Summary of Industry:

Global Economic Outlook

Source: World Economic Outlook - October 2020

Global growth is projected at -4.4 percent in 2020, 0.8 percentage point above the June 2020 WEO Update forecast. The stronger projection for 2020 compared with the June 2020 WEO Update reflects the net effect of two competing factors: the upward impetus from better-than-anticipated second quarter GDP outturns (mostly in advanced economies) versus the downdraft from persistent social distancing and stalled re-openings in the second half of the year.

An investment in the Equity Shares involves a high degree of risk. You should carefully consider all the information in this Prospectus, including the risks and uncertainties summarised below, before making an investment in our Equity Shares. The risks described below are relevant to, the industries our Company is engaged in, our Company and our Equity Shares. Prior to making an investment decision, prospective investors should carefully consider all of the information contained in 'Consolidated Financial Statements' on page 115. Unless stated otherwise, the financial data in this section is as per our financial statements prepared in accordance with Indian GAAP, as restated.

If any one or more of the following risks as well as other risks and uncertainties discussed in this Prospectus were to occur, our business, financial condition and results of our operation could suffer material adverse effects, and could cause the trading price of our Equity Shares and the value of investment in the Equity Shares to materially decline which could result in the loss of all or part of your investment.

This Prospectus also contains forward looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of many factors, including the considerations described below and elsewhere in this Prospectus.

These risks are not the only ones that our Company face. Our business operations could also be affected by additional factors that are not presently known to us or that we currently consider to be immaterial to our operations. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify financial or other implication of any risks mentioned herein.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- 1. Some risks may not be material individually but may be material when considered collectively.*
- 2. Some risks may have an impact which is qualitative though not quantitative.*
- 3. Some risks may not be material at present but may have a material impact in the future.*

INTERNAL RISKS

- 1. There are certain outstanding legal proceeding against our company which may adversely affect our business, financial condition and results of operations.**

There are certain proceedings pending at different levels of adjudication before various authorities, enquiry officers and appellate forums. Such proceedings could divert management time, attention and consume financial resources in their defense. Further, an adverse judgment in some of these proceedings could have an adverse impact on our business, financial condition and results of operations. A summary of the outstanding proceedings against our Company and Group Companies as disclosed in this Prospectus, to the extent quantifiable, have been set out below:

Nature of case	Number of cases	Cases Filed By Amount involved (in ₹lakhs)	Cases Filed Against Amount involved (in ₹lakhs)

Group Entities	5	118.89	1,890.37

The table above does not include those penalties, interests and costs, if any, which may be imposed or which may have been pleaded but not quantified in the course of legal proceedings, or which the Court / Tribunal otherwise has the discretion to impose. The imposition and amount of such penalties / interests / costs are at the discretion of the court / tribunal where the case is pending. Such liability, if any, would crystallize only on the order of the tribunal where the case(s) is / are pending.

For further details, please refer to section titled "Outstanding Litigation and Material Developments" beginning on page 149 of this Prospectus.

2. We have not entered into any long-term contracts with any of our clients.

We do not have any long-term contracts with our clients and any change in the business pattern of our existing clients could adversely affect the business of our Company. Although we have satisfactory business relations with our clients and have received continued business from them in the past, there is no certainty that the same will continue in the years to come and may affect our profitability.

3. Our operations are significantly located in the Thane region and failure to expand our operations may restrict our growth and adversely affect our business

Currently, all our manufacturing facilities and registered office are situated in Thane district, Maharashtra state, India and we are carrying our business mainly from these facilities. For the financial year ended March 31, 2021 and financial year ended March 31, 2020, our revenue from operations from Southern states accounted for approximately 44.34% and 21.85% and from Western States accounted for approximately 48.24% and 76.22% respectively. In the event that demand for our services in general reduces or stops by any reason including political discord or instability or change in policies of these States, then our financial condition and operating results may be materially and adversely affected. Geographical and functional expansion of our business domain requires establishment of adequate network. As we seek to diversify our regional focus we may face the risk that our competitors may be better known in other markets, enjoy better relationships with customers. Our lack of exposure in geographical boundaries outside our operating region could impact our future revenues.

4. The recent outbreak of the novel coronavirus could have a significant effect on our results of operations, and could negatively impact our business, revenues, financial condition and results of operations.

An outbreak of COVID-19 was recognised as a pandemic by the WHO on March 11, 2020. In response to the COVID-19 outbreak, the governments of many countries, including India, have taken preventive or protective actions such as imposing country-wide lockdowns, as well as restrictions on travel and business operations. Since May 2020 many of these measures have been lifted. Due to a government mandated lockdown in India, we had to temporarily shut down our operations from mid-March 2020 to April 2020. We have resumed operations gradually from May 2020. We proactively engaged with our clients to reassure them and to demonstrate our commitment to restart our operations and to build confidence in the safety protocols deployed at our office. If we do not respond appropriately to the pandemic, or if customers do not perceive our response to be adequate, we could suffer damage to our reputation and our brand, which could adversely affect our business in the future.

Further, the lockdown was again imposed by the government in Maharashtra w.e.f. April 23, 2021, which was partially relaxed w.e.f. June 1, 2021, during this lockdown although we have continued with our business, the execution of our business operations were delayed by few weeks.

We cannot predict the degree to, or the time period over, which our business will be affected by the COVID-19 outbreak. For example, this pandemic could necessitate further lockdowns, resulting in significant additional effects on our revenue, financial condition and results of operations. There are numerous uncertainties associated with the COVID-19 outbreak, including the number of individuals who will become infected, availability of a vaccine or a cure that mitigates the effect of the virus, the extent of the protective and preventative measures imposed by governments and whether the virus' impact will be seasonal, among others. Consequently, there may be adverse effects of this pandemic on our short-term business operations and our financial results may be impacted.

5. We operate in a highly competitive and fragmented industry with low barriers to entry. We face significant competition and if we fail to compete effectively, our business, prospects, financial condition and results of operations will be adversely affected.

The filters and dryers market is highly fragmented and competitive. We compete with both domestic as well as multinational companies. We also face competition from various regional players. Price competition in the industry is intense. We expect that the level of competition will remain high, which could directly impact the size of our workforce and therefore potentially limit our ability to maintain or increase our profitability. Our continued success depends on our ability to compete effectively against our existing and future competitors. With the potential influx of new competitors, our ability to retain our existing clients and to attract new clients is critical to our continued success.

Further, some of our competitors may be larger than us, have stronger financial resources or a more experienced management team, or have stronger execution capabilities in executing complex projects. They may also benefit from greater economies of scale and operating efficiencies and may have greater experience in facilities management business. Further, the premium placed on having experience may cause some of the new entrants to accept lower margins in order to be awarded a contract. We may also decide not to participate in some projects as accepting such lower margins may not be financially viable and this may adversely affect our competitiveness to bid for and win future contracts. We cannot assure you that we can continue to compete effectively with our competitors in the future, and failure to compete effectively against our current or future competitors may have an adverse effect on our business, results of operations and financial condition.

As a result, there can be no assurance that we will not encounter increased competition in the future. Nor can there be any assurance that our Company will, in light of competitive pressures, be able to remain profitable or, if profitable, maintain its current profit margins.

6. Our Company had negative cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

(₹ in lakhs)

Cash flow from	FY 2021	FY 2020	FY 2019
Operating activities	(329.80)	166.41	(375.72)
Investing activities	(33.96)	(37.77)	(73.03)
Financing activities	197.42	(26.18)	516.73

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow, it may adversely affect our business and financial operations. For further details please refer to the section titled 'Financial Information' and chapter titled 'Management's Discussion and Analysis of Financial Condition and Results of Operations' beginning on page numbers 115 and 140, respectively, of the Prospectus.

7. Our Company is dependent on the Debt funds for our business.

Our business has been highly capital intensive and working capital intensive, we have been largely using Debt from Banks in the form of Term Loans and Working Capital, details of the same is disclosed under "Financial Indebtedness" chapter on page 148 of the Draft Prospectus. As we are using more of Debt, our interest obligation is also higher and accordingly we are not able to maintain Interest coverage ratio of 2 or more, which is generally consider adequate by the lenders. Any changes in terms of lending by lenders or non-availability of debts may adversely affect our business and financial operations.

8. We have certain contingent liabilities that have not been provided for in our Company's financials, which if materialize, could adversely affect our financial condition.

