For the details about the "Key Managerial Personnel", please refer to page 72 of RHP. Our future performance will depend upon the continued services of these persons. Demand for key managerial personnel in the industry is intense and our inability to attract and retain key managerial personnel may affect the operations of our Company.

11) Our indebtedness and the conditions and restrictions imposed by our financing and other agreements could adversely affect our ability to conduct our business and operations.

We have incurred a substantial amount of indebtedness which could adversely affect our financial condition. As on March 31, 2011, we had total debt of approximately Rs. 1252.04 Lacs. In addition, we may incur substantial additional indebtedness in the future. Our indebtedness could have several significant consequences including but not limited to the reduction of the availability of our cash flow to fund working capital, capital expenditures and other general corporate requirements. Also fluctuations in market interest rates may affect the cost of our borrowings.

Apart from that as per the terms of the loan agreements, the company can not do the certain activities, during the Currency of the bank's credit facilities, without the bank's/lead arranger's prior permission in writing of the Banks, which amongst other, includes:

13) Our Equity Shares pursuant to the Issue will not be listed on the NSE which is one of the exchanges having nationwide terminals and it could affect the trading volumes of our Equity Shares.

We had filed an application with the NSE seeking an in-principle listing approval for our Equity Shares. However, pursuant to a view of our Board, there was a considerable delay from NSE to accord its in principle. Keeping in mind of avoiding any further delay for the upcoming public issue; we have withdrawn the said application on September 30, 2010. Consequently, our Equity Shares will not be listed on the NSE, which is one of the exchanges having nationwide terminals and it could affect the trading volumes of our Equity Shares.

16) We do not currently have long term contracts or exclusive supply arrangements with any of our vendors, though we are dependent on a few suppliers. Any major disruption to the timely and adequate supplies of our raw materials could adversely affect our business, results of operations and financial condition.

The major raw materials which are used by the company are Poly Propylene, Poly Ethylene, LDPE and LLDPE. The raw material consumption cost is 64.90% of the total Expenditure of the Company for the financial year 2010-11. Our Company is dependent on a few suppliers for raw materials and we do not currently have long term contracts or exclusive supply arrangements with any of our vendors. Further, we are dependent on adequate and timely deliveries of necessary raw materials or equipment. In the event of a delay, inadequacy or default in deliveries by any of our vendors, we may not be able to obtain substitutes on an adequate and timely basis or on commercially acceptable terms. A major disruption to the timely and adequate supplies of our raw materials could adversely affect our business, results of operations and financial condition.

17) There is risk associated with price fluctuation of raw material and finished product

In the past, there have been fluctuations in the prices of critical raw materials. Such fluctuations in prices of raw material and the Company's inability to negotiate at optimum market rates may affect its profitability. Similarly, the prices of finished products have also shown price variations, which may impact its profitability.

18) The present project is funded mainly from the proceeds of present public issue. Due to the delay in the public issue, there has been a delay in the schedule of implementation of the project that the company proposes to undertake.

The cost of project is to be funded mainly from the IPO. Due to the delay in the public issue, there has been a delay in the schedule of implementation of the project that the company proposes to undertake. Failure to complete the project according to its schedule, may give rise to potential liabilities, as a result our returns on investments may be lower than originally expected, which may have a material adverse impact on the business operations and profitability of our Company.

19) We have not made firm arrangements for increased demand in power and water for the proposed project.

We have yet to apply for additional power and water. We will apply to West Bengal State Electricity Distribution Company Limited for additional power and will apply to Haldia Development Authority for additional water once our project is near completion. Any delay in getting the additional power and water might result in additional cost and time overrun to the company.

20) There may be further equity offerings in the Company which will dilute the shareholding of existing shareholder.

The Company may require further infusion of funds to satisfy its capital needs and future growth plans, which the Company may not be able to procure. Any future equity offerings by the Company may lead to dilution of equity and may affect the market price of the Equity Shares.

21) We are dependent on our management team and key personnel and loss of any key team member may adversely affect our business performance.

Our success depends on the continued services and performance of the members of our management team and other key employees. If one or more members of our senior management team were unable or unwilling to continue in their present positions, those persons could be difficult to replace with competent employees and our business could be adversely affected. Moreover, we do not own any key person insurance. As such, any loss of our senior management personnel or key employees could adversely affect our business, results of operations and financial condition.

22) Failure to effectively manage labour or failure to ensure availability of sufficient labour could affect the business operations of the Company.

There has been a strike in the manufacturing unit for the period from June 23, 2009 to July 28, 2009 for the wage dispute. The sales & profitability of the Company was adversely affected for these 36 days. Further, the existing plant of the company is not owned by us and it has been leased for 90 years by Haldia Development Authority. If any of the owners of these leased and/or rented premises do not renew the agreements under which we occupy the premises on terms and conditions acceptable to us, or at all, or dispute the validity of the lease and/or rent, we may suffer a disruption in our operations.

24) Our business is dependent on our manufacturing facilities. The loss of or shutdown of operations at any of our manufacturing facilities may have a material adverse effect on our business, financial condition and results of operations.

Our manufacturing facilities are subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, labour disputes, strikes, lock-outs, continued availability of services of our external contractors, earthquakes and other natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. The occurrence of any of these risks could significantly affect our operating results. Although we take precautions to minimize the risk of any significant operational problems at our facilities, our business, financial condition and results of operations may be adversely affected by any disruption of operations at our facilities, including due to any of the factors

25) The Company may face significant competition from a number of sources.

The packaging market in India is highly competitive with a large number of players. We expect the competition to intensify and increase from a number of sources. We believe that the principal competitive factors in our markets are price, quality and raw material supply. There are many companies in India, which are present across the value chain and hold a commanding position in the industry; such companies pose a threat to our Company.

26) Failure to comply with environmental laws, rules and regulations may adversely affect our business or operations.

A failure on our part to adequately comply with applicable environmental laws, rules and regulations, could hamper or adversely impact the operations of our Company, and consequently, could adversely affect the Company and its cash flows and profitability

27) The Company may continue to be controlled by our promoter group and other principal shareholders following this issue and our other shareholders may not be able to affect the outcome of shareholder voting.

After the completion of the Issue, our promoters group will collectively hold approximately 65.34% of the outstanding Equity Shares. Consequently, our Promoters and other principal shareholders, if acting jointly, may exercise substantial control over us and *inter alia* may have the power to elect and remove a majority of our Directors and/or determine the outcome of proposals for corporate action requiring approval of our Board of Directors or shareholders, such as lending and investing policies, revenue budgets, capital expenditure, dividend policy and strategic acquisitions/joint ventures.

28) Our insurance coverage may not adequately protect us against all losses. To the extent that we suffer loss or damage which is not covered by insurance or exceeds our insurance coverage, our results of operations and financial performance could be adversely affected.

