Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implication of any risks mentioned herein under.

INTERNAL RISKS

- We have experienced negative cash flows from operating activities for FY 2006 to FY 2008. Any negative cash flows in the future would adversely affect our results of operations and financial condition.***

Following is the details of negative cash flow:

For the year ended March 31		
2006	2007	2008

If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

- We reported a loss after tax in fiscal 2006 and may incur additional losses in the future.***

We reported a loss after tax of Rs. 0.04 lakhs in fiscal 2006 mainly due to Administrative expenses and statutory charges when there were no operations in the Company. Our failure to generate profits may adversely affect the market price of our Equity Shares, restrict our ability to pay dividends and impair our ability to raise capital and expand our business.

- Contingent liabilities as at September 30, 2010 aggregating Rs. 38.98 lakhs which have not been provided for could adversely affect our financial conditions.***

- Our Company does not own the premises at which our registered office is located***

Our Company does not currently own the premises at which its registered office and its corporate office are located. Premises No. 43, Manorama Chambers, 4th Floor, S.V.Road, Bandra (West), Mumbai – 400 050 has been taken on lease from our Promoter Mrs. Kanaklata S. Tibrewala (“Licensor”) and we pay rent for the occupation of the premises. In case of breach of any of the covenants/conditions, the Licensor can terminate the Agreement which would affect our ability to conduct our business or increase our operating costs.

Further, Premises No. 42 Manorama Chambers, 4th Floor, S.V.Road, Bandra (West), Mumbai – 400050 also being our Registered and Corporate office is not owned by us. It is owned by our

Chairman and Managing Director, Mr. Surendra Kumar Tibrewala (“Owner”) and it has been granted to us free of rent for office and administrative purpose. In the event that the Owner requires us to pay rent or vacate the premises, it would increase our operating costs and could also temporarily disrupt our operations.

Further, please refer to Chapter titled “Business Overview” beginning on page 74 of this Red Herring Prospectus for details of lease documents and rent free agreement pertaining to the registered office and corporate office of our Company.

5. Some of our Promoter Group companies are in the similar line of business and this could cause a conflict of interest. Such conflict of interest could also lead to our business and revenues being affected.

Proton Biochem Private Limited and Kamal Chemicals Private Limited our Promoter companies are in the line of manufacturing chemicals and are in a similar line of business. Further, we have entered into non-compete agreements with both the above companies. Under the Non Compete agreements the above mentioned companies have agreed that the operations and the markets of these companies shall not in any way infringe or compete with those of our Company.

For further details please refer our Chapter titled “History and Other Corporate Matters” beginning on page 98 of this Red Herring Prospectus

6. The objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. The deployment of funds in the project is entirely at our discretion and as per the details mentioned in the section titled “Objects of the Issue”. Any revision in the estimates may require us to reschedule our Project expenditure and may have a bearing on our expected revenues and earnings.

Our funding requirements and the deployment of the proceeds of the Issue are based on management estimates and have not been appraised by any bank or financial institution. We may have to revise our management estimates from time to time and consequently our funding requirements may also change. Our estimates for the project may exceed the value that would have been determined by third party appraisals and may require us to reschedule our project expenditure which may have a bearing on our expected revenues and earnings. Further, the deployment of the funds towards the objects of the Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. However, the deployment of funds is subject to monitoring by our audit committee.

7. We have not acquired land for our proposed project till now. Our inability to acquire the land at the right time and at the estimated price may delay the project or result in an increase in the cost of acquisition

We envisage a Land requirement of approximately 3 Acres at the estimated cost of Rs. 96.00 Lacs in and around Khopoli. Since we have not acquired the land till now, our inability to acquire the land at the right time and at the above mentioned price may delay the project or result in an increase in the cost of acquisition; thereby resulting in an increase in the project cost or time overrun thus affecting our operations and profitability.

For further details refer to the Chapter titled “Objects of the Issue” beginning on page 47 of the Red Herring Prospectus.

8. On identification and acquisition of the land for the proposed project, our Company will require the following approvals. Delay or non receipt of regulatory approvals may delay the production.

Sr. No.	Approval/Consent	Authority
1.	Factory License	Chief Inspector Of Factory, Maharashtra

2.	Consent for Operation of the Plant under Water(Prevention and Control of Pollution) Act, 1974	Maharashtra Pollution Control Board
3.	Consent for Operation of the Plant under Air(Prevention and Control of Pollution) Act, 1981	Maharashtra Pollution Control Board
4.	Permission for DG Sets (Current as well as proposed)	Electrical Inspector

In case our Company fails to obtain within the prescribed time, any of the aforesaid approvals, our ability to execute our Project for setting up of new manufacturing plant for production of Specialty Chemicals may be materially impacted.

For further details on Statutory Approvals and Licences, please refer to Page 160 of the Red Herring Prospectus.

9. *We have not identified Office Space for our sales operations in Mumbai. Our inability to identify a suitable office space at the right time and at the estimated price may affect our sales, operations and profitability*

Our Company plans to run its sales operations from Mumbai but is yet to identify a suitable office space. An amount of Rs. 150 lacs has been earmarked for this purpose, which constitutes [●]% of the total cost of project. Our inability to identify a suitable office space at the right time and at the estimated price may affect our sales, operations and profitability and may also lead to an increase in the implementation cost of the project.

For further details refer to the Chapter titled “Objects of the Issue” beginning on page 47 of the Red Herring Prospectus.

10. *We have not yet placed orders for Plant and Machinery aggregating Rs. 338 Lacs required by us for the proposed project. Any delay in placing the orders/ or supply of plant and machinery may result in time and cost overruns, and may affect our profitability.*

We propose to acquire plant and machinery aggregating Rs. 338 Lacs for our proposed project which is approximately [●]% of the Issue Proceeds. We have not yet placed orders for plant and machinery aggregating 338 Lacs required by us which constitutes 100.00% of the total plant and machinery required. We are further subject to risks on account of inflation in the price of plant and machinery.

Our Company has received quotations for these machineries, and negotiations with the vendors have commenced. The details of quotations received appear in paragraph titled “Plant and Machinery” beginning on page 49 under the Section titled ‘Objects of the Issue’ beginning on page 47 of the Red Herring Prospectus. Since the funding for the plant and machinery is solely from the IPO proceeds, any delay in access to IPO proceeds would eventually delay the process of placing the orders. The purchase of plant and machinery would require us to consider factors including but not limited to pricing, delivery schedule and after-sales maintenance. There may also be a possibility of delay at the suppliers’ end in providing timely delivery of these machineries, which in turn may delay the implementation of our project.

11. *Our customers generally do not enter into long term contracts. There is no assurance that these customers will continue to purchase our products from us or that they will not scale down their orders. This could impact our financial performance.*

Our customers generally do not enter into any long term contracts with us. Our ability to maintain close and satisfactory relationships with our customers and to consistently manufacture products that meet their requirements is therefore important to our business. There is no assurance that these customers will continue to purchase our products from us or that they will not scale down their orders. This could impact our financial performance.

12. *The loss resulting from shutdown of operations at any of our plants could have an adverse effect on us.*

Our plants are subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, labour disputes, natural disasters, industrial accidents. Our plants use complex equipment and machinery, and the breakdown or failure of equipment or machinery may result in us having to make repairs or procure replacements which may require considerable time and expense. Although we have not had such incident in the past and while we have insurance cover for both our facilities, including for loss of profit due to accidental shut down, the same may not be adequate to cover the loss in business.

Although we take precautions to minimize the risk of any significant operational problems at our plants they could have adverse effect on our financial performance.

13. *Our business is dependent on our key customers and the loss of any significant customer could adversely affect our financial results.*

For the financial year ended March 31, 2010, our five largest customers accounted for approximately 56.42% of our net sales. The loss of a significant customer or customers would have a material adverse effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these customers or that we will be able to replace these customers in case we lose any of them. Further the business with customers is based on regular requirements and orders, rather than yearly contracts.

Sr. No	Financial Year	% of Net Sales Contribution from Top 5 customers
a.)	FY 2007-2008	31.38 %
b.)	FY 2008-2009	44.79 %
c.)	FY 2009-2010	56.42 %

14. *Our new Project is dependent on performance of external agencies*

The timely commissioning of our new Project is dependent on the performance of third parties such as contractors and engineers, who are responsible for construction of buildings, installation and commissioning of plant & machinery and supply & testing of equipments. If the performance of these third parties is not satisfactory and results in a delay or low quality, we may be compelled to replace these third parties, which could result in increased cost and time overruns. This could adversely affect our business operations and profitability.

15. *Our proposed expansion plans are financially dependent on the Issue proceeds any delay in raising of the the same may result in escalation of project cost thereby impacting the operations and financials of our Company.*

Our proposed expansion plans are dependent on the proceeds of this Issue. We have not arranged for any alternate source of funding the major part of the project. Any delay in the proposed Issue may increase the project cost and also result in delay in project implementation. This may adversely affect our operations and profitability.

16. *Cordial relationship with the employees is crucial for smooth functioning of our operations. In the event there is a shortage of skilled labour or stoppage caused by disagreements with employees in future, it could affect our ability to meet the quality standards and timely completion of orders.*

Our operations rely heavily on employees and on the employees' ability to provide high-quality services. In the event there is a shortage of skilled labour or stoppage caused by disagreements with employees in future, it could affect our ability to meet the quality standards and timely completion of orders, which could lead to reduced business or may potentially damage our reputation.

17. *Any future acquisitions of businesses/ facilities, technologies and products may expose us to new risks and we may fail to realize the benefits of such acquisitions thereby adversely impacting our profitability.*

In future, we may acquire businesses/ facilities, technologies and products believing them to be a strategic fit with our business. However, we may not be able to successfully integrate such businesses, products, technologies or personnel without a significant expenditure on operating, financial and management resources. Further, we may fail to realize the anticipated benefits of certain acquisitions. Future acquisitions could dilute our shareholders' interest in us and could cause us to incur substantial debt, expose us to contingent liabilities and negatively impact our profitability. However, as of the date of this Red Herring Prospectus we have not entered into any definitive commitment or agreement for any material investment, partnership or acquisition.