The contingent liabilities as at March 31, 2021 were as follows:

Total	1017.19	

9. We have limited history of operating in the business of design and manufacture of Pharmaceutical & Chemical plants and process equipment vis-à-vis some of our Competitors. If we are not successful in managing our growth, our business may be disrupted and our profitability may be reduced.

We have limited history of operating in the business of design and manufacture of Pharmaceutical & Chemical plants and process equipment vis-à-vis some of our competitors, wherein our Company has ventured in the year 2011 only. However, our Promoter, Prakash Lade, is involved in the business of manufacturing of filters and dryers since 1988. There may be many unforeseen challenges in the business and they may pose bigger risk due to our inexperience. Our business and financial position may be adversely affected to the extent we are not able to deal with these business challenges in a timely and effective manner. Although, we plan to continue to expand our scale of operations, we may not grow at a rate comparable to our growth rate in the past or the growth of the industry, either in terms of income or profit.

We have a limited operational history in these segments. Our results may vary from year to year due to various factors. You should not rely on our past financial results for any year as indicators of future performance. Our future growth is subject to risks arising from a rapid increase in order volume, and inability to retain and recruit skilled staff. Although, we plan to continue to expand our scale of operations, we may not grow at a rate comparable to our growth rate in the past, either in terms of income or profit.

Our future growth may place significant demands on our management and operations and require us to continuously evolve and improve our financial, operational and other internal controls. In particular, continued expansion may pose challenges in:

- maintaining high levels of client satisfaction;
- recruiting, training and retaining sufficient skilled management and trained personnel;
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, internal control and other internal systems;
- making accurate assessments of the resources we will require;
- adhering to the standards of quality and process execution to meet clients' expectations;
- operating in business segments where we have limited experience;
- preserving a uniform culture, values and work environment;
- strengthening internal control and ensuring compliance with legal and contractual obligations;
- managing relationships with clients, suppliers, investors, lenders and service providers; and

If we are not successful in managing our growth, our business may be disrupted and profitability may be reduced. Our business, prospects, financial condition and results of operations may be adversely affected.

10. Substantial portion of our revenues has been dependent upon our few clients. The loss of any one or more of our major clients would have a material adverse effect on our business operations and profitability.

For the financial years ended March 31, 2021 and March 31, 2020, our top five largest clients accounted for approximately 40.03% and 40.89% of our revenues from operations respectively. The loss of a significant client or clients would have a material adverse effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients or that we will be able to replace these clients in case we lose any of them. Furthermore, major events affecting our clients, such as bankruptcy, change of management, mergers and acquisitions could adversely impact our business. If any of our major clients becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivable from that client would increase and may have to be written off, adversely impacting our income and financial condition.

11. We are dependent upon few suppliers for the material requirements of our business.

For the financial years ended March 31, 2021 and March 31, 2020, our top five suppliers contributed for approximately 31.38% and 36.96% of our purchases respectively. Any problems faced by our supplier resulting in delays or non-adherence to quality requirements could adversely impact our ability to meet our customer's requirements in time and our operations would be affected to the extent we are unable to line up supplies from alternate suppliers.

12. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

We have not paid any dividends since incorporation. Our future ability to pay dividends will depend on our earnings, financial condition and capital requirements. Dividends distributed by us will attract dividend distribution tax at rates applicable from time to time. There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders.

Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition and results of operations.

13. Our Promoters and Directors have indirect interest in certain of our Group Entities, which are engaged in similar businesses, which may create a conflict of interest.

Our Promoters and Directors are promoters / directors our Group Companies namely, M/s. Bifriends Engineering Works and Sterling Fabricating Engineers Private Limited which are engaged in the similar business which are similar to the business of our Company. However, we have entered in to a non-compete agreements with M/s. Bifriends Engineering Works and Sterling Fabricating Engineers Private Limited dated April 28, 2021 and April 29, 2021 respectively to address the conflict of interest between our Company and the said Group Entities. For further details please refer to the chapters titled ‘Our Promoters and Promoter Group’ and ‘Our Group Entities’ beginning on page 105 and 110 respectively of the Prospectus.

14. We may enter into related party transactions and may continue to do so in the future.

We have entered into related party transactions in the last three financial years, i.e. FY 2021, 2020 and 2019. Further we may enter into transactions with our promoters and our Promoter Group. While we believe that all such transactions will be conducted on an arm’s length basis, there can be no assurance that we could not have achieved more favorable terms had such transactions not been entered into with related parties. Hence, it is likely that we may enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations. For further details, please refer to “Annexure V – Related Party Transactions” of the “Financial Statements” beginning on page 115 of this Prospectus.

15. Our business and profitability could be adversely affected if we fail to keep pace with changing technology and evolving industry standards and norms or fail to enhance existing services and develop and introduce new latest designs in a timely manner.

The markets for our services are characterized by rapidly changing technology, evolving industry standards and norms and new service introductions. Adaptability is one of the key attributes for success in our industry. Our results of operations and financial condition depend on our ability to develop and introduce new products and services, as well as our ability to modify and upgrade our existing products. Our success will depend on several factors, including proper identification of market demands and the competitiveness of our products with the products introduced by our competitors. Our failure to successfully adopt such technologies in a cost effective and a timely manner could increase our costs and lead to us being less competitive in terms of our prices or quality of services we provide.

16. Our inability to build and maintain our brand name will adversely affect our business, prospects, financial condition and results of operation.

Brand recognition is important to the success of our business. Establishing and maintaining our brand name for people relying on our services to look for desired results is critical to the success of the customer acquisition process of our business. No assurance can be given that our brand name will be effective in attracting and growing user and customer base for our businesses or that such efforts will be cost-effective, which may negatively affect our business, prospects, financial condition and results of operations.

17. Non-availability of skilled personnel / laborers and risk associated with increasing wage cost may affect our financial conditions and results of operations.

As economy and demand for our products picks up, more number of players might enter in our business segment, which might create a shortage of the skilled labourer in the industry. Such shortage may further lead to substantial rise in the wage bills of our Company, thus seriously affecting our cost structure and profitability. Further if we do not agree to employees’ increased wage demands than the same may lead to strikes, work stoppages or any other kind of disputes, which in turn may affect our productions and customers and loss of business and the same in turn will affect our financial conditions and result of operations.

18. Our success depends largely on our senior management and skilled employees and our ability to attract and retain them.

Our success depends on the continued services and performance of the members of our senior management team and other key employees. Our continued success also depends upon our ability to attract and retain skilled staff, particularly managers and skilled workers. The loss of the services of our senior management or our inability to recruit, train or retain a sufficient number of skilled professionals could have a material adverse effect on our operations and profitability. Competition for senior management in our industry in which we operate is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. Moreover, we do not maintain “key man” life insurance policies for senior members of our management team or other key personnel. Any such loss of the services of our senior management personnel or skilled staff could adversely affect our business, prospects, financial condition and results of operation.

19. Our Promoter, Directors and Key Managerial Personnel of our Company may have interests in us other than reimbursement of expenses incurred or normal remuneration or benefits.

Our Promoter is interested in us to the extent of any transactions entered into or his shareholding and dividend entitlement in us. Our Directors are also interested in us to the extent of remuneration paid to them for services rendered as our Directors and reimbursement of expenses payable to them. Our Promoters, Prakash Lade and Rohan Lade have given personal guarantees for our borrowings to secure our loans. Our Directors may also be interested in any transaction entered into by us with any other company or firm in which they are shareholders, directors or partners or in their individual capacity. For further details, please refer “Our Promoters and Promoter Group” and “Our Management” on page 105 and 94 respectively.

20. Our funding requirements and deployment of the issue proceeds are based on management estimates and have not been independently appraised by any bank or financial institution.

Our funding requirements and the deployment of the proceeds of the Issue are based on management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by bank or financial institution and are based on our estimates. In view of the competitive and dynamic nature of our business, we may have to revise our expenditure and fund requirements as a result of variations including in the cost structure, changes in estimates and other external factors, which may not be within the control of our management. This may entail rescheduling, revising or cancelling the planned expenditure and fund requirement and increasing or decreasing the expenditure for a particular purpose from its planned expenditure at the discretion of our Board. In addition, schedule of implementation as described herein are based on management’s current expectations and are subject to change due to various factors some of which may not be in our control.

