There are significant differences between Indian GAAP and IFRS or US GAAP. Our Company has not attempted to explain those differences or quantify their impact on the financial data included herein and our Company urge you to consult your own advisors regarding such differences and their impact on our financial data. Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited.

In this Draft Red Herring Prospectus, any discrepancies in any table between the totals and the sum of the amounts listed are due to rounding off.

Currency of Presentation

All references to "Rupees" or "Rs." or "₹" are to Indian Rupees, the official currency of the Republic of India. ₹1 lac / lakh means ₹1,00,000 and ₹1 Crore means ₹1,00,00,000. All references to "US\$", "USD" or United States Dollars are to the official currency of the United States of America.

These forward-looking statements include statements as to our business strategy, our revenue and profitability, planned projects and other matters discussed in this Draft Red Herring Prospectus regarding matters that are not historical facts. These forward looking statements and any other projections contained in this Draft Red Herring Prospectus (whether made by us or any third party) are predictions and involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements or other projections.

These forward-looking statements generally can be identified by words or phrases like “will”, “aim”, “believe”, “expect”, “will continue”, “anticipate”, “estimate”, “intend”, “plan”, “seek to”, “future”, “objective”, “project”, “should” and similar expressions or variations of such expressions, that are “forward looking statements”. Similarly, the statements that describe our objectives, strategies, plans or goals are also forward-looking statements. All forward looking statements are subject to risks, uncertainties and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant statement.

Important factors that could cause actual results to differ materially from our expectations include, but are not limited to, the following:

- Implementation risk involved in our Projects;
- Order Book not being representative of our future results;
- Our ability to successfully implement our strategy, growth and expansion plans;
- Our inability to manage growth;
- Our ability to respond to competitive pressures;
- Increase in cost or non-availability of equipment, materials or fuel;
- Fluctuations in operating costs;
- Engagement of sub-contractors or other agencies in the course of execution of our road and railway projects;
- Dependence on joint ventures to qualify for the bidding process;
- Seasonality and weather conditions;
- General economic and political conditions in India and which have an impact on our business activities;
- Statutory taxes and other levies, which may affect our margin in the event of our inability to factor such expenses in our bids or contract price;
- Any adverse outcome in the legal proceedings / arbitrations in which our Company is involved.

For further discussion on factors that could cause our actual results to differ, see the section titled “Risk Factors” beginning on page 13 and “Management’s Discussion and Analysis of Financial Conditions and Results of Operations” beginning on page 171 of this Draft Red Herring Prospectus. By their nature, certain market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual future gains or losses could materially differ from those that have been estimated. Neither our Company, our Directors nor the BRLMs, nor members of the Syndicate, nor any of their respective affiliates have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition. In accordance with SEBI requirements, our Company and the BRLMs will ensure that investors in India are informed of material developments until such time as the grant of listing and trading permission by the Stock Exchanges for the Equity Shares allotted pursuant to the Issue.

SECTION II – RISK FACTORS

RISK FACTORS

An investment in Equity Shares involves a high degree of risk. You should carefully consider all of the information in this Draft Red Herring Prospectus, including the risks and uncertainties described below, before making an investment in our Company's Equity Shares. To obtain a complete understanding of our business, you should read this section in conjunction with "Our Business" beginning on page 94 and "Management's Discussion and Analysis of Financial Conditions and Results of Operations" beginning on page 171 of this Draft Red Herring Prospectus. Any of the following risks as well as other risks and uncertainties discussed in this Draft Red Herring Prospectus could have a material adverse impact on our business, financial condition and results of our operation and could cause the trading price of our Equity Shares to decline which could result in the loss of all or part of your investment.

This Draft Red Herring Prospectus also contains forward looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Red Herring Prospectus.

Unless specified or quantified in the relevant risk factors below, our Company is not in a position to quantify the financial or other implications of any of the risks described in this section.

Materiality:

The risk factors have been determined on the basis of their materiality. The following factors have been considered for determining their materiality:

- A. Some events may not be material individually but may be found material collectively.*
- B. Some events may have a material impact qualitatively instead of quantitatively.*
- C. Some events may not be material at present but may have material impacts in the future.*

INTERNAL RISK FACTORS

- 1. Our Company is involved in certain legal proceedings, the outcome of which could adversely affect our business operations and financial conditions.**

Our Company is involved in certain legal proceedings and claims in relation to certain civil, statutory, labour matters and arbitration proceedings incidental to our business and operations. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. Any adverse decision may render us liable to liabilities/penalties and may adversely affect our business and results of operations.

Particulars	No of cases / disputes	Amount involved where quantifiable (₹ in lakhs)

- 2. The premises used by our Company as Registered Office is not owned by us, and has been taken on Lease from Sreenivasa Associates (Project Works) Limited, an entity promoted by one of our Promoters, Mr. Adala**

Prabhakara Reddy.

The Registered Office of our Company in Hyderabad has been taken on lease basis from Sreenivasa Associates (Project Works) Limited (the “**Lessor**”), an entity promoted by one of our Promoters, Mr. Adala Prabhakara Reddy in consideration thereof refundable security deposit aggregating to ₹20.70 lakhs *vide* a leave and license agreement dated June 01, 2009, (the “**Agreement**”). The current agreement is valid for three years from June 01, 2009 till May 31, 2012. The aforesaid agreement may be terminated prior to its validity period. There can be no assurance that the agreement would be renewed upon expiry or termination or on terms and conditions commercially acceptable to us. Upon termination of the lease, we will have to vacate the premises and move to alternative premises which may not be available or which may be available at a substantially higher cost outlay and could also temporarily disturb our activities. Further the said lease has not been registered with the authorities, as required under the Registration Act, 1908 nor been adequately stamped under applicable stamp laws. In case of dispute the agreement may not be legally admissible as evidence till the deficiency is rectified by our Company by payment of requisite fees, stamp duty and penalty, if any as may be decided by the competent authorities.

For details regarding the terms and conditions of this agreement, please refer chapter titled “*Our Business*” beginning on page 94 of this Draft Red Herring Prospectus.

3. Our current Order Book represents only the estimated revenue from the projects awarded to us which may be cancelled due to various factors and which could materially impact our cash flow position and revenues.

As on February 28, 2011 our Company has Order Book of ₹1,41,619.88 lakhs. Our order Book represents projects that are considered firm, but cancellations or adjustments with respect to the scope or schedule may occur. Any delays due to factors beyond our control or the control of our clients, reduction in scope, revision of schedule, cancellation, execution difficulty, postponement of payment or payment default with regard to Order Book projects or any other uncompleted projects, or disputes with clients in respect of any of the foregoing, or failures of our clients to obtain necessary permits, authorizations, permissions, right-of-way, delays or failure to receive performance bonds and other types of difficulties or obstructions may postpone a project or result in its cancellation could materially impact our Order Book and/or cash flow position, revenues and earnings.

4. Any increase in or occurrence of our contingent liabilities not provided for may adversely affect our financial condition.

Contingent liabilities not provided for as on November 30, 2010, are as under –

		(₹ in lakhs)
Sr. No.	Particulars	As at
		30-11-2010
1.	The outstanding contingent liabilities on account of guarantees given by the banks	15,077.86
2.	Claims against the Company not acknowledged as debts:-	
	Service Tax Liability that may arise in respect of matters in appeal (which in turn recoverable from the contractee as per the terms of contract)	628.87
	Others	9.50
3.	Corporate Guarantee given by the Company on behalf of Associate Concerns	1,300.00
	Total	17,016.23

Any increase in our contingent liabilities or occurrence of these liabilities may materially and adversely affect our financial position, results of operations and cash flows. For further details please refer to section titled “Financial Statements” beginning on page 148 of this Draft Red Herring Prospectus.

5. Our Company may not be able to procure contracts due to the competitive bidding process prevailing in the infrastructure industry. Any failure to compete effectively could have a material adverse effect on our business, financial conditions and results of operations.

Most of tenders in infrastructure industry are awarded pursuant to a competitive bidding process. The notice inviting bids may either involve pre-qualification, or shortlisting of contractors, or a post qualification process. In a pre-

qualification or shortlisting process, the client stipulates technical and financial eligibility criteria to be met by the potential applicants. Pre-qualification applications generally require us to submit details about our organizational set-up, experience, technical ability and performance, reputation for quality, safety record, bidding capacity and size of previous contracts in similar projects, financial parameters (such as turnover, net worth and profit and loss history), employee information, plant and equipment owned, portfolio of executed and ongoing projects and details in respect of litigations and arbitrations in which our Company is involved, although the price competitiveness of the bid is usually the primary selection criterion. Our Company may not be entitled to participate in projects where we are unable to meet the selection criteria specified by the relevant client or company. Further our Company may not be able to procure a contract even if we are technically qualified owing to price competitiveness in comparison to other bidders. Any failure to compete effectively could have a material adverse effect on our business, financial conditions and results of operations.

6. ***Our Company may be exposed to several risks, including penalties, which are inherent to projects undertaken through joint ventures. In the event of any dispute with them, it could adversely affect our business and results of operations.***

In order to meet the pre-qualification requirements for certain projects, which require higher capital adequacy or technical expertise, our Company has to enter into joint ventures with third parties. On account of the complexity of the joint venture agreements executed by our Company, it is very difficult to ascertain and quantify the liabilities of our Company in case of default or breach of obligations by the other joint venture partners. In terms of such joint venture agreements, the liability of joint venture partners is joint and several and in the event that a joint venture partner fails to discharge its contractual obligations, our Company may, together with such joint venture partner, be liable to pay any penalties which may be levied by the clients for whom the projects are being executed. Though our Company has entered into joint ventures with third parties based on their track record and position in the market, the aforesaid risks are inherent to the projects undertaken by means of a joint venture.

7. ***The Company faces margin pressure as a significant number of its infrastructure-related contracts and projects are awarded by the Government of India and state governments through competitive bidding processes. As a result, the Company's business, financial condition and results of operations may be adversely affected.***

Most infrastructure-related contracts and infrastructure development projects are awarded by governments' entities through competitive bidding processes and satisfaction of other prescribed pre-qualification criteria. Once prospective bidders clear the technical requirements of the tender, the contract is usually awarded to the most competitive financial bidder. The Company also faces competition from companies who may operate on a larger scale than it and so may be able to achieve better economies of scale. Further, the Company's margins are susceptible to decline as contracts in the sectors that it operates in are awarded by government entities to the lowest bidder, causing the Company to accept lower margins in order to be awarded the contract. As a result, the Company's business, financial condition and results of operations may be adversely affected.

8. ***Our business has high working capital requirements. If we experience insufficient cash flows to meet required payments on our debt and working capital requirements, there may be an adverse effect on the results of our operations.***

Our business requires a substantial amount of working capital to finance the purchase of materials and execution of construction and other work on projects before payment is received from clients. In certain cases, we are contractually obligated to our clients to fund working capital on our projects. Our working capital requirements may increase if, in certain contracts, payment terms do not provide for advance payments to us or if the payment terms and schedules are less favourable to us. Our Company may need to borrow additional funds in the future to fulfil our working capital needs. Non availability such working capital or higher costs on such additional funds may have an adverse effect on our financial condition and the results of our operations.

9. ***Increase in cost or non-availability of equipment, materials, labour or fuel may adversely affect our results of operations.***

Work expenditure constitutes approximately 92% part of our contract revenues for the eight months period ended November 30, 2010 and approximately 91% for the fiscal ended March 31, 2010. Our infrastructure projects require

various construction materials including stone aggregate, fuel, steel, cement and bitumen. In addition, we are also required to procure various equipment including crushers, mechanical equipment, machinery, excavators, loaders, dumpers, tippers etc. Fuel costs for our operations and other equipment also constitute a substantial part of our operating expenses. Unanticipated increases in the cost of hiring / procuring equipment, materials or fuel not taken into account in our bid or our inability to procure the requisite equipment, materials or fuel on time may adversely affect the results of our operations.

10. The conditions and restrictions imposed by our lenders could restrict our ability to expand our business and operations.

As on November 30, 2010 our Company has availed an aggregate of ₹7059.83 lakhs as secured loans from various banks and NBFCs to meet our working capital and long term capital requirements. Our working capital loans are secured by first charge on the current assets both present and future. In case our Company is not able to repay the loans, interest thereon and other dues in time, the same could have an adverse impact on our operations. In addition to the above, our financing arrangements also include restrictive conditions and negative covenants that require us to obtain consents of our lenders prior to carrying out certain activities and entering into certain transactions. Though we have received approvals from all our lenders for this Issue, the same may not be available for the aforesaid activities in future. Any delay or non receipt of such approvals/consents could adversely affect our Company's ability to implement management decisions with regard to our business.