Our Company has obtained insurance coverage in respect of certain risks. While we believe that the insurance coverage we maintain would reasonably be adequate to cover all normal risks associated with the operation of our business, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, nor that we have taken out sufficient insurance to cover all material losses. The Company has not taken any insurance for protecting us from future business losses and in the event of such losses occurring, the operations of our Company may be affected significantly. Furthermore, there can be no assurance that we will be able to maintain adequate insurance coverage in the future at acceptable costs. To the extent that we suffer loss or damage for which we do not obtain or maintain insurance or exceeds our insurance coverage, the loss would have to be borne by us and our results of operations and financial performance could be adversely affected.

29) We have entered into certain transactions in which our promoters are interested parties. For details of the Related Party Transaction, please refer to page no.148 of RHP.

The Company has entered into transactions with its promoters. There can be no assurance that the Company could not have achieved more favorable terms had such transactions not been entered into with related parties. Furthermore, it is likely that the Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on the Company's financial condition and results of operations. For further information on the transactions with the promoters, please refer "Details of related party transaction" on page 148 of this Red Herring Prospectus.

B. EXTERNAL RISK FACTORS BEYOND THE CONTROL OF THE COMPANY

Certain factors beyond the control of the Company could have a negative impact on the Company's performance, such as:

30) Changes in Government Policies and political situation in India

Since 1991, the Government of India has pursued policies of economic liberalization, including relaxing restrictions on the private sector. The Company cannot assure you that these liberalization policies will continue in future. Protest against liberalization could slowdown the pace of economic development. The rate of economic liberalization could change, specific laws and policies could change, and foreign investment, currency exchange rates and other matters affecting investing in our securities could change as well.

The current Indian Government is coalition of several parties. The withdrawal of one or several parties could result in political instability, which may have adverse affect on the capital market and investor confidence.

Any adverse change in Government policies relating to the packaging industry in general and plastic packaging in particular may have an impact on the profitability of the industry.

31) Changes in regulations

Changes in regulatory environment relating to manufacturing and marketing packaging products in and outside the country will significantly impact the business of the Company.

32) Regulation of Exports and Imports

Any change in regulations, domestic or international, having an impact on the packaging market in general, will affect the industry as a whole. Such changes may be in the nature of introduction of quota, tariff barrier, subsidies etc.

33) Risks arising from changes in taxation policies

Statutory taxes and other levies may affect our margin in the event of our inability to factor such expense in our trading margin. Any increase in taxes and/ or levies, or the imposition of new taxes and/ or levies in the future, may have a material adverse impact on our business, results of operations and financial condition.

34) Risk arising from violence and acts of terror

Terrorist attacks and other acts of violence or war involving India and other countries where the Company sells its products could affect the Company's business.

35) The Company is subject to risk arising from exchange rate fluctuations.

The exchange rate between the Rupee and other currencies is variable and may continue to fluctuate in the future. Fluctuations in the exchange rates may affect the Company to the extent of cost of imported raw material being bought from overseas vendors for the Company's products and also for the sales of the Company to its foreign buyers. Any adverse fluctuations with respect to the exchange rate of any foreign currency for Indian Rupees may affect the Company's profitability, since a part of its raw material will be purchased in foreign currency and also as a part of its sales is from its overseas sales.

36) Risk caused by changes in Interest rates and banking Policies

The Company is dependent on various banks and financial institutions for arranging the Company's working capital requirements, term loans, etc. Accordingly, any change in the extant banking policy or increase in interest rates may have an adverse impact on the Company's profitability.

37) Change in India's debt rating

Any downgrading of India's debt rating by an international rating agency could have a negative impact on our business and could materially effect our future financial performance, and the trading price of our equity shares.

38) Disruption in infrastructural facilities

Any disruption in supply of power, basic infrastructural facilities, telecom lines could adversely affect the business and production process of the Company or subject it to excess cost.

39) Economic Downturn

The Company's performance is highly dependent upon the growth of business and economy in the Country. An economic down turn may negatively impact the operating results of the Company.

40) Trading of shares only in Dematerialised form

Since the Equity Shares of the Company are required to be traded compulsory in demat form, shareholders who hold shares in Physical Form may not be able to trade in such Equity Shares unless they get their holding dematerialized.

41) Volatility of share prices on listing

After this Issue, the price of our Equity Shares may be highly volatile, or an active trading market for our Equity Shares may not develop. The prices of our Equity Shares on the Stock Exchange may fluctuate as a result of several factors, including:

- Volatility in the Indian and global securities market;
- Our results of operations and performance, in terms of market share;
- Performance of the Indian economy;
- Changes in Government policies;
- Changes in the estimates of our performance or recommendations by financial analysts;
- Significant developments in India's economic liberalization and deregulation policies; and
- Significant developments in India's fiscal and environmental regulations

SECTION III - INTRODUCTION

SUMMARY

The Investor should read the following summary with the Risk Factors included from page no ix to xvi and the more detailed information about the Company and the financial statements included in the Prospectus.

Industry Overview

Packaging may be looked at as several different types. For example a transport package or distribution package is the package form used to ship, store, and handle the product or inner packages. Some identify a consumer package as one which is directed toward a consumer or household. It is sometimes convenient to categorize packages by layer or function: "**primary**", "**secondary**", etc.

- Primary packaging is the material that first envelops the product and holds it. This usually is the smallest unit of distribution or use and is the package which is in direct contact with the contents.
- Secondary packaging is outside the primary packaging – perhaps used to group primary packages together.
- Tertiary packaging is used for bulk handling and shipping.

Using these three types as a general guide, examples of packaging materials and structures might typically be listed as follows:

Primary Packaging

- Aerosol spray can
- Bags-In-Boxes
- Beverage can
- Wine box
- Bottles
- Blister packs
- Carton
- Cushioning
- Envelopes
- Plastic bags
- Plastic bottles
- Skin pack
- Tin can
- Wrappers

Secondary Packaging

- Boxes
- Cartons
- Shrink wrap

Tertiary Packaging

- Bales
- Barrel
- Crate
- Container
- edge protector
- Flexible intermediate bulk container, Big bag, "Bulk Bags", or "Super Sacks"
- Insulated shipping container
- Intermediate bulk container
- Pallets

- **Slip Sheet**
- **Stretch wrap**

These broad categories can be somewhat arbitrary. For example, depending on the use, a shrink wrap can be primary packaging when applied directly to the product, secondary packaging when combining smaller packages, and tertiary packaging on some distribution packs

The Indian packaging industry holds a lot of potential. The industry is still at a very nascent stage. The importance of packaging has still not been fully realised in the Indian market.