21. Our Company’s management will have flexibility in utilizing the Net Proceeds. There is no monitoring agency appointed by our Company and the deployment of funds is at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.

The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors and is not subject to monitoring by external independent agency. As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹10,000.00 lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Net Issue Proceeds to the NSE and shall also simultaneously make the material deviations / adverse comments of the audit committee public. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

22. Any variation in the utilization of the Net Proceeds as disclosed in this Prospectus shall be subject to certain compliance requirements, including prior Shareholders’ approval.

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Prospectus without obtaining the shareholders’ approval through a special resolution. In the event of any such circumstances that requires us to undertake variation in the disclosed utilisation of the Net Proceeds, we may not be able to obtain the Shareholders’ approval in a timely manner, or at all. Any delay or inability in obtaining such Shareholders’ approval may adversely affect our business or operations. Further, our Promoter or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Issue as prescribed in the SEBI (ICDR) Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in

the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition, and may adversely affect our business and results of operations.

23. We have not obtained the registration of our trademarks used in our businesses and our inability to obtain or maintain these registrations may adversely affect our competitive business position.

Our Corporate logo is registered in the name of our Group Company, M/s. Bifriends Engineering Works and they have given us rights to use the logo vide “Deed of Assignment of Trademark” dated April 27, 2021. Our Company is not the legal owner of the same and hence we do not enjoy the statutory protections accorded to a registered trademark and are subject to the various risks arising out of the same, including but not limited to infringement or passing off our name and logo by a third party.

The registration of any trademark is a time-consuming process, and there can be no assurance that any such registration will be granted as and when applied. In the absence of such registration, competitors or other companies may challenge the validity or scope of our intellectual property. These trademarks are integral to our business, and the loss of any of these intellectual property rights could have a material adverse effect on our business.

There can be no assurance that we will be able to obtain the registration of our trademarks in a timely manner, or at all. If any of our unregistered trademarks are registered in favour of a third party, we may not be able to claim registered ownership of such trademarks and consequently, we may be unable to seek remedies for infringement of those trademarks by third parties other than relief against passing off by other entities. If our application is objected to, we will not have the right to use this trademark or prevent others from using this trademark or its variations. Our inability to obtain or maintain this trademark in our business thus could adversely affect our reputation, goodwill, business, prospectus and results of operations.

24. We require certain registrations, licenses, approvals and permissions from government and regulatory authorities in the ordinary course of our business and any delay or failure to obtain them may adversely affect our operations.

We require certain statutory and regulatory approvals, licenses, registrations and permissions, and applications need to be made at the appropriate stages for our business to operate. There can be no assurance that the relevant authorities will issue these approvals or licenses, or renewals thereof in a timely manner, or at all. An inability to obtain or maintain approvals or licenses required for our operations may adversely affect our operations. Government approvals, licenses, clearances and consents are often also subject to numerous conditions, some of which are onerous and may require significant expenditure. Furthermore, approvals, licenses, clearances, and consents covering the same subject matter are often required at both the Central Government and State Government levels. If we fail to comply, or a regulator claims that we have not complied, with these conditions, we may not be able to commence or continue with work or operate these projects. Further, we may become liable to penal action if our activities are adjudged to be undertaken in the manner not authorized under the applicable law. This could materially and adversely affect our business, financial condition and results of operations. We cannot assure you that we will be able to obtain approvals in respect of such applications or any application made by us in the future. For further information on various approvals or licenses required in connection with our operations, please refer “Government and Other Approvals” on page 156.

25. Our Company has taken certain insurance cover but that may not be adequate hence we may not be able to protect ourselves from all losses and may in turn adversely affect our financial condition.

Our Company has taken certain insurance cover at present, for details of our insurance cover *please refer to Chapter titled “Our Business” on page 73*. Though we believe that our insurance cover is adequate but the same may not be able to protect ourselves from all damage or loss suffered by us. To the extent that we suffer loss or damage not covered by our insurance cover, our results of operations or cash flow may be affected.

26. Certain data mentioned in this Prospectus has not been independently verified.

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

EXTERNAL RISKS

27. Any downturn in the macroeconomic environment in India could adversely affect our business, results of operations, cash flows and financial condition.

India is our key market. For FY 2021, 98.26 of our Company's revenue from operations was from India. In addition, an increase in India's trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could increase interest rates and adversely affect liquidity, which could adversely affect the Indian economy and our business, results of operations, cash flows and financial condition.

28. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, in the jurisdictions in which we operate may adversely affect our business and results of operations.

Our business is subject to various laws and regulations, which are evolving and subject to change. For details, see "Key Industrial Regulations and Policies in India" on page 87. We are also subject to corporate, taxation and other laws in effect in India, which require continued monitoring and compliance. These laws and regulations and the way in which they are implemented and enforced may change. There can be no assurance that future legislative or regulatory changes will not have any adverse effect on our business, results of operations, cash flows and financial condition.

29. Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India, or globally, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations.

30. Significant differences exist between Ind AS and Indian GAAP and other accounting principles, such as IFRS and US GAAP, which may be material to investors' assessments of our financial condition, result of operations and cash flows.

Our financial statements for the last three financial years, i.e. FY 2021, 2020 and 2019 included in this Prospectus are prepared and presented in conformity with Indian GAAP and restated in accordance with the requirements the SEBI (ICDR) Regulations and the Guidance Note on "Reports in Company Prospectuses (Revised 2016)" issued by the ICAI. Ind AS differs from Indian GAAP and other accounting principles with which prospective investors may be familiar in other countries, such as IFRS and U.S. GAAP. Accordingly, the degree to which the Financial Statements included in this Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Persons not familiar with Indian accounting practices should limit their reliance on the financial disclosures presented in this Prospectus.

RISKS RELATING TO THE EQUITY SHARES AND THE ISSUE

31. Investors bear the risk of fluctuations in the price of Equity Shares and there can be no assurance that a liquid market for our Equity Shares will develop following the listing of our Equity Shares on the Stock Exchanges.

There has been no public market for our Equity Shares prior to the Issue. The price may not necessarily be indicative of the market price of our Equity Shares after the Issue is completed. You may not be able to re-sell your Equity Shares at or above the Issue price and may as a result lose all or part of your investment.

Our Equity Shares are expected to trade on EMERGE Platform of NSE after the Issue, but there can be no assurance that active trading in our Equity Shares will develop after the Issue, or if such trading develops that it will continue. Investors may not be able to sell our Equity Shares at the quoted price if there is no active trading in our Equity Shares.

The price at which our Equity Shares will trade at after the Issue will be determined by the marketplace and may be influenced by many factors, including:

- Our financial condition, results of operations and cash flows;
- The history of and prospects for our business;

- An assessment of our management, our past and present operations and the prospects for as well as timing of our future revenues and cost structures; and
- The valuation of publicly traded companies that are engaged in business activities similar to ours;
- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- announcements of significant claims or proceedings against us;
- new laws and government regulations that directly or indirectly affect our business;
- additions or departures of Key Management Personnel;
- changes in the interest rates;
- fluctuations in stock market prices and volume; and general economic conditions.

The Indian stock markets have, from time to time, experienced significant price and volume fluctuations that have affected market prices for the securities of Indian companies. As a result, investors in our Equity Shares may experience a decrease in the value of our Equity Shares regardless of our financial performance or prospects.

32. Any future issuance of Equity Shares by us or sales of Equity Shares by the Promoters could adversely affect the trading price of our Equity Shares and in the case of the issuance of Equity Shares by us result in the dilution of our then current shareholders.

As disclosed in “Capital Structure” on page 44, an aggregate of at-least 20% of our fully diluted post-Issue capital held by our Promoters shall be considered as minimum Promoters' contribution and locked in for a period of three years and the balance Equity Shares held by the Promoters will be locked-in for one year from the date of Allotment. Except for the customary lock-in on our ability to issue equity or equity-linked securities discussed in “Capital Structure” on page 44, there is no restriction on our ability to issue Equity Shares. As such, there can be no assurance that our Company will not issue additional Equity Shares after the lock-in period expires or that the Promoters will not sell, pledge or encumber their Equity Shares after the lock-in periods expire. Future issuances of Equity Shares or convertible securities and the sale of the underlying Equity Shares could dilute the holdings of our Shareholders and adversely affect the trading price of our Equity Shares. Such securities may also be issued at prices below the then trading price of our Equity Shares or the Issue Price. Sales of Equity Shares by the Promoters could also adversely affect the trading price of our Equity Shares.