11. Failure to adhere to agreed timelines could adversely affect our reputation and/or expose us to financial liability

Certain contracts provide that our Company shall be liable for any loss due to delay in commencement or execution of the work, even if such delays are on account of procuring construction material and fuel. The client may not extend the time period for completion except in case of temporary suspension of works ordered by it. Certain contracts also permit our clients to foreclose the contracts at any time due to reduction or abandonment of work and leave us with no recourse in the event of such abandonment. Certain contracts provide that we are required to complete the work as per schedule even if payments due to us have not been made. In the event of non-completion of work on schedule or defects in our work or damage to the construction due to factors beyond our control, our Company may incur significant contractual liabilities and losses under our contracts and such losses may materially and adversely affect our financial performance and results of operations.

12. Our Company may not be able to sustain the growth rate as experienced in the past few years which may affect the revenue and profitability of our Company in future.

In the Financial Year 2010, our total income was ₹29645.15 lakhs and our Company earned net profit of ₹1517.62 lakhs. Our total income has grown at a CAGR of 32.22% for the period 2006 to 2010 and our profit after tax has grown at a CAGR of 27.15% over the same period. Our Company may not be able to sustain such growth in revenues and profits or maintain a similar rate of growth in the future.

13. Our operations are dependent on Government and Government agencies to a large extent and any change in Government and Government related policies or regulations may affect our business and financial performance. Political or financial pressure may also cause a decrease in government spending on public sector projects which could adversely affect our growth.

Our Company derives 96% of its total income from contracts awarded by the Central & State government bodies / agencies and may continue to do so. It is possible that in certain cases implementation of budgetary allocation (including external funding) may get delayed and consequently our Company may not receive payments against running account bills in a timely manner. Our operations involve substantial working capital requirements and delayed collection of receivables could adversely affect our liquidity and results of operations. Hence change in Government or changes in any Government policies impacting the public at large or changes in external budgetary allocation or delay in payment schedule due to insufficiency of funds with the Government, may adversely affect our operations.

14. Our growth strategy to expand into new geographic areas and new business segments poses risks associated with exposure to that geography and business segment

Our operations are currently geographically concentrated in the States of Andhra Pradesh, Maharashtra, Madhya Pradesh, Bihar, Assam, Tripura, Karnataka, West Bengal and Tamil Nadu. Our business is therefore significantly dependent on the general economic condition and activity in these States, and the central, state and local government policies relating to infrastructure projects. Although investment in the infrastructure sector in the areas in which we operate has been encouraged, there can be no assurance that this will continue. Our business activities are primarily in the areas of irrigation projects and rail projects. Our business strategy is to expand into other geographical regions and new business segments. In the course of any such diversification, we may face competition and our performance may suffer as a result of strong presence of our competitors in that zone. Increasing competition could have an adverse impact on our profit margins.

15. Our insurance coverage may not adequately protect us against certain operating hazards and this may have a material adverse effect on our business

Our operations subject our workforce to hazards inherent in constructing roads, bridges and railway work such as risk of equipment failure, impact from falling objects, collision, work accidents, fire, or explosion, including hazards that may cause injury and loss of life, severe damage to and destruction of property and equipment, and environmental damage. The insurance coverage that we maintain may not be adequate to cover the normal risks associated with our business operations. To the extent of any loss or damage that is not covered by insurance per se or which exceeds insurance coverage in force and available to our Company, our results of operations or cash flows may be affected.

16. Our Company faces competition in business from Indian and international infrastructure companies. Any failure to compete effectively could have a material adverse effect on our business, financial conditions and results of operations

Our Company operate in a competitive environment. While service quality, technical capacity and performance, health and safety records and personnel, as well as reputation and experience, are important considerations in client decisions, price is a major factor in most tender awards. Our industry has been frequently subject to intense price competition. There are number of competitors who have achieved greater market penetration and have greater financial and other resources at their disposal vis-à-vis our Company. As a result, we may need to accept contracts with lower margins in order for us to compete with such competitors. If we are unable to compete successfully in such markets, our profits could be reduced. There can be no assurance that we can continue to effectively perform vis-a-vis our competitors in the future, and our failure to compete effectively may have an adverse effect on our business, financial condition and results of operations.

17. Our success depends largely upon the services of our key managerial personnel and our ability to attract and retain them.

Our ability to meet future business challenges depends on our ability to attract, recruit and retain talented and skilled personnel. We are highly dependent on our senior management, our Directors and other key personnel, including skilled project management personnel. A significant number of our employees are skilled engineers and we face strong competition to recruit and retain skilled and professionally qualified staff. Due to the limited pool of available skilled personnel, competition for senior management and skilled engineers in our industry is intense. We may experience difficulties in attracting, recruiting and retaining an appropriate number of managers and engineers for our business needs. We may also need to increase our pay structures to attract and retain such personnel. Our future performance will depend upon the continued services of these persons. The loss of any of the members of our senior management, our Directors or other key personnel or an inability to manage the attrition levels in different employee categories may materially and adversely impact our business and results of operations.

18. Our Promoters and Promoter group will continue to retain significant control of our Company after the Issue, which will allow them to influence the outcome of matters submitted to shareholders for approval.

After this Issue, our Promoters together with our Promoter Group will beneficially hold approximately [●] % of our post-Issue Equity Share Capital. As a result thereof, our Promoters and Promoter Group will have the ability to exercise significant influence over the matters requiring shareholders' approval, including the election of Directors and approval of significant corporate transactions. They will also be in a position to influence the result of any shareholders' action or approval requiring a majority vote, except where they are required by applicable laws to abstain from voting. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a

change in control. For further details, please refer to the section “Capital Structure” beginning on page 48 of this Draft Red Herring Prospectus.

19. Our ability to pay dividends will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and other factors.

The amount of our future dividend payments on the Equity Shares of our Company, if any, will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditures and other factors. There can be no assurance that sufficient profits or distributable funds would be available for declaration of dividends.

20. An inability to renew or maintain our statutory and regulatory permits and approvals required to operate our business may have a material adverse effect on our business:

While our Company has endeavoured to obtain or apply for all applicable governmental, statutory and regulatory permits, licenses and approvals, including renewals thereof, to operate its business, certain governmental or statutory approvals and/or licenses may have expired or applications for the same (or renewals thereof) are still pending before the concerned authorities. In future, our Company will be required to renew such permits, licenses and approvals, and obtain new permits, licenses and approvals in order to carry on current business operations and for any proposed new operations. While we believe that we will be able to renew or obtain such permits, licenses and approvals as and when required, there can be no assurance that the relevant authorities will issue or renew any of such permits, licenses or approvals in the time-frame anticipated by it or at all. Such non-issuance or non-renewal may result in the interruption of our business operations and may have a material adverse effect on our project completion schedule, results of operations and financial conditions. For further details, please refer the section titled “Government and Other Approvals” beginning on page 191 of this Draft Red Herring Prospectus.

21. Our work force may unionize in the future. Further, our Company hires its labour requirements on contract basis through third party contractors. Contract labour being supplied to us by third parties, there is no assurance that the same would be available in accordance with our requirements.

As on date, our employees are not represented by any labour union. However, our employees may unionize in the future. While we consider our current labour relations to be satisfactory, there can be no assurance that we will not experience future disruptions to our operations due to disputes including strikes, work stoppages, or increase wage demands by our employees or other problems with work force which may adversely affect our business or operations. In that case, there may be restrictions on the flexibility of our labour policies. Further, we have used contract labour to meet our labour requirements in the past. There is no assurance that the same would be available to us in accordance with our requirements and cost estimates in the future, and non-availability of requisite contract labour or increased costs may adversely affect our business, results of operations and financial condition.

22. Any mishaps or accidents at our project sites could lead to damage, work stoppage and accident claims

Any mishap or accident at any of our project site could result eventually in damages, which may result in our Company suffering a loss. Our Company could suffer a delay in execution of project, receive adverse publicity and could be forced to invest valuable resources in defending such damages, both in terms of time and money. Although there have been no accidents involving our Company in the past, there is no assurance that there would not be mishaps or accidents in the future. Furthermore, there is no assurance that issues arising from such accidents, such as compensation and liability, will be amicably settled without leaving any adverse impact in the form of litigation or regulatory action being taken against us.

23. Our Company has entered into and may continue to enter into related party transactions.

Our Company has entered into related party transactions with Entities Promoted by our Promoters and other persons/entities who are “related parties” in terms of the relevant Accounting Standard. While, we believe that all our related party transactions have been conducted on an arm’s length basis, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our business, prospects, results of operations and financial condition. For details, please refer to the Annexure XII titled “Statement of Related Party Disclosures” in the chapter titled “Financial Statements” beginning on page 148 of the Draft Red Herring Prospectus.

24. *Our projects under development are subject to construction, financing and operational risks.*

The development of our new projects involves various risks, including, among others, land acquisition risk, regulatory risk, construction risk, financing risk and the risk that these projects may ultimately prove to be unprofitable. Entering into any new projects may pose significant challenges to our management, administrative, financial and operational resources.

Our Company cannot provide any assurance that we will succeed in any new projects we invest in or that we will recover our investments. Any failure in the development, financing or operation of any of our material new projects, though not quantifiable monetarily, is likely to materially and adversely affect our business, prospects, financial condition and results of operations.

Our Company may be adversely affected if the completion of the projects under construction or development is delayed due to:

- the contractors hired by us may not be able to complete the construction of the project on time, within budget or to the specifications and standards they have set out in the contracts with them;
- failure to obtain necessary government approvals in time or at all;
- delays in completion and commercial operation could increase the financing costs associated with the construction and cause the forecasted budget to be exceeded;
- our Company may not be able to obtain adequate working capital or other financing to complete construction of and to commence operations of the project; and
- our Company may not be able to recover the amounts we have invested in the projects if the assumptions contained in the feasibility studies for these projects do not materialize.

Any of the foregoing factors could materially and adversely affect our business, financial condition, cash flows, profitability and reputation.

25. *The information we have provided in relation to our “projects under execution” is not representative of our future results and do not provide indications in relation to cancellations or scope adjustments that may occur to some of such projects.*

The information we have provided in relation to our “projects under execution” is not representative of our future results. Additionally these projects are subject to execution risks as mentioned in Risk factor 24 above which may affect our business, cash flows and profitability.

26. *Our Company depends on various contractors and their sub-contractors to construct, develop, operate and maintain our projects. Any delay, default or unsatisfactory performance by these third parties could materially and adversely affect our ability to complete, effectively operate or maintain our projects. Any delay in meeting project milestones by our contractors / sub-contractors may increase our financing cost, cause our forecasted budget to exceed and may lead to delayed payments.*

Our Company depends on the availability and skills of third party contractors and their sub-contractors for the development, construction, operation and maintenance of our projects. We do not have direct control over the timing or quality of services, equipment or supplies provided by these contractors. There is no assurance that such contractors will continue to be available at reasonable rates in the areas in which we conduct our operations. We may also be exposed to risks relating to the quality of their services, equipment and supplies. The contractors and sub-contractors may not be able to obtain adequate working capital or other financing on favourable terms as and when required for completing construction. Any delays in meeting project milestones by our contractors could increase our financing costs and cause our forecasted budget to exceed, which may in turn result in invocation of clauses relating to payment of liquidated damages or penalties, or may even result in termination of the concession agreements.

As we expand geographically within and outside India, we may have to use sub-contractors with whom we are not familiar, which could increase the risk of cost overruns, construction defects and failures to meet scheduled completion dates. We generally do not receive guarantees or indemnities from our contractors as to timely completion, cost overruns, or additional liabilities. As a result, we assume the risk of delayed or reduced payments, liquidated damages or penalty amounts, or termination of contracts. We also assume liability for defects in connection

with any design or engineering work provided by the contractors. Although we sub-contract our construction work, we may still be liable for accidents on our projects, due to defects in design and quality of construction of our projects, during their construction and operations. Any delay, default or unsatisfactory performance by these third parties could adversely affect our ability to complete our projects in a timely manner or at all. Any of the foregoing factors, though not quantifiable monetarily, could have a material adverse effect on our business, financial condition, reputation and results of operations.

27. *Our business is subject to seasonal and other fluctuations that may affect our cash flows and business operations.*

Our business and operations are affected by seasonal factors, which may require the evacuation of personnel, suspension or curtailment of operations, resulting in damage to construction sites or delays in the delivery of materials. In particular, the monsoon season in the second quarter of each Fiscal Year may restrict our ability to carry on activities related to our projects and fully utilize our resources. This may result in delays to our contract schedules and reduce our productivity. During periods of curtailed activity due to adverse weather conditions, we may continue to incur operating expenses but our project related activities may be delayed or reduced. Additionally, traffic volumes witness a decrease during the monsoon. Such fluctuations may adversely affect our cash flows and business operations related to the toll roads operated and managed by us.