18. We have in the past entered into related party transactions with our Promoters and Promoter Group Entities and may continue to do so in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

We have entered into related party transactions with our Promoters and Promoter Group Entities. While we believe that all such transactions have been conducted on an arm's length basis and are accounted as per Accounting Standard 18, however there can be no assurance that we could not have achieved more favorable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

The aggregate value of related party transactions for the 6 months period ended September 30, 2010 is Rs. 257.86 lakhs, for FY 2010 was Rs. 722.18 lakhs and for FY 2009 was Rs. 729.70 lakhs. For further details please refer our Section titled "Financial Information" beginning on page 124 of this Red Herring Prospectus

19. We have made application for registration of trademark, which is under process of registration. We are unable to assure that the future viability or value of any of our intellectual property or that the steps taken by us to protect the proprietary rights of our Company will be adequate.

We have made application for registration of trademark 'FINOCON', and the registration for the said trademark in our name is important to retain our brand equity. If our application for registration is not accepted or if the oppositions filed against our trademark application if any, are successful, we may lose the statutory protection available to us under the Trade Marks Act, 1999 for such trademark. Further, we cannot assure that our pending application would be granted registration or will not be challenged or if granted registration, will not be invalidated or circumvented or will offer us any meaningful protection. Further, the laws of some countries in which we may market our products may not protect our intellectual property rights adequately. We are unable to assure that the future viability or value of any of our intellectual property or that the steps taken by us to protect the proprietary rights of our Company will be adequate.

For further details please refer our Chapter titled "Government and Other Statutory Approvals" beginning on page 160 of this Red Herring Prospectus

20. Our success depends largely upon the services of our Promoters, Executive Directors and other key managerial personnel and our ability to attract and retain them. Demand for key managerial personnel in the industry is intense and our inability to attract and retain key managerial personnel may affect the operations of our Company

Our Chairman and Managing Director, Mr. Surendra Kumar Tibrewala and our whole time Director Mr. Sanjay S. Tibrewala have over the years built relations with suppliers, customers and other persons who are connected with us. Further, most of the key managerial personal of our Company have been known to us for many years. Accordingly, our Company's performance is dependent upon the services of our Executive Directors and other key managerial personnel. Our future performance will depend upon the continued services of these persons. Demand for key managerial personnel in the industry is intense and our inability to attract and retain key managerial personnel may affect the operations of our Company.

21. We may not be able to maintain the pace of growth as exhibited historically. Our inability to efficiently handle the abovementioned challenges may affect our business prospects, results of operations and financial condition

We have experienced significant growth in recent years and expect our business to grow further. Our ability to sustain our growth depends, in a large part, on our ability:

- To augment financial resources for additional capacities at competitive terms and conditions;
- To complete capacity expansion / new projects without time and cost overrun;
- To employ and retain key management personnel;
- To design and implement strong internal control systems; and
- To control costs.

Our inability to efficiently handle the abovementioned challenges may affect our business prospects, results of operations and financial condition.

22. Members of our Promoter Group will continue to retain significant control in our Company after the Issue, which will allow them to influence the outcome of matters submitted to shareholders for approval. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control.

After this Issue, members of our Promoter group will beneficially hold approximately 62.50% of our post-Issue Equity Share Capital. As a result, our Promoter Group will have the ability to exercise significant influence over the matters requiring shareholders' approval, including the election of Directors and approval of significant corporate transactions. The Promoter Group will also be in a position to influence the result of any shareholders' action or approval requiring a majority vote, except where they are required by applicable laws to abstain from voting. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control.

23. We face competition in India and internationally. There is no assurance that we will continue to compete successfully in future which may affect our business prospects

We operate in a competitive environment as our products are produced by a large number of other manufacturers in India and abroad. Players in this market generally compete with each other on key attributes such as technical competence, quality of products and services, pricing and track record. We compete with our competitors on the basis of our track record of quality, technical competence, distribution channels, logistical facilities and after sales relationships. There is however no assurance that we will continue to compete successfully in future.

24. Increase in wages could reduce our profit margins.

Historically, wage costs in the Indian chemical industry have been significantly lower than wage costs in the developed countries for comparable skilled technical personnel. In the long term, wage increases may make us less competitive unless we are able to continue increasing our efficiency and productivity, and the prices we can charge to our customers. Any significant increase in wage costs could have an adverse effect on our business, financial condition and results of operations.

25. We are dependent on third-party transportation providers for the supply of raw materials and delivery of products.

We normally use third-party transportation providers for the supply of most of our raw materials and for deliveries of our finished products to our customers. Transportation strikes by members of various Indian Truckers' Unions have had in the past, and could in the future, an adverse effect on our receipt of supplies and our ability to deliver our finished products. In addition, transportation costs have been steadily increasing. Continuing increases in transportation costs may have an adverse effect on our business and results of operations.

26. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

The amount of our future dividend payments, if any, will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our results of future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot guarantee our ability to pay dividends.

EXTERNAL RISK FACTORS

1. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude.

2. *Global recession and market conditions could cause our business to suffer.*

The developed economies of the world viz. U.S., Europe, Japan and others are in midst of recovering from recession which is affecting the economic condition and markets of not only these economies but also the economies of the emerging markets like Brazil, Russia, India and China. General business and consumer sentiment has been adversely affected due to the global slowdown and there cannot be assurance, whether these developed economies will see good economic growth in the near future. Consequently, this has also affected the global stock and commodity markets.

3. *Any disruption in the supply of power, IT infrastructure, telecom lines and disruption in internet connectivity could disrupt our business process or subject us to additional costs.*

Any disruption in basic infrastructure or the failure of the Government to improve the existing infrastructure facilities could negatively impact our business since we may not be able to provide timely or adequate services to our clients. We do not maintain business interruption insurance and may not be covered for any claims or damages if the supply of power, IT infrastructure, internet connectivity or telecom lines is disrupted. This may result in the loss of a client, impose additional costs on us and have an adverse effect on our business, financial condition and results of operations and could lead to decline in the price of our Equity Shares.

4. *Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.*

India has experienced natural calamities such as earthquakes, tsunamis, floods and drought in the past few years. Natural calamities could have a negative impact on the Indian economy and may cause suspension, delays or damage to our current projects and operations, which may adversely affect our business and our results of operations.

5. *Outbreak of contagious diseases in India may have a negative impact on the Indian industry.*

Recently, there have been threats of epidemics, including the H1N1 virus that causes "swine flu" and which the World Health Organization has declared a pandemic, in the Asia Pacific region, including India, and in other parts of the world. If any of our people are suspected of having contracted any of these infectious diseases, we may be required to quarantine such people or the affected areas of our facilities and temporarily suspend part or all of our operations which would have a material adverse effect on our business, prospects, financial condition and results of operations and could cause the price of our Equity Shares to decline.

6. Terrorist attacks and other acts of violence or war involving India, the United States, and other countries could adversely affect the financial markets, result in a loss of business confidence and adversely affect our business, results of operations and financial condition.

Terrorist attacks and other acts of violence or war, including those involving India, the United States or other countries, may adversely affect Indian and worldwide financial markets. These acts may also result in a loss of business confidence and have other consequences that could adversely affect our business, results of operations and financial condition. Increased volatility in the financial markets can have an adverse impact on the economies of India and other countries, including economic recession.

7. The price of our Equity Shares may be highly volatile, or an active trading market for its Equity Shares may not develop.

After this Issue, the price of our Equity Shares may be highly volatile, or an active trading market for our Equity Shares may not develop. The prices of our Equity Shares on the Stock Exchange may fluctuate as a result of several factors, including:

8. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sale your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares will be determined on the basis of the Book Building Process. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sale your Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Changes in economic, legal and regulatory factors (both domestic and international) unrelated to our performance such as global recession, imposition of trade / non trade barriers and sanctions etc.

SUMMARY ABOUT THE INDUSTRY

GLOBAL CHEMICAL INDUSTRY

The Global Chemical Industry, estimated at US\$ 2.4 trillion, is one of the fastest growing sectors of the manufacturing industry. Despite the challenges of escalating crude oil prices and demanding international environmental protection standards now adopted globally, the chemicals industry has grown at a rate higher than the overall-manufacturing segment.

According to industry reports the pharmaceutical segment contributes approximately 26% of the total industry output and approximately 35-40% is dominated by the petrochemical segment. Commodity chemicals are the largest segment in the chemicals market with an approximately size of \$ 750 billion while the Specialty and Fine Chemicals segment accounts for \$ 500 billion.

Some of the major markets for chemicals are North America, Western Europe, Japan and emerging economies in Asia and Latin America. The US consumes approximately one-fifth of the global chemical consumption whereas Europe is the largest consumer with half the consumption. The US is the largest consumer of commodity chemicals whereas Asia Pacific is the largest consumer of agrochemicals and fertilizers.

Globalization has resulted in the location of manufacturing bases close to raw materials, cheaper energy sources and lower tax regimes. Consolidation has necessarily emerged to seek economies of scale in manufacturing, logistics and R&D. The impact of consolidation has often been improvement in geographical reach and entry into new markets. The two main components in cost reduction have been aggressive identification of improved operating norms and financial restructuring to cut interest costs. In R&D, there has been focus in knowledge areas designed to secure future revenues. There has been increased emphasis on application development especially in specialty chemicals along with greater customer interaction.

INDIAN CHEMICAL INDUSTRY

Chemical Industry is one of the oldest industries in India, which contributes significantly towards industrial and economic growth of the nation. It is highly science based and provides valuable chemicals for various end products such as textiles, paper, paints and varnishes, leather etc., which are required in almost all walks of life. The Indian Chemical Industry forms the backbone of the industrial and agricultural development of India and provides building blocks for downstream industries.

The chemical industry includes basic chemicals and its products, petrochemicals, fertilizers, paints and varnishes, gases, soaps, perfumes and toiletries and pharmaceuticals and is one of the most diversified of all industrial sectors covering thousands of commercial products. Its contribution to the GDP of the country is around 3 per cent.

The Indian Chemicals Industry comprises both small and large-scale units. The fiscal concessions granted to the small sector in mid-eighties led to the establishment of a large number of units in the Small Scale Industries (SSI) sector. Currently, the Indian Chemical industry is in the midst of a major

restructuring and consolidation phase. With the shift in emphasis on product innovation, brand building and environmental friendliness, this industry is increasingly moving towards greater customer orientation. Even though India enjoys an abundant supply of basic raw materials, it will have to build upon technical services and marketing capabilities to face global competition and increase its share of exports.