- The market volume of the Indian packaging industry amounts to about Rs. 77,570 crore and has constantly grown by approximately 15 percent year on year.
- The pace of growth will accelerate to between 20-25 percent over the next five years.
- The highest demand for packaging and the associated equipment come from the food processing industry at 50 percent and from the pharmaceutical industry at 25 percent.
- The large growing middle class, liberalization and organized retail sector are the catalysts to growth in packaging. Also food and Pharma packaging are the key driving segments.

- Food retail turnover is expected to grow from the current Rs 3,39,365 crore mark to 7,27,212 crore by 2025.
- The pharmaceutical industry is expected to average an annual growth of 16 percent till 2012.
- There are about 600-700 packaging machinery manufacturers, 95 percent of which are in the small and medium sector located all over India.
- Indian packaging machinery imports are around Rs 606 crore (20-25 percent) while the Indian packaging machinery exports are rapidly growing.

Illustration of Book Building and Price Discovery Process (*Investors should note that the following is solely for the purpose of illustration and is not specific to this Issue*)

Bidders can bid at any price within the price band. For instance, assuming a price band of Rs. 20 to Rs. 24 per share, issue size of 1800 equity shares and receipt of five bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the website of the BSE (www.bseindia.com) and NSE (www.nseindia.com) during the bidding period. The illustrative book as shown below shows the demand for the shares of our Company at various prices and is collated from bids from various investors.

Number of equity shares Bid for	Bid Price (Rs.)	Cumulative equity shares Bid for	Subscription
500	24	500	27.77%
1000	23	1500	83.33%
1500	22	3000	166.67%
2000	21	5000	277.77%
2500	20	7500	416.66%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired quantum of shares is the price at which the book cuts off i.e., Rs.22 in the above example. The issuer, in consultation with the BRLM will finalise the issue price at or below such cut off price i.e. at or below Rs.22. All bids at or above this issue price and cut-off bids are valid bids and are considered for allocation in respective category.

Though the process of Book Building is not new now, investors are advised to make their own judgment about investment through this process prior to making a Bid or Application in the Issue. Pursuant to SEBI Regulations, QIBs are not allowed to withdraw their Bids after Bid/ Issue Closing Date.

As per provisions of section 111A of the IT Act, short term capital gains arising from transfer of short term capital asset, being an equity share in a company or a unit of an equity oriented mutual fund shall be taxable @ 15% (plus applicable surcharge and education cess), if such sale is entered into on or after October 1, 2004 and the transaction is chargeable to STT.

INDUSTRY OVERVIEW

(A) Packaging Industry Overview

Packaging may be looked at as several different types. For example a transport package or distribution package is the package form used to ship, store, and handle the product or inner packages. Some identify a consumer package as one which is directed toward a consumer or household. It is sometimes convenient to categorize packages by layer or function: "**primary**", "**secondary**", etc.

- Primary packaging is the material that first envelops the product and holds it. This usually is the smallest unit of distribution or use and is the package which is in direct contact with the contents.
- Secondary packaging is outside the primary packaging – perhaps used to group primary packages together.
- Tertiary packaging is used for bulk handling and shipping.

Using these three types as a general guide, examples of packaging materials and structures might typically be listed as follows:

Primary Packaging

- Aerosol spray can
- Bags-In-Boxes
- Beverage can
- Wine box
- Bottles
- Blister packs
- Carton
- Cushioning
- Envelopes
- Plastic bags
- Plastic bottles
- Skin pack
- Tin can
- Wrappers

Secondary Packaging

- Boxes
- Cartons
- Shrink wrap

Tertiary Packaging

- Bales
- Barrel
- Crate
- Container
- edge protector
- Flexible intermediate bulk container, Big bag, "Bulk Bags", or "Super Sacks"
- Insulated shipping container
- Intermediate bulk container
- Pallets
- Slip Sheet
- Stretch wrap

These broad categories can be somewhat arbitrary. For example, depending on the use, a shrink wrap can be primary packaging when applied directly to the product, secondary packaging when combining smaller packages, and tertiary packaging on some distribution packs

The role of packaging has changed from that of a carrier and protector to that of a marketing tool, performing a vital role in brand communication and on-shelf differentiation. Technological advancement has been one of the key drivers of growth in this industry. This industry is largely dependent on the fast moving consumer goods sector.

Indian Packaging industry with a growth of more than 15% p.a. accounts for USD 14 Billion. This shows the immense potential in the industry. This growth is expected to be doubled in next two years and figures indicate towards a change in the industrial and consumer set up. Packaging today, has grown in importance and is regarded as vital marketing tool. It enhances product value and helps expand market within and outside country. The packaging industry can be characterized as global and fast growing industry.

With a rapid growth in markets like Food, beverage, pharmaceutical, cosmetics and textile has provided momentum for the need of packaging as all these sectors need specialized packaging. Availability of most of the raw material in abundance that is required in packaging industry such as paper, plastic, board, glass, metal adds to the further growth of industry

The Indian packaging industry holds a lot of potential. The industry is still at a very nascent stage. The importance of packaging has still not been fully realised in the Indian market.

- The market volume of the Indian packaging industry amounts to about Rs. 77,570 crore and has constantly grown by approximately 15 percent year on year.
- The pace of growth will accelerate to between 20-25 percent over the next five years.
- The highest demand for packaging and the associated equipment come from the food processing industry at 50 percent and from the pharmaceutical industry at 25 percent.
- The large growing middle class, liberalization and organized retail sector are the catalysts to growth in packaging. Also food and Pharma packaging are the key driving segments.
- The Indian food market is estimated to total about Rs. 8,82,350 crore according to the 'India Food Report 2008' published by Research and Markets.
- Food retail turnover is expected to grow from the current Rs 3,39,365 crore mark to 7,27,212 crore by 2025.
- The pharmaceutical industry is expected to average an annual growth of 16 percent till 2012.
- There are about 600-700 packaging machinery manufacturers, 95 percent of which are in the small and medium sector located all over India.
- Indian packaging machinery imports are around Rs 606 crore (20-25 percent) while the Indian packaging machinery exports are rapidly growing.
- Germany and Italy are the largest suppliers of packaging machinery to India but focus is now shifting on Taiwan and China.
- Indian companies are now placing increasing emphasis on attractive and hygienic packaging. This promises enormous potential for the future.

This demand is **demand of processed raffia products** in terms of actual polymer used (in tape plant) **without taking in to account the weight of filler , lamination and liner.**

Production

The state wise production of Woven Sack based on 2007 – 08 situation is given in the table below:

Product	WB	Bihar	Jharkhand	Orissa	CG-EMP	NE	Fig in MTA
							Total
PP	52200	0	7900	5700	13200	3000	82000
HDPE	7750	0	0	1450	0	0	9200
Total	59950	0	7900	7150	13200	3000	91200

Out of the total production, around 9000 MTA of raffia product is exported. So the domestic supply within ER by the local manufacturers is – 82000 MTA.