28. *Our employee attrition rate may increase to a level where we are not able to sustain our deliverables at a given point of time.*

Our Company believes that we pay competitive compensation package and benefits to our employees. However, given the increasing wage levels and the increased competition for professionally qualified staff in India, there is no assurance that our employee attrition rate will not increase to an unsustainable level or that we will be able to attract, recruit and retain experienced professionals to replace the professionals leaving at that particular point of time. Employee compensation in India is increasing at a fast rate, which could result in increased costs relating to engineers, managers and other mid-level professionals. We may need to continue to increase the levels of our monetary and non-monetary incentives to retain talent.

29. *Our statutory auditors had qualified their examination reports on our Financial Statements for FY 2008.*

30. *Our Company had negative cash flows for certain periods. Any negative cash flow in the future could affect our operations and financial conditions*

As per our Restated Financial Statements, our cash flows in the last five years and for the eight months period ended November 30, 2010 are as follows:

(₹ in Lakhs)

Particulars	Year Ended March 31					
	8 months ended 30 November, 2010	2010	2009	2008	2007	2006

Any negative cash flow in the future could affect our operations and financial conditions. For further details, please refer to the section titled “Financial Statements” beginning on page 148 of this Draft Red Herring Prospectus.

31. Our Company has bid for Build, Operate and Transfer (“BOT”) projects, there are several risks associated with such projects which may have adverse impact on our revenues.

As part of our strategy, we had bid and also plan to selectively bid for BOT projects in future. In addition, we expect that the overall proportion of projects that are offered on a BOT basis will increase over time due to the government’s increasing reliance on private participation in infrastructure investment. BOT projects offer the potential benefit of higher operating margins, as BOT projects can generally give us greater control over project costs. In addition, they offer the potential benefit of greater-than-anticipated revenues from the users of the constructed facility during the concession period. However, the risks associated with undertaking BOT projects can be substantial, including the risk of incorrect forecasts at the bid stage concerning revenues to be derived from the use of the constructed facility and the risk of extended exposure to fluctuating economic conditions. Reduced profitability or losses from BOT projects that do not perform as forecast could have a material adverse effect on our results of operations. Additionally, growth in BOT infrastructure projects may require increasing private sector participation. Investment by the private sector in such projects is dependent on the potential returns from such projects and is therefore linked to government policies relating to public-private participation and the sharing of risks and returns from such projects. Any changes in government policies that may lead to a reduction in capital investment in the infrastructure sector by the private sector could have a material adverse impact on our business and our results of operations. Revenues in BOT projects accrue to the contractor at a later stage in form of user fees and the toll collected. The collection of the toll amount being uncertain in nature, it may be insufficient to generate enough revenue which shall have a material impact on our business and our results of operations.

32. Our Company was in violation of Section 383A of the Companies Act, 1956 for the period from March 31, 2005 till February 14, 2007 and December 01, 2009 till April 11, 2010, which may attract penalties under the Companies Act, 1956.

No show cause notice in respect of the above has been received by the Company from the office of Registrar of the Companies till date. Our Company is in process of making an application for compounding of the violation.

One of our promoters, Mr. Adala Prabhakara Reddy is also the promoter of one of our Group Companies, Sreenivasa Associates (Project Works) Limited which has objects and business activities similar to that of our Company. Considering the current financial position of SAL it may not be in a position to compete with us in bidding and procuring large contracts. However we cannot assure that in future SAL will not acquire enough financial capabilities to compete with us in large contracts.

Risks Related to the Objects of the Issue:

36. Our Company has not obtained any third party appraisals for the objects of our Issue

Our funding requirements and the deployment of the proceeds of the Issue are based on management estimates and have not been appraised by any bank or financial institution. Our Company may have to revise our management estimates from time to time and consequently our funding requirements may also change.

37. Our Company has not made applications for enhancement of our working capital limits to meet the incremental working capital requirement for our future operations. Any delay or inability to meet our incremental working capital requirement will have a material adverse effect on our results of operations and financial results.

Our total working capital requirement for FY 12 is estimated at ₹23,927.25 Lakhs, of which ₹4034.28 Lakhs would be met through issue proceeds and the remaining would be met through Internal Accruals and borrowings from Banks / Financial Institutions. Any delay or inability to meet our incremental working capital requirements would have a material adverse effect on our results of operations and financial condition.

38. Our Company is yet to place orders for the entire Plant & Machinery worth ₹4,198.71 lakhs. Any delay in placing the orders/ or supply of plant and machinery may result in time and cost overruns, and may affect our profitability.

We propose to acquire plant and machinery aggregating ₹ 4,198.71 Lakhs for our proposed projects which is approximately 40.37% of the total cost of project. We are yet to place orders for the entire plant and machinery.

Our Company has received quotations for these machineries. The details of quotations received appear in paragraph titled “Finance the procurement of construction equipment” beginning on page 59 under the Chapter titled “*Objects of the Issue*” beginning on page 58 of the Draft Red Herring Prospectus. The purchase of plant and machinery would require us to consider factors including but not limited to pricing, delivery schedule and after-sales maintenance. There is no assurance that we would be able to procure these plant & machinery, or procure the same within budgeted costs and timelines. Delays in acquisition of the same could result in the cost and time overrun in the implementation of the Project, which would have a material adverse affect on our business, results of operations and financial condition.

39. *The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titled “Objects of the Issue” and is not subject to monitoring by any independent agency.*

Further, there is no assurance that the actual costs or schedule of implementation will not vary from the estimated costs or schedule of implementation, and such variance may be on account of one or more factors, some of which may be beyond our control.

B. Risks External to our Company

Certain factors beyond the control of our Company could have a negative impact on our Company's performance, such as:

40. *Changes in Government Policies and political situation in India may have an adverse impact on the business and operations of our Company*

The Government of India has traditionally exercised and continues to exercise a significant influence over many aspects of the economy. Our business, and the market price and liquidity of the Company's shares, may be affected by changes in Government of India's policies, including policies on taxation. Social, political, economic or other developments in or affecting India could also adversely affect our business. Since 1991, successive governments have pursued policies of economic liberalisation and financial sector reforms including significantly relaxing restrictions on the private sector. The rate of economic liberalisation could change, and specific laws and policies affecting construction projects, foreign investment and other matters affecting investment in our Equity Shares could change as well. The current Government is a coalition of various parties and the withdrawal of support by parties in the coalition could result in general elections being held in the country. In addition, any political instability in India may adversely affect the Indian economy and the Indian securities markets in general, which could also affect the trading price of our Equity Shares. India's economy could be adversely affected by a general rise in interest rates, adverse weather conditions affecting agriculture, a general or sharp increase in commodity and energy prices as well as various other factors. A slowdown in the Indian economy could adversely affect the policy of the Government of India towards construction, which may, in turn, adversely affect our financial performance and our ability to implement our business strategy.

41. *Statutory taxes and other levies may affect our margin in the event of our inability to factor such expense in our contract prices.*

Any increase in taxes and/ or levies, or the imposition of new taxes and/ or levies in the future, could increase the cost of production / operating expenses. To the extent our Company is not able to factor such increase in our bid/contract price, such increase in taxes and/or levies or imposition of new taxes and/or levies it may have a material adverse impact on our business, results of operations and financial condition.

42. *You will not be able to immediately sell on an Indian Stock Exchange any of the Equity Shares you purchase in the Issue on the Stock Exchanges.*

Our Equity Shares will be listed on the NSE and the BSE. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading in such Equity Shares may commence. Investors' book entry, or “demat”, accounts with Depository Participants in India are expected to be credited within nine days of the

Bid/Issue closing date. Thereafter, upon receipt of final approval from the NSE and the BSE, trading in the Equity Shares is expected to commence within twelve working days of the date of Bid/Issue closing date. There is no assurance you that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified above. Any delay in obtaining the approvals would restrict your ability to dispose of your Equity Shares.

43. *Conditions in the Indian securities market may affect the price or liquidity of the Equity Shares.*

The Indian securities markets are smaller than securities markets in more developed economies. Indian Stock Exchanges have in the past experienced substantial fluctuations in the prices of listed securities. Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies. These problems include temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Similar problems could occur in the future and, if they do, they could have an adverse impact on the market price and liquidity of the Equity Shares.

44. *If our Company fails to comply with environmental laws and regulations or face environmental litigation, our results of operation may be adversely affected.*

Environmental laws and regulations in India have become increasingly stringent and it is possible that they will become significantly more stringent in the future. If, as a result of non-compliance with any environmental regulations, any of our units or the operations of such units are suspended, we may need to incur costs in complying with regulations, appealing any decision, closing our facilities, maintaining production at our existing facilities and continuing to pay labour and other costs which continue to accrue even if the facility is closed. As a result, our overall operating expenses will increase and our profits will decrease.

45. *Our Company is subject to risk arising from changes in interest rates and banking policy.*

We are dependent on various banks for arranging our working capital requirements, term loans, etc. Accordingly, any change in the existing banking policy or increase in interest rates may have an adverse impact on our Company's profitability.

46. *Increasing employee compensation in India may erode some of our competitive advantage and may reduce our profit margins.*

Wage costs in India have historically been significantly lower than the wage costs in the developed countries for comparably skilled professionals in the industry, which has been one of our competitive strengths. However, wage increases in India may prevent us from sustaining this competitive advantage and may negatively affect our profit margins. This could impact our performance, profit margins and may have a material adverse effect on our business.

47. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

External factors such as potential terrorist attacks, acts of war or geopolitical and social turmoil in many parts of the world could constrain our ability to do business, may increase our costs and negatively affect our stock price. These geopolitical social and economic conditions could result in increased volatility in the Indian and worldwide financial markets and economy, and such volatility could constrain our ability to do business, may increase our costs and negatively affect our stock price.

48. *The price of our Equity Shares may be highly volatile, or an active trading market for our Equity Shares may not develop.*

The price of our Equity Shares on the Indian Stock Exchange may fluctuate as a result of several factors including:

- Volatility in Indian and global securities market;
- Our results of operations and performance;
- Performance of our competitors;
- Adverse media reports, if any, relating to our Company;
- Changes in the estimates of our performance or recommendations by financial analysts;
- Significant development in India's economic liberalization and de-regulation policies; and

- Significant development in India's fiscal and environmental regulations.

There can be no assurance that an active trading market for our Company's Equity Shares will develop or be sustained after this Issue or the price at which our Equity Shares are initially traded will correspond to the prices at which our Equity Shares will trade in the market subsequent to this Issue.

49. The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.

The Book Building Process will determine the Issue Price of our Equity Shares. This price will be based on numerous factors (discussed in the section "Basis for Issue Price" beginning on page 65 of this Draft Red Herring Prospectus) and may not be indicative of the market price for our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There is no assurance that you will be able to resell your Equity Shares at or above the Issue Price. Among the factors that could affect our Equity Share price are:

- Quarterly and other periodical variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

SECTION III – INTRODUCTION

SUMMARY OF OUR INDUSTRY

The Indian economy grew at an unprecedented rate of 8.8 per cent per annum between 2003-04 and 2007-08. However, the growth slowed down to 6.7 per cent in 2008-09 as the global financial crisis hit the Indian economy, in the form of contraction in international trade and reversal of investment flows. Since October 2008, the economy has received significant monetary and fiscal stimulus needed to arrest and revive its growth prospects. As a result, the economy posted a growth rate of 7.4 per cent in 2009-10.

Budget 2010 – 11: Thrust on Infrastructure

With 46 per cent of the total plan allocations in the Union Budget earmarked for the infrastructure sector, the Finance Minister indicated that government was poised for infrastructural development of the country. The Finance Minister has provided an allocation of Rs 173,552 crore for infrastructure development in the country.

The government is focusing on developing high quality infrastructure for roads, ports, airports and railways for sustaining economic growth of 8-9 per cent.

- For road infrastructure, government is targeting construction of national highways at the pace of 20 km per day. The total allocation of road transport has increased from Rs 17,520 crore to Rs 19,894 crore in 2010-11.
- The Indian Railways has been provided Rs 16,752 crore in 2010-11 for modernization and expansion of rail network.

IRRIGATION INDUSTRY - OVERVIEW:

Inland Water resources of the country are classified as rivers and canals; reservoirs; tanks & ponds; beels, oxbow lakes, derelict water; and brackish water. Other than rivers and canals, total water bodies cover all area of about 7 M.Ha. Of the rivers and canals, Uttar Pradesh occupies the First place with the total length of rivers and canals as 31.2 thousand km, which is about 17 percent of the total length of rivers and canals in the country. Other states following Uttar Pradesh are Jammu & Kashmir and Madhya Pradesh. Among the remaining forms of the inland water resources, tanks and ponds have maximum area (2.9 M.Ha.) followed by reservoirs (2.1 M.Ha.).

