced to the market in the year 1997. Currently V-Guard offers a wide range of UPS which comes with advance features like micro-controller based compact design, Off-mode Battery charging, High voltage protection, ZPD technology, PID controlled PWM-MOSFET technology, Intelligent audio indication and generator compatible. Our UPS are available in 13 different models which includes UPS 60 Royal, 60 Legend, 70 Vismaya, UPS 120EB/IB, Enermax 100,200 & 300 (online UPS) catering different needs of the customers.

Since the beginning, we have been sourcing this product from small and medium manufacturers who have been provided R& D support by our technical team. Each product has to pass through microscopic lens of our QA team before it is embossed with our brand to maintain our worthiness in the market. During the previous year ended 31.3.07 the sale of UPS was Rs. 795 lakhs which contributed more than 3.45% to the gross revenue of the company. Major competition comes in the form of players such as Numeric, Wipro, APC etc.

Electric Fans

Company in its urge to diversify introduced electric fans during the year 2005. V-Guard fans come with 'High-Angle Technology' and specially designed blades that facilitate 'full coverage' of cool breeze in the entire room. We have been sourcing this product from small and medium manufacturers without compromising on the quality norms before marketing it under our brand.

During the previous year ended 31.3.07 the sale of Electric Fans was Rs. 576.64 lakhs which contributed more than 2.50% to the gross revenue of the company. Presently our 22 models are competing with big players such as Crompton, Khaitan, Havells, etc.

Wind Mill

Our company in the year 2004 setup two windmills in Coimbatore with a capacity to generate 230KW of power each with a total combined installed generation capacity is 13.5 lakh units of electricity per year. With the manufacturing facilities for building cable and solar water heaters in Coimbatore, our company thought it prudent to setup up these windmills which supply electricity to these manufacturing units.

Until the year 2005, the manufacturing facilities were not absorbing the total electricity generated by the windmills as these facilities were not functioning at their maximum capacities. During this period, to take dispose off the excess power generated, we entered into an agreement with Tamil Nadu Electricity Board for selling of the surplus power.

Since 2006, we have been able to use the complete generated power for captive consumption for our manufacturing facilities.

OUR PROPOSED BUSINESS

1. L. T Power & Control Cables

As per stated in Objects of this Issue, our Company intends to setup a manufacturing unit for LT Power cables with an installed capacity to process 3000 metric tonnes of Aluminum and 300 metric tonnes of Copper per annum. As Aluminum cables are used for industrial purposes/ large commercial constructions and distribution of electricity through underground cables, our company would be able to market this product through institutional sales along with its present domestic cables. Moreover, this new product line would create synergy as our company will be able to satisfy the institutions/ large commercial constructions by offering them both domestic and industrial cables.

L. T Power & Control Cables essentially comprise of, Conductor, Insulation, P. V. C Tape / Extruded Bedding, Armour wire and Outer sheathing.

Manufacturing Process

Step 1: Conductor

Copper or Aluminium used for the Conductors are obtained in the form of rods, the 8.0 mm Copper or 9.5 mm Aluminium rods after testing are drawn into wires of required sizes. The drawn wires are then stranded (Bunched / Stranded / Shaped / Compacted) to form final conductor.

Step 2: Insulation

Cross-linkable polyethylene or PVC compound are used for insulation process.

XLPE insulated cores are cured by steam in vulcanizing chamber to provide thorough cross-linking. If insulation is done with natural curing material, then the cross-linking process will take place simultaneously.

The raw materials & thickness of Insulation are maintained under strict Quality Control and conform to IS Standards for XLPE & PVC cables respectively.

Step 3: Laying Up

The insulated cores are laid up with a right hand, or alternating left & right hand, direction of lay in the sequence of the core numbers or colours. Wherever necessary non-hygroscopic PP / PVC Fillers & binder tape are used to form a compact and reasonably circular cable.

Step 4: Bedding (Inner Sheeting)

All armoured cables have extruded PVC bedding. The PVC used for bedding is compatible with the temperature of Insulation material.

Step 5: Armouring

When armouring is required, the armour consists of single layer of Galvanized Steel Wire / Strip / Tape. The armour is then applied. Single core cables are armoured with Aluminium wires.