Exports:

Total export of raffia products from Eastern Region is 9000 MTA which includes 6000 MTA of jumbo bags (FIBC). At present there are 5 manufactures in Eastern India producing about 7000 MTA of FIBC.

Demand-Supply Gap

The demand supply summary of woven sack / fabric market in Eastern India is given in the table below:

Demand	112, 200 MTA
Production	91,200 MTA
Exports	9000 MTA
Domestic Supply	82200 MTA
Gap	30000 MTA
Available Market for New Unit	30000 MTA + Exports + National Sales

Future growth

- Raffia market (processed product) in the East has witnessed – 16% growth in demand in 07-08 over 06-07. Similar growth is likely to continue in the coming years (20% CAGR by 2009-10 over 2007-08).
- East is likely to witness a significant cement capacity addition in the coming years. Around 20 million MTA of cement capacity is to be added between 08-09 & 09-10 in the East, which will generate additional demand of 32000 MTA of raffia bags.
- Leno bag, a variant of raffia bags, is being used in potato packaging in West Bengal and become popular in Bihar. This market is still in short supply and about two third market being catered primary from South India. This sector has a longer term potential of 6000 MTA in the East.

- West Bengal, specifically the port cities of Haldia and Kolkata has all the potential to become an export hub for FIBC, tarpaulin, leno bag & other raffia products. The global demand for these product is extremely high and due to labor intensively of the raffia manufacturing process, the developed countries find it more economic to source this from the developing world. West Bengal has already been recognized by the world as a sourcing hub for such products.

Investment Opportunity in West Bengal

- Three major raw materials for raffia manufacturing are raw material, power and labor. Considering the input cost of all these components, West Bengal is the one of cheapest in the country. This will help local units to become competitive in all India marketing.
- GO WB is offering special additional incentive of 25% of total power bill over above the other normal incentives for 33 KV line & 1500 KVA maximum demand load. A new raffia unit with 2 X 600 kg/hr line set up in WBSEDCL area can easily avail this benefit.
- A Petroleum, Chemical & Petrochemical Invest Region (PCPIR) is being set up at Nayachar. This will bring two fold opportunity for raffia industry – a) boost in demand for chemicals packing & b) opportunity to set up raffia unit within the PCPIR.

Conclusion

The demand supply gap suggest that there is an **immediate opportunity for 10 more 450 kg/hr raffia lines** to fulfill the gap in the domestic market. Over and above that, further demand will be created from the exports markets, organic growth in the consuming sectors , new application development and national sales outside the Eastern Region.

In a nutshell, there is a very significant investment opportunity for the raffia industry particularly for the large size units. The new industry should ideally target both the domestic as well as the exports market (particularly for FIBC, Leno Bag & Tarpaulin).

As our Products are manufactured out of different kinds of polymers, it is necessary to understand Petrochemical and Polymer industry in India as well.

Petrochemicals

Petrochemicals are derived from various chemical compounds, mainly from hydrocarbons. These hydrocarbons are derived from crude oil and natural gas. Among the various fractions produced by distillation of crude oil, petroleum gases, naphtha, kerosene and gas oil are the main feed-stocks for the petrochemical industry. Ethane and natural gas liquids obtained from natural gas are the other important feedstock's used in the petrochemical industry. Olefins (Ethylene, Propylene & Butadiene) and Aromatics (Benzene, Toluene & Xylenes) are the major building blocks from which most petrochemicals are produced.

Petrochemical manufacturing involves manufacture of building blocks by cracking or reforming operation; conversion of building blocks into intermediates such as fibre intermediates (Acrylonitrile, Caprolactum, Dimethyl Terephthalate/Purified Terephthalic Acid, Mono Ethylene Glycol); precursors (Styrene, Ethylene Dichloride, Vinyl Chloride Monomer etc.) and other chemical intermediates; production of synthetic fibres, plastics, elastomers, other chemicals and processing of plastics to produce consumer and industrial products.

Petrochemical products namely synthetic fibers cater to the clothing needs of mankind and are used in both apparel and non-apparel applications.

(Sources:<http://chemicals.nic.in/petro3.htm>)

Polymer

Polymers find major applications in packaging for preservation of food articles, molded industrial and home appliances, furniture, extruded pipes etc. Synthetic rubbers are used for making various types of tyres and non tyre rubber goods and supplement natural rubber. Surfactant intermediates are used in the manufacture of detergents.

The polymer business is broadly based on the changing dynamics of the user industry. The industrial growth which contributes to the growth of the economy is a prime driver for the growth in the polymer business.

Additionally, changing preferences and costs of packaging are other factors that affect growth.

Performance of Indian Polymers Industry

India's per capita demand for polymers is still a minuscule 6 kg vis- vis world average of 27 kg. A large base of converting industry and a growing domestic market as well as export will make India an interesting place for polymer business in the years to come. India has the advantage of high population and expected to maintain high economic growth. This should propel the India's consumption in polymer to new levels in coming year.

Flexible Packaging

Plastics flexible packaging is a very dynamic and competitive business. This is particularly in the commodity monolayer films or simple 3 layer structures, providing an overall protection with moisture barrier and inferior barrier properties limiting shelf life.

With almost 40% of the global population and GDP more than US\$5 trillion at the purchase power parity, both India and China are becoming very important global economic centers. The dynamic change in lifestyle of the growing younger generation in Asian countries like China and India, has increased the scope of multi layer structures, including Aluminum foil to enhance the barrier properties against Oxygen and Carbon Dioxide etc.

The flexible packaging market in these two countries alone, is growing at an average rate of 12-15%, compared to about 6% globally. Despite the large mature market of Japan, the Asian region is expected to grow between 8-10%. The developed regions of North America and Europe are expected to grow at more than 4%, significantly higher than their GDP growth.

The plastics flexible packaging is dominated by Polyolefins mainly from Pe. It is estimated that Pe has almost 75% share of the flexible packaging market. BOPP and cast PP films would be responsible for an additional 10-12 % share. The only other commodity polymer, with a decent share (almost 5-7%) is PVC. Although the specialty barrier resins are very crucial for the growth of the industry, they have only 2-4% share in volumes.

These specialty barrier resins are very efficient and therefore are required at significantly lower levels, though their contribution in the value of the packaging would be much higher.

Packtech

Textiles made of man-made fibres/filament yarns and used in packaging are in great demand. The Rs 14,000 crore market for technical textiles used in packaging, commonly known as packtech, is estimated to grow to around Rs 26,000 crore by 2012-13. Packtech includes several flexible packaging material for packing industrial, agricultural, consumer and other goods. Products like polyolefin woven sacks, leno bags, wrapping fabric, jute hessian and sacks, soft luggage, tea-bags filter paper and jumbo-sized bags fall under the category. Jumbo-sized ordinary bags or tote bags are technically known as flexible intermediate bulk container (FIBC).