Demand

Ultimate irrigation potential which can be created making use of the utilizable surface water resources through major, medium and minor projects would be about 75.9 m ha. Irrigation potential making use of ground water has now been assessed as 64 m ha. Thus the total irrigation potential from surface and ground water sources would be about 139.9 m ha. Besides this, an additional irrigation potential of about 35 m ha can be created by taking up long distance inter basin transfer of water from surplus to deficit basins.

Supply

In spite of being a sector integral to the growth of Indian agriculture, the irrigation sector continues to be plagued by issues such as delays in land acquisition and funding constraints at the state level and the lack of interest shown by state governments in developing this sector. Further, the supply in irrigation had been impacted considerably due to the recent slowdown in economy as it deteriorated state finance and decelerated the pace of funding of irrigation projects. However with the revival in the economy, the funding delays are expected to come down.

Key Highlights

- Government Investments: Due to socio-economic benefits, irrigation has been the key focus area for many state governments. Further, as irrigation investments are completely government driven, the risks of cancellation of projects is also low.

(Source: CRISIL Research, Indian Infrastructure Report, November 2009)

- After commencement of AIBP, 109 major/medium projects and 6,584 Surface MI Schemes have been reported to be completed so far. An additional irrigation potential of 5.44 million hectare has been created through major/medium irrigation projects and an irrigation potential of 0.45 million hectare has been created through Surface Minor Irrigation Schemes up to March 2009.

ROAD INDUSTRY – OVERVIEW

India has one of the largest road networks of 33 lakh kms consisting of:

Road	Length (In km.)
Expressway	200
National Highways	70,548
State Highways	1,28,000
Major District Roads	4,70,000
Rural and Other Roads	26,50,000

- India has the second largest road network in the world.
- About 65% of freight and 80% passenger traffic is carried by the roads.
- National Highways constitute only about 2% of the road network but carry about 40% of the total road traffic.
- Number of vehicles has been growing at an average pace of 10.16% per annum over the last five years.

(Source: www.nhai.org)

Demand

Roads are the most preferred mode of transport for both freight and passengers. Preference for road transport for freight movement is primarily on account of large capacity expansions carried out by fleet operators, flexibility and door-to-door movement. In addition, roads act as a primary means for last mile travel. Further, capacity constraints in road transport are not acute as it is in railways. Also, the presence of multiple players ensures better scalability in capacity when required.

Supply

CRISIL Research expects to see around 18,000 km (that is, 8 km per day) of roads in various phases of NHDP to be developed at an estimated cost of around Rs 1,888 billion over the next 5 years from 2009-10 to 2013-14. The government's focus on developing the roads sector and reduction in ambiguity in its policies is expected to aid future investments in roads.

Around 14,000 km still remain to be awarded in Phase III and Phase V. Most of the projects in these phases are expected to be awarded on BOT basis. After a lull seen in awarding projects in the last 2 years due to policy issues coupled with the economic slowdown, CRISIL Research believes in favourable changes in government policies and attractive returns in the sector would increase the private sector's participation and thus result in faster execution of road projects.

Based on the past and current trend of awarding projects and the implementation schedule, CRISIL Research believes that the ongoing projects under Phases I, II, III and V will be completed to a substantial extent (over 90 per cent) by 2016-17.

Key Highlights

The government has announced several incentives to attract private sector participation. These include:

- The Indian government has launched the ambitious National Highway Development Programme (NHDP) involving a total investment of US\$ 50 billion up to 2012.
- The government has also started the Bharat Nirman Programme that aims to cover every village having a population of over 1,000 or over 500 in hilly and tribal areas, with all-weather roads.
- Removal of ranking and short listing of bidders for future road projects: As per the Delhi High Court's judgement, the ranking and short listing of the top 5-6 bidders in the Request for Qualification (RFQ) stage has been removed for future road projects. Consequently the cap on bids to be submitted in the Request for Proposal (RFP) has also been removed, which should lead to faster awarding of projects.
- Change in methodology for revision of toll rates: The new tolling policy was introduced in December 2008 with effect from April 1, 2008. The toll revision has been fixed at 3 per cent plus 40 per cent of change in WPI in an effort to help achieve a better balance between tolls charged and returns for developers, which will encourage private player participation.
- According to the Press Information Bureau, in the third week of December 2009, the government approved four-laning 384 km of highways with an investment of US\$ 669.2 million.
- Moreover, in January 2010, the government approved road projects worth US\$ 1.4 billion in five states for upgrading nearly 562 km of four-lane highways into six lanes, according to the Press Information Bureau.
- In the first week of April, the Cabinet Committee on Infrastructure approved highway construction works worth over US\$ 981.4 million in various states including Bihar and Rajasthan, according to the Press Information Bureau.
- The Tamil Nadu government has allocated US\$ 2.25 billion for a project envisaging laying of roads of international standard in 11 cities.
- The World Bank has agreed to provide a US\$ 3 billion loan for developing national highways. The World Bank assistance will be utilised for converting 6,372 km of one-lane highways to two-lane, out of the total of 19,702 km of single lane highways in the country.

RAILWAYS INDUSTRY – OVERVIEW

The US\$ 18 billion Indian Railways industry has one of the largest developed networks in the world.

- Largest rail network in Asia
- World's second largest rail network under single management.
- It runs through the country covering 63,140 route km, carrying 20 million passengers a day on about 18,000 trains.
- It is one of the few mixed traffic systems in the world, carrying both passengers and freight that generates a cash surplus.

(Source: www.indianrailways.gov.in)

Demand

Railways is working on more than 100 per cent capacity utilisation, highlighting the need to augment its freight-carrying capacity for handling increase in volume of traffic in the coming years. Given the strained capacity utilisation, Indian Railways needs to step up its investments. The railway working committee has proposed an investment of Rs 2,510 billion in various projects over the Eleventh Plan period (2007-08 to 2011-12); close to three times the Tenth Plan outlay.

(Source: CRISIL Research, Indian Infrastructure Report, November 2009)

Supply

The route network of Indian Railways has expanded very slowly in the past having added nearly 10,000 kms over 62 years.

(Source: Railways Vision 2020 Document, Ministry of Railways)

In order to surmount strain in capacity utilisation, it is necessary to augment the freight-carrying capacity of railways for handling increase in traffic volume in the coming years. Considering the overwrought capacity utilisation, it is essential to step up investment by Indian railways.

(Source: CRISIL Research, Indian Infrastructure Report, November 2009)

While doubling of lines, gauge conversions, electrification and many other positive things did happen during the last six decades, the overall expansion of the Indian Railways to areas it did not serve earlier has been unacceptably slow. To realize this potential, the Indian Railways must achieve annual growth of 10% over the next 10 years by developing a sharper commercial focus with a strong social commitment.

(Source: Railways Vision 2020 Document, Ministry of Railways)

Key Highlights

- 25,000 km of rail lines to be completed by 2020
- Rs 1302 crores to improve passenger amenities;
- 1021 Km of New Lines to be completed, 9 new line projects announced;
- Electrification of 1000 km by 2011
- 94 stations to be upgraded to Adarsh Stations
- Special Task Force to clear investment proposals within 100 days
- Multi-level parking complexes through PPP route
- Plan for high-speed rail corridor by National High Speed Rail Authority
- Master plan for development of rail infrastructure the Northeast region
- Setting up of dedicated freight and passenger corridors

FUTURE OUTLOOK ON INFRASTRUCTURE:

Taking in to consideration both new and latent demand, CRISIL Research estimates infrastructure expenditure to nearly double to Rs 32 trillion (\$700 billion) over 2009-10 to 2013-14 period. CRISIL Research believes that even if new demand for infrastructure across sectors is ignored, bridging the latent demand itself presents a huge investment opportunity.

In the past few years, the government has taken initiatives to bridge the gap in infrastructure by encouraging private participation in a number of sectors. However, the gap is very huge and demand is growing at a faster pace. Therefore, in order to realize the potential economic growth rate in the long term, investments would need to grow at a much faster pace.

(Source: CRISIL Research, Indian Infrastructure Report, November 2009)

Infrastructure sector received an impetus in the Government's policy package, which includes measures such as permission to India Infrastructure Financing Company (IIFCL) for raising tax free bonds, removal of interest ceiling on external commercial borrowings (ECB), enhancing of cap on FII investment in corporate debt market, easy refinancing from the Reserve Bank and creation of Special Purpose Vehicle (SPV) to lend to non-bank finance companies.

With a view to enhancing the competitiveness of the domestic industry by providing quality infrastructure through public-private partnership (PPP) in select functional clusters/locations which have the potential to become globally competitive, the Government of India has recast the Industrial Infrastructure Upgradation Scheme (IIUS). The salient features of this scheme include creation of quality infrastructure in existing industrial clusters/locations with high growth potential requiring strategic interventions in providing common facilities for transport, road, power supply, effluent treatment and solid waste disposal, information and communication technology (ICT) and such other physical infrastructures.

Illustration of book building and price discovery process

(Investors should note that the following is solely for the purpose of illustration and is not specific to the Issue)

Bidders can bid at any price within the price band. For instance, assuming a price band of ₹40 to ₹48 per share, issue size of 6,000 equity shares and receipt of nine bids from bidders, details of which are shown in the table below, the illustrative book would be as below. A graphical representation of the consolidated demand and price would be made available at the bidding centres during the bidding period. The illustrative book as shown below indicates the demand for the shares of the company at various prices and is collated from bids from various investors.

Bid Quantity	Bid Price (₹)	Cumulative Quantity	Subscription
500	48	500	8.33%
700	47	1,200	20.00%
1,000	46	2,200	36.67%
400	45	2,600	43.33%
500	44	3,100	51.67%
200	43	3,300	55.00%
2,700	42	6,000	100.00%
800	41	6,800	113.33%
1,200	40	8,000	133.33%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired quantum of shares is the price at which the book cuts off i.e. ₹42 in the above example. The issuer, in consultation with the BRLMs will finalize the issue price at or below such cut-off price i.e. at or below ₹42. All bids at or above this issue price and cut-off bids are valid bids and are considered for allocation in respective category.

Infrastructure Sector Overview

Infrastructure development is a key determinant of economic growth. Over the last decade and a half, there has been a considerable growth in the pace of investments in the infrastructure sector. However, it has been unable to meet the demands of the growing economy. For a developing country, economic progress has to be preceded and also accompanied by higher spend on infrastructure. As an economy matures, it enters into the infrastructure maintenance mode, but in the early stages of economic development (where India currently is); infrastructure has to be expanded at a faster pace to meet the economy's growing needs.

The Indian economy grew at an unprecedented rate of 8.8 per cent per annum between 2003-04 and 2007-08. However, the growth slowed down to 6.7 per cent in 2008-09 as the global financial crisis hit the Indian economy, in the form of contraction in international trade and reversal of investment flows. Since October 2008, the economy has received significant monetary and fiscal stimulus needed to arrest and revive its growth prospects. As a result, the economy posted a growth rate of 7.4 per cent in 2009-10.

The availability and the quality of the available infrastructure significantly impact the effective functioning of the economy. The extent and effectiveness of a country's infrastructure is indicated by the Global Competitiveness Index 2009-10, which ranks Indian Infrastructure development at 76 among 133 countries. India ranks well below all other BRIC nations -- China at 46, Brazil at 74 and Russian Federation at 71. The report also states inadequate supply of infrastructure as the most constraining factor to carrying out business in India. Inadequate infrastructure not only affects the efficiency of domestic industries, but also foreign trade, and therefore investments.

Budget 2010 – 11: Thrust on Infrastructure

With 46 per cent of the total plan allocations in the Union Budget earmarked for the infrastructure sector, the Finance Minister indicated that government was poised for infrastructural development of the country. The Finance Minister has provided an allocation of Rs 173,552 crore for infrastructure development in the country.

The government is focusing on developing high quality infrastructure for roads, ports, airports and railways for sustaining economic growth of 8-9 per cent.

- For road infrastructure, government is targeting construction of national highways at the pace of 20 km per day. The total allocation of road transport has increased from Rs 17,520 crore to Rs 19,894 crore in 2010-11.

- The Indian Railways has been provided Rs 16,752 crore in 2010-11 for modernization and expansion of rail network.

TYPES OF CONTRACTS USED IN THE INFRASTRUCTURE AND CONSTRUCTION INDUSTRIES

There are different models currently being adopted for Public Private Partnerships in India which vary in the distribution of risks and responsibility between the public and the private sectors for financing, constructing, operating, and maintaining projects. Two important types of contracts - BOT and BOOT - are explained below, as well as certain other contracts generally used in the Indian construction industry.