The armour Wire / Strip / Tape used for armouring are in conformity to IS specifications.

Step 6: Outer Sheath

The standard cables are manufactured with Extruded PVC compound either of Type ST-1 for Type – A Insulated or of Type – ST-2 for Heat Resisting / XLPE Insulated cables conforming to IS: 5831 for sheathing. Outer sheath is embossed or printed with the information required by the related standards.

Special Fire Retardent (FR), Flame Retardent and Low Smoke (FRLS) compounds are used for outer sheathing of cables, to suit customer's specifications.

Step 7: Final Testing

Each cable is tested for all applicable Routine Tests. From a lot of cable one cable of each type and size is tested for Type Test and Acceptance tests as per ISO specifications.

Raw materials required for L.T. Power cables

The essential raw materials required for manufacturing of L.T. Cables are

- a. Copper
- b. Aluminum
- c. PVC Compound
- d. XLPE Compound
- e. Master batch
- f. PVC Tape
- g. Armour (GS Strip/ wire/Tape)

Our company has recently entered into an agreement dated 4th July, 2007 with M/s Varsha Cables Private Limited for manufacture and supply of LT Power cables for us under brand name of “V-Guard”. Though our company intends to manufacture our own L.T. Power cables as stated in the objects of the issue on page no. 27 of this Red Herring Prospectus, this arrangement with M/s Varsha Cables Private Limited will help the company in creating market as well as awareness for the new product by the time we commence commercial production at our own manufacturing facility. Also, pre-approval of our product is a pre-condition for inclusion of our name in the approved supplier list of various government/ semi-government agencies, this arrangement would enable us to obtain all the necessary approvals well in advance of commencement of our commercial production which would compliment our corporate/institutional sales.

2. Enameled Copper.

Enameled copper wire is one of the main raw materials used in the manufacture of stabilizers, Pumps and electric fans.

As per industry sources the Indian pump industry is expected to sustain strong growth momentum given the strong investment under pipeline in fluid handling industries and irrigation, urban utilities and infrastructure projects. Also as per estimates by IMRB, 80% of the new sales of air conditioners, 50% of refrigerators and 18% of TV are

accompanied with separate stabilizers. With consumer appliance sector recording a growth of 25% in 2006-07, the stabilizer market has also witnessed a growth of about 20% during the year.

The present average consumption of enameled wire by our suppliers for products manufactured for us itself is 60 metric tones per month. This requirement is expected to increase further. To meet the market demand for enameled copper wires, we propose to start an enameling plant at Coimbatore having a capacity to process 100 metric tones of enameled copper per month. For details on the project please refer Section titled "Objects of this Issue" on page no. 27 of this Red Herring Prospectus.