33. You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.

Previously, any gain realized on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months was not subject to long term capital gains tax in India if Securities Transaction Tax (“STT”) was paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or after October 1, 2004, except in the case of such acquisitions of Equity Shares which are not subject to STT, as notified by the Central Government under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017. However, the Finance Act, 2018, now seeks to tax on such long-term capital gains exceeding ₹ 100,000 arising from sale of equity shares on or after April 1, 2018, while continuing to exempt the unrealised capital gains earned up to January 31, 2018 on such Equity Shares. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

34. QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their applications (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a application. Retail Individual Bidders can revise their applications during the Issue Period and withdraw their applications until Issue Closing Date. While we are required to complete Allotment, listing and commencement of trading pursuant to the Offer within six Working Days from the Issue Closing Date, events affecting the Bidders' decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows and financial condition may arise between the date of submission of the Bid and Allotment, listing and commencement of trading. We may complete the Allotment, listing and commencement of trading of our Equity Shares even if such events occur and such events may limit the Bidders' ability to sell our Equity Shares Allotted pursuant to the Issue or may cause the trading price of our Equity Shares to decline on listing.

35. Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

Our performance, growth and market price of our Equity Shares are and will be dependent on the health of the Indian economy. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, cash flows and financial condition. Also, a change in the Government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

36. Changing laws, rules and regulations and legal uncertainties in India, including adverse application of corporate and tax laws, may adversely affect our business and financial results.

Our business and financial performance could be adversely affected by any change in laws or interpretations of existing laws, or the promulgation of new laws, rules and regulations applicable to us and our business including those relating to the industry in which we operate. There can be no assurance that the Government of India or state governments will not introduce new laws, regulations and policies which will require us to obtain additional approvals and licenses or impose onerous requirements on our business.

For example, the new Companies Act, 2013 contains significant changes to Indian company law, including in relation to the issue of capital by companies, disclosures in offer documents, related party transactions, corporate governance, audit matters, internal controls, shareholder class actions, restrictions on the number of layers of subsidiaries, prohibitions on loans to directors, insider trading and restrictions on directors and key management personnel from engaging in forward dealing. Moreover, effective April 1, 2014, companies exceeding certain net worth, revenue or profit thresholds are required to spend at least 2% of average net profits from the immediately preceding three financial years on corporate social responsibility projects, failing which an explanation is required to be provided in such companies' annual reports.

The Ministry of Finance has issued a notification dated March 31, 2015 notifying ICDS which creates a new framework for the computation of taxable income. Subsequently, the Ministry of Finance, through a press release dated July 6, 2016, deferred the applicability of ICDS from April 1, 2015 to April 1, 2016 and is applicable from FY 2017 onwards and will have impact on computation of taxable income for FY 2017 onwards. ICDS deviates in several respects from concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. Such specific standards for

computation of income taxes in India are relatively new, and the impact of the ICDS on our results of operations and financial condition is uncertain. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition going forward.

The Government of India has recently approved the adoption of a comprehensive national goods and services tax (“GST”) regime that will combine taxes and levies by the Central and State Governments into a unified rate structure, with effect from July 1, 2017. Given the limited availability of information in the public domain concerning the GST, we cannot provide any assurance as to this or any other aspect of the tax regime following implementation of the GST. The implementation of this rationalized tax structure may be affected by any disagreement between certain state governments, which may create uncertainty. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. If, as a result of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of such transactions.

We have not determined the effect of such legislations on our business. In addition, unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

37. Investors may have difficulty enforcing foreign judgments against us or our management.

We are a limited liability company incorporated under the laws of India. All our directors and executive officers are residents of India and all of our assets and such persons are located in India. As a result, it may not be possible for investors to effect service of process upon us or such persons outside of India, or to enforce judgments obtained against such parties outside of India.

Recognition and enforcement of foreign judgments is provided for under Section 13 of the Code of Civil Procedure, 1908 (“CPC”) on a statutory basis. Section 13 of the CPC provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon, except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognise the law of India in cases to which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; and (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. Under the CPC, a court in India shall, upon the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record.

However, under the CPC, such presumption may be displaced by proving that the court did not have jurisdiction. India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. Section 44A of the CPC provides that where a foreign judgment has been rendered by a superior court, within the meaning of that Section, in any country or territory outside of India which the Central Government has by notification declared to be in a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been rendered by the relevant court in India. However, Section 44A of the CPC is applicable only to monetary decrees not being of the same nature as amounts payable in respect of taxes, other charges of a like nature or of a fine or other penalties.

The United States and India do not currently have a treaty providing for reciprocal recognition and enforcement of judgments, other than arbitration awards, in civil and commercial matters. Therefore, a final judgment for the payment of money rendered by any federal or state court in the United States on civil liability, whether or not predicated solely upon the federal securities laws of the United States, would not be enforceable in India. However, the party in whose favour such final judgment is rendered may bring a new suit in a competent court in India based on a final judgment that has been obtained in the United States. The suit must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India.

It is unlikely that a court in India would award damages on the same basis as a foreign court if an action was brought in India. Furthermore, it is unlikely that an Indian court would enforce a foreign judgment if that court were of the view that the amount of damages awarded was excessive or inconsistent with public policy or Indian practice. It is uncertain as to whether an Indian court would enforce foreign judgments that would contravene or violate Indian law. However, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI under the FEMA to execute such a judgment or to repatriate any amount recovered.

Global Economic Outlook

(Source: World Economic Outlook – April 2021 / July 2021)

One year into the COVID-19 pandemic, the accumulating human toll continues to raise concerns, even as growing vaccine coverage lifts sentiment. High uncertainty surrounds the global economic outlook, primarily related to the path of the pandemic. The contraction of activity in 2020 was unprecedented in living memory in its speed and synchronized nature. But it could have been a lot worse. Although difficult to pin down precisely, IMF staff estimates suggest that the contraction could have been three times as large if not for extraordinary policy support. Much remains to be done to beat back the pandemic and avoid divergence in income per capita across economies and persistent increases in inequality within countries.

Economic prospects have diverged further across countries since the April 2021 World Economic Outlook (WEO) forecast. Vaccine access has emerged as the principal fault line along which the global recovery splits into two blocs: those that can look forward to further normalization of activity later this year (almost all advanced economies) and those that will still face resurgent infections and rising COVID death tolls. The recovery, however, is not assured even in countries where infections are currently very low so long as the virus circulates elsewhere.

Figure 2. Global Activity Indicators

(Three-month moving average, annualized percent change; deviations from 50 for PMIs, unless noted otherwise)

Sources: CPB Netherlands Bureau for Economic Policy Analysis; Haver Analytics; Markit Economics; and IMF staff estimates.
Note: PMI above 50 indicates expansion while below 50 indicates contraction. PMI = purchasing managers' index.

Divergent Recoveries Expected to Continue into 2022

The baseline forecast reflects the influences of the forces discussed earlier and rests on the following key assumptions:

- **Vaccines, therapies, and the pandemic:** Local transmission of the virus is expected to be brought to low levels everywhere by the end of 2022 through a combination of better-targeted precautions and improved access to vaccines and therapies. Advanced economies are generally on track to achieve broad vaccine availability by summer 2021. Some emerging markets are assumed to get to that point later this year. Most countries are assumed to gain broad access by the end of 2022. Some countries will get to low levels of local transmission sooner than others depending on country-specific circumstances. The baseline nonetheless assumes the possibility of additional waves before vaccines are widely available.
- **Fiscal policy:** The forecast assumes additional fiscal support in the United States in line with the overall cumulative size of the current administration's proposed American Jobs Plan and American Families Plan. The baseline also incorporates expected Next Generation EU grants and loans into the forecasts for those economies. As noted in Box 2, fiscal deficits in most emerging markets are projected to decline in 2021.
- **Monetary policy:** Major central banks are assumed to leave policy rates unchanged throughout the forecast horizon (end of 2022). Some emerging market central banks have begun reducing support, and more are expected to follow suit later in 2021.
- **Rising commodity prices:** Commodity prices are expected to increase at a significantly faster pace than assumed in the April 2021 WEO. Amid the strengthening global recovery, oil prices are expected to rise close to 60 percent above their low base in 2020. Non-oil commodity prices are expected to rise close to 30 percent above 2020 levels, reflecting particularly strong increases in the price of metals and food.
- **Handoff to private activity:** The buildup of excess household savings over the past five quarters of subdued contact-intensive activity and travel is a key aspect of the unprecedented downturn and rebound. As seen in Figure 4, savings tended to accumulate more in countries with larger above-the-line fiscal support to households, which buffered disposable incomes. As economies reopen, private spending is expected to pick up, financed in part by these savings. The speed at which these savings are drawn down will influence the pace of the recovery and inflation pressure. The forecast assumes a smooth handoff from extraordinary policy support to private-activity-led growth, with a gradual drawdown of excess savings. IMF staff analysis suggests a more substantial accumulation of savings in places with relatively lower pre-pandemic household saving rates, indicating some reversion to the mean and the rebuilding of household net worth, which would weigh on the immediate spending impulse.