Build, Operate and Transfer (“BOT”)

Under this type of PPP contract, the Government grants to a contractor a concession to finance, build, operate and maintain a facility for a concession period. During the life of the concession, the operator collects user fees and applies these to cover the costs of construction, debt-servicing and operations. At the end of the concession period, the facility is transferred back to the public authority. BOT is the most commonly used approach in relation to new highway projects in India, and is also used in the energy and port sectors.

Build, Own, Operate and Transfer (“BOOT”)

BOOT contracts are similar to BOT contracts, except that in this case the contractor owns the underlying asset, instead of only owning a concession to operate the asset. For example, in the case of hydroelectric power projects, the contractor would own the asset during the underlying concession period and the asset would be transferred to the Government at the end of that period pursuant to the terms of the concession agreement.

Design, Build, Finance and Operate (“DBFO”)

The NHAI is planning to award new highway contracts under the DBFO scheme, wherein the detailed design work is done by the concessionaire. The NHAI would restrict itself to setting out the exact requirements in terms of quality and other structure of the road, and the design of the roads will be at the discretion of the concessionaire. The DBFO scheme will improve the design efficiency, reduce the cost of construction and reduce time to commence operations, in addition to giving the concessionaire greater flexibility in terms of determining the finer details of the project in the most efficient manner.

Item Rate Contracts

These contracts are also known as unit-price contracts or schedule contracts. For item rate contracts, contractors are required to quote rates for individual items of work on the basis of a schedule of quantities furnished by the customer. The design and drawings are provided by the customer. The contractor bears almost no risk in these contracts, except escalation in the rates of items quoted by the contractor, as it is paid according to the actual amount of work on the basis of the per-unit price quoted.

Engineering Procurement Construction/Lump-Sum Turnkey Contracts

In this form of contract, contractors are required to quote a fixed sum for the execution of an entire project including design, engineering and execution in accordance with drawings, designs and specifications submitted by the contractor and approved by the customer. The contractor bears the risk of incorrect estimation of the amount of work, materials or time required for the job. Escalation clauses might exist in some cases to cover, at least partially, cost overruns.

Operations and Maintenance (O&M) Contracts

Typically an operations and maintenance contract is issued for operating and maintaining facilities. This could be in sectors such as water, highways, buildings and power. The contract specifies routine maintenance activities to be undertaken at a predetermined frequency as well as break-down maintenance during the contract period. While the contractor is paid for the routine maintenance based on the quoted rates which are largely a function of manpower, consumables and maintenance equipment to be deployed at the site, any breakdown maintenance is paid for on a cost-plus basis.

Front End Engineering and Design (FEED) Contracts

Ordinarily, FEED work is carried out as a part of a consultancy assignment where the consultant provides FEED data to the project owner to enable it to take a decision on making a tender for construction. In addition to this, the FEED is also a prerequisite to enable a contractor to bid for EPC/turnkey projects. A FEED project can be an independent consultancy project or a part of an EPC/turnkey contract.

Price Preference

In tenders for the projects funded by multilateral agencies such as the World Bank and the Asian Development Bank, where there is international competitive bidding, generally there is a clause giving a price preference of 7.5% for domestic Indian bidders. In this case, if the bid by the domestic Indian contractor is 7.5% higher than the lowest international bid, then the employer has to award the project to the domestic bidder. This would be subject to certain conditions specific to the project. In case the domestic bidder is in a joint venture with an international bidder, then the domestic bidder would need to own 51% or more in the joint venture in order to qualify for the preferential treatment.

Purchase Preference

In government tenders for projects normally less than Rs. 100 crores, there is a purchase preference clause wherein a tender submitted by a Public Sector Undertaking ("PSU") will entail 10% price preference over other bidders. In this case, if the bid by the PSU is 10% higher than the lowest bidder, the employer reserves the right to award the project to the PSU.

IRRIGATION INDUSTRY - OVERVIEW:

Inland Water resources of the country are classified as rivers and canals; reservoirs; tanks & ponds; beels, oxbow lakes, derelict water; and brackish water. Other than rivers and canals, total water bodies cover all area of about 7 M.Ha. Of the rivers and canals, Uttar Pradesh occupies the First place with the total length of rivers and canals as 31.2 thousand km, which is about 17 percent of the total length of rivers and canals in the country. Other states following Uttar Pradesh are Jammu & Kashmir and Madhya Pradesh. Among the remaining forms of the inland water resources, tanks and ponds have maximum area (2.9 M.Ha.) followed by reservoirs (2.1 M.Ha.).

Most of the area under tanks and ponds lies in Southern States of Andhra Pradesh, Karnataka and Tamil Nadu. These states along with West Bengal, Rajasthan and Uttar Pradesh, account for 62 percent of total area under tanks and ponds in the country. As far as reservoirs are concerned, major states like Andhra Pradesh, Gujarat, Karnataka, Madhya Pradesh, Maharashtra, Orissa, Rajasthan and Uttar Pradesh account for larger portion of area under reservoirs. More than 77 percent of area under beels, oxbow, lakes and derelict water lies in the states of Orissa, Uttar Pradesh and Assam. Orissa ranks first as regards the total area of brackish water and is followed by Gujarat, Kerala and West Bengal. The total area of inland water resources is, thus, unevenly distributed over the country with five states namely Orissa, Andhra Pradesh, Gujarat, Karnataka and West Bengal accounting for more than half of the country's inland water bodies. (Source: www.wrmin.nic.in)

The schemes for irrigation development are conceived, planned and implemented by the respective State Governments as per their own priorities as Water being a State subject. Government of India encourages the State Governments to create additional irrigation potential through early completion of the ongoing major and medium irrigation projects and taking up surface minor irrigation schemes in special category States, tribal and drought prone

areas by providing grants under Accelerated Irrigation Benefits **Programme** (AIBP). Central grant is also provided to States under the schemes for “Repair, Renovation and Restoration of Water Bodies” (RRRWB) and “Command Area Development and Water Management” (CAD&WM) for efficient utilization of created facilities. The ultimate irrigation potential for the country has been assessed to be about 139.9 million hectare (**Mha**). As per the available information, about 105.8 **Mha** of irrigation potential has been created so far. Total area under irrigation varies from year to year. (Source: Press Information Bureau)

The country is now ready for moving ahead with much greater emphasis in securing its requirements from its land and water resources. To promote better irrigation infrastructure the Government of India has implemented certain policy measures including the following :-

- XIth Plan allocation for Irrigation, Flood Control and Command Area Development at Rs. 232311 crores showing an increase of 142.75% in relation to Xth Plan outlay of Rs. 95700 crore.
- There was quantum jump in the Central Assistance released to States under “**Accelerated Irrigation Benefits Programme (AIBP)**”. 13 major & medium projects and 1186 minor irrigation schemes were included under AIBP during the year 2008-09. An irrigation potential of about 7.5 lakh hectares was created under AIBP assisted projects during 2008-09.
- Central assistance to States under “**Command Area Development & Water Management (CAD&WM) Programme.**”

Types of Projects

Irrigation projects are divided on the basis of their Cultivable Command Area (CCA).

- If CCA is more than 10,000 hectares it is called Major Irrigation.
- If CCA is between 2,000-10,000 hectares it falls in the category of Medium Irrigation.
- Irrigation projects having CCA less than 2,000 hectares are categorized as Minor Irrigation.

Major and Medium irrigation projects mostly comprise dams, canals and lift irrigation schemes. Minor Irrigation schemes are mainly wells, tube wells, mud canals, etc
(Source: www.mowr.gov.in)

Extension, Renovation & Modernizing (ERM): Typically, ERM schemes aim at avoiding excessive losses in the distribution system and field channels, a re-appraisal of the irrigation water requirements and frequency of water application, the conjunctive use of ground water to the extent possible, modifications to canal structures and construction of new structures as necessary.

Flood Control: Flood Control Schemes aiming to control the damage caused by floods in Food Prone States

Demand

Ultimate irrigation potential which can be created making use of the utilizable surface water resources through major, medium and minor projects would be about 75.9 m ha. Irrigation potential making use of ground water has now been assessed as 64 m ha. Thus the total irrigation potential from surface and ground water sources would be about 139.9 m ha. Besides this, an additional irrigation potential of about 35 m ha can be created by taking up long distance inter basin transfer of water from surplus to deficit basins.(Source: www.cwc.nic.in – Annual Report, 2008 – 09)

State level funding of irrigation projects has been impacted considerably due to the economic slowdown. However, with a revival in the economy, we expect funding delays to go down.

In spite of being a sector integral to the growth of Indian agriculture, the irrigation sector continues to be plagued by issues such as delays in land acquisition and funding constraints at the state level and the lack of interest shown by state governments in developing this sector. Further, the supply in irrigation had been impacted considerably due to the recent slowdown in economy as it deteriorated state finance and decelerated the pace of funding of irrigation projects. However with the revival in the economy, the funding delays are expected to come down.

In India, the current Ultimate Irrigation Potential (UIP) is estimated at 139.9 million hectares. Till the end of the Tenth Five-Year Plan (2002-07), Indian had created irrigation infrastructure of 102.8 mh, leaving a gap of 37.2 mh (27 per cent) as against the total potential (UIP). As per CRISIL report 10.5 mh of irrigation potential is expected to be created over Eleventh Five-Year Plan, as against the target of 16 mh laid down by the plan. Further in the next five year (FY 2010-14) there is an expectation of 15.1 mh of IPC to be created in India.

Major Initiatives

Accelerated Irrigation Benefit Program (AIBP)

The Accelerated Irrigation Benefit Programme (AIBP) was launched during 1996 – 1997 to give loan assistance to the States to help them complete some of the incomplete major/medium irrigation projects which were at an advanced stage of completion and to create additional irrigation potential in the country. The State Governments have been provided an amount of about Rs. 36,534 crores as CLA / Grant under AIBP since inception of this programme till 7th

July 2009 for 268 major/medium irrigation projects and 9,908 Surface Minor Irrigation Schemes. Budget allocation for AIBP for the year 2008-09 was of Rs. 4,300 crores. Under PM's stimulus package, an additional allocation of Rs. 2300 crores was provided for AIBP. Thus, total allocation was of Rs. 6,600 crores. Against this allocation, the actual expenditure during the year was about Rs.7,598crores. For the year 2009-10, budget allocation is Rs.8,000crores. (Source: Indian Portal: www.india.gov.in)

Command Area Development and Water Management (CADWM)

Command Area Development and Water Management (CADWM) program was initiated in 1974. Its main objective was to improve the utilisation of Irrigation Potential Created (IPC) and optimize agriculture production and productivity from irrigated agriculture through a multi-disciplinary team functioning under the Area Development Authority. CADWM includes majority of small works such as field channels, field drains, land leveling etc. So far, 332 irrigation projects with a Cultivated Command Area (CCA) of about 29 mh have been benefited from the programme, out of which 138 projects are currently under implementation.

Bharat Nirman

Bharat Nirman is a business plan for action in rural infrastructure by the Government of India in partnership with State Governments and Panchayat Raj Institutions. The Ministry of Water Resources in collaboration with State Governments is responsible for creation of additional irrigation capacity through major, medium and minor irrigation projects complemented by ground water development. Investments

Expected Irrigation Investments

Source: CRISIL Research and Planning Commission

Slowdown in investments due to deterioration in state finances affected the sector's growth in 2008-09. However, the situation has been improving with economic revival and the sector is expected to see strong growth in investments. Major contribution to this growth will be from states concentrating on improving water and irrigation infrastructure such as Andhra Pradesh, Maharashtra, Gujarat, Madhya Pradesh, Orissa, Rajasthan and Karnataka. In order to capitalize on the direct and indirect benefits of irrigation, the government, particularly the state governments, have gradually started to increase their focus on investments in irrigation and flood control over the years. Total investments in the irrigation sector are expected to grow from Rs. 1455 bn during the 2004-05 to 2008-09 (at 2008-09 prices) to Rs. 2984 bn during the 2009-10 to 2013-14 period, representing a growth of 110 per cent.

Key Highlights

- Government Investments: Due to socio-economic benefits, irrigation has been the key focus area for many state governments. Further, as irrigation investments are completely government driven, the risks of cancellation of projects is also low. (Source: CRISIL Research, Indian Infrastructure Report, November 2009)
- After commencement of AIBP, 109 major/medium projects and 6,584 Surface MI Schemes have been reported to be completed so far. An additional irrigation potential of 5.44 million hectare has been created through major/medium irrigation projects and an irrigation potential of 0.45 million hectare has been created through Surface Minor Irrigation Schemes up to March 2009. ROAD INDUSTRY – OVERVIEW

India has one of the largest road networks of 33 lakh kms consisting of:

Road	Length (In km.)
Expressway	200
National Highways	70,548
State Highways	1,28,000
Major District Roads	4,70,000
Rural and Other Roads	26,50,000

- India has the second largest road network in the world.
- About 65% of freight and 80% passenger traffic is carried by the roads.
- National Highways constitute only about 2% of the road network but carry about 40% of the total road traffic.
- Number of vehicles has been growing at an average pace of 10.16% per annum over the last five years.