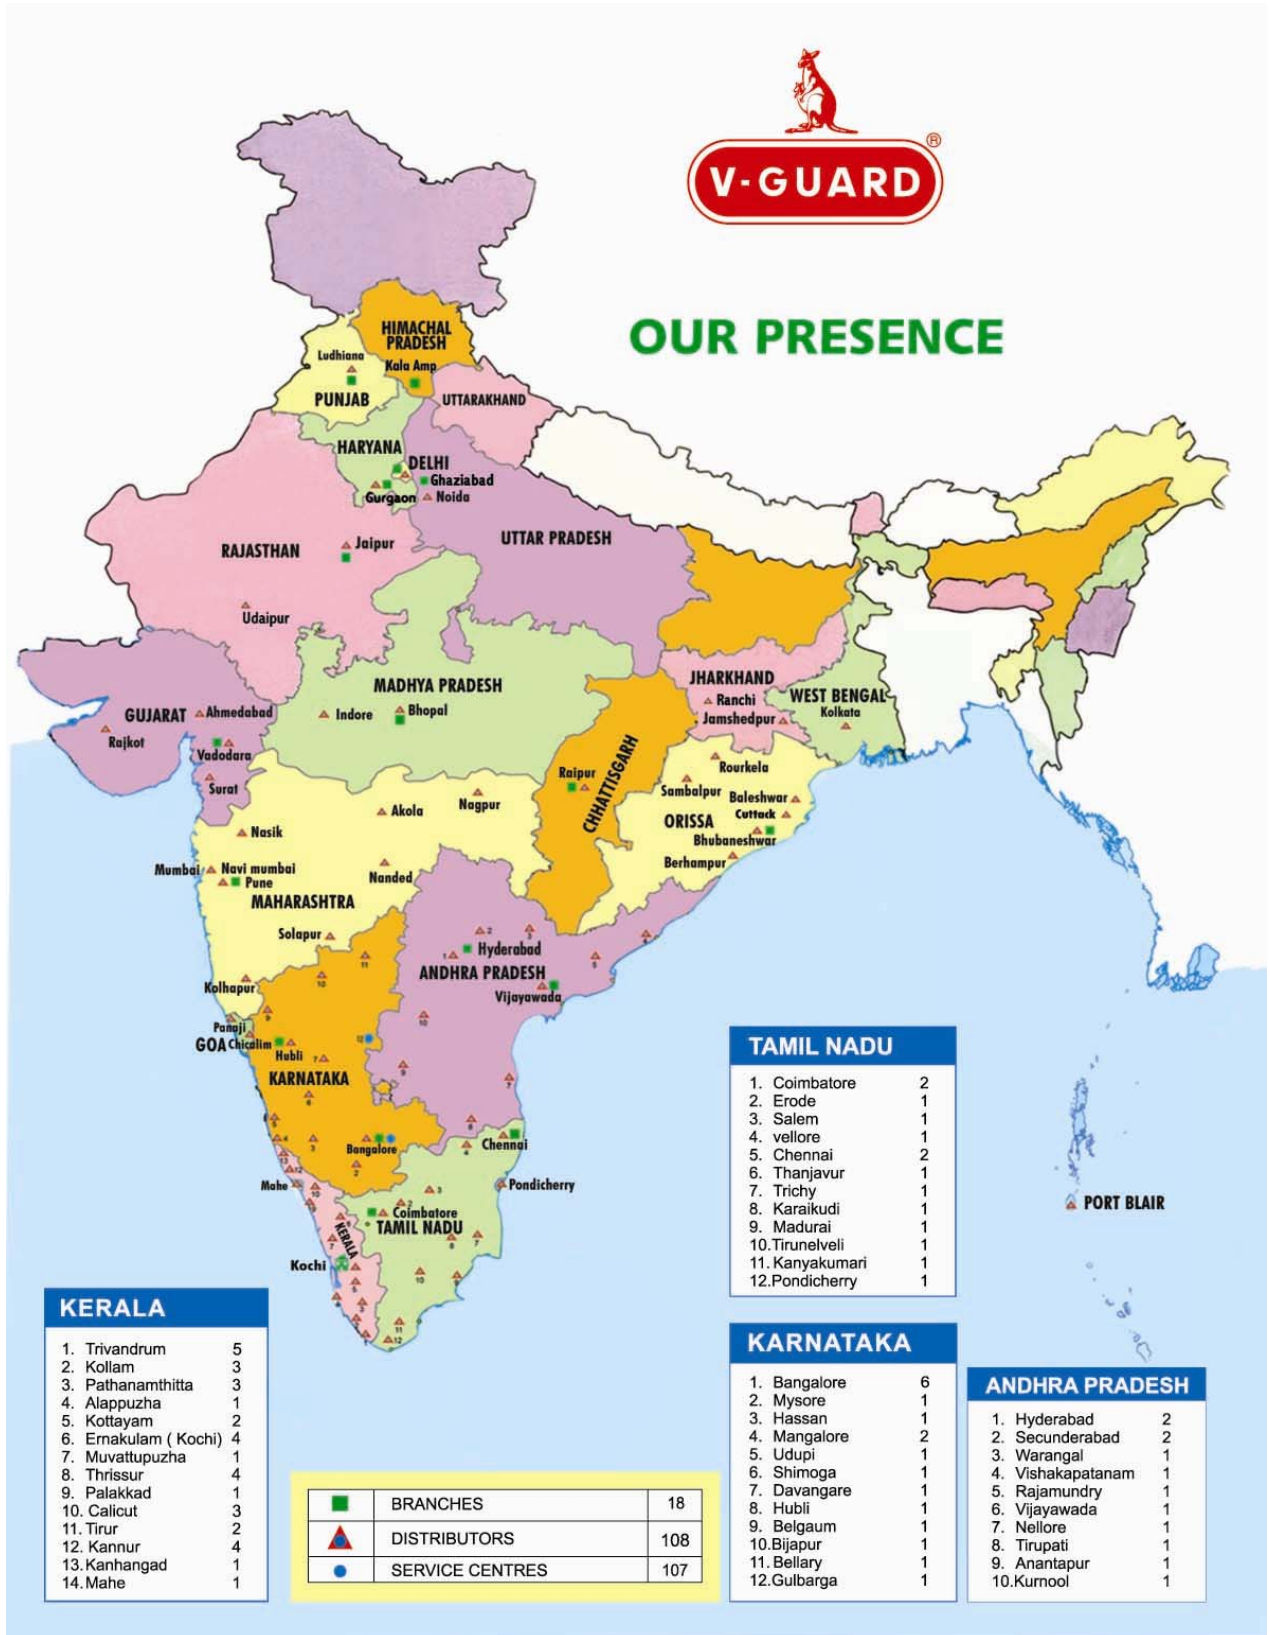

Manufacturing Process

The process of wire enameling involves the breaking down of 8 mm copper wires to the sizes of 1.6 mm/2.5 mm/ 3.5 mm. The drawn copper wires are then fed into the wire enameling machine where they are further drawn in the required output wire sizes and annealed (process of heating of copper wires to a temprature of 550°C and then cooling it for enhancing the properties of electrical conductivity and for softness) in on-line annealer. These drawn annealed wires are then subject to undergo the process of enameling (coating of enamel on the copper wire). The enameled wires are then wound into spools.

Raw materials required for Enameled Copper Wire

The essential raw materials required for manufacturing of Enameled Copper wires are copper and enamel.

The Factories Act, 1948

The Factories Act has been enacted to consolidate and amend the law regulating labour in factories. The Act provides that employees should work in healthy and sanitary condition so far as the manufacturing process will allow and that precautions should be taken for their safety and the preventions of accidents.

The Contract (Regulation and Abolition) Act, 1970

The Act applies to every establishment in which 20 or more workmen are employed or were employed on any day of the preceding 12 months as contract labour and to every contractor who employs or who employed on any day of the preceding 12 months 20 or more workmen. Key Factors influencing results of operations

The key factors influencing our results of operations, profitability and cash flow are listed below:

Raw material prices

We have no control on the prices of our basic raw material viz. copper. The prices of Copper could fluctuate due to uncertain prices world over. In the recent past, there have been wide fluctuations in the prices of copper both at domestic and international levels. Such fluctuations in prices of raw material and our inability to negotiate at optimum market rates may affect our profitability. In case we are unable to procure the requisite quantities on a timely basis and at reasonable prices, this may have an adverse impact on our reputation and may affect our future growth.