Demand for packaging products is dependent on industrial growth. In the medium term (next five years), the packaging industry is expected to grow by 13% per annum. Within the industry, polymer-based products like woven sacks, FIBC, leno bags and wrapping fabric are expected to grow higher at a CAGR of 17% during the period. The maximum growth in packtech consumption is expected in the FIBC segment which is used for bulk packaging segment. With exports multiplying each year, demand for FIBC is expected to shoot up to 4.5 lakh tonne over the next five years from the existing consumption of 1.5 lakh tonne.

Life Cycle analysis study of Synthetic, Jute and Paper Woven Sacks illustrate the advantages

Indian Institute of Technology, Delhi conducted an exhaustive life cycle study (in the Indian environment) on various types of 50 kg bags used for packaging of several commodities, including cement, fertilizers and food grains. Some of these products have been so far reserved exclusively for jute bags essentially to protect the jute growing community. This study, involving the entire cycle from production of raw materials, conversion to bags, transportation of the packed commodity product to the disposal and recovery of the basic raw materials in the Indian environment reveals some very interesting facts:

- Synthetic bags made from HDPE/PP are much lighter and save almost 3 to 5 times of packaging material as compared to jute and paper bags.
- The lower material weight obviously would save significant amount of energy during manufacture of raw materials and conversion into bags. The study shows that jute bags would require almost 50% more energy and paper bags about 300% more energy compared to synthetic bags.

- Synthetic bags require very insignificant amount of water compared to jute and paper bags. Similarly, the consumption of chemicals for synthetic bags is negligible as compared to jute and paper bags.
- The lighter weight of the synthetic bags provides significant saving of fuel and therefore energy during transportation.

Environmental effect on usage of Plastics in packaging

Packaging is one of the major applications of plastics. Compared to alternative materials, a plastic package has significantly lower weight (between two and eight times lighter, depending on the application). This advantage results in a lower overall carbon footprint, despite a higher production footprint per kilogram of material

(about 2-4 kgCO₂e per kg plastic versus 0.7 kgCO₂e per kg for glass and paper, 3 kgCO₂e per kg for thin steel and 8 kgCO₂e per kg for aluminum).

To quantify the savings, the packaging market is segmented in seven applications: "Small packaging", "Beverage bottles", "Other bottles", "Other rigid packaging", "Shrink and stretch films", "Carrier bags", and "Other flexible packaging". In total seven different plastics (LDPE, HDPE, PP, PVC, PS, EPs, PET) were considered against seven reference materials (white glass, thin steel, aluminum, corrugated board, paper/cardboard, beverage carton, wood).

Films and bottles, with 67 MtCO₂e and 97 MtCO₂e respectively, are the largest contributors to the total savings of ~220 MtCO₂e. (Source: 'Innovations for Greenhouse Gas Reductions' by International Council of Chemical Associations: July 2009)

Technology

The Company is using Extrusion & Weaving Technology for the current manufacturing activity.

Process

MANUFACTURING PROCESS FLOW CHART

The manufacturing process can be divided into seven different phases as explained below:

- Extrusion of PP granules into different types of Tapes
- Weaving the tapes into fabrics in circular looms
- Printing
- Cutting of woven cloth of desired sizes
- To makes sacks PP woven sacks fabric by stitching
- Bailing
- Lamination

The manufacturing process is described as under;

1. PP Granules, the main raw material for tape manufacturing are mixed by the computerized dozer as per requirement and extruded by a Screw Extruder rotation in a fixed barrel, with Screw configuration for material, mixing sharing, melting and final mixing to develop pressure between 250 to 300 to enable plastic material to flow from a flat Die with control of $\pm 0.5\%$ and the same quenched from 250 degrees to 25 degrees centigrade, making more oriented grain structure locked in the cast film, by cold water. The film is then wiped off water and silted by multi slitters for required tape width between 2mm to 5mm, to be obtained by mono orientation through a hot air woven to adopt chain structure in PP. the same tape is then annealed by heating and cooling arrangement before winding, by high speed magnetic tension controlled cheese winders, to get adequately tight wound bobbin for binder tape /using in circulars looms. The edge trimmings are re-cycled to the extruder.
2. The tape thus extruded and winded on bobbins are feed into the circular looms creel for warp feed & welt feed for Weaving the required size of tubular fabric for woven bags/FIBC bags/tarpaulins crushing the tape and covering the maximum surface area with minimum weight adequate strength for packing.

3. The fabric thus produced has lot of perforation, which is not suitable to pack hydroscopic, free flowing, material & bulk materials like Urea, DAP, pesticides and are laminated by giving a coating on both the sides of flat fabric by LDPE extruded film for tarpaulins and laminated fabric.
4. The fabric, laminated or unlimited are cut to size as per the customers specifications by heat cutting process, in order to avoid tape frying due to heat sealing.
5. The cut fabric is stitched on the sides by automatic double needle stitching machine for conversion into sacks. The stitched bag is printed in multi colours. Bags are inspected for the pattern, weight etc. The bags are then packed in bales with the help of bailing machine. The finished bags, FIBC bags, tarapauliuns are made in to bales, each containing 50 to 70 KGS per bale and binder tapes are packed in cartons containing 50 to 70 KGS per cartons which are ultimately dispatched to the customers.

An analysis of reasons for the changes in significant items of income and expenditure is given hereunder:

1. Unusual or infrequent events or transactions

There have been no events, other than as described in this Red Herring Prospectus, which may be called "unusual" or "infrequent".

2. Significant economic changes that materially affected or are likely to affect income from continuing operations

Any slowdown in the growth of Indian economy or future volatility in global commodity prices, could affect the business, including the future financial performance, shareholders' funds and ability to implement strategy and the price of the Equity Shares.

3. Known trends or Uncertainties that have had or are expected to have a material adverse impact on sales, revenue or income from continuing operations

There are no known trends or uncertainties that may have material adverse impact on the income, costs and profits of the company from continuing operations.

4. Future changes in relationship between costs and revenues, in case of events such as future increase in labour or material costs or prices that will cause a material change are known

Increase in the cost of the products in which the Company deals, will affect the profitability of the company. Further, the company is not able to pass on the increase in prices of the product to the customers in full. This can be offset through cost reduction.

5. The extent to which material increases in net sales or revenue are due to increased sales volume, introduction of new products or services or increased sales prices

The increase / decrease in turnover is only on account of increase in sales prices and volume.

6. Status of any publicly announced new product

We have not publicly announced any new products. However, we are in the process of entering new Technical Textile applications consisting of geotextiles, pond liners, canal liners, flexi-tanks, etc. these value-added products offer good realizations and margins as compared to its PP-based woven packaging products. We believe there is a good potential for our concept products like rain water pond and woven PP canal liner in India, at the backdrop of water scarcity, drought etc.