(Source: www.nhai.org)

The rapid expansion and strengthening of the road network is imperative to provide for both present and future traffic and improved accessibility to the hinterland. In addition, road transport needs to be regulated for better energy efficiency, less pollution and enhanced road safety. To promote better road infrastructure the Government of India has implemented certain policy measures including the following :-

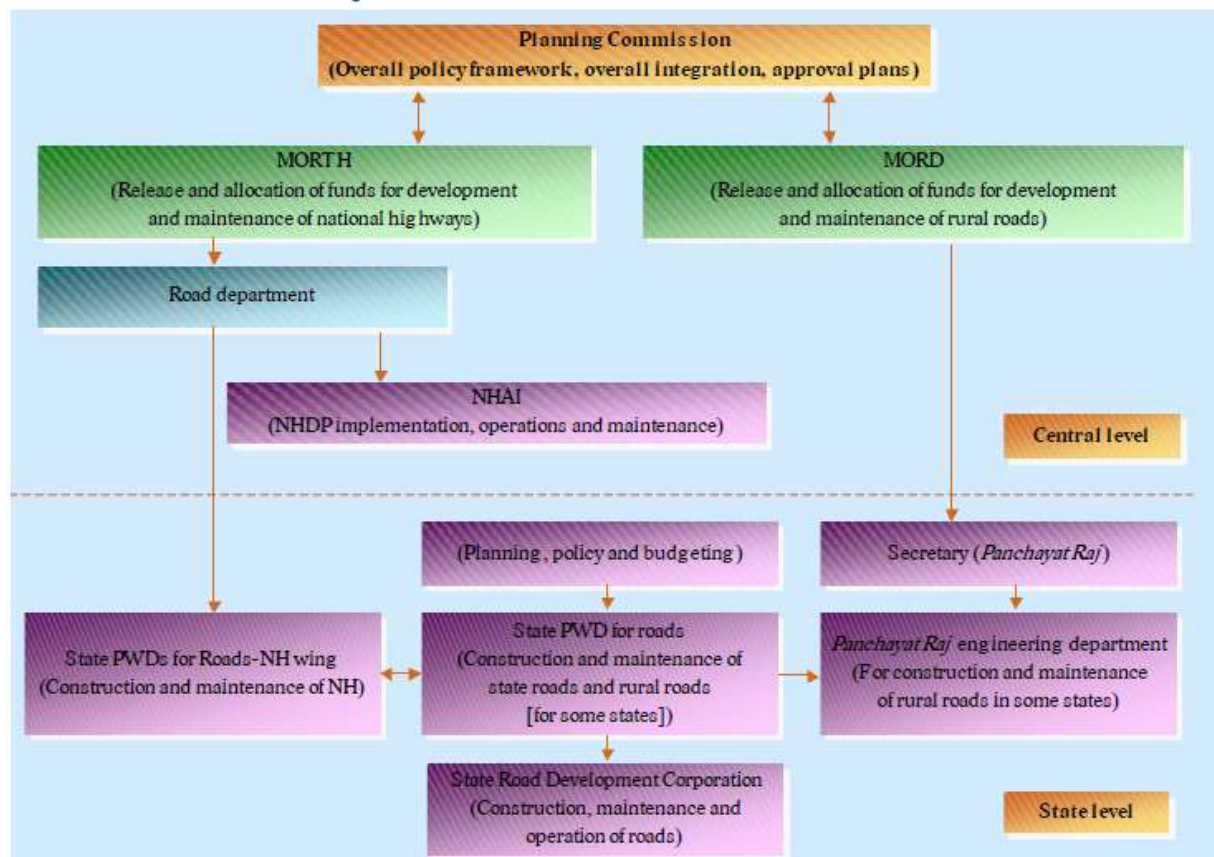

- Declaration of the road sector as an industry.
- In Budget 2010-11, the allocation for road transport has been increased by over 13 per cent from US\$ 3.8 billion to US\$ 4.3 billion.
- In order to tide over the shortage of funds, the road transport and highways ministry has proposed priority sector status for road development, allowing private highway developers more funds from banks.

- Foreign Direct Investment up to 100 per cent in road sector.
- Easier external commercial borrowing norms. The government has also announced an increase in the overseas borrowing amount of infrastructure sectors, to US\$ 500 million from US\$ 100 million.
- As per the Economic Survey, the Ministry of Road Transport and Highways, with a view to expediting the progress of the NHDP, has set a target of completion of 20 km of national highways per day, which translates to 35,000 km at the rate of 7,000 km per year during the next five years (2009-14).

National Highways – National Highways Development Project:

In order to take up the improvement and development of National Highways, National Highways Development Project (NHDP), the largest highway project ever undertaken in the country, was initiated in a phased manner. Currently, the NHDP is being implemented in four phases: I (Golden Quadrilateral, port connectivity and other projects), II (North South East West Corridor), III and V. Phase VI and Phase VII have been approved by the government and most of the contractors in these phases are in the various stages of planning and bidding.

- **NHDP Phase I & II** envisage 4/6 laning of about 14,000 km of National Highways, at an estimated cost of about Rs. 65,000 crores at 2004 prices. These two phases comprise Golden Quadrilateral (GQ), North-South & East-West corridor (NSEW), Port Connectivity and Other Projects.
- Up gradation of 12,109 km of National Highways (NHs) under **NHDP Phase-III** at an estimated cost of Rs. 80,626 crores.

- Up gradation/ strengthening of 5,000 km of single / intermediate / two lane National Highways to two lane with paved shoulders under **NHDP Phase-IV A** on BOT (Toll) and BOT (Annuity) basis at an estimated cost of Rs. 6950 crores.
- Six laning of 6,500 km of NHs comprising 5,700 km of GQ and balance 800 km of other sections of NHs under **NHDP Phase-V** at a cost of Rs. 41,210 crores.
- Construction of 1,000 km of expressways with full access control on new alignments at a cost of Rs. 16,680 crores under **NHDP-Phase VI**.
- Construction of ring roads including improvement of NH Links in cities, grade separated intersections, flyovers, elevated highways, ROBs, underpasses and Service Roads at a cost of Rs. 16,680 crores under **NHDP Phase-VII**.

State Roads

The contribution from state roads towards road investments is expected to be higher than that from National Highways. States like Rajasthan, Madhya Pradesh, Karnataka, Gujarat and Maharashtra are taking several initiatives to facilitate and promote private sector participation in state road projects.

(Source: CRISIL Research, Indian Infrastructure Report, November 2009)

Rural Roads

To boost the rural connectivity, a rural roads programme, **THE PRADHAN MANTRI GRAM SADAK YOJNA (PMGSY)** has been launched, with the objective of providing connectivity, through good All-weather roads, to all unconnected areas, with a population of more than 500 persons. This programme is entirely funded by the Government of India.

(Source: www.pmgys.nic.in)

Demand

Freight traffic across modes of transport Roads are the most preferred mode of transport for both freight and passengers. Preference for road transport for freight movement is primarily on account of large capacity expansions carried out by fleet operators, flexibility and door-to-door movement. In addition, roads act as a primary means for last mile travel. Further, capacity constraints in road transport are not acute as it is in railways. Also, the presence of multiple players ensures better scalability in capacity when required.

- CRISIL Research expects to see around 18,000 km (that is, 8 km per day) of roads in various phases of NHDP to be developed at an estimated cost of around Rs 1,888 billion over the next 5 years from 2009-10 to 2013-14. The government's focus on developing the roads sector and reduction in ambiguity in its policies is expected to aid future investments in roads.
- Around 14,000 km still remain to be awarded in Phase III and Phase V. Most of the projects in these phases are expected to be awarded on BOT basis. After a lull seen in awarding projects in the last 2 years due to policy issues coupled with the economic slowdown, CRISIL Research believes in favourable changes in government policies and attractive returns in the sector would increase the private sector's participation and thus result in faster execution of road projects.
- Based on the past and current trend of awarding projects and the implementation schedule, CRISIL Research believes that the ongoing projects under Phases I, II, III and V will be completed to a substantial extent (over 90 per cent) by 2016-17

(Source: CRISIL Research, Indian Infrastructure Report, November 2009)

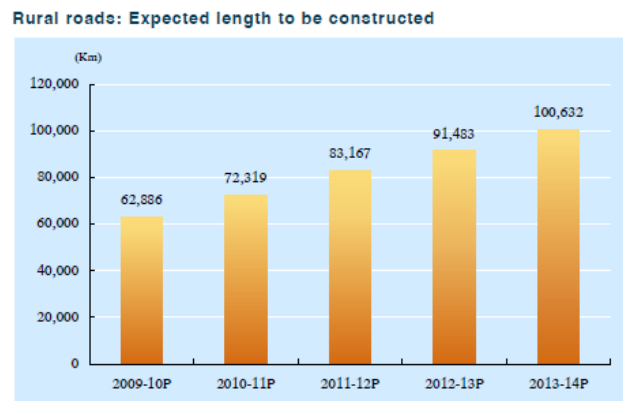

State Roads

- Upcoming projects (excluding ongoing projects) aggregating to total length of 25,724 km are being planned in progressive states like Karnataka, Gujarat, Madhya Pradesh, Maharashtra and Rajasthan. These projects are expected to be awarded in the next 5 years.
- Nearly 80 per cent of upcoming state road projects in these states are being planned on the PPP model.
- These states are taking several initiatives in facilitating and promoting private sector participation in road projects. A well-defined policy framework with Model Concession Agreement (MCA), Toll Policy and a structured bidding process has further encouraged private sector participation in these five states.

- The growth rate is expected to be around 15 per cent over the next 3 years and 10 per cent for the subsequent 2 years.

Major Initiatives

Special Accelerated Road Development Programme for North Eastern region (SARDP-NE):

It envisages improvement of road connectivity to all the State Capitals and District Headquarters in the North Eastern region. The proposed programme includes improvement of 9760 km of roads comprising of National Highways (5104 km) and State roads (4656 km), which will be implemented under Phase 'A', Phase 'B' and Arunachal Pradesh Package for Roads & Highways. The Government has approved Phase-A comprising 1959 km of National Highways and 657 km of State Roads; preparation of Detailed Project Report (DPR) for Phase-B comprising of 1673 km of National Highways and 3152 km of State Roads and Arunachal Pradesh Package of Roads & Highways comprising 1472 km of National Highways and 847 km of State Roads.

Public Private Partnerships

The increasing resource requirements and the concern for managerial efficiency and consumer responsiveness have led in recent time to an active involvement of private sector. To encourage participation of private sector, the government has announced several incentives such as –

- Government will carry out all preparatory work including land acquisition and utility removal. Right of way (ROW) to be made available to concessionaires free from all encumbrances.
- NHAI / GOI to provide capital grant up to 40% of project cost to enhance viability on a case to case basis
- 100% tax exemption for 5 years and 30% relief for next 5 years, which may be availed of in 20 years.
- Concession period allowed up to 30 years
- Arbitration and Conciliation Act 1996 based on UNICITRAL provisions.
- In BOT projects entrepreneur are allowed to collect and retain tolls
- Duty free import of specified modern high capacity equipment for highway construction.

Central Road Fund (CRF)

The Central Government has created a dedicated fund called Central Road Fund (CRF) from collection of Cess on Petrol and High Speed Diesel (HSD) Oil. Presently, Rs.2/- per litre is collected as cess on petrol and HSD Oil. The fund is distributed for development and maintenance of National Highways, state roads, rural roads, and for railway over bridges/under bridges and other safety features as provided in Central Road Fund Act, 2000. Investments

- Over the last 3 years, road investments have grown at a CAGR of 24 per cent on account of the Central and State governments' continued focus on improving road development.
- Out of the total road investments over the last 3 years, state roads contributed 48 per cent, followed by the national highways at around 31 per cent and rural roads accounted for the remaining 21 per cent.
- Investments in national highways has slowed down over the last 3 years due to various policy issues with respect to the Model Concession Agreement (MCA), RFQ and the economic slowdown
- On account of the government's continued thrust on rural development, Investments in rural roads (PMGSY) has increased at a CAGR of 44 per cent over the last 3 years.