Specialty Chemicals

The Specialty Chemicals segment in the Indian Chemical Industry is a new emerging sector which brings promises of huge growth. Specialty chemicals are those chemicals which are produced at a low volume; they are high priced and usually targeted at a wide variety of markets. These chemicals are developed under the user's specifications which usually vary from one user to another. The methods of development depend on the application and the function of the chemicals. This industry requires the best technical know how. Main specialty chemicals are rubber chemicals, water treatment chemicals, polymer additives, lubricating additives, specialty pigments etc. These chemicals are mainly based on organic chemicals.

Globally the contribution of specialty chemicals is upto 25% of the chemical sector i.e. it is approximately worth US\$ 453 billion. The average annual growth is expected to be 7.5%. In India, the capacity of specialty chemical is 5272 thousand MTs and production is approx. 3690 thousand MTs.

Scope of Improvement in Specialty Chemicals Industry

- Consolidation to leverage on reducing the overall cost of production.
- Focus on Research & Development to enable development of world class technological capabilities in product and processes to become cost competitive globally.
- Manufacturing units to improve their operational efficiencies. - There must be a focus on training human resources to enhance their skills.
- Also the industry needs to attract outsourcing partners through:
 - (a) Follow good manufacturing practices for attracting outsourcing
 - (b) Benchmark global Quality systems (Assurance & Control)

16. Our Company, our Promoter, our Directors and the BRLM to this Issue have not entered into any buy-back, standby or similar arrangements with any person for purchase of our Equity Shares issued by our Company through the Red Herring Prospectus.
17. An over-subscription to the extent of 10% of the offer to public can be retained for the purpose of rounding off to the nearest integer during finalizing the allotment, subject to minimum allotment being equal to 90 Equity Shares, which is the minimum bid lot in this Issue.

Consequently, the actual allotment may go up by a maximum of 10% of the Issue to Public, as a result of which, the post-issue paid up capital after the Issue would also increase by the excess amount of allotment so made. In such an event, the Equity Shares held by the Promoter and subject to lock- in shall be suitably increased; so as to ensure that 20% of the Post Issue paid-up capital is locked in.

18. Since the entire money of Rs. [●] per share (Rs. 10 face value + Rs. [●] premium) is being called on application, all the successful applicants will be issued fully paid-up Equity Shares only.

C. Requirement for Working Capital

Currently the working capital requirements are funded through the company's internal accruals. However for the proposed project the working capital requirement is envisaged as under:

Working Capital Requirement

Year 1 = April 2012 - March 2013		
Particulars	Period	Monthly (Rs.) in Lacs
Raw Material	1 month	142.20
Packing	1 month	17.50
Debtors	3 months	656.30
Total Current Assets		816.00
Other Current Liabilities		
Salary	1 month	4.64
Power	1 month	0.70
Water	1 month	0.38
Selling Expenses	1 month	10.08
Total Current Liabilities		15.80
Working Capital Requirement		800.20

The calculation and estimation of working capital requirements are based on the Company's current operation and considering FY 2010 audited figures as under:

The total Stock of Raw Materials and Packing goods as at 31st March 2010 was Rs.1.35 crore, while the total purchase during the said year was Rs. 11.71 crore, which is approximately 29 days of Raw material (approx.) and has been considered as one month for the proposed project. The total Debtors as at 31st March 2010 was Rs. 5.75 crore, while the total Sales during the period was Rs. 22.07 crore, which works out at approx 95 days. The same has been considered as 3 months in the proposed project. Other liabilities like Salary, Water, Power etc are taken on similar calculations and considered as one month as these liabilities are generally executed monthly basis.

In FY 2010 to meet the working capital requirements, our Company availed the overdraft facility i.e; the sanction limit of Rs. 1.50 crore granted by Indian Bank in addition to the internal accruals utilized. In FY 2011 based on our financial performance, we expect to meet the working capital requirement from our own internal accruals, which shall also enable our Company to cut down on the financial costs incurred on availing the working capital loans. However in FY 2012, the working capital requirements of the proposed project would be met with the proceeds of the IPO and the working capital requirements for the current existing business operation would be met through internal accruals.

However, in respect of long term capital gains, it offers a benefit by permitting substitution of cost of acquisition / improvement with the indexed cost of acquisition / improvement, which adjusts the cost of acquisition / improvement by a cost inflation index as prescribed from time to time.

2.2.3 As per the provisions of Section 112 of the Act, long term gains as computed above that are not exempt under section 10(38) of the Act would be subject to tax at a rate of 20 percent (plus applicable surcharge and education cess). However, as per the proviso to Section 112(1), if the tax on long term capital gains resulting on transfer of listed securities or units or zero coupon bond, calculated at the rate of 20 percent with indexation benefit exceeds the tax on long term gains computed at the rate of 10 percent without indexation benefit, then such gains are chargeable to tax at a concessional rate of 10 percent (plus applicable surcharge and education cess).

In such a case, the cost of such long term specified asset will not qualify for deduction under section 80C of the Act. However, if the said bonds are transferred or converted into money within a period of three years from the date of their acquisition, the amount of capital gains exempted earlier would become chargeable to tax as long term capital gains in the year in which the bonds are transferred or converted into money.

As per the provisions of Section 115-I of the Act, a Non-Resident Indian may elect not to be governed by the provisions of Chapter XII-A for any assessment year by furnishing his return of income for that assessment year under Section 139 of the Act, declaring therein that the provisions of Chapter XII-A shall not apply to him for that assessment year and accordingly his total income for that assessment year will be computed in accordance with the other provisions of the Act.

3.2.6 Exemption of capital gain from income tax

- Under Section 10(38) of the Act, long term capital gains arising out of sale of equity shares or a unit of equity oriented fund will be exempt from tax provided that the transaction of sale of such equity shares or unit is chargeable to STT.
- According to the provisions of Section 54EC of the Act and subject to the conditions specified therein, capital gains not exempt under Section 10(38) and arising on transfer of a long term capital asset shall not be chargeable to tax to the extent such capital gains are invested in

certain notified bonds within six months from the date of transfer. If only part of the capital gain is so reinvested, the exemption shall be allowed proportionately.

In such a case, the cost of such long term specified asset will not qualify for deduction under Section 80C of the Act. However, if the said bonds are transferred or converted into money within a period of three years from the date of their acquisition, the amount of capital gains exempted earlier would become chargeable to tax as long term capital gains in the year in which the bonds are transferred or converted into money.

- According to the provisions of section 54F of the Act and subject to the conditions specified therein, in the case of an individual, gains arising on transfer of a long term capital asset (not being a residential house) are not chargeable to tax if the entire net consideration received on such transfer is invested within the prescribed period in a residential house. If only a part of such net consideration is invested within the prescribed period in a residential house, the exemption shall be allowed proportionately. For this purpose, net consideration means full value of the consideration received or accruing as a result of the transfer of the capital asset as reduced by any expenditure incurred wholly and exclusively in connection with such transfer.

3.3 Deduction of STT paid

Deduction of STT paid of an amount equal to the securities transaction tax paid by the assessee in respect of the taxable securities transaction entered into the course of his business during the previous year, if the income arising from such taxable securities transactions is included in the income computed under the head “Profits and gains of business or profession”.

Consequently, capital gains arising on sale of these assets held for more than 12 months are considered as “long term capital gains”. Capital gains arising on sale of these assets held for 12 months or less are considered as “short term capital gains”.

4.2.2 Section 48 of the Act contains special provisions in relation to computation of capital gains on transfer of shares of an Indian Company by non-residents. Computation of capital gains arising on transfer of shares in case of non-residents has to be done in the original foreign currency, which was used to acquire the shares. The capital gain (i.e., sale proceeds less cost of acquisition/ improvement) computed in the original foreign currency is then converted into Indian Rupees at the prevailing rate of exchange.

As per the provisions of Section 112 of the Act, long term gains as computed above that are not exempt under section 10(38) of the Act would be subject to tax at a rate of 20 percent (plus applicable surcharge and education cess).

4.2.3 In case investment is made in Indian rupees, the long-term capital gain is to be computed after indexing the cost.

As per the provisions of Section 112 of the Act, long term gains as computed above that are not exempt under section 10(38) of the Act would be subject to tax at a rate of 20 percent (plus applicable

surcharge and education cess). However, as per the proviso to Section 112(1), if the tax on long term capital gains resulting on transfer of listed securities or units or zero coupon bond, calculated at the rate of 20 percent with indexation benefit exceeds the tax on long-term gains computed at the rate of 10 percent without indexation benefit, then such gains are chargeable to tax at a concessional rate of 10 percent (plus applicable surcharge and education cess).

4.2.4 As per the provisions of section 111A of the Act, short-term capital gains on sale of equity shares, where the transaction of sale is chargeable to STT, shall be subject to tax at a rate of 15 per cent (plus applicable surcharge and education cess).

4.2.5 Exemption of capital gain from income tax

- Under Section 10(38) of the Act, long term capital gains arising out of sale of equity shares or a unit of equity oriented fund will be exempt from tax provided that the transaction of sale of such equity shares or unit is chargeable to STT.
- According to the provisions of Section 54EC of the Act and subject to the conditions specified therein, long term capital gains not exempt under section 10(38) shall not be chargeable to tax to the extent such capital gains are invested in certain notified bonds within six months from the date of transfer. If only part of the capital gain is so reinvested, the exemption shall be allowed proportionately.

In such a case, the cost of such long term specified asset will not qualify for deduction under Section 80C of the Act. However, if the assessee transfers or converts the notified bonds into money within a period of three years from the date of their acquisition, the amount of capital gains exempted earlier would become chargeable to tax as long term capital gains in the year in which the bonds are transferred or converted into money.

- According to the provisions of Section 54F of the Act and subject to the conditions specified therein, in the case of an individual or a HUF, gains arising on transfer of a long term capital asset (not being a residential house) are not chargeable to tax if the entire net consideration received on such transfer is invested within the prescribed period in a residential house. If only a part of such net consideration is invested within the prescribed period in a residential house, the exemption shall be allowed proportionately. For this purpose, net consideration means full value of the consideration received or accrued as a result of the transfer of the capital asset as reduced by any expenditure incurred wholly and exclusively in connection with such transfer.