Competition

Manufacturers are facing intense competition from domestic and foreign brands, which results in high promotion costs and shrinking profit margins. The products markets are highly competitive. The industry is experiencing rapid changes that are affecting the competitive landscape. These changes may result in larger competitors with significant resources.

While we have historically been able to provide our products and services in our principal markets at competitive prices and on a cost-efficient basis, there can be no assurance that we will be able to do so in the future, as our competitors may be able to offer products and services that are more effective than ours.

Growing competition may force us to reduce the prices of our products, which may reduce our revenues and margins and/or decrease our market share, any of which could have a material adverse effect on our business, financial condition and results of operations.

Dependence on markets in the states of Kerala, Andhra Pradesh, Karnataka and Tamil Nadu for our products

Our initial focus was on developing our markets in the states of *Kerala, Andhra Pradesh, Karnataka and Tamil Nadu*. These states still contribute a very significant percentage of our revenues *i.e.* 44.53%, 11.70%, 20.20% and 19.24% of our total revenues for the FY 2006-2007. Further, 41.48 %, 19.09 % and 20.09 % of our total revenues for the FY 2006-2007 have accrued from three products, *viz.* Stabilizers, pumps and cables respectively. Our business, results of operations and financial condition may be adversely affected if one or more of the following factors occur:

- a. Negative demand for our products in these states
- b. Our competitors' further penetration in these states
- c. Enactment of any legislation which may not be favourable to our industry in these states

Ability to attract, recruit and retain Key personnel.