7. The extent to which the business is Seasonal

Our business is not seasonal and no major cyclical trends are observed in this industry.

8. Total turnover of each major industry segment in which the Company operated

The Company operates in only one Industry Segment that is Packaging industry.

9. Any significant dependence on a single or few suppliers or customers

The Major Supplier for raw material is Haldia Petrochemical Ltd; however company does not foresee any difficulty in getting raw materials at reasonable price.

The Company is largely dependent on single and few customers, as the top one and top ten customers constitutes around 15% and 85% of the total income for the year 2010-11. In addition, company is also dependent on few suppliers as top one and top ten suppliers constitutes around 43% and 91% of the total purchases (other than capital goods) for the year 2010-11. Top one foreign customer constitutes around 4% of income for the year 2010-11.

10. Competitive conditions

The company will face competition from existing as well as new players in packaging industry in India.

The advertisement, subject to the provisions of Section 66 of the Companies Act, shall be in the format prescribed in Schedule XIII of the SEBI ICDR Regulations. The Syndicate and the SCSBs shall accept Bids from the Bidders during the Bid/ Issue Period.
2. The Bid/ Issue Period shall be a minimum of three Working Days and not exceeding ten Working Days (including the days for which the Issue is open in case of revision in Price Band). In case the Price Band is revised, the revised Price Band and Bidding Period will be published in one English national daily, one Hindi national daily and one regional daily newspaper with wide circulation, where the Registered Office of our Company is situated and the Bid/ Issue Period may be extended, if required, by an additional three Working Days, subject to the total Bid/ Issue Period not exceeding ten Working Days. 3. Each Bid cum Application Form will give the Bidder the choice to bid for upto three optional prices (for details refer to the paragraph entitled “Bids at Different Price Levels” below) within the Price Band and specify the demand (i.e. the number of Equity Shares Bid for) in each option. The price and demand options submitted by the Bidder in the Bid cum Application Form will be treated as optional demands from the Bidder and will not be cumulated. After determination of the Issue Price, the maximum number of Equity Shares Bid for by a Bidder at or above the Issue Price will be considered for allocation/Allotment and the rest of the Bid(s), irrespective of the Bid Price, will become automatically invalid.
4. The Bidder cannot Bid on another Bid cum Application Form after his or her Bids on one Bid cum Application Form have been submitted to any member of the Syndicate or the SCSBs. Submission of a second Bid cum Application Form to either the same or to another member of the Syndicate or SCSBs will be treated as multiple Bids and is liable to be rejected either before entering the Bid into the electronic bidding system, or at any point of time prior to the allocation or Allotment of Equity Shares in this Issue. However, the Bidder can revise the Bid through the Revision Form, the procedure for which is detailed under the paragraph titled “Build up of the Book and Revision of Bids”.
5. The members of the Syndicate/ SCSBs will enter each Bid option into the electronic bidding system as a separate Bid and generate a Transaction Registration Slip, (TRS), for each price and demand option and give the same to the Bidder. Therefore, a Bidder can receive upto three TRSs for each Bid cum Application Form.
6. The members of the Syndicate shall accept Bids from the all Bidders and shall have the right to vet the Bids, during the Bid / Issue Period in accordance with the terms of the Syndicate Agreement and the Red Herring Prospectus. QIB and Non Institutional Bidders must necessarily use the ASBA process and Bidders using the ASBA facility to submit their Bids should approach the Syndicate members (at ASBA Bidding Locations) or Designated Branches of the SCSBs to register their Bids.
7. Along with the Bid cum Application Form, all Bidders will make payment in the manner described under the paragraph titled ‘*Payment Instructions*’ of the Red Herring Prospectus.

ASBA Bidders submitting their Bids in electronic form should submit their Bids using the internet enabled bidding and banking facility of the SCSBs for bidding and blocking funds in the accounts of the bank account maintained with the SCSB specified in the ASBA Bid cum Application Form, and accordingly registering such Bids. Every Designated Branch of the SCSBs shall accept Bids from all such investors who wish to place Bids through them and the account in which funds are to be blocked is maintained with them. The Designated Branches of the SCSBs shall provide to the ASBA Bidders an acknowledgment specifying the application number as proof of acceptance of the ASBA Bid cum Application Form. Such acknowledgment does not in any manner guarantee that the Equity Shares Bid for shall be allocated to

the ASBA Bidders. Upon receipt of the ASBA Bid cum Application Form, submitted in physical or electronic mode, the Designated Branch of the SCSB shall verify if sufficient funds equal to the Bid Amount are available in the ASBA Account, as specified in the ASBA Bid cum Application Form, prior to uploading such Bids with the Stock Exchanges. If sufficient funds are not available in the ASBA Account, the Designated Branch of the SCSB shall reject such Bids and shall not upload such Bids with the Stock Exchanges

ASBA Bidders at ASBA Bidding Locations may also submit the ASBA Bid cum Application Form to the Syndicate/ sub-syndicate members. The Syndicate/ sub-syndicate members are required to upload the bid and other relevant details of the ASBA Bid cum Application Form in the electronic bidding system provided by the stock exchanges and forward the same to the SCSBs.

If sufficient funds are available in the ASBA Account, the Designated Branch of SCSB shall block an amount equivalent to the Bid Amount mentioned in the ASBA Bid cum Application Form and will enter each Bid option into the electronic bidding system as a separate Bid and generate a TRS for each price and demand option. The TRS shall be furnished to the ASBA Bidder on request.

9. The Bid Amount shall remain blocked in the aforesaid ASBA Account until finalisation of the Basis of Allotment and consequent transfer of the Bid Amount against the Allotted Equity Shares to the Public Issue Account, or until withdrawal/ failure of the Issue or until withdrawal/ rejection of the ASBA Bid cum Application Form, as the case may be. Once the Basis of Allotment is finalized, the Registrar to the Issue shall send an appropriate request to the Controlling Branch of the SCSB for unblocking the relevant ASBA Accounts and for transferring the amount allocable to the successful Bidders to the Public Issue Account. In case of withdrawal/ failure of the Issue, the blocked amount shall be unblocked on receipt of such information from the Registrar to the Issue.

In case the total amount (i.e. original Bid Amount plus additional payment) exceeds Rs. 2,00,000, the Bid will be considered for allocation under the Non Institutional Bidders category in terms of the Red Herring Prospectus. If, however, the Bidder does not either revise the Bid or make additional payment and the Issue Price is higher than the cap of the Price Band prior to revision, the number of Equity Shares Bid for shall be adjusted for the purpose of allocation, such that no additional payment would be required from the Bidder and the Bidder is deemed to have approved such revised Bid at Cut-off Price.