4.3 Deduction of STT paid

Deduction of STT paid of an amount equal to the securities transaction tax paid by the assessee in respect of the taxable securities transaction entered into the course of his business during the previous year, if the income arising from such taxable securities transactions is included in the income computed under the head "Profits and gains of business or profession".

CHEMICAL INDUSTRY

Global Chemical Industry

The Global Chemical Industry, estimated at US\$ 2.4 trillion, is one of the fastest growing sectors of the manufacturing industry. Despite the challenges of escalating crude oil prices and demanding international environmental protection standards now adopted globally, the chemicals industry has grown at a rate higher than the overall-manufacturing segment.

According to industry reports the pharmaceutical segment contributes approximately 26% of the total industry output and approximately 35-40% is dominated by the petrochemical segment. Commodity chemicals are the largest segment in the chemicals market with an approximately size of \$ 750 billion while the Specialty and Fine Chemicals segment accounts for \$ 500 billion.

Some of the major markets for chemicals are North America, Western Europe, Japan and emerging economies in Asia and Latin America. The US consumes approximately one-fifth of the global chemical consumption whereas Europe is the largest consumer with half the consumption. The US is the largest consumer of commodity chemicals whereas Asia Pacific is the largest consumer of agrochemicals and fertilizers.

Market Trends

- The global chemicals industry is estimated to have grown by about 5% from 2005.
- The US continues to be largest consumer of chemicals globally.
- Increasing demand from emerging economies in Asia and Brazil
- Commodity chemicals continues to be the largest segment followed by specialty and fine chemicals and agrochemicals
- Major trends observed in the industry are consolidation and outsourcing.

Increased competition resulting from globalization is driving the chemical industry towards consolidation, cost reduction, location of manufacturing bases close to raw materials, cheaper energy sources, lower tax regimes, increased use of information technology (IT), and intensification of R&D activities. At the same time the industry is responding to the increased environment consciousness worldwide. Consolidation has become imperative as the industry seeks economies of scale in manufacturing, logistics, and R&D. The impact of consolidation has often been improvement in geographical reach and entry into new markets. Cost reduction is being aggressively attempted through improved operating norms and financial restructuring. Enhanced worldwide concern for the protection of the environment has been forcing the industry to modernize and innovate. There has

been increased emphasis on application development especially in specialty chemicals along-with greater customer interaction.

Indian Chemical Industry

Chemical Industry is one of the oldest industries in India, which contributes significantly towards industrial and economic growth of the nation. It is highly science based and provides valuable chemicals for various end products such as textiles, paper, paints and varnishes, leather etc., which are required in almost all walks of life. The Indian Chemical Industry forms the backbone of the industrial and agricultural development of India and provides building blocks for downstream industries.

The chemical industry includes basic chemicals and its products, petrochemicals, fertilizers, paints and varnishes, gases, soaps, perfumes and toiletries and pharmaceuticals and is one of the most diversified of all industrial sectors covering thousands of commercial products. Its contribution to the GDP of the country is around 3 per cent.

The Indian Chemicals Industry comprises both small and large-scale units. The fiscal concessions granted to the small sector in mid-eighties led to the establishment of a large number of units in the Small Scale Industries (SSI) sector. Currently, the Indian Chemical industry is in the midst of a major restructuring and consolidation phase. With the shift in emphasis on product innovation, brand building and environmental friendliness, this industry is increasingly moving towards greater customer orientation. Even though India enjoys an abundant supply of basic raw materials, it will have to build upon technical services and marketing capabilities to face global competition and increase its share of exports.

(Source: Ministry of Chemicals and Fertilizers, Department of Chemicals and Petrochemicals, Annual Report 2009-10)

The chemical industry is an important constituent of the Indian economy with an estimated turnover at around US\$ 35 billion, constituting 1.5% of the global chemical industry estimated at US\$ 2400 billion. The total investment in the sector is nearly US\$ 60 billion and the employment is about one million. It accounts for 13%–14% of total exports and 8%–9% of total imports of the country. Gujarat dominates with 51% of the total share of major chemicals produced in the country. Various sub-sectors such as chloralkali, inorganic chemicals, organic chemicals, dyestuffs and dye intermediates, and agrochemicals grew at varying rates during the Tenth Five Year Plan, with inorganic chemicals recording the highest CAGR at 10% and agro-chemicals the lowest.

Over the last decade, the Indian chemical industry has evolved from being a basic chemical producer to becoming an innovative industry. With increasing investments in R&D, the industry is registering significant growth in the knowledge sector comprising specialty chemicals, fine chemicals, and pharmaceuticals. Broadly, the share of basic, knowledge, and specialty chemicals is 57%, 18%, and 25%, respectively. Share of different segments of Chemical Industry in India is shown in figure below:

(Source: 11th Five year Planning Commission Report- 2007-2012, Volume III)

Specialty Chemicals

The Specialty Chemicals segment in the Indian Chemical Industry is a new emerging sector which brings promises of huge growth. Specialty chemicals are those chemicals which are produced at a low volume; they are high priced and usually targeted at a wide variety of markets. These chemicals are developed under the user's specifications which usually vary from one user to another. The methods of development depend on the application and the function of the chemicals. Main specialty chemicals are rubber chemicals, water treatment chemicals, polymer additives, lubricating additives, specialty pigments etc. These chemicals are mainly based on organic chemicals.

Globally the contribution of specialty chemicals is upto 25% of the chemical sector i.e. it is approximately worth US\$ 453 billion. The average annual growth is expected to be 7.5%. In India, the capacity of specialty chemical is 5272 thousand MTs and production is approx. 3690 thousand MTs.

Types of Specialty Chemicals

The various Specialty Chemicals are:

- Diagnostic Aids
- Adhesives
- Paper Additives
- Flavors & Fragrances
- Elastomers
- Foundry Chemicals
- Industrial Enzymes
- Cosmetic Additives
- Dyes
- Food Additives
- Metal Plating & Finishing Chemicals
- Lube Additives
- Category Specialty Chemicals
- Industrial Cleaning Agents
- Fuel Additives
- Polymer Additives
- Oilfield chemical
- Mining Chemicals
- Photographic Chemicals
- Paint Additives
- Construction Chemicals
- Rubber Chemicals
- Water Management Chemicals
- Surfactants
- Textile Auxiliaries
- Electronic Chemicals

Dyestuffs, basic textile intermediaries and leather chemicals continue to be the main areas for most companies in the domestic specialty chemicals sector.

The industry can be divided into two categories — traditional specialty chemicals in the textiles and leather treatment segments and the emerging specialty chemicals in paper treatment, polymer intermediates, master batches, water treatment chemicals and electronic chemicals segments. The largest section of the industry continues to be in the textile dyes and chemicals segment.

The second in line, in terms of numbers, is leather chemicals and pigments. The dyestuffs segment has traditionally been one of the largest in the industry and continues to be crucial because of its forward and backward linkages with a number of other industries. Dyes find application in industries and product segments such as textiles, leather, paper, printing inks and food processing.

Specialty Chemical Business

Specialty Chemicals are different than Bulk and Commodity Chemicals on various parameters. The key differences are tabulated below:

Parameters	Bulk/Commodity Chemicals	Specialty Chemicals
Product Life Cycle	Long	Short
Product range	Narrow	Broad
Product Volume	Large	Variable
Product type	Homogenous	Differentiated / Application Oriented
Product prices	Low	High
Unit Margins	Low	High
Production	Mostly Continuous	Batch Process
Value Addition	Low	High
Consumer Service levels	Low	High
Capital Intensity	High	Low
Turnover to assets ratio	High	Low
Focus	Capacity utilization, feedstock, cost reduction, technology	Product innovation, Market orientation
Market	Global	Mostly Local
R&D Focus	Process Improvement	Product Development, applied research
Success factors	Feedstock access, economies of scale, process optimization, cost reduction	Innovation, good R&D, technical application expertise, global network, customer based solutions, niche markets

Managing Surfactants (Specialty Chemical) business closely resembles managing an R&D programme. Manufacturers have to constantly interact with the customer to understand customer needs and expectation. Innovation is the key to success.

Shorter Products Life Cycles

Life cycles have shortened because the needs of consumers are changing very quickly a classic example is the near disappearance of the fountain pen and therefore a need for overhaul of ink technology, this is also influenced by the shift from carbon paper to photocopiers to multiple-copy document printing from a computer. Similar changes are affecting the specialty chemical user industries and specialty chemical manufacturers will have to keep pace to maintain their commercial viability. This can only be achieved through constant innovation both in product as well as service.

Differentiation through Products and Services

In this era of increased competition and margin compression providing new products, technical's service, application expertise and solving problems for the customer will be the key platforms for growth. Companies will have to invest in R&T to ensure the future.

Scope of Improvement in Specialty Chemicals Industry

- Consolidation to leverage on reducing the overall cost of production.
- Focus on Research & Development to enable development of world class technological capabilities in product and processes to become cost competitive globally.
- Manufacturing units to improve their operational efficiencies. - There must be a focus on training human resources to enhance their skills.
- Also the industry needs to attract outsourcing partners through:
 - (a) Follow good manufacturing practices for attracting outsourcing
 - (b) Benchmark global Quality systems (Assurance & Control)

Our Company is equipped with state-of-the-art technology. The Company has 2 laboratories at Mahape and keeps updating itself through its in-house Research & Development team. The R&D team has proven expertise in specialty chemicals. The team also focuses on technological upgradation of existing products and processes as a continuous exercise to improve our quality of our products, increase efficiencies and reduce cost. The process development for an identified product is done in step by step manner after a thorough literature survey, followed by the laboratory trials, pilot plant trials and then finally scaling it up to the plant size. Our laboratories are equipped with equipments like Brookfields' Viscometers, Refractometers and other equipment like pilot vessels to take trial R & D batches. We have testing facilities and application equipment to perform pre-treatment, dyeing, printing and finishing trial to evaluate the product's performance.