CRISIL Research's estimates of road investments(2009-10 to 2013-14)

Road Investments						Rs. billion
Segment	2009 - 10	2010 - 11	2011 - 12	2012 - 13	2013 - 14	Total
National Highways	264	287	388	471	477	1887
State Roads	326	373	395	445	471	2010
Rural Roads	181	218	264	304	352	1319
Total	771	878	1047	1220	1300	5216

- Out of the total road investments, state roads would account for 39 per cent, followed by national highways with a share of around 36 per cent, while rural roads would constitute the remaining 25 per cent of the total investment.
- The state governments' focus on improving state roads have led to an increase in state road investments since 2006-07. Consequently, the share of state roads and highways in road investments has risen
- Out of the total NHDP investments, 75 percent would be contributed by phase III and Phase IV. However, majority of the investments from Phase III and Phase IV have been deferred by 1-2 years on account of policy issues and the overall economic slowdown. Investments from these phases are expected to scale up in the next 5 years.
- Rural roads are expected to see continued investment momentum under the PMGSY.

Funding Sources

- National highways are funded through private and public funds. Around 55 per cent of the total funding requirement of Rs 1.9 trillion is expected to come from private sector through internal accruals, equity infusion, private placements, sale or securitization of existing operational projects etc. The balance 45 per cent is to be funded by NHAI through cess funds, market borrowings, budgetary support, toll revenues and external assistance in the form of grants and loans from multi-lateral agencies like the World Bank, Asian Development Bank (ADB) etc.
- State roads are largely funded through budgetary allocations of the respective state governments. Funds from NABARD, HUDCO, RURAL Infrastructure Development Fund (RIDF) schemes and the Central government's fund (the state's portion of CRF) have supplemented the same. Out of the total funding requirement of Rs 2 trillion in state roads, around 16 percent of the total funding requirement is expected to come from private sector, with the rest coming from the public sector.

- Rural roads under the PMGSY are 100 per cent financed through funds from the Central government, which includes loans from NABARD, the World Bank, and the ADB, invested in rural roads under the PMGSY over the next 5 years.

Key Highlights

The government has announced several incentives to attract private sector participation. These include:

- The Indian government has launched the ambitious National Highway Development Programme (NHDP) involving a total investment of US\$ 50 billion up to 2012.
- The government has also started the Bharat Nirman Programme that aims to cover every village having a population of over 1,000 or over 500 in hilly and tribal areas, with all-weather roads.
- Removal of ranking and short listing of bidders for future road projects: As per the Delhi High Court's judgement, the ranking and short listing of the top 5-6 bidders in the Request for Qualification (RFQ) stage has been removed for future road projects. Consequently the cap on bids to be submitted in the Request for Proposal (RFP) has also been removed, which should lead to faster awarding of projects.
- Change in methodology for revision of toll rates: The new tolling policy was introduced in December 2008 with effect from April 1, 2008. The toll revision has been fixed at 3 per cent plus 40 per cent of change in WPI in an effort to help achieve a better balance between tolls charged and returns for developers, which will encourage private player participation.
- According to the Press Information Bureau, in the third week of December 2009, the government approved four-laning 384 km of highways with an investment of US\$ 669.2 million.
- Moreover, in January 2010, the government approved road projects worth US\$ 1.4 billion in five states for upgrading nearly 562 km of four-lane highways into six lanes, according to the Press Information Bureau.
- In the first week of April, the Cabinet Committee on Infrastructure approved highway construction works worth over US\$ 981.4 million in various states including Bihar and Rajasthan, according to the Press Information Bureau.
- The Tamil Nadu government has allocated US\$ 2.25 billion for a project envisaging laying of roads of international standard in 11 cities.
- The World Bank has agreed to provide a US\$ 3 billion loan for developing national highways. The World Bank assistance will be utilised for converting 6,372 km of one-lane highways to two-lane, out of the total of 19,702 km of single lane highways in the country.

RAILWAYS INDUSTRY - OVERVIEW

The Indian Railways, as one of the pillars of India's infrastructure, has a symbiotic relationship with the country's industry and economy. Railways play a crucial role in the transport of coal, iron ore and raw materials for the manufacturing industry, fertilizers, cement and steel products and food-grain and in the movement to and from the major ports, as well as the transportation of people. Transport being a derived demand, any growth in the economy fuels the demand for transport.

(Source: www.indianrailways.gov.in)

The US\$ 18 billion Indian Railways industry has one of the largest developed networks in the world.

- Largest rail network in Asia
- World's second largest rail network under single management.
- It runs through the country covering 63,140 route km, carrying 20 million passengers a day on about 18,000 trains.
- It is one of the few mixed traffic systems in the world, carrying both passengers and freight that generates a cash surplus.

To promote better railway infrastructure the Government of India has implemented certain policy measures in the Union Budget for 2010-11 including the following :-

- Highest ever Plan Outlay at Rs 41,426 Cr., an increase of Rs 1142 Cr. over 2009 – 10.
- New Lines – Rs 4411 Cr.
- Passenger Amenities – Rs 1302 Cr.
- Metro Projects – Rs. 1001 Cr.
- Additional budgetary support of Rs 3701 cr sought for 11 National Projects.
- Surveys for 114 socially desirable projects connecting backward areas to be taken up.
- 54 surveys for new lines, 2 for gauge conversion, 7 for doubling and 5 others to be taken up.
- Master Plan for the development of rail infrastructure in the Northeast region to be drawn up in consultation with the Northeast Development Council and the state authorities concerned.
- 1021km of New Lines to be completed. 9 new line projects announced.
- 800 km of gauge conversion and 700km of doubling targeted.
- Several projects being taken up on cost sharing basis with State Governments and on PPP mode.

Regulatory Framework

Ministry of Railways: The Railway Board manages operations of Indian Railways; it handles policies and regulations pertaining to railways and is supervised by the Ministry of Railways (MoR). Railways operations and management is vested in the hands of 16 zonal offices. Each of the zonal office is a geographical monopoly, which interchanges traffic from all other zones. Each zone has 67 divisions, headed by a divisional manager.

PSU set up to meet its operational needs: Indian Railways has set up several public sector undertakings (PSUs) for dealing with different operational aspects. These include Rail India Technical and Economic Services Ltd .(RITES), a consultancy service; Ircon International Ltd, for construction; The Indian Railways Finance Corporation (IRFC), that augments financial resources; Container Corporation of India Ltd (CONCOR), handles domestic and international cargo and RailTel Corporation of India, which is into telecom.

Demand

Despite continued dominance of the roadways (>70 per cent value share) in the overall freight transport in India, railways dominate freight movement regarding several bulk products. Bulk commodities constitute almost 80 per cent of the railways' freight traffic due to better cost economics as compared to road transport.

Railways is working on more than 100 per cent capacity utilisation, highlighting the need to augment its freight-carrying capacity for handling increase in volume of traffic in the coming years. Given the strained capacity utilisation, Indian Railways needs to step up its investments.

The railway working committee has proposed an investment of Rs 2,510 billion in various projects over the Eleventh Plan period (2007-08 to 2011-12); close to three times the Tenth Plan outlay.

Supply

The route network of Indian Railways has expanded very slowly in the past having added nearly 10,000 kms over 62 years.

(Source: *Railways Vision 2020 Document*, Ministry of Railways)

In order to surmount strain in capacity utilisation, it is necessary to augment the freight-carrying capacity of railways for handling increase in traffic volume in the coming years. Considering the overwrought capacity utilisation, it is essential to step up investment by Indian railways.

(Source: CRISIL Research, *Indian Infrastructure Report*, November 2009)

While doubling of lines, gauge conversions, electrification and many other positive things did happen during the last six decades, the overall expansion of the Indian Railways to areas it did not serve earlier has been unacceptably slow.

To realize this potential, the Indian Railways must achieve annual growth of 10% over the next 10 years by developing a sharper commercial focus with a strong social commitment.

(Source: Railways Vision 2020 Document, Ministry of Railways)

Major Initiatives

Vision 2020

Gross Revenue of the Indian Railways has remained at a level of around 1.2% of India's GDP over the last 10 years. The vision is to take it to 3% in the next 10 years. India's GDP is expected to exceed US\$ 2 trillion (Rs. 90 lakh crore) by the year 2020. With GDP at this level, Indian Railways has the potential to grow to around Rs.2,70,000crore of revenue from around Rs. 90,000 crore at present.

Summary of Broad Goals of Vision 2020

Broad category	Short Term Target (2010-11-2011-12)	Long-term Target (2012-2013-2019-20)	Total Target

- In order to achieve the goals mentioned above the following strategy will be adopted by the Ministry of Railways in the Infrastructure segment:-
- In the short to medium term, the emphasis would be to remove bottlenecks and create capacity quickly.
- Project execution capability would be strengthened.
- Port connectivity works would be taken up on priority in partnership with ports and other major users.
- A non-lapsable dedicated fund will be set up to fund new line projects and wipe out the entire throw forward of new line projects.
- Connectivity projects to the North-East (new line and gauge conversion) and J&K (new line) would be accorded priority. All state capitals would be connected by rail.
- Segregations between commuter and non-commuter lines in large cities with population exceeding one million shall be achieved by partnership with state governments and city authorities.

Dedicated Freight Corridor

As part of its expansion initiatives, Indian Railways have undertaken Dedicated Freight Corridor (DFC) as one of their important projects, with the objective of building a dedicated rail corridor for freight movement on both western and eastern routes. Through DFC, Indian Railways intends to create rail infrastructure with the capability of transporting a substantially higher level of freight traffic.

Total length of the multimodal high axle load network comprising two corridors is 7,462 km, of which the route length is 2,793 km and feeder route length is 4,669 kms. Of the total route length, the eastern DFC and western DFC constitute 1,278 km and 1,515 km, respectively. The eastern DFC and western DFC constitute 2,587 km and 2,082 km, respectively of the total feeder route length. Rs 281 billion

investment in DFC is expected to ease congestion on the railway network and facilitate growth of bulk freight and container rail movement.

Funding Sources

Break up of projected public private investment (Rs Bn)

P: Projected

In the next 5 years, around 65-70 per cent of investment in railways is expected to be funded through budgetary support and extra budgetary resources. Internal accruals of the railways are likely to fund the rest.

With increasing cargo containerisation, demand for container movement by rail has grown rapidly. This was hitherto a monopoly of the Container Corporation of India, a PSU entity. In a major initiative in PPP, container movement has been thrown open to competition with 15 private sector entities being licensed for running container trains. Private sector container trains have commenced operations; operators would also be expanding investment into container handling facilities such as Inland Container Depots, etc.

In addition to above, private players are expected to make high investments in setting up logistics parks and free trade warehousing zones (FTWZs) across India.

FUTURE OUTLOOK ON INFRASTRUCTURE:

Taking in to consideration both new and latent demand, CRISIL Research estimates infrastructure expenditure to nearly double to Rs 32 trillion (\$700 billion) over 2009-10 to 2013-14 period. CRISIL Research believes that even if new demand for infrastructure across sectors is ignored, bridging the latent demand itself presents a huge investment opportunity.

In the past few years, the government has taken initiatives to bridge the gap in infrastructure by encouraging private participation in a number of sectors. However, the gap is very huge and demand is growing at a faster pace. Therefore, in order to realize the potential economic growth rate in the long term, investments would need to grow at a much faster pace.

(Source: CRISIL Research, Indian Infrastructure Report, November 2009)

Infrastructure sector received an impetus in the Government's policy package, which includes measures such as permission to India Infrastructure Financing Company (IIFCL) for raising tax free bonds, removal of interest ceiling on external commercial borrowings (ECB), enhancing of cap on FII investment in corporate debt market, easy refinancing from the Reserve Bank and creation of Special Purpose Vehicle (SPV) to lend to non-bank finance companies.

With a view to enhancing the competitiveness of the domestic industry by providing quality infrastructure through public-private partnership (PPP) in select functional clusters/locations which have the potential to become globally competitive, the Government of India has recast the Industrial Infrastructure Upgradation Scheme (IIUS). The salient features of this scheme include creation of quality infrastructure in existing industrial clusters/locations with high growth potential requiring strategic interventions in providing common facilities for transport, road, power supply, effluent treatment and solid waste disposal, information and communication technology (ICT) and such other physical infrastructures.

Business Strategy

Expand our business by bidding for higher value projects

With the growth in investments and the government's emphasis on developing infrastructure at a faster pace through public private partnership, we believe that a considerable number of large infrastructure projects will be structured on a BOT or PPP basis. We intend to take advantage of these opportunities. Our Company has selectively started bidding for PPP projects by evaluating the technical and commercial feasibility of such projects.

Our Company has been executing Irrigation segment projects for more than two decades. We believe that we have developed expertise into building Dams / Spillways, Canals and Tunnels. Our Company is also present in Railways and Industrial segment. We intend to further strengthen our position by bidding for higher value projects, which will help us in improving margins.