The global economy is projected to grow 6.0 percent in 2021 and 4.9 percent in 2022. The 2021 global forecast is unchanged from the April 2021 WEO, but with offsetting revisions. Prospects for emerging market and developing economies have been marked down for 2021, especially for Emerging Asia. By contrast, the forecast for advanced economies is revised up. These revisions reflect pandemic developments and changes in policy support. The 0.5 percentage-point upgrade for 2022 derives largely from the forecast upgrade for advanced economies, particularly the United States, reflecting the anticipated legislation of additional fiscal support in the second half of 2021 and improved health metrics more broadly across the group.

Indian Economic Outlook

(Source : IBEF - <https://www.ibef.org/economy/indian-economy-overview> - **ABOUT INDIAN ECONOMY GROWTH RATE & STATISTICS**)

Introduction

India has emerged as the fastest growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

Market size

India's real gross domestic product (GDP) at current prices stood at Rs. 135.13 lakh crore (US\$ 1.82 trillion) in FY21, as per the provisional estimates of annual national income for 2020-21.

India is the fourth-largest unicorn base in the world with over 21 unicorns collectively valued at US\$ 73.2 billion, as per the Hurun Global Unicorn List. By 2025, India is expected to have ~100 unicorns by 2025 and will create ~1.1 million direct jobs according to the Nasscom-Zinnov report 'Indian Tech Start-up'.

India needs to increase its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030's, for productivity and economic growth according to McKinsey Global Institute. Net employment rate needs to grow by 1.5% per year from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030.

According to data from the RBI, as of the week ended on June 04, 2021, the foreign exchange reserves in India increased by US\$ 6.842 billion to reach US\$ 605 billion.

Recent Developments

With an improvement in the economic scenario, there have been investments across various sectors of the economy. Private Equity - Venture Capital (PE-VC) sector recorded investments worth US\$ 20 billion in the first five months of 2021, registering a 2x growth in value compared with the same period in 2020. Some of the important recent developments in Indian economy are as follows:

- Merchandise exports stood at US\$ 62.89 billion between April 2021 and May 2021, while imports touched US\$ 84.27 billion. The estimated value of service exports and imports between April 2021 and May 2021 stood at US\$ 35.39 billion and US\$ 19.86 billion, respectively.

- India's Index of Industrial Production (IIP) for April 2021 stood at 126.6 against 143.4 for March 2021.
- Consumer Food Price Index (CFPI) – Combined inflation was 5.01 in May 2021 against 1.96 in April 2021.
- Consumer Price Index (CPI) – Combined inflation was 6.30 in May 2021 against 4.23 in April 2021.
- In June 2021, foreign portfolio investors (FPIs) turned net buyers by investing Rs. 12,714 crore (US\$ 1.71 billion) into the Indian markets. According to depositories data, between June 1, 2021 and June 25, 2021, FPIs invested Rs. 15,282 crore (US\$ 2.06 billion) in equities.

Government Initiatives

The first Union Budget of the third decade of 21st century was presented by Minister for Finance & Corporate Affairs, Ms. Nirmala Sitharaman in the Parliament on February 1, 2020. The budget aimed at energising the Indian economy through a combination of short-term, medium-term and long-term measures.

In the Union Budget 2021-22, capital expenditure for FY22 is likely to increase to increase by 34.5% at Rs. 5.5 lakh crore (US\$ 75.81 billion) over FY21 (BE) to boost the economy.

Increased government expenditure is expected to attract private investments, with production-linked incentive scheme providing excellent opportunities. Consistently proactive, graded and measured policy support is anticipated to boost the Indian economy.

In May 2021, the government approved the production linked incentive (PLI) scheme for manufacturing advanced chemistry cell (ACC) batteries at an estimated outlay of Rs. 18,100 crore (US\$ 2.44 billion); this move is expected to attract domestic and foreign investments worth Rs. 45,000 crore (US\$ 6.07 billion).

The Union Cabinet approved the production linked incentive (PLI) scheme for white goods (air conditioners and LED lights) with a budgetary outlay of Rs. 6,238 crore (US\$ 848.96 million) and the 'National Programme on High Efficiency Solar PV (Photo Voltic) Modules' with an outlay of Rs. 4,500 crore US\$ 612.43 million).

In June 2021, the RBI (Reserve Bank of India) announced that the investment limit for FPI (foreign portfolio investors) in the State Development Loans (SDLs) and government securities (G-secs) would persist unaffected at 2% and 6%, respectively, in FY22.

To boost the overall audit quality, transparency and add value to businesses, in April 2021, the RBI issued a notice on new norms to appoint statutory and central auditors for commercial banks, large urban co-operatives and large non-banks and housing finance firms.

In May 2021, the Government of India has allocated Rs. 2,250 crore (US\$ 306.80 million) for development of the horticulture sector in 2021-22.

In November 2020, the Government of India announced Rs. 2.65 lakh crore (US\$ 36 billion) stimulus package to generate job opportunities and provide liquidity support to various sectors such as tourism, aviation, construction and housing. Also, India's cabinet approved the production-linked incentives (PLI) scheme to provide ~Rs. 2 trillion (US\$ 27 billion) over five years to create jobs and boost production in the country.

Numerous foreign companies are setting up their facilities in India on account of various Government initiatives like Make in India and Digital India. Mr. Narendra Modi, Prime Minister of India, launched Make in India initiative with an aim to boost country's manufacturing sector and increase purchasing power of an average Indian consumer, which would further drive demand and spur development, thus benefiting investors. The Government of India, under its Make in India initiative, is trying to boost the contribution made by the manufacturing sector with an aim to take it to 25% of the GDP from the current 17%. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy.

Road Ahead

As indicated by provisional estimates released by the National Statistical Office (NSO), India posted a V-shaped recovery in the second half of FY21. As per these estimates, India registered an increase of 1.1% in the second half of FY21; this was driven by the gradual and phased unlocking of industrial activities, increased investments and growth in government expenditure.

As per the Reserve Bank of India's (RBI) estimates, India's real GDP growth is projected at 9.5% in FY22; this includes 18.5% increase in the first quarter of FY22; 7.9% growth in the second quarter of FY22; 7.2% rise in the third quarter of FY22 and 6.6% growth in the fourth quarter of FY22.

India is focusing on renewable sources to generate energy. It is planning to achieve 40% of its energy from non-fossil sources by 2030, which is currently 30% and have plans to increase its renewable energy capacity from to 175 gigawatt (GW) by 2022. In line with this, in May 2021, India, along with the UK, jointly launched a 'Roadmap 2030' to collaborate and combat climate change by 2030.

India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behaviour and expenditure pattern, according to a Boston Consulting Group (BCG) report. It is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by 2040 as per a report by PricewaterhouseCoopers.

Note: Conversion rate used for June 2021 is Rs. 1 = US\$ 0.013

PHARMA API MARKET IN INDIA

India is the largest provider of generic drugs globally. Indian pharmaceutical industry supplies over 50 % of global demand for various vaccines, 40 % of generic demand in the US and 25 % of all medicines in UK are met by exports from India. The country's pharmaceutical industry has expanded at a CAGR of 22.4 % over 2015–20 to reach US \$55 billion. India's pharmaceutical exports stood at US \$17.27 billion in 2017-18 and are expected to reach US \$20 billion by 2020. By 2020, India is likely to be among the top three pharmaceutical markets by incremental growth and 6th largest market globally in absolute size.