OTHER INSTRUCTIONS

Joint Bids in case of Individuals

Bids may be made in single or joint names (not more than three). In case of joint Bids, all payments will be made out in favour of the Bidder whose name appears first in the Bid cum Application Form or Revision Form. All communication will be addressed to the First Bidder and will be dispatched to his or her address as per the Demographic Details received from the depository.

Multiple Bids

A Bidder should submit only one Bid (and not more than one) for the total number of Equity Shares required. Two or more Bids will be deemed to be multiple Bids if the sole or First Bidder is one and the same.

In this regard, the procedures which would be followed by the Registrar to the Issue to detect multiple applications are given below:

1. All applications with the same name and age will be accumulated and taken to a separate process file which will serve as a multiple master document.
2. In this master, a check will be carried out for the same PAN numbers. In cases where the PAN numbers are different, the same will be deleted from this master.
3. The addresses of all these applications from the multiple master will be strung from the address master. This involves including the addresses in a single line after deleting non-alpha and non-numeric characters, i.e., commas, full stops, hashes etc. Sometimes, the name, the first line of the address and pin code will be converted into a string for each application received and a photo match will be carried out among all the applications processed. A print-out of the addresses will be made to check for

common names. Applications with the same name and same address will be treated as multiple applications.

4. The applications will be scanned for similar Depository Participant's identity (DP ID) and client identity numbers. If applications bear the same numbers, these will be treated as multiple applications.
5. After the aforesaid procedures, a print-out of the multiple master will be taken and the applications physically verified to tally signatures and also father's/husband's names. Upon completion of this exercise, the applications will be identified as multiple applications.

In case of a mutual fund, a separate Bid can be made in respect of each scheme of the mutual fund registered with SEBI and such Bids in respect of more than one scheme of the mutual fund will not be treated as multiple Bids provided that the Bids clearly indicate the scheme concerned for which the Bid has been made.

After Bidding on an ASBA Bid cum Application Form either in physical or electronic mode, where such ASBA Bid has been submitted to the Designated Branches of SCSBs / members of the Syndicate/sub-syndicate member and uploaded with the Stock Exchanges, an ASBA Bidder cannot Bid, either in physical or electronic mode, on another ASBA Bid cum Application Form or a non-ASBA Bid cum Application Form. However, the ASBA Bidder can revise the Bid through the Revision Form, the procedure for which is detailed in "*Build up of the Book and Revision of Bids*".

More than 1 ASBA Bidder may Bid for Equity Shares using the same ASBA Account, provided that the SCSBs shall not accept a total of more than 5 ASBA Bid cum Application Forms from such ASBA Bidders with respect to any single ASBA Account.

Procedure and Time of Schedule for Allotment and Demat Credit of Equity

The Issue will be conducted through a "100% book building process" pursuant to which the members of the Syndicate will accept bids for the Equity Shares during the Bidding/Issue Period. The Bidding/Issue Period will commence on September 21, 2011 and expire on September 23, 2011. Following the expiration of the Bidding/Issue Period, the Company, in consultation with the BRLM, will determine the Issue Price, and, in consultation with the BRLM, the basis of allocation and entitlement to Allotment based on the bids received and subject to confirmation by the BSE. Successful Bidders will be provided with a confirmation of their allocation (subject to a revised confirmation of allocation) and will be required to pay any unpaid amount, if any, for the Equity Shares within a prescribed time. The Equity Shares will then be credited and Allotted to the investors' demat accounts maintained with the relevant depository participant. The SEBI Regulations require the Company to complete the Allotment to successful Bidders including credit of shares to demand accounts, within 12 working days from Bid/Issue Closing Date or 15 days from Bid/Issue Closing Date, whichever is earlier. Upon approval by the Stock Exchange, the Equity Shares will be listed and trading will commence.

Method of Proportionate Basis of Allotment in the Issue

In the event of the Issue being over-subscribed, the Company shall finalize the basis of Allotment in consultation with the Designated Stock Exchange. The Executive Director (or any other senior official nominated by them) of the Designated Stock Exchange along with the BRLM and the Registrar to the Issue shall be responsible for ensuring that the basis of Allotment is finalized in a fair and proper manner.

The Allotment shall be made in marketable lots, on a proportionate basis as explained below:

- a) Bidders will be categorized according to the number of Equity Shares applied for.

- b) The total number of Equity Shares to be allotted to each category as a whole shall be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio.
- c) Number of Equity Shares to be allotted to the successful Bidders will be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio.
- d) In all Bids where the proportionate Allotment is less than 80 Equity Shares per Bidder, the Allotment shall be made as follows:
 - The successful Bidders out of the total Bidders for a category shall be determined by draw of lots in a manner such that the total number of Equity Shares allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and
 - Each successful Bidder shall be allotted a minimum of 80 Equity Shares.
- e) If the proportionate Allotment to a Bidder is a number that is more than 80 but is not a multiple of 1 (which is the marketable lot), the decimal would be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5, it would be rounded off to the lower whole number. Allotment to all in such categories would be arrived at after such rounding off.
- f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares allotted to the Bidders in that category, the remaining Equity Shares available for Allotment shall be first adjusted against any other category, where the allotted shares are not sufficient for proportionate Allotment to the successful Bidders in that category. The balance Equity Shares, if any, remaining after such adjustment will be added to the category comprising Bidders applying for minimum number of Equity Shares.

Rationale for RDB Rasayans Ltd's IPO Grading

RDB Rasayans Ltd IPO Grading: BWR IPO Grade 2 (Below-average fundamentals)

Brickwork Ratings (BWR) has assigned BWR IPO Grade 2 to the proposed IPO of RDB Rasayans Limited (“RRL” or “the Company”). **Brickwork Ratings’ BWR IPO Grade 2 indicates** below average fundamentals for the issue in relation to its peers. BWR assigns IPO grading on a scale of IPO Grade 5 to IPO Grade 1 with Grade 5 signifying strong fundamentals and Grade 1 poor fundamentals of the issue in relation to its peers.

The grading factors RRL’s experienced management team and promoter group, strategic cost/logistic advantage enjoyed by RRL due to their location close to clients and ports, healthy growth of domestic packaging industry as well as demand from Western and European countries and good clientele and suppliers. The grading is constrained by volatility of raw material prices and RRL’s inability to fully pass on the production price hikes, negative cash flows from operations, fragmented nature of industry with high level of regulation, number of litigations against the promoter and group companies, risk of adverse business environment with regard to labor unrests and cyclical nature of end-user sectors. In absence of project appraisal by bank or term lending institution the funds utilization is with the RRL.