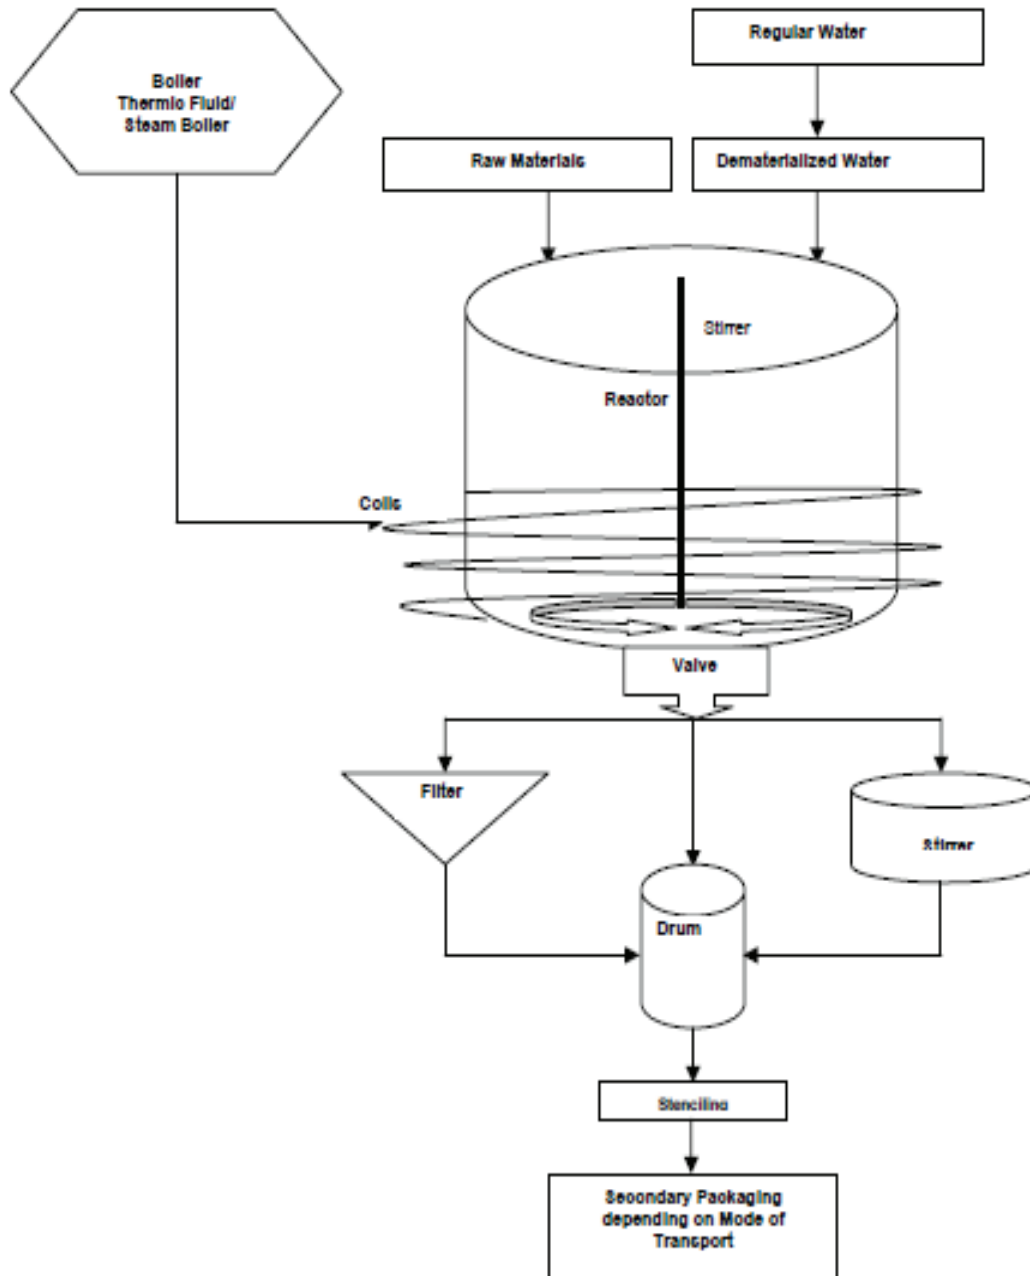

We have not entered into any technology agreement. Our Company uses proven technology for manufacturing our products, which we intend to continue for the new Project also.

Process

Specialty Chemicals and Adhesives

STEPS FOR SPECIALTY CHEMICALS

1. Water supplied by MIDC is filtered and all the impurities are removed. Sometimes, if needed, it is de-mineralized by Ion Exchange Unit.

2. This Water is charged (filled) into the Reactors. As all the products manufactured are Water Based; water plays a vital role in the manufacturing of our products.
3. The reactor is heated either by Steam Boiler or by Thermic Fluid circulating heater. The Steam or oil runs through the coils that surround the Reactor externally. The reactor is now heated to the required temperature.
4. The required Raw Materials are tested and weighed.
5. After the water is heated to the required temperature, Raw Materials (A) is charged into the Reactor through inlet pipes/funnels on the top of the Reactor. After necessary stirring and reaching desirable temperature, a sample is drawn to check for the following parameters in the laboratory:
 - pH
 - Viscosity & Solubility
 - Solid Content (Non Volatile Content)
 - Specific Customer Requirement
6. The same procedure is repeated for addition of each Raw Material (B, C, D...)
7. After the final product is made, the parameter check is repeated. Each batch of chemical production is closely monitored on quality parameters.
8. After the Finished Product is ready as per the Customer Specifications, the product is discharged through bottom valve and is filtered and directly poured into the HDPE (High Density Poly Ethylene) Drums.
9. As per certain specific requirements where a product needs to be diluted in different percentages for different customers, the product is poured into a Stirring Vessel where water or other raw materials are added and stirred till the product is blended and formulated perfectly.
10. FCL also does Toll Conversion for its customers and sends it as a final product to be marketed under the Customers name. This is usually dependant on the contracting terms.
11. Samples of the Final Products are Stored with our Company for 6 Months after Dispatch so that we can check the product even after it reaches the customer to answer customer queries. We provide product assurance for 6 months.
12. The Drums are stenciled either with Fineotex or Customer Details as per the Specifications. Other details such as Batch Number, Date of Manufacturing, Weight, Product Name, etc are also stenciled.

The process for all products is the similar only with a variation in Raw Materials, Temperature and Time duration.

The following technical processes are carried out by FCL:

Polymerization

Polymerization is a chemical reaction, usually carried out with a catalyst, heat or light, and often under pressure, in which a large number of relatively simple molecules combine to form a chain like macromolecule

Esterification

Esterification is the method to derive products from acids by the exchange of the replaceable hydrogen of the latter of an organic radical. The usual reaction is that of an acid (organic or inorganic) with an alcohol or other organic compound rich in OH groups

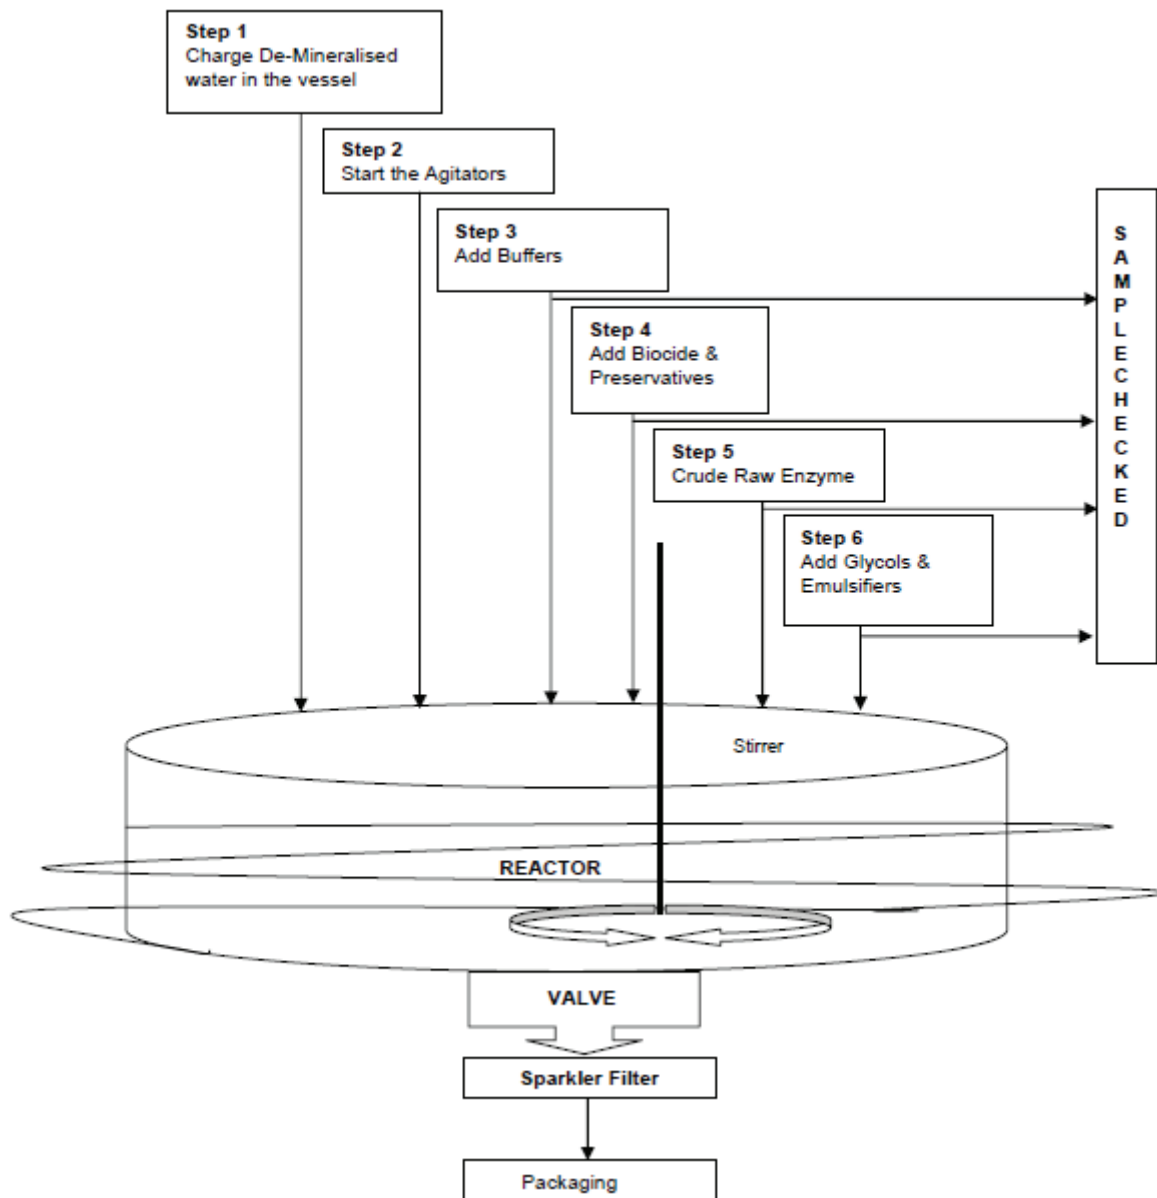

Sulphonation

Sulphation and Sulphonation are the most widely used processes for the production of synthetic anionic surface active agents derived from a wide range of synthetic and natural feed stocks.