The business we operate in is highly specialized in nature due to the technical know-how required and the available, especially skilled technical and marketing, talent pool is limited. Further, each of our products has various models which are customized as per customer preferences. It takes substantial time and resource to train human resource talent to understand consumer behaviour and their preferences. The Company's success on a large scale depends upon its senior management, Directors and key personnel and its ability to attract and retain them. Our future performance will depend upon the continued services of senior management, Directors and key personnel. Qualified & experienced people are in demand, and in the light of paucity of talented manpower, salary expectations are growing faster than revenue growth & hence retaining key personnel and recruiting fresh talent will be the challenges the company will have to face.

For a detailed discussion on the factors that affect our results of operations, please refer to the chapter titled "Risk Factors" on page x of this Red Herring Prospectus.

Procedure and Time Schedule for Allotment of Equity Shares and Demat Credit of Equity

The Issue will be conducted through a “100% book building process” pursuant to which the Underwriters will accept bids for the Equity Shares during the Bidding Period. The Bidding Period will commence on 18th February, 2008 and expire on 21st February, 2008. Following the expiration of the Bidding Period, our Company, in consultation with the BRLM, will determine the issue price, and, in consultation with the BRLM, the basis of allocation and entitlement to allotment based on the bids received and subject to the confirmation by the BSE/NSE. Successful bidders will be provided with a confirmation of their allocation and will be required to pay any unpaid amount for the Equity Shares within a prescribed time. The Prospectus will be filed with SEBI and the Registrar of Companies and will be made available to investors. SEBI Guidelines require our Company to complete the allotment to successful bidders within 15 days of the expiration of the Bidding Period. The Equity Shares will then be credited and allotted to the investors’ demat accounts maintained with the relevant depository participant. Upon approval by the Stock Exchanges, the Equity Shares will be listed and trading will commence. This typically takes three trading days from the date of crediting the investor’s demat account, subject to final approval by the Stock Exchanges.

Method of Proportionate Basis of Allotment

In the event the Issue is over-subscribed, the basis of allotment shall be finalised by the Company in consultation with the Designated Stock Exchange. The Executive Director or Managing Director (or any other senior official nominated by them) of the Designated Stock Exchange along with the BRLM and the Registrar to the Issue shall be responsible for ensuring that basis of allotment is finalised in a fair and proper manner. Allotment to Bidders shall be as per the basis of allocation as set out in this Prospectus under “Issue Structure”.

- Bidders will be categorised according to the number of Equity Shares applied for.
- The total number of Equity Shares to be allotted to each category, as a whole shall be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of bidders in the category multiplied by number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio.
- Number of Equity Shares to be allotted to the successful Bidders will be arrived at on a proportionate basis which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio in that category subject to minimum allotment of 80 Equity Shares. The minimum allotment lot shall be the same as the minimum application lot irrespective of any revisions to the Price Band.
- In case the proportionate allotment to any Bidders is in fractions, then the same would be rounded off to nearest integer.
- In all bids where the proportionate allotment is less than 80 per Bidder, the allotment shall be made as follows:
 - Each successful Bidder shall be allotted a minimum of 80 Equity Shares; and
 - The successful Bidders out of the total Bidders for a category shall be determined by draw of lots in a manner such that the total number of Equity Shares allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above.
- If the proportionate allotment to a Bidder is a number that is more than 80 but is not a multiple of 1 (which is the marketable lot), the number in excess of the multiple of 1 would be rounded off to the higher multiple of 1 if that

number is 0.5 or higher. If that number is lower than 0.5, it would be rounded off to the lower multiple of 1. All Bidders in such categories would be allotted Equity Shares arrived at after such rounding off.

- g) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares allotted to the Bidders in that category, the remaining Equity Shares available for allotment shall be first adjusted against any other category, where the allotted Equity Shares are not sufficient for proportionate allotment to the successful bidders in that category. The balance Equity Shares, if any, remaining after such adjustment will be added to the category comprising of bidders applying for minimum number of Equity Shares.