Low cost of skilled manpower and innovation are some of the main factors supporting this growth. India is the third largest active pharmaceutical ingredient (API) market in the Asia-Pacific region and China is its main competitor. The API industries in India include domestic and in-house consumption as well as exports. The Indian active pharmaceutical ingredients manufacturing segment can be divided into two sectors such as innovative (branded) and generic (unbranded).

The global generic drugs market was valued at around US \$244.5 billion in 2017, growing at a CAGR of around 8 % during 2010-2017. The global API market is poised to grow at a CAGR of around 6.6 % over the next decade to reach approximately US \$238.8 billion by 2025.

According to Global Market Estimates, the Indian API Market will grow rapidly at a CAGR of 8.57% during the 2020-2026 phase. The Indian drug industry is the world's third-biggest and as far as volume is concerned then it's the thirteenth biggest industry. The rapidly increasing rate of persistent infections, along with the rising importance of conventional drugs, is major reasons for the Indian API market to grow positively. A large scale set up of API manufacturers in the country is the positive outcome of the market growth. The promotion of API via clusters and Production Linked Incentive (PLI) programs by the Government of India has drastically changed the market dynamics.

As per the latest findings, China is representing 30% of the worldwide nonexclusive API vendor market. After China, its USA, and India who are the main producers of nonexclusive APIs. Hence, making India the major hub for outsourcing API manufacturing.

The Indian API industry is esteemed at INR 798 Billion in 2020 and is extended to arrive at INR 1,307 Billion by 2026, at a CAGR of 8.57 %. Also, the China API industry is esteemed at INR 982 Billion in 2020 and is extended to arrive at INR 1,431 Billion by 2026, at a CAGR of 6.49 %.

AGRO CHEMICALS MARKET IN INDIA

Source:

([https://infomerics.com/db-include/uploads/Indian agrochemical industry 06.09.2019.pdf](https://infomerics.com/db-include/uploads/Indian_agrochemical_industry_06.09.2019.pdf) &

<http://www.indiachem.in/brochure/Presentation%20by%20Mr.%20Harsh%20Dhanuka-%20Dhanuka%20Agritech.pdf>)

India is the world's 4th largest producer of agrochemicals after United States, Japan and China. Indian Agro chemical segment can be broadly classified into Insecticides which dominate the Indian crop protection market and form almost 53% of the domestic agrochemicals market followed by Herbicides, Fungicide & others having market share of 24 %, 19% and 4 % respectively, however herbicides are emerging as the fastest growing segment amongst the agrochemicals.

In 2020 Indian agro chemical market was having sales of USD 3.1 Bn. The industry has seen a steady rise for the past four years and is expected to continue to grow at a CAGR of 8% for the period up to year 2024 to reach a size of USD 4 Bn.

Indian agro-chemical firms are preparing products for near future that could significantly boost their sales as molecules worth over INR 26,000 crore are going off-patent by 2020. Industry experts feel the agrochemical sector may witness an annual growth of 15-20 per cent following patent expiry from currently around 8-9 per cent.

Strict enforcement and inspections of environmental clampdown of chemical industry in China would lead to shutdown of Chinese agrochemicals companies unable to comply with such guidelines. This might provide a competitive edge to the Indian agrochemicals companies. India is increasing its share in Net Export of agrochemicals

Due to labor shortages and rising labor costs and new genetically modified crops have increased use of herbicides. Growth in fungicides has grown by 7.5% over the last five years, and this growth is expected to continue.

Losses in Indian agriculture amounts to US \$ 50 Bn., which is 12.5% of the total agriculture output of our country. Pest attacks across various stages of crop life-cycles are affecting farmers. Major reason for agriculture losses can be attributed to weeds constituting 37 % followed by Insect, Diseases & other having share of 29%, 22% & 12% respectively.

SPECIALTY CHEMICALS MARKET IN INDIA

Source:

(<https://blog.finology.in/business/specialty-chemicals-industry#:~:text=The%20Indian%20chemical%20industry%20is,growing%20industries%20in%20the%20world.&text=The%20specialty%20chemical%20segment%2C%20at,consumption%20growth%20and%20export%20opportunity.>)

Specialty chemicals are particular chemical products which provide a wide variety of effects on which many other industry sectors rely. Such industries that depend heavily on it are automotive, aerospace, food, cosmetics, agriculture, manufacturing, and textiles. They can be some kind of formulation or single chemical entities whose chemical composition influences the end product.

Specialty chemicals are made with extensive research and development, which is the main difference between them and commodity chemicals. Unlike commodity chemicals, Specialty chemicals have couple of core applications and are used in various industries like cosmetics, dyes & pigments, agrochemicals, polymers additives, water treatment etc. these user industries contribute over 80% sales of specialty chemicals.

Global chemicals market was estimated to be around USD 4.0 trillion in 2019 of which 20% is constituted by specialty chemicals and has been growing at a CAGR of 5.7 % over the last 5 years reaching USD 805 Bn. It is estimated to grow at 6.4 % over the next 5 years to reach USD 1.2 Tn. By 2025. Specialty chemicals often require extensive product R&D and innovation, which gets translated into better margins, profitability.

The past couple of decades have seen a significant shift in the manufacturing of chemicals from Europe and North America, to Asia. One of the most prominent trends in the global chemicals industry has been the emergence of China as a dominant player. This is reflected in an increase in China's share in the global chemicals industry from 6% in 2000 to around 25% in 2020.

Global share of countries in specialty chemicals

The Indian chemical industry is one of the fastest-growing industries in the world. Currently, it ranks 3rd in Asia and is the 6th largest in the world with respect to output, after the USA, China, Germany, Japan and South Korea. The Indian chemical industry stood at USD 180 Billion in 2019 of which Specialty chemical constituted USD 32 Bn. The industry's growth is mainly driven by consumption growth and export opportunity.

Indian specialty chemicals industry has grown with a CAGR of around 11% from 2014-2019 and is expected to grow with a 12% CAGR in the next 5 years. It is too fragmented with only a few players present in the sub-segment. The scale on which a company operates is also a critical differentiating factor across sub-segments as it helps them to gain a larger share of the customer's wallet. Customers across the globe expect their suppliers to adhere to the compliance norms acceptable across the globe, which serves as a significant entry barrier for scaled-up companies in the industry.

Recent Government Policy Initiatives and Road ahead

(Source : www.investindia.gov.in)

To promote Self-sufficiency in manufacturing of bulk drugs Government has launched two schemes to promote domestic manufacturing of bulk drugs & API's.

Our Competitive Strengths

1. Strong Brand value and repeat Customer orders

BEW brand has strong legacy of over 3 decades. We have esteemed client base across Pharmaceuticals, Agro Chemicals and Specialty Chemicals Industry. Most of our clients give us repeat orders and have been with us for last many years.

2. Cost effective and Quality Manufacturing

We are certified as an authorized ASME U & R stamp manufacturer. This is one of the pre requisite certification for some of our clients for manufacturing few equipments. We have been manufacturing custom made equipments for many of our customers at a much cheaper cost compared to some of our competitors, which helps us win the customers. We also stick to very quality and time bound manufacturing to meet the capex requirements of our customers.

3. Efficient after sales Support Teams

We have trained after sales support teams stationed at Mumbai and Hyderabad to cater key customers across India. Our clientele is mainly situated in Maharashtra, Gujarat, Andhra Pradesh, Telangana and Karnataka. Our team at Mumbai takes care of customers in Maharashtra and Gujarat regions and team at Hyderabad takes care of customers in southern region. Thus we serve our customers very efficiently and in a very timely manner.

4. Strong Leadership Team

Our Promoter, Mr. Prakash Lade is a Mechanical Engineering Diploma holder from Board of Technical Examinations, Maharashtra. He has an experience of almost 5 decades in this business and has been guiding force behind our growth and strategy of our Company. Further Mr. Lade is supported by team of professionals having knowledge of our various business functions.

Our Business Strategy

Our key strategic initiatives are described below:

1. Focused Industry Segment

We have been focused on Chemical Industry comprising of Pharmaceuticals, Agro Chemicals and Specialty Chemicals only. This Industry segments have been withstanding all economic cycles and have proved as winner for our business model. We have avoided the commodity industry to protect our self against the cyclical ups and downs of commodity prices.