Blending & Formulation

Blending & Formulation is uniform dispersion of liquid, semi solid or solid ingredient of a mixture by means of mechanical agitator. This may be carried out at required temperature, time duration and stirring

PROCESS FOR ENZYMES

STEPS FOR ENZYMES

1. Charge De-Mineralized (DM) Water in the Vessel

FCL uses water provided by MIDC. The water is de-mineralized and charged (filled) in the vessel (reactors) for chemical formulations as per the product requirement.

2. Start Agitator

The agitator is started at required RPM (Rotations Per Minute).

3. Add Buffer

After the water is charged into the vessel and the agitators are started, raw materials are charged into the vessel one by one as per the product requirement.

4. Add Biocide/ Preservative

Biocide and/or preservatives are added for further formulations as per the product specifications.

5. Add Crude Raw Enzyme

Once the biocide and preservatives are added to the raw materials, acid cellulose is also added to the process.

6. Add Glycols & Emulsifiers

Glycols and Emulsifiers are further added to the mixture.

7. Check & Analyze Sample

After every stage of processing i.e. adding the buffer, biocide & preservatives, crude raw enzyme, glycols & emulsifiers, the sample of the product is checked for different parameters:

- pH
- Viscosity & Solubility
- Solid Content
- Specific Customer Requirement like Stability

If it conforms to the production recipe, it is discharged for filtration

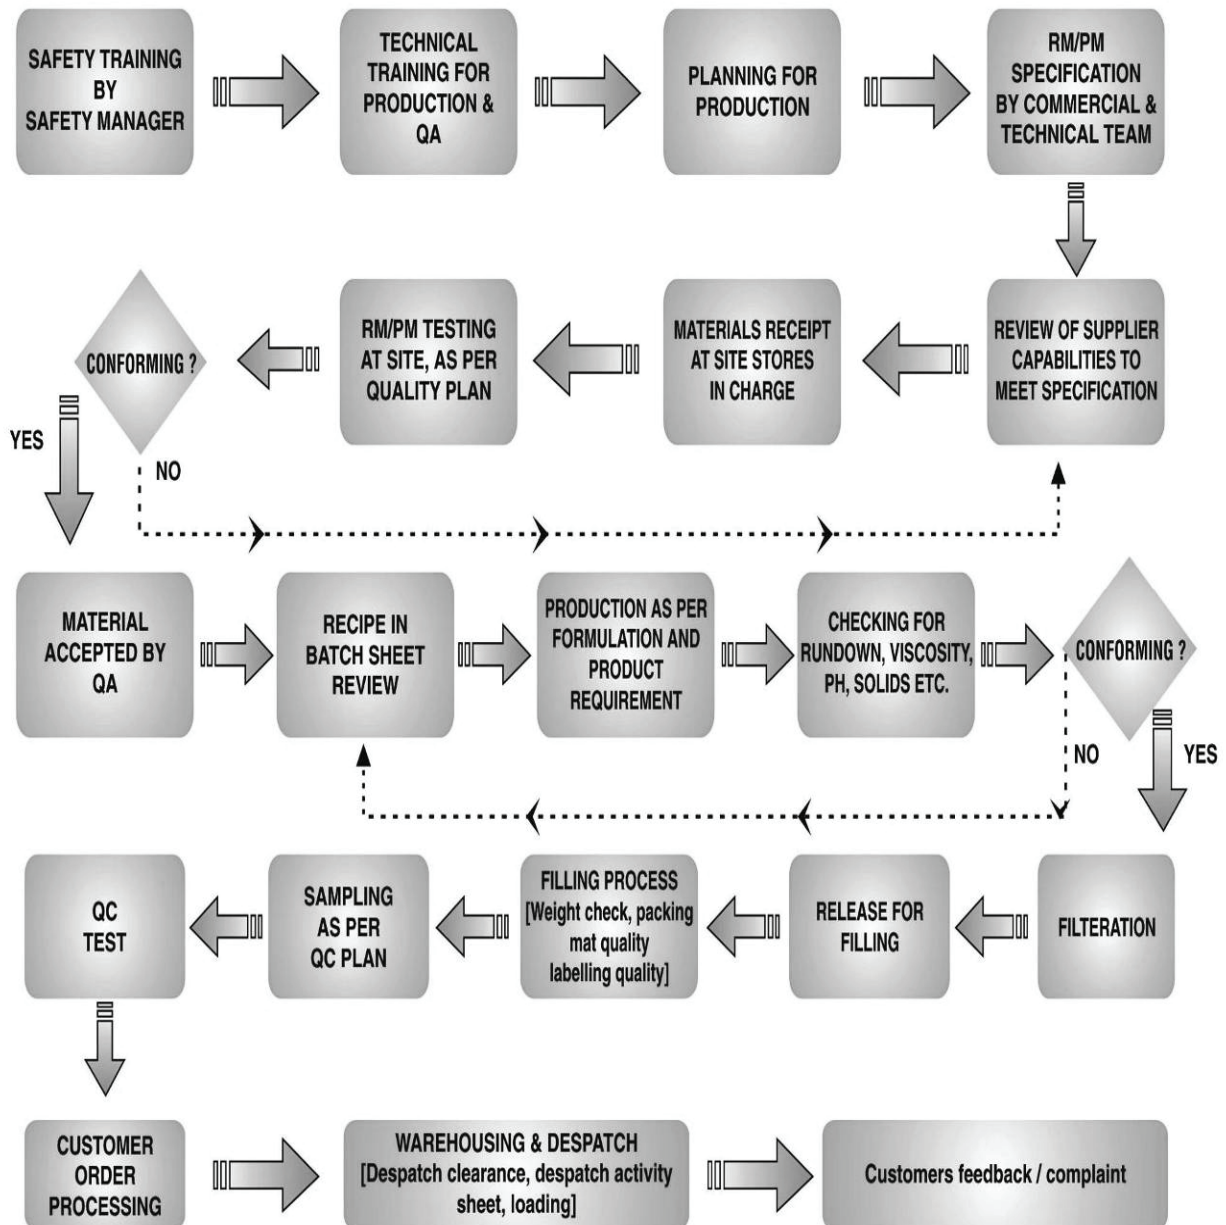

8. Sparkler Filter

Enzymes are filtered through Sparkler Filters and transferred to packaging containers.

9. Packing

The Packing is done into containers similar as for Specialty chemicals and the secondary packaging is done as per the geographical needs and Mode of Transport being used.

PRODUCTION CONTROL & QA PROCESS FLOW CHART

1. Safety Training

The workers of FCL are provided safety training at the respective plants. They are provided with the safety glasses, gloves, helmets, masks and lab coats for performing their work.

2. Technical Training for Production and QA

The working staff is trained for the chemical formulations and the use of equipment such as reactors, stirrers, boilers, etc. They are also trained to understand the ideal batch size and time required and other specifications required by each product.

3. Planning for Production

Logistics plays a very crucial role in any kind of production. Production is planned as per the priority of the existing orders, expected orders and advance order schedules given to us by customers. Accordingly, raw materials are procured, and we adjust the batches in such a way that we can ensure timely delivery of goods. Thus proper planning during this time requires utmost attention like deciding upon Batch size, Raw Material Requirements, Time for Manufacturing, Delivery Schedule etc.

4. Raw Material /Process Material specification by Commercial & Technical Team

The commercial and technical team decides raw material specifications, quantity, packaging material etc as per the finished product and customer requirement.

5. Review of the Supplier Capabilities

Suppliers are reviewed in terms of the quality of raw material provided by them, cost, proximity to the factory, Lead Time etc. Quotations and samples are called for from various suppliers. Suppliers who meet the specifications provided are selected for providing the raw materials.

6. Materials Receipt

Once the suppliers are finalized and the raw materials are ordered, arrangements are made for the receipt and storage at the site.

7. Raw Material /Process Material Testing

Raw materials are again tested on receipt as per quality plan. At FCL quality is given the top most priority. If the raw materials meet the quality specification as per the requirement they are accepted by QA. If not then there is review of the supplier capabilities and accordingly the suppliers are selected.

8. Recipe in the Batch Sheet

Once the raw materials meet the specifications and are accepted by the QA the recipe of producing the chemicals is reviewed and the production as per formulation and product requirement is carried out.

9. Checking for Rundown, Viscosity, pH, Solids etc.

At every stage of production samples of chemicals being produced are checked for rundown, viscosity, pH content, moisture content, etc. When the samples of chemicals being produced conform to the product requirements they are finally filtered and processed further if required or released directly for filling. If the samples do not conform to the product requirements then the recipe of the batch sheet i.e. product requirement is reviewed and production is carried out accordingly. This process is continued till the final product is made.

10. Filling Process

Once the chemical production process is over the product is released for filling to packaging containers. Sometimes the product is filtered through cloth or through sparkler filters. After filling into the containers the containers are passed through weight checks. Packed containers are then

accordingly stenciled/ labelled as per the customer requirements, i.e. product name, batch no, manufacturing date, weight, etc.

11. Sampling as per QC Plan

After the production process is over samples of the final product are kept for a period of 6 months. This is done for quality control as a proactive step for any queries which might arise in future.

12. Customer Order Processing

After the samples are approved as per the desired specification, packaging is done as per customers order.

13. Warehousing and Dispatch

Once the packaging is done, logistics again comes into the picture as they have to draw out the dispatching schedule and load the finished products. Products to be dispatched at later date are stored in warehouses.

14. Customer's Feedback

FCL has an after sales service system. In case of any customer complaint, we recheck the samples stored and give prompt solutions to the customers.