Creation of Revenue Generating asset base

We intend to build a strong asset base with constant revenue flows and high value potential. As on November 30, 2010 our Company's investment into fixed assets has been ₹ 4377.42 Lakhs (net of accumulated depreciation). Our company has been investing into equipment as per business requirements. With diversification and increased order book position we had expanded our equipment bank. With the growth in the order book, we would require a number of capital equipment to pre-qualify and bid for and implement larger and more technically complex projects. The acquisition of such equipment and addition of the same to the existing equipment base will reduce the dependability on third party equipment operators and thereby enabling our Company to achieve higher operating margins. Our Company proposes to raise ₹ 4198.71 Lakhs for buying capital equipment as stated in the section titled "Objects of the Issue" beginning on page 58 of this DRHP.

Having a pan-India presence by bidding & procuring projects funded by Central & State government as well as other recognized institutions

Our Company started operations with projects in Andhra Pradesh and Karnataka. Currently, our Company has on-going projects in the states of Andhra Pradesh, Maharashtra, Madhya Pradesh, Assam, Tripura, Karnataka, West Bengal, Tamil Nadu and Bihar. All these projects are either from Central & State government bodies / agencies, Public Sector Enterprises and Private Sector Enterprises. We intend to take advantage of growth opportunities for our business in the infrastructure segment by expanding our business to other geographical locations.

Diversify our business activities into other Infrastructure segments

From being a player undertaking civil construction works our Company has grown into segments like Irrigation, Industrial projects and Railways. Our Company intends to undertake BOT (Toll) Road projects in the near future. BOT projects in Road segment provide long-term sources of revenue. Going forward, we further intend to enter into Ports as well as Repairs & Maintenance activities under Roads & Railways.

Business Operations

Our Company's past growth is a result of the professional approach adopted by the management towards various aspects of the infrastructure business.

Projects undertaken by our Company are mainly through competitive bidding. Currently we undertake the following contracts –

1. Lump sum turnkey Contracts – bidding for contracts by quoting a fixed sum for the entire project which includes providing Designs, Drawings & Specification, Engineering and Execution.
2. Item Rate Contracts – bidding for contracts by quoting rates for individual items of work on the basis of schedule of quantities furnished by the client. The design, drawings and specifications are provided by the client.

The business of our Company is carried out through five distinct processes viz., Business Development; Contract Bidding; Post Tender Follow-up; Commercial & Purchase and Execution & Completion of Contract Works. The detailed description of each process is as follows –

Business Development

Our Company being in a competitive space, is always on the lookout for potential business opportunities. Contracts in the infrastructure space are awarded through competitive bidding. The process of business development is as follows:

- Information collection from Newspaper or Online notifications
- Short-listing of projects based on geographical location, project cost, client, resources and manpower
- To attend pre-bid meetings & understand key requirements
- Decide on the JV partner, as per the requirements of the project
- Submit pre-qualification report along with the requisite documents
- Establish contact with prospective clients / consultants and follow-up with them

Contract Bidding

On identification of the potential business opportunities, our Company will go through the process of bidding for contracts based on factors like resources requirements, pre-qualification parameters, financial position, project

specifications, etc. Our Company follows a methodical process for bagging contracts. The contract bidding process followed is enumerated as below –

- Obtain tender documents & understand pre-qualification formalities
- Assessing need for Joint Venture & entering into Joint Venture agreement, if required
- Planning department to obtain inputs from various departments for estimation of various parameters like cost, manpower, equipment, etc.
- Preparation of tender – BOQ, Price analysis, planning etc. & review tender conditions.
- To finalise & submit tender documents along with EMD

Post Tender Follow-up

This process starts with the submission of the tender documents. Our Company has a team that follows up with the clients to understand the developments taking place. This process is important as it will help the team to analyse the business development process, trends in the industry, pricing practise being followed by other players, etc. The post tender follow – up process followed by is enumerated as below:

- Opening of tenders on the specified date and identification of the tender value
- Announcing the sequence of contractors as L1, L2, L3, etc. based on the tender value with L1 being the lowest.
- If our Company is L1, then we will have to complete all formalities like –
 - Sign contract agreement
 - Take possession of the site
 - Obtain documents for Mobilisation Advances, etc.
- If our Company is not L1, then we will try to analyse the grounds on which we lost the tender
- Submit request for refund of EMD

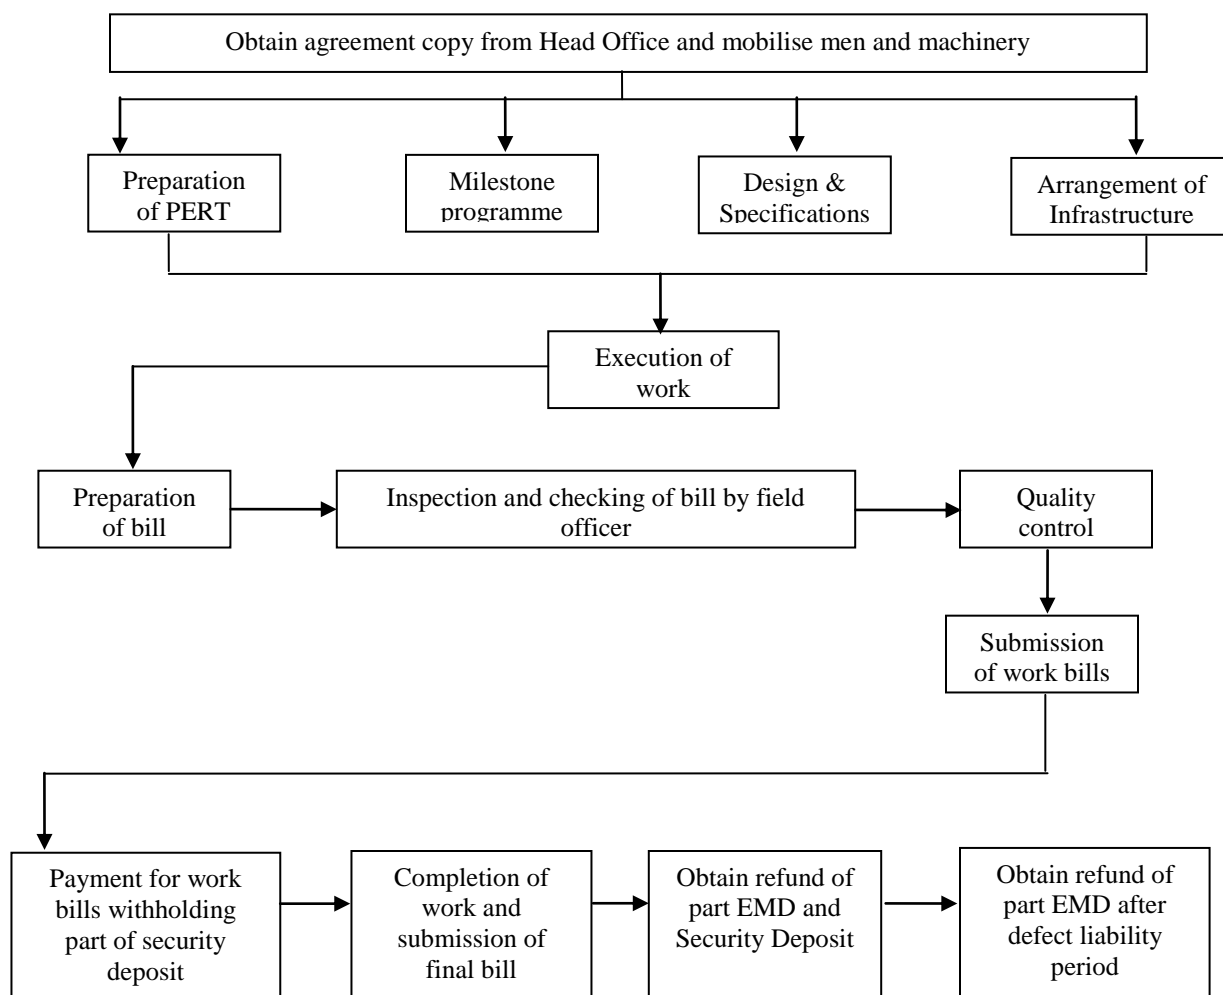

Commercials & Purchase

Once the contract is awarded, our Company will make arrangements for the required raw material, labour and equipment depending on the size and schedule of the project. Our Company doesn't have any identified source of raw material or a firm contract with any supplier of raw materials. The major raw material for projects undertaken by our Company are boulders, stone aggregates, cement, steel, bitumen, sand, fuel and water. The Commercial & Purchases department in conjunction with the Projects Management team draws up the raw material delivery schedule and places orders with the shortlisted vendors. - c. Each Bid cum Application Form will give the Bidder the choice to bid for upto three optional prices (for details refer to the paragraph entitled “Bids at Different Price Levels” below) within the Price Band and specify the demand (i.e. the number of Equity Shares Bid for) in each option. The price and demand options submitted by the Bidder in the Bid cum Application Form will be treated as optional demands from the Bidder and will not be cumulated. After determination of the Issue Price, the maximum number of Equity Shares Bid for by a Bidder at or above the Issue Price will be considered for allocation/Allotment and the rest of the Bid(s), irrespective of the Bid Price, will become automatically invalid.
- d. The Bidder cannot Bid on another Bid cum Application Form after his or her Bids on one Bid cum Application Form have been submitted to any member of the Syndicate or the SCSBs. Submission of a second Bid cum Application Form to either the same or to another member of the Syndicate or SCSBs will be treated as multiple Bids and is liable to be rejected either before entering the Bid into the electronic bidding system, or at any point of time prior to the allocation or Allotment of Equity Shares in this Issue. However, the Bidder can revise the Bid through the Revision Form, the procedure for which is detailed under the paragraph titled “Build up of the Book and Revision of Bids”.
- e. The members of the Syndicate/ SCSBs will enter each Bid option into the electronic bidding system as a separate Bid and generate a Transaction registration Slip (TRS), for each price and demand option and give the same to the Bidder. Therefore, a Bidder can receive upto three TRSs for each Bid cum Application Form.
- f. The BRLMs shall accept Bids from the Anchor Investors during the Anchor Investor Bid/ Issue Period i.e. one Working Day prior to the Bid/ Issue Opening Date. Bids by QIBs under the Anchor Investor Portion and in the Net QIB Portion shall not be considered as multiple Bids.
- g. During the Bid/ Issue Period, Bidders (other than QIBs), who are interested in subscribing for the Equity Shares may approach any of the members of the Syndicate to submit their Bid. The member of the Syndicate shall accept Bids from all the Bidders and shall have the right to vet the Bids in accordance with the terms of the Syndicate Agreement and the Draft Red Herring Prospectus. Bidders (other than Anchor Investors) who wish to use the ASBA process should approach the Designated Branches of the SCSBs to register their Bids.
- h. Along with the Bid cum Application Form, all Bidders (other than ASBA Bidders) will make payment in the manner described under the paragraph titled “*Payment Instructions*” of the Draft Red Herring Prospectus.
- i. Upon receipt of the ASBA Bid cum Application Form, submitted whether in physical or electronic mode, the Designated Branch of the SCSB shall verify if sufficient funds equal to the Bid Amount are available in the ASBA Account, as mentioned in the ASBA Bid cum Application Form, prior to uploading such Bids with the Stock Exchanges.
- j. If sufficient funds are not available in the ASBA Account, the Designated Branch of the SCSB shall reject such Bids and shall not upload such Bids with the Stock Exchanges.
- k. If sufficient funds are available in the ASBA Account, the SCSB shall block an amount equivalent to the Bid Amount mentioned in the ASBA Bid cum Application Form and will enter each Bid option into the electronic bidding system as a separate Bid and generate a TRS for each price and demand option. The TRS shall be furnished to the ASBA Bidder on request.
- l. The Bid Amount shall remain blocked in the aforesaid ASBA Account until finalisation of the Basis of Allotment and consequent transfer of the Bid Amount against the Allotted Equity Shares to the Public Issue Account, or until withdrawal/ failure of the Issue or until withdrawal/ rejection of the ASBA Bid cum Application Form, as the case may be. Once the Basis of Allotment is finalized, the Registrar to the Issue shall send an appropriate request to the Controlling Branch of the SCSB for unblocking the relevant ASBA Accounts and for transferring the amount allocable to the successful Bidders to the Public Issue Account. In case of withdrawal/ failure of the Issue, the blocked amount shall be unblocked on receipt of such information from the Registrar to the Issue.

In case the total amount (i.e. original Bid Amount plus additional payment) exceeds ₹2,00,000, the Bid will be considered for allocation under the Non Institutional Bidders category in terms of the Draft Red Herring Prospectus.