2. No Credits or Least Credit period

Our focused Industry segment clientele has better revenues and profits from their supply to regulated markets and accordingly they have been paying us advance payments at the time of the orders and have been paying almost full amount before equipment is delivered to them. This helps us in managing our working capital and finance cost. This also helps us in protecting us from default or bad debt risks.

3. Competitive Pricing

We have been operating in the Industry segment where there has been very few quality suppliers like us, despite that, we believe in offering competitive prices to our customers. This helps us to sustain the competition and claim a position of strength in the marketplace. Due to Covid 19 pandemic situations and production linked incentive (PLI) scheme, most of our customers have planned a large capex and have offered us huge orders due to our quality manufacturing and cost competitive supplies.

4. No Marketing

As a practice we do not have marketing department in our Company. Most of our orders are repeat orders of our old clients or customers those who have come through word-of-mouth publicity. This helps in selecting orders on our terms and at our price. Accordingly, we focus on the orders which give us good margins and where we do not have to offer any credits.

Following is the brief write up on some of our key products:

a. Agitated Pressure Nutsche Filter Dryer (ANFD)

The Agitated Nutsche filter is a Nutsche type filter designed to separate solids from liquids under controlled conditions. It is totally enclosed and is normally operated under pressure or under vacuum. Additionally, the equipment is fitted with a stirrer mechanism which efficiently agitates the slurry during cake washing, smoothens and squeezes the cake during filtration and assists in the automatic discharge of the cake. The APNFD comprises of a pressure vessel in which a main shaft rotates and also moves in the vertical direction. Specially designed stirrer blades are mounted on the shaft, capable of performing various functions. A side discharge arrangement is provided, closing and opening through hydraulic / mechanical means. A filter plate is located at the base of the vessel in level with the discharge port to facilitate maximum cake removal. The filter medium, usually a filter cloth, is fitted on the filter plate which is replaceable type. A multilayered filter plate construction can also be provided for filtration instead of filter cloth. In addition a special design of interchangeable arrangement between filter cloth and multilayered sintered plate can be provided in the same equipment filter dryer.

b. Rotocone Vacuum Filter Dryers (RVFD)

BEW Rotocone Vacuum Filter Dryer is uniquely designed to Filter slurry under pressure or vacuum and to dry wet cake under vacuum only, for products which cannot be agitated either due to crystal breaking limitation or due to static charge generation limitation. It ensures clean and fast filtration. It is also possible to filter at a constant temperature, either low or high. Thorough washing of cake is done with controlled quantity of wash liquid, which can be recovered, reducing washing cycles and effluent discharge. The closed operation ensures odourless and contamination free working conditions. Our unique design saves costly solvents, power, labor, floor space and time. It is well suited for sterile applications. It provides economical and pollution free working environment. BEW Rotocone Vacuum Filter Dryer does not require extensive foundation. It can be fitted on lugs or platform.

c. Cantilever Rotocone Vacuum Dryer (RCVD)

This is a unique innovated vacuum dryer which is space saving compared to the conventional Rotocone Vacuum Dryer. This dryer has a single stand on one side only whereas conventional Rotocone Vacuum Dryer has two side stands on either side which occupies more space. This unit is very much useful for drying high sterile pharma and high toxic chemical products along with solvent recovery system under vacuum.

d. Retractable Plough Shear Mixer Dryer

Specialised cip design (retractable shaft)
The design is modified to suit specific CIP purpose essential in Pharma industry. Here the entire shaft can be retracted out of the main shell using guides, so that the equipment can be thoroughly cleaned for batch change over. The shaft is specially designed in Cantilever shape and can be provided with a Mechanical seal with close tolerances. Choppers can be employed in this design too.

e. Agitated Pan Dryer

The Pan dryer is based on the well-established and proven Filter / Dryer technology. The porous filter bottom is replaced with a heated flat bottom. The simple change in the design of the heated flat bottom increases the heat transfer area considerably. The agitator of the Pan Dryer is also normally heated and is equipped with speed control.

Pan Dryer (top entry agitator type)

The top driven Pan Dryer relies on rotational velocity. A particularly fast agitator with circumferential speed of up to 3 m/s ensures optimum mixing. The raising and lowering agitator also provides mixing on the vertical axis. At the same time, the minimal agitator to wall clearance keeps the wall free from product crust. The rotational high speed of the agitator combined with its vertical translation does not require the use of a chopper.

Pan Dryer (bottom entry agitator type)

The vessel is equipped with a bottom driven agitator turning at low and variable speed, depending on the nature of the product to be dried and its moisture content. The agitator ensures the constant renewal of the product in contact with the Heated vessel shell and ensures a good homogeneity and a constant temperature of mixing. In Both type of Pan Dryer the heat required for drying is supplied by the circulation of hot fluid (water, steam or thermal fluid) in the insulated double jacket of the vessel (bottom, shell, cover, dust filter) and avoids areas of condensation. Loading is done at the top of the vessel in both types.

f. Rotary Vacuum Paddle Dryer (RVPD)

These dryers give drying, mixing and breaking effects simultaneously. Wet cake or slurry is fed through charging door, while the agitator is rotating in clockwise direction, Vacuum is applied in the dryer and heating media is circulated in the jacket. Evaporation of moisture takes place under vacuum and vapors passes through the dust catcher into the condenser, where it is condensed and collected in the receiver. Dried material is discharged through discharge valve. The lump breaker rods are provided to achieve good drying effect. The unique quick opening discharge valve is operated by a hand wheel. This allows quick discharge of material and permits the dry product to be directly packed into convenient 25/50 kg bags or drums without loss of powder material.

g. Spherical Dryer

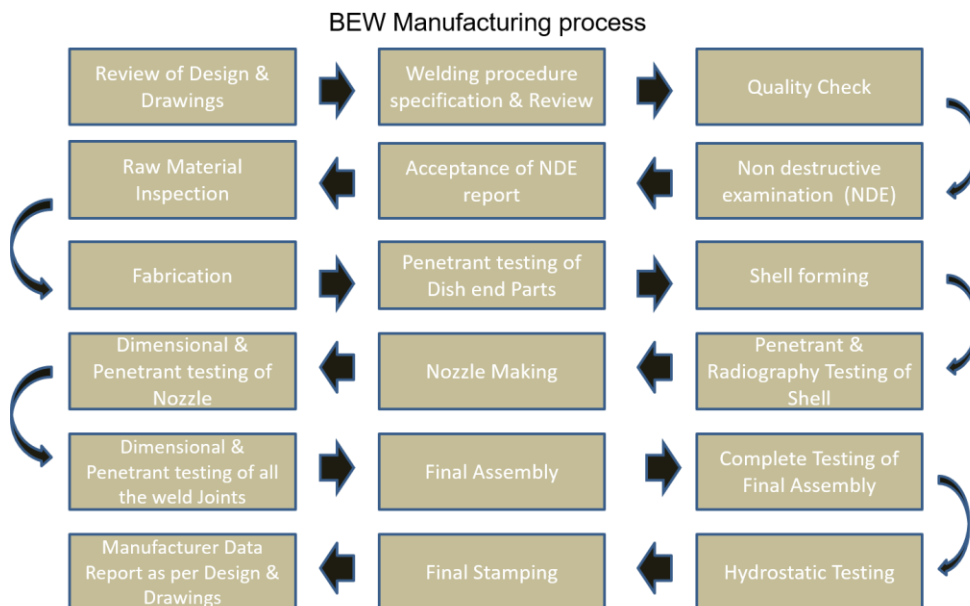

These dryers give drying, mixing and breaking effects simultaneously. Wet cake or slurry is fed through charging nozzle, while the agitator is rotating in clockwise direction. Vacuum is applied in the dryer and heating media is circulated in the jacket. Evaporation of moisture takes place under vacuum and vapors pass through the dust catcher into the condenser, where it is condensed and collected in the receiver. Dried material is discharged through discharge valve. A lump breaker can be provided to achieve good drying and disintegration effect.

Process:

Our portfolio of products currently includes design and manufacturing of filters and dryers for Chemicals Industry comprising of Pharmaceuticals – API, Agro Chemicals and Specialty Chemicals.