Future Prospects

The chemical industry moves hand in hand with all other industries. It is inevitable to survive without chemicals for manufacturing different products. Today the chemical industry is a necessity for other industries to operate. Hence the scope and future Prospects of the industry is wide and long term.

Fineotex Chemical Limited produces and proposes to produce specialty chemicals for the following industries, of which the scope is given below;

Construction Industry:

The size of the construction industry in India is over \$25 billion and it accounts for more than 6% of the GDP. It is also the largest employer in the country after the agriculture sector, employing almost 18 million people.

Construction Chemicals is a generic name assigned to describe a wide range of chemicals that are used in pre and post – construction stages. Construction Chemicals are used in several purposes and are performance chemicals used as an additive to concrete/mortar or as an application on masonry surfaces. These chemical modify and enhance the properties of concrete in fresh and hardened state. A large variety of formulations and chemistries are used for diverse applications during both pre and post – construction stages in order to impart special properties to concrete structures. For the sake of convenience, construction chemical market can be segregated into, Admixtures, Flooring, Compounds, Repair & Rehab and other products Rehab and other products.

Water Treatment Industry

The water treatment industry in India, growing at more than 20%, has started making more use of membrane-based solutions.

The country's water treatment industry, pegged at around Rs 500 crore, mainly uses the traditional chemical treatment and de-mineralizing procedures. Water treatment industry is growing because of:

- Growth of the processed food market
- Changes in paper processing technology
- Worldwide trends toward water reuse
- Waste minimization
- Stricter discharge regulations
- Equipment life extension
- Productivity improvement

Textile & Garment Industry

The chemicals consumption is totaling to 8-10% on the weight of fabric/garment. This helps us to infer that the scope and demand of processing chemicals is enormous in the textile industry. With the abolition of the quota regime and opening of the Textile Industry, India has great scope in the World Textile Market as it has good quality and cost competitiveness.

Leather Industry

Indian leather industry today has attained well merited recognition in international markets besides occupying a prominent place among the top seven foreign exchange earners of the country.

Chemicals are used in leather processing from cleaning, dyeing and finishing of leather i.e.; coating, softening, improve the strength, shine, texture, water proofing, appearance and giving the final finish for comfort wear and use.

Adhesive Industry

The adhesive industry growth is related to Wood Working, Packaging, Furniture, Paper, Sticker Industry which is on a continuous rise. There is a sudden increase in property thus increasing the need for furniture and allied industries, which in turn would lead to an increase in demand of adhesives.

Agrochemical Industry

India is the fifth leading fertilizer producer in the world after Canada, China and France. India is the fourth largest consumer of fertilizer in the world. The agro chemical industry is growing at an increasing pace, because of special support given by the government to the agricultural sector. For producing wide range of complex fertilizers, we need many chemicals and additives like Defoamers and Anticaking agents for which there is an increasing demand.

In case of any discrepancy of data between the BSE or the NSE and the Members of the Syndicate or the Designated Branches of the SCSBs, the decision of our Company, in consultation with the BRLM and the Registrar, (which may be based on the physical records of Bid Cum Application Forms) shall be final and binding on all concerned.

Build up of the Book and Revision of Bids

1. Our Company, in consultation with the BRLM, shall decide the minimum number of Equity Shares for each Bid to ensure that the minimum application value is within the range of Rs. 5,000 to Rs. 7,000.
2. The Bidder can Bid at any price within the Price Band in multiples of Re. 1 (Rupee One). The Bidder has to Bid for the desired number of Equity Shares at a specific price.

Retail Individual Bidders applying for a maximum Bid in any of the bidding options not exceeding up to Rs. 2,00,000/- may Bid at the Cut-off Price. However, bidding at the Cut-off Price is prohibited for QIB Bidders or Non-Institutional Bidders where the Bid Amount is in excess of Rs. 2,00,000/- and such Bids from QIB Bidders and Non-Institutional Bidders shall be rejected.

3. Bids registered by various Bidders, during the Bidding Period through the members of the Syndicate and SCSBs shall be electronically transmitted to the NSE or BSE mainframe on a regular basis.
4. The book gets built up at various price levels. This information will be available with the BRLM on a regular basis at the end of the bidding period.

5. During the Bid/Issue period, any Bidder who has registered his or her Bid at a particular price level is free to revise his or her Bid within the Price Band using the Revision Form, which is a part of the Bid cum Application Form.
6. Revisions can be made in both the desired number of Equity Shares and the Bid Amount by using the Revision Form. The Bidder must complete the details of all the options in the Bid cum Application Form or earlier Revision Form. For example, if a Bidder has Bid for three options in the Bid cum Application Form and he is changing only one of the options in the Revision Form, he must still complete all the details of the other two options that are not being changed in the Revision Form. Incomplete or inaccurate Revision Forms will not be accepted by the members of the Syndicate.
7. The Bidder can make this revision any number of times during the Bid/Issue period. However, for any revision(s) in the Bid, the Bidders will have to use the services of the same member of the Syndicate or SCSB through whom the original Bid was placed.
8. Bidders are advised to retain copies of the blank Revision Form and the revised Bid must be made only on such Revision Form or copies thereof.
9. In case of an upward revision in the Price Band announced as above, Retail Individual Bidders, who had Bid at the Cut-off Price could either (i) revise their Bid or (ii) make additional payment based on the higher cap of the revised Price Band (such that the total amount i.e., the original Bid Amount plus additional payment does not exceed Rs. 2,00,000, if the Bidder wants to continue to Bid at the Cut-off Price), with the members of the Syndicate to whom the original Bid was submitted. In case the total amount (i.e., original Bid Amount plus additional payment) exceeds Rs. 2,00,000, the Bid will be considered for allocation under the Non-Institutional Portion in terms of this Red Herring Prospectus. In case of Retail Individual Bidders who do not revise the Bid or make additional payment, where the Issue Price is higher than the cap of the Price Band before revision, the number of Equity Shares Bid for shall be adjusted downwards for the purpose of Allotment, such that no additional payment would be required from such Bidder and the Bidder is deemed to have approved such revised Bid at the Cut-off Price.
10. In case of a downward revision in the Price Band, announced as above, Retail Individual Bidders who have Bid at the Cut-off Price could either revise their Bid or the excess amount paid at the time of bidding would be refunded from the Escrow Accounts.
11. Any revision of the Bid shall be accompanied by payment in the form of cheque or demand draft for the incremental amount, if any, to be paid on account of the upward revision of the Bid. With respect to the ASBA Bids, if revision of the Bids results in an incremental amount, the relevant SCSB shall block the additional Bid Amount. In case of Bids, other than ASBA Bids, the Syndicate shall collect the payment in the form of cheque or demand draft if any, to be paid on account of the upward revision of the Bid at the time of one or more revisions by the QIB Bidders. In such cases, the Syndicate will revise the earlier Bids details with the revised Bid and provide the cheque or demand draft number of the new payment instrument in the electronic book. The Registrar will reconcile the Bid data and consider the revised Bid data for preparing the Basis of Allotment.
12. When a Bidder revises his or her Bid, he or she shall surrender the earlier TRS and may get a revised TRS from the Syndicate or the SCSB, as applicable. It is the responsibility of the Bidder to request for and obtain the revised TRS, which will act as proof of his or her having revised the previous Bid.
13. In the event of any revision in the Price Band, whether upwards or downwards, the minimum application size and the Bid lot shall remain 90 Equity Shares irrespective of whether the Bid Amount payable on such minimum application is not in the range of Rs. 5,000 to Rs. 7,000.

Procedure and Time of Schedule for Allotment and demat Credit of Equity Shares

The Issue will be conducted through a “100% Book Building Process” pursuant to which the members of the Syndicate will accept Bids for the Equity Shares during the Bid/Issue period. The Bid/Issue period will commence on February 23, 2011 and expire on February 25, 2011. Following the expiration of the Bid/Issue period, our Company, in consultation with the BRLM, will determine the Issue Price, ‘Basis of Allocation’ and entitlement to Allotment based on the Bids received and subject to confirmation by the Designated Stock Exchange. Successful bidders will be provided with a confirmation of their allocation (subject to a revised confirmation of allocation) and will be required to pay any unpaid Bid amount for the Equity Shares within a prescribed time. The SEBI Regulations require our Company to complete the Allotment to successful bidders within 8 working days of the expiration of the Bid/Issue period. The Equity Shares will then be credited and Allotted to the investors’ demat accounts maintained with the relevant Depository Participant. Upon approval by the Stock Exchange, the Equity Shares will be listed and trading will commence.

Unblocking of ASBA Account

Once the basis of Allotment is finalized, the Registrar to the Issue shall send an appropriate request to the SCSBs for unblocking the ASBA Accounts and for the transfer of requisite amount to the Public Issue Account. On the basis of instructions from the Registrar to the Issue, the SCSBs shall transfer the requisite amount against each successful ASBA Bidder to the Public Issue Account and shall unblock excess amount, if any in the ASBA Account. However, the Bid Amount may be unblocked in the ASBA Account prior to receipt of intimation from the Registrar to the Issue by the relevant Controlling Branch regarding finalisation of the ‘Basis of Allocation’, in the event of withdrawal or failure of this Issue or withdrawal or rejection of the ASBA Bid, as the case may be.

After the Bid/Issue Closing Date, the Registrar to the Issue shall aggregate the demand generated under the ASBA process and which details are provided to them by the SCSBs along with the demand generated by other Bidders, to determine the total demand generated by such Bidders.

Method of proportionate Basis of Allotment

In the event the Issue is oversubscribed, the Allotment shall be as per the basis of Allotment approved by the Designated Stock Exchange. The executive director (or any other senior official nominated by them) of the Designated Stock Exchange along with the BRLM and the Registrar to the Issue shall be responsible for ensuring that the basis of Allotment is finalised in a fair and proper manner.

Allotment to Bidders shall be made in marketable lots on a proportionate basis as explained below:

- (a) Bidders will be categorised according to the number of Equity Shares applied for by them.
- (b) The total number of Equity Shares to be Allotted to each category as a whole shall be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio.
- (c) The number of Equity Shares to be allotted to the successful Bidders will be arrived at on a proportionate basis, which is the total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio.
- (d) If the proportionate Allotment to a Bidder is a number that is more than 90 but is not a multiple of one (which is the market lot), the decimal will be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5, it will be rounded off to the lower whole number. Allotment to all Bidders in such categories shall be arrived at after such rounding off.