Company Profile

RRL was incorporated in the year 1995 as public limited company. In 2003, the company changed the objects clause and commenced manufacture of small bags with commissioning of plant at Haldia. In the year 2004, RRL started manufacture of Flexible Intermediate Bulk Containers (FIBC) or Jumbo Bags with installed capacity of 1,800 MTPA. In 2009 the installed capacity was increased to 6,050 MTPA. The present capacity is 7,000 MTPA (increased from 6,050 MTPA to 7,000 MTPA w.e.f. March 31, 2010). RRL is currently a manufacturer of Polypropylene (PP) Tape, PP woven sacks, Woven fabrics, Industrial woven fabric, PP woven fabrics and PP woven bags. With the present installed capacity, RRL can produce 2 lac Jumbo Bags and 25 lac PP woven sacks per month.

RDB Rasayans Ltd is part of The RDB Group (“RDB” or “the Group”) promoted by Mr. Sunder Lal Dugar. The Group is engaged in infrastructure development, cigarettes and tobacco, printing and packaging, containers and bags, automobiles marketing, retail business, production and installation of power transmission lines and logistics. Industry

India is the third largest producer of Flexible Intermediate Bulk Containers (FIBC) in the world after China and Turkey. Indian producers are increasingly penetrating newer markets by either selling overseas through resellers or direct supply to end users. Indian companies enjoy strategic benefits compared to other international players due to low labor costs, procurement of raw material and proximity to end markets. In the international market, Indian producers compete with price competitive Chinese producers. However, the Chinese producers lack consistency of supply and quality. The Turkish producers have advantage in terms of proximity to European countries but lack price competitiveness compared to Indian and Chinese producers.

Bulk packaging products – FIBC, Jumbo Bags – are increasingly gaining acceptance over other forms of packaging such as jute based products both in the domestic as well as overseas markets. FIBCs are cost effective, easy to handle and produce, can be customized based on client requirement and have superior quality in terms of load handling (safety factor of 5:1 on nominal load) and resistance to chemicals. Over the period the capacity of FIBC has increased manifold. Within packaging industry which is estimated at \$500 bn³, polymer-based flexible bulk packaging products account for about 18% of the demand and the industry is expected to grow by about 15-20% in the next five years. Raw material expenses, the major cost component, are crude derivatives and are expected to rise in FY12 and FY13 keeping profit margins of players under pressure.

Demand Drivers

- Increasing acceptance of FIBCs over other forms of packaging in domestic markets
- Growth in end-user industries – cement, food, alumina, chemicals

3 www.indiapackagingshow.com/ConfPDF2010/JumboBags.pdf

- Indian players are getting competitive vis-à-vis international players in terms of price and quality

Risk Factors

- Volatility in raw material prices and the company's inability to pass or only partially pass on the hike to the customer could impact profitability (low pricing power)
- Highly regulated industry especially for food grade products
- Fragmented nature of the industry increases competition
- Adverse business environment esp. labor unrest could hamper operations
- Cyclicity in the end-use sectors, export markets could impact growth in revenues

Business Risks

RRL is a mid-sized player engaged into manufacture of industrial packaging products - FIBCs which are used in bulk packaging, and Poly Propylene (PP) woven sacks and fabrics. FIBCs account for about 60% of gross sales of the company. RRL caters to the domestic market and has clients located mainly in West Bengal. RRL also exports its products to various countries in Europe, Australia, and the Middle East. Export revenues contributed about 12% of RRL's gross revenues. **The top ten clients on an average accounted for about 84% of RRL's gross sales over past four years and include companies operating in various industries - chemical, fertilizers, cement, carbon black, agro products etc.** The company has several large clients such as Haldia Petrochemicals Ltd, Tata Chemicals Ltd., Phillips Carbon Black Ltd., Mitsubishi Chemical Corp-PTA, Hi-tech Carbon etc.

The company's sales have grown sequentially over the years; however, profitability has been under pressure from increased input costs and inability to fully pass on the price hikes, in line with industry trend. The company does not enjoy technological advantage and faces stiff competition from other players, however, strategic location advantage in terms of proximity to clients and nearby ports enable it to timely deliver consignments with minimal logistics costs. While the company has adequate infrastructure facilities and work force to meet **client's** requirement, it has experienced labor unrest in the past. Occurrence of such events in the future **could hamper company's operations.**

The ability of the company to optimize raw material consumption, effectively manage operational and foreign exchange risks, adhere to the prescribed quality standards and increase its clientele will be vital to enhance profitability.

Financial Performance

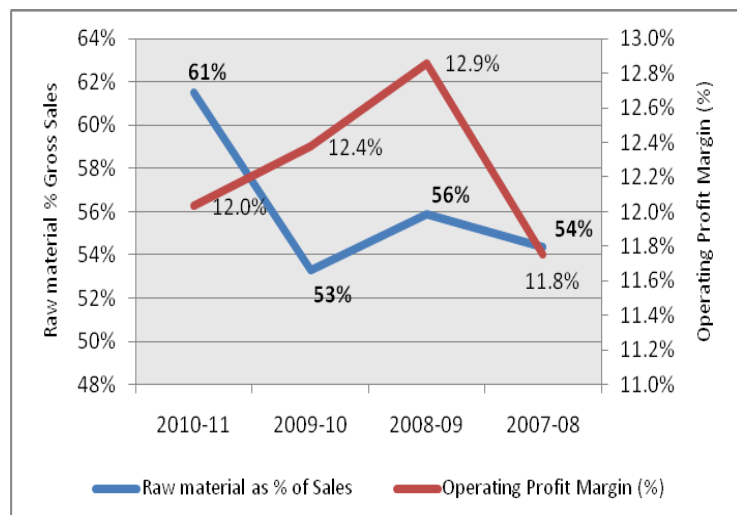

RRL's Sales have grown at an average rate of 17% from 2008-2011. Gross Sales increased from ₹ 28.19 crores in FY08 to ₹ 46.13 crores in FY11. However, this growth has not been consistent. Gross Sales have grown 50% in FY11, -10% in FY10, 21% in FY09 and 6% in FY08. While the **company's domestic revenues have shown stable to increasing trends in the last four years, the export revenues declined substantially by about 50% in FY10 due to slowdown in the western economies and consequent decline of trade volumes.** Export revenues have subsequently picked up in FY11 and expected to improve due to upturn in demand from other countries.

Raw material expenses, which mainly comprise of polypropylene, have increased substantially by 73% during FY11 and account for about 60% of gross sales. In FY10, raw material consumption had declined due to restructuring of operations of a key supplier. PBIDT has increased from ₹ 2.95 crores in 2008 to ₹ 5.10 crores in 2011.

The average PBIDT margin for the period 2008-2011 was 12.3%. The net profit margin has been fluctuating from one year to other due to volatility in raw material prices as well as higher depreciation on account of capex incurred during FY09. The main raw material used in the manufacture of FIBC is polypropylene, which is a crude oil derivative, and subject to price fluctuations. Any variation in its prices could impact profit margins of the company. RRL's financial risk

profile was stable as reflected by low gearing and comfortable coverage ratios. The company's cash flow from operations has been negative in the past.