Our business process generally includes the following steps:

Manufacturing process time lines in Weeks / Days (Average)

Stage 1 – 2 Weeks (14 – 15 Days)	Stage 2 – 1 Week (7 – 9 days)	Stage 3 – 1 Week (7 – 8 days)
Stage 6 – 1.5 Week (8 -10 days)	Stage 5 – 2 Weeks (8 – 10 days)	Stage 4 – 3 Weeks (20 – 22 days)
Stage 7 – 2 days	Stage 8 – 2 Weeks (12 – 15 days)	Stage 9 – 2 Weeks (12 - 14 days)
Stage 12 – 2 days	Stage 11 – 3 Weeks (18 – 20 days)	Stage 10 – 3 days
Stage 13 – 1.5 Week (7 – 10 days)	Stage 14 – 3 days	Stage 15 – 1 week (7 – 8 days)
Stage 18 – 1 week (7 – 8 days)	Stage 17 – 1.5 week (7 – 10 days)	Stage 16 – 3 days

Apart from the above time lines it takes 4 weeks to design and assemble agitator and other bought out's and if there is 3rd party inspection then additional 2 weeks is needed for the same. Document checking by the client at the time of installation is additional 1 week. So in all it takes at least 24 – 30 weeks to complete the machine which depends upon customization & complexity of the machine.

Explanations for each stage

Stage 1 – Our Design team prepares design of equipment as per specification received from clients. The design is reviewed by our internal team for any flaws, once design is finalised same is shared with clients for any approval / changes, if any, and finalised. Once go ahead is received from clients next stage is commenced.

Stage 2 - Welding specification of equipment is discussed with the welding team on the basis of design finalised earlier and the same is reviewed along with the design team and the same is finalised for further processing.

Stage 3 - The design & welding specification finalised by respective teams are sent to the quality check department to verify its compliance to various engineering standards as per which the machine is to be manufactured.

Stage 4 - Non Destructive Test (NDT) and quality checks are conducted on raw materials received.

Stage 5 & 6 - Once lab report for NDT and quality check is received and accepted final inspection of raw material is conducted

Stage 7 - Raw materials are handed over to the fabrication team for further processing of the same.

Stage 8 - Dish end of the equipment is designed and manufactured as per specification of the design. Penetrant and radiology test is conducted to check for any flaws on the dish end.

Stage 9 - The fabrication team now starts fabricating outer shell of the equipment. At every stage of fabrication design, welding & fabrication team works in close coordination with each other.

Stage 10 - Penetrant and Radiology test is conducted on the shell body and the quality check report is shared with other departments. Once clearance is received from the respective teams buffing and polishing of the shell is done.

Stage 11 - Nozzle design is finalised by the design team and shared with welding team to start manufacturing the nozzle.

Stage 12 - Quality check on welding joints and dimensions of the nozzle is done to verify its adherence as per design specifications.

Stage 13 - Penetrant and Radiology test is done on the nozzle.

Stage 14 - Go ahead is given for final assembly of the entire machine on receipt of quality check report of the nozzle.

Stage 15 - Once the final assembly of the equipment is done quality checks like Penetrant test & Radiology test is conducted to check for any flaw.

Stage 16 - High pressure hydrostatic test and vacuum pumps test is conducted to check for any leakages.

Stage 17 - On receipt of test report the equipment is approved by the design team and quality check department and is readied for final dispatch.

Stage 18 - At time of installation a complete documentation along with detailed design and user manual is provided to clients.

GST is levied on all transactions such as supply, transfer, purchase, barter, lease, or import of goods and/or services. Transactions made within a single state are levied with Central GST (CGST) by the Central Government and State GST (SGST) by the government of that state. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST is a consumption based tax, therefore, taxes are paid to the state where the goods or services are consumed and not the state in which they were produced.

Indian Contract Act, 1872

The Indian Contract Act, 1872 provides for seeking data protection under contract law and common law, by incorporating confidentiality and data protection clauses in contracts. According to this Act, when a party commits a breach of contract, the other party is entitled to receive compensation for any loss or damage caused to it. Specific performance of the contract is also a remedy under the Act. Thus companies acting as ‘data importers’ may enter into contracts with ‘data exporters’ to adhere to a high standard of data protection.

The Specific Relief Act, 1963

The Specific Relief Act is complimentary to the provisions of the Contract Act and the T.P. Act, as the Act applies both to movable property and immovable property. The Act applies in cases where the Court can order specific performance of a contract. Specific relief can be granted only for purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. ‘Specific performance’ means Court will order the party to perform his part of agreement, instead of imposing on him any monetary liability to pay damages to other party.

Other Laws and Regulations

In addition to the above, our Company is also required to comply with the provisions of the Companies Act, and other applicable statutes imposed by the Centre or the State for its day-to-day operations. Our Company is also amenable to various central and state tax laws.

COVID 19 Pandemic:

An outbreak of COVID-19 was recognised as a pandemic by the WHO on March 11, 2020. In response to the COVID-19 outbreak, the governments of many countries, including India, have taken preventive or protective actions such as imposing country-wide lockdowns, as well as restrictions on travel and business operations. Since May 2020 many of these measures have been lifted. Due to a government mandated lockdown in India, we had to temporarily shut down our operations from mid-March 2020 to April 2020. We have resumed operations slowly from May 2020. We proactively engaged with our clients to reassure them and to demonstrate our commitment to restart our operations and to build confidence in the safety protocols deployed at our office. As a result, we have since experienced a gradual increase in business.

Key factors affecting the results of operation:

Our Company's future results of operations could be affected potentially by the following factors:

Competition

Our Company faces significant competition from other companies operating in the markets in India in which we operates. Our ability to grow revenues will depend on demand for our services in preference to those of its competitors.

Growth in the Indian economy

General economic conditions in India have a significant impact on our results of operations. The Indian economy has grown rapidly over the past decade and is expected to continue to grow in the future. We believes growth in the overall economy has driven, and will drive, the underlying demand for our products

Regulatory developments

Our Company is regulated by the Companies Act and some of its activities are subject to supervision and regulation by statutory and regulatory authorities. It is therefore subject to changes in Indian law, as well as to changes in regulation and government policies and accounting principles.

Fluctuations in demand for our services

Supply and demand market conditions are affected by various factors outside our control, including:

- prevailing local economic, income and demographic conditions;
- changes in applicable regulatory schemes; and
- competition from other players.

Other factors

1. Company's ability to successfully implement our strategy, our growth and expansion, technological changes;
2. Failure to comply with regulations prescribed by authorities of the jurisdictions in which we operate;
3. Changes in laws and regulations relating to the segments in which we operate;
4. Our ability to attract, retain and manage qualified personnel;
5. Failure to adapt to the changing technology in our industry of operation may adversely affect our business and financial condition;

(SEBI/HO/CFD/DIL2/CIR/P/2019/76) dated June 28, 2019, has introduced an alternate payment mechanism using Unified Payments Interface (—UPI) and consequent reduction in timelines for listing in a phased manner. From January 1, 2019, the UPI Mechanism for RIIs applying through Designated Intermediaries was made effective along with the existing process and existing timeline of T+6 days. (—UPI Phase II). The UPI Phase I was effective till June 30, 2019.

With effect from July 1, 2019, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, read with circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019 with respect to Applications by RIIs through Designated Intermediaries (other than SCSBs), issued by SEBI, the existing process of physical movement of forms from such Designated Intermediaries to SCSBs for blocking of funds has been discontinued and only the UPI Mechanism for such Bids with existing timeline of T+6 days will continue for a period of three months or launch of five main board public issues, whichever is later (“**UPI Phase II**”). Subsequently however, SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 extended the timeline for implementation of UPI Phase II till March 31, 2020. However, given the prevailing

uncertainty due to the COVID-19 pandemic, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, has decided to continue with the UPI Phase II till further notice. The final reduced timeline of T+3 days for the UPI Mechanism for applications by RIIs (“**UPI Phase III**”) and modalities of the implementation of UPI Phase III maybe notified and made effective subsequently, as may be prescribed by SEBI. The Issue will be undertaken pursuant to the processes and procedures under UPI Phase II, subject to any circulars, clarification or notification issued by the SEBI from time to time. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 has introduced certain additional measures for streamlining the process of initial public offers and redressing investor grievances. This circular shall come into force for initial public offers opening on or after May 1, 2021 and the provisions of this circular are deemed to form part of this Prospectus.

Phased implementation of Unified Payments Interface

SEBI has issued a **UPI Circulars** in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Retail Individual Applicant would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six Working Days.

Phase II: This phase commenced on completion of Phase I i.e. with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to be three Working Days. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Issue.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers are to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.