- (e) In all Bids where the proportionate Allotment is less than 90 Equity Shares per Bidder, the Allotment shall be made as follows:
- Each successful Bidder shall be Allotted a minimum of 90 Equity Shares; and
 - The successful Bidders out of the total Bidders for a portion shall be determined by the drawing of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (c) above; and
- (f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that portion, the remaining Equity Shares available for Allotment shall be first adjusted against any other category, where the Equity Shares are not sufficient for proportionate Allotment to the successful Bidders in that category. The balance of Equity Shares, if any, remaining after such adjustment will be added to the category comprising Bidders applying for the minimum number of Equity Shares.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the industrial policy of Government of India, or the Industrial Policy and FEMA. While the Industrial Policy prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made.

Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Foreign Investment Promotion Board of Government of India (FIPB) and the RBI. As per current foreign investment policies, foreign direct investment in the sector in which our Company operates (Chemicals) is allowed upto 100% under the automatic route.

RBI, *vide* its circular A.P (DIR Series) Circular No. 53 dated December 17, 2003, permitted FIIs to subscribe to shares of an Indian Company in the public issue without prior approval of RBI, so long as the price of Equity Shares to be issued is not less than the price at which the Equity Shares are issued to residents.

Investment by Non-Resident Indians

A variety of special facilities for making investments in India in shares of Indian Companies are available to individuals of Indian nationality or origin residing outside India (“NRIs”). These facilities permit NRIs to make portfolio investments in shares and other securities of Indian companies on a basis not generally available to other foreign investors. Under the portfolio investment scheme, NRIs are permitted to purchase and sell Equity Shares of our Company through a registered broker on the Stock Exchange. NRIs collectively should not own more than 10% of the post-issue paid up capital of our Company. No single NRI may own more than 5% of the post- issue paid up capital of our Company. NRI investment in foreign exchange is now fully repatriable whereas investments made in Indian Rupees through rupee accounts remains non repatriable.

Investment by Foreign Institutional Investors

Foreign Institutional Investors (“FIIs”) including institutions such as pension funds, investment trusts, asset management companies, nominee companies and incorporated, institutional portfolio managers can invest in all the securities traded on the primary and secondary markets in India. FIIs are required to obtain an initial registration from the SEBI and a general permission from the RBI to engage in transactions regulated under FEMA. FIIs must also comply with the provisions of the SEBI (Foreign Institutional Investors) Regulations, 1995, as amended from time to time. The initial registration and the RBI’s general permission together enable the registered FII to buy (subject to the ownership restrictions discussed below) and sell freely securities issued by Indian companies, to realise capital gains or investments made through the initial amount invested in India, to subscribe or renounce rights issues for shares, to appoint a domestic custodian for custody of investments held and to repatriate the capital, capital gains, dividends, income received by way of interest and any compensation received towards sale or renunciation of rights issues of shares.

Ownership restrictions of FIIs

Under the portfolio investment scheme, the overall issue of Equity Shares to FIIs on a repatriation basis should not exceed 24% of post-issue paid-up capital of our Company. However, the limit of 24% can be raised up to the permitted sectoral cap for that Company after approval of the board of directors and shareholders of our Company. The issue of Equity Shares to a single FII should not exceed 10% of the post-issue paid-up capital of our Company. In respect of an FII investing in Equity Shares of a Company on behalf of its sub-accounts, the investment on behalf of each sub-account shall not exceed 10% of the total issued capital of that Company.

Registration of Equity Shares under US Laws

The Equity Shares have not been and will not be registered under the U.S. Securities Act 1933, as amended or any state securities laws in the United States and may not be offered or sold within the United States or to, or for the account or benefit of, 'U.S. persons' (as defined in Regulation S of the U.S. Securities Act, 1933), except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act. Accordingly, the Equity Shares will be offered and sold only (i) in the United States to 'qualified institutional buyers', as defined in Rule 144A of the Securities Act, and (ii) outside the United States in compliance with Regulation S and the applicable laws of the jurisdiction where those offers and sales occur.

The above information is given for the benefit of the Bidders. Grading Rationale

Fineotex Chemical Limited (FCL)

Grading Assigned

Instrument	Size of the IPO	Grading¹	Remarks
Initial Public Offering (IPO)	42,11,160 shares having Face Value of Rs. 10 each	'IPO Grade 2'	Initial Grading

Grading Rationale

The grading is constrained by FCL's small size of operations, unorganized and highly competitive industry in which the company is operating, decline in total operating income, high collection period, low entry barriers and customer concentration risk faced by the company.

The grading, however, derives strength from experience of the promoters in the specialty chemical sector, debt and litigation free status of the company, improved profitability margins, long track record of operations and favourable industry scenario for specialty chemicals.

Background

Fineotex Chemical Limited (FCL) was incorporated as a Private Limited Company under The Companies Act 1956, on January 30, 2004. Its constitution was changed to a Public Limited Company on October 19, 2007. The promoters of the company are Mr. Surendra Kumar Tibrewala, Mr. Sanjay S. Tibrewala, Mrs. Kanaklata S. Tibrewala, Ms. Ritu S. Tibrewala, Proton Biochem Private Limited, Kamal Chemicals Private Limited and Surendra Kumar Tibrewala (HUF).

FCL is in the business of manufacturing specialty chemicals and enzymes consumed by the Textile and Garment Industry, Leather, Water Treatment, Construction, Paper, Paint, Adhesives, Agrochemical and other industries.

¹ Complete definition of the grading assigned is available at www.careratings.com and in other CARE Publications

FCL's existing plant, with an installed capacity of 5,000 MT/annum, is located at Mahape in Navi Mumbai. The company proposes to set up a new manufacturing facility, at Khopoli in Maharashtra, for the production of specialty chemicals and enzymes with a capacity of 13,125 MT/annum.

Management

Mr. Surendra Kumar Tibrewala, the Promoter and Managing Director of FCL, is supported by a team of senior executives headed by his son Mr. Sanjay Tibrewala, Whole Time Director. Mr. Surendra Kumar Tibrewala has more than three decades of experience in manufacturing specialty chemicals and enzymes for various industries. Further, Mr. Sanjay Tibrewala is actively engaged in managing the affairs of the company specifically focusing on entering new markets, increasing the product line with constant focus on improvement in quality of the products offered.

Corporate Governance

FCL has five directors, of which the Chairman of the board is an executive director. According to the requirements of clause 49 of the Listing Agreement, a company is required to have 50 per cent independent directors on the board, if the chairman of the board is also an executive director of the company. Accordingly, FCL has two executive directors and three independent directors. The company has an Audit Committee, a Remuneration Committee and a Shareholders/Investors Grievance Committee since the year 2007.

Litigations

No cases are pending against the company, its promoters and its directors as on March 31, 2010.

Operations

FCL is an ISO 9001:2000 certified company engaged in the business of manufacturing specialty chemicals and enzymes used by many industries. The company's existing manufacturing facility is located at Mahape in Navi Mumbai and has an installed capacity of 5,000 MT/annum. FCL is a small player in the specialty chemicals industry. It faces competition from some of the unorganised players in the sector as well as from big multinationals, like Pidilite Industries Limited, the BASF group, Clariant Chemicals India Limited etc., which have better manufacturing facilities and superior brand image than FCL. Although FCL has managed to carve a niche for itself within the industry and its customer profile includes some

multinationals, it is highly dependent on a few key customers for its revenues. Its top six customers accounted for approximately 57.84% of its net sales in FY10.

IPO Details

FCL proposes to make a public issue of 42,11,160 equity shares of face value of Rs. 10 each. The proceeds of the issue are proposed to be deployed towards:

- Setting up of Manufacturing facility for production of specialty chemicals
- Setting up of Sales Office in Mumbai
- Working Capital Requirements
- Meeting public issue expenses
- General Corporate Purpose

Financial Analysis

FCL's total income declined at a CAGR of 16.31% from FY08 to FY10 despite the revenues from the sale of manufactured specialty chemicals rising at a CAGR of 12.42%. This is mainly because the company gradually reduced its trading activities, which formed about 46.65% of the net sales in FY08, to focus on sale of manufactured specialty chemicals. Accordingly, there were no revenues from trading activities in FY10.

The company's PBILDT grew by 11.04% in FY10 due to a higher focus on manufactured products as opposed to the low margin trading. Backed by an increase in the PBILDT and a decline in the interest cost, the PAT grew by 16.62% in FY10. The margins of FCL improved in FY10 due to the discontinuation of the low margin trading activities by the company.

Due to a significant increase in the capital employed and the networth of the company combined with a slight increase in the profits, the company's ROCE and RONW have declined in FY10.

FCL was a debt free company as on March 31, 2010. The company has sanctioned fund based limits of Rs. 0.44 crore against a fixed deposit with the bank. However the limits of the company remain largely unutilized.

The average collection period of the company increased to 91 days as on March 31, 2010 due to a decline in the sales of the company as FCL shifted its focus towards sale of manufactured goods only and in FY10 there were no sales of traded goods.

As per the audited results for HIFY11, FCL earned a PAT of Rs.2.15 core on total income of Rs.13.48 crore.

Industry Review

The Specialty Chemicals segment in the Indian Chemical Industry is an emerging sector which brings promises of huge growth. Specialty chemicals are those chemicals which are produced at a low volume, are highly priced and usually targeted at a wide variety of markets. These chemicals are developed under the user's specifications which usually vary from one user to another. The methods of development depend on the application and the function of the chemicals which requires the best technical knowhow. The main specialty chemicals are rubber chemicals, water treatment chemicals, polymer additives, lubricating additives, specialty pigments etc. These chemicals are mainly based on organic chemicals. In India, the capacity of specialty chemical is estimated at 5,272 thousand MTs and production is approximately 3690 thousand MTs.

Like information technology, specialty chemicals are also a knowledge based industry and India has the capability to become a leading player in the world because of its low cost structure, scientific competence and skilled manpower. Specialty chemicals have high rates of growth, superior margins, are specific need oriented, non-cyclic and relatively immune to industry cycles.

The industry can be divided into two categories, traditional specialty chemicals in the textiles and leather treatment segments and the emerging specialty chemicals in paper treatment, polymer intermediates, master batches, water treatment chemicals and electronic chemicals segments. The emerging specialty chemicals offer better margins as compared to traditional specialty chemicals.
