The publishing market size is forecast to increase by USD 19.37 billion at a CAGR of 1.2% between 2023 and 2028. The market is experiencing significant shifts, driven by several key trends. The increasing demand for diversity in content reflects a growing recognition of the importance of representation and inclusivity. This trend is further fuelled by the rise in the number of self-published authors, who have greater creative control and faster time-to-market. Conversely, the market share of traditional publishing is decreasing due to the ease of self-publishing and changing consumer preferences. These trends present both opportunities and challenges for market participants, requiring them to adapt and innovate to remain competitive.

The market is a dynamic and diverse industry that caters to the insatiable appetite of reading enthusiasts for knowledge and entertainment. From the publication of Charles Darwin's groundbreaking works on evolution to Albert Einstein's scientific theories, the publishing industry has played a pivotal role in shaping our understanding of the world. Today, the market encompasses a wide range of genres, from the mystery genre with its intricate jigsaws and Rubik's cubes-like puzzles, to educational books on subjects as diverse as stock market analysis and housing market trends. The India publishing market is a rapidly growing and lucrative industry. It is estimated to grow at a CAGR of 10.3% during the forecast period 2020-2026. The Indian publishing sector has been in existence for centuries, and continues to be an important part of the cultural landscape today. Traditional publishing houses in India have seen significant growth over recent years due to the increased demand for books in regional languages as well as a rise in digital content consumption across various platforms such as e-books, videos, audio books etc., which are made available online through major Indian publishers like Amazon Kindle, Flipkart Books, among others.

Prospective Investors should carefully consider all information in this Red Herring Prospectus, including the risks described below, before making an investment in our Equity Shares. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations, cash flows and financial condition could suffer, the price of the Equity Shares could decline, and you may lose all or part of your investment. In making an investment decision, prospective investors must rely on their own examination of Our Company and the terms of the Offer including the uncertainties and risks involved. Investors should consult their tax, financial and legal advisors about particular consequences to them of an investment in the Offer. The risk factors set forth below do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, such financial impact cannot be disclosed in such risk factors. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section. Any of the following risks, as well as the other risks and uncertainties discussed in this Red Herring Prospectus, could have a material adverse effect on our business and could cause the trading price of our Equity Shares to decline and you may lose all or part of your investment.

This Red Herring Prospectus also contains forward-looking statements that involve risks and uncertainties. Materiality

The Risk Factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality of Risk Factors:

- Some events may not be material individually but may be found material collectively;
- Some events may have material impact qualitatively instead of quantitatively; and
- Some events may not be material at present but may have a material impact in future.

The financial and other related implications of risks concerned, whether quantifiable have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence, the same has not been disclosed in such risk factors. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk over another.

In this Red Herring Prospectus, any discrepancies in any table between total and sums of the amount listed are due to rounding off.

In this section, unless the context requires otherwise, any reference to “we”, “us” or “our” refers to Icodex Publishing Solutions Limited.

INTERNAL RISK AND RISKS ASSOCIATED WITH OUR BUSINESS

- We are highly dependent on few customers for our business and revenues. Loss of relationship with any of these customers may have a material adverse effect on our profitability and results of operations of our Company**

We depend on few customers who have contributed to a substantial portion of our total revenue from operations. Till March 31, 2024, the business of our Company was entirely dependent on a single Client, however, in order to mitigate this risk of revenue concentration, we have from FY 2024-25 started making domestic sales to few more clients.

In aggregate for the Financial Years ended March 2025, March 2024 and March 2023, the contribution towards revenue from operations from our top 1 customer and top 5 customers is as follows:

Particulars	FY 2025		FY 2024		FY 2023	
	Amount	%	Amount	%	Amount	%
Top 1 Customer	912.21	41.70%	1040.07	100.00%	953.67	100.00%
Top 5 Customers [#]	2172.03	99.28%	1040.07	100.00%	953.67	100.00%
Total	2187.74	100.00%	1040.07	100.00%	953.67	100.00%

#During the financial years 2024 and 2023 our Company had 100% revenue from one Client only i.e., a Global Publishing Company. During FY 2024-25, the company has started its Software Product Development, BPM and Application Support and IT & Management to few domestic clients.

There is no guarantee that we will retain the business from our existing key customers or maintain the current level of business with each of these customers. Reliance on a limited number of customers may involve several risks. These risks may include, but are not limited to, reduction, delay or cancellation of orders from our key customers or failure to negotiate favourable terms. Loss of any of these customers will have a material adverse effect on our business, financial condition, results of operations and future prospects. In order to retain some of our existing customers we may also be required to offer better terms to such customers which may place restraints on our resources. Maintaining strong relationships with our key customers is essential to our business and for the growth of our business. Additionally, the loss of any key customer, may significantly affect our revenues, and we may have difficulty securing comparable levels of business from other customers to offset any loss of revenue. If one or more of our customers become insolvent or otherwise unable to pay for the services rendered by us, this could have an impact on our business as we may not be able to recover our costs.

For the financial year ended March 31, 2024 and March 31, 2023 100% of the revenue was derived from one customer. A substantial portion of our revenue is still dependent on this customer. Further, considering that there is significant competition for the services provided by us and that our Company does not provide exclusive service to the customer, the quantum of revenues generated could vary from time to time. Further, the customer typically retains us under master services agreements which do not provide for specific amounts of guaranteed business.

- Substantial portion of our revenues is dependent on a Global Publishing Company based out of United States of America (USA). Any economic slowdown and/or any other factor affecting the economy of USA may have an adverse impact on our business. Further any change in the Government regulations and policies vis-à-vis supply of services to USA may have a material adverse effect on our profitability and results of operations.**

We have historically derived a significant portion of our revenues from a Global Publishing Company based out of USA. Revenue from operations from this USA based client amounted to Rs. 912.21 Lakhs, Rs. 1040.07 Lakhs, Rs. 953.67 Lakhs for the financial years ended March 31, 2025, March 31, 2024 & March 31, 2023 respectively, and represented 41.70%, 100.00%, & 100.00% of our revenue from operations, in such years, respectively. Consequently, in the event of any economic slowdown and/or any other factor affecting the economy of USA may have an adverse impact on our business.

We are highly dependent on provision of service to Global Publishing Company based out of United States of America. In case of any change in the Government regulations and policies vis-à-vis supply of services to USA our resultant service will be hampered which may have a material adverse effect on our business, profitability and results of operations. Further, catering to international clients are subject to risks that are specific to each country and region in which the services are provided.

Our Company derives majority of its revenue from a Global Publishing Company based in USA. This customer is in the business of publishing or providing publishing solutions and outsource a part of its work to our Company. Offshore outsourcing has been the subject of political debate, and has come under increased government scrutiny within the

countries where our end markets are located due to its perceived association with loss of jobs in these countries. Several governments have implemented or are actively considering implementing restrictions or sanctions on outsourcing work to offshore IT services providers. Any changes in these countries in relation to their existing laws or the enactment of new legislation restricting offshore outsourcing, particularly by private companies, may adversely impact our business, financial condition and results of operations.

3. We have entered into business agreements / service agreements with our customers which contain Termination clause. In the event of any breach of obligations or covenants in the agreements, it may lead to termination of our service agreements with our customers which in turn may result in loss of business, profitability and operations of our Company.

We have entered into business/service agreements with our customers including a Global Publishing Company in connection with our business activities. Some of these agreements entail specific termination clause viz breach of agreement, general assignment for the benefit of creditors, filing of petition for bankruptcy or reorganization, change in control, dissolution or ceasing to do business, delisting from any major public stock exchange, or negative cash flow from operations on a rolling twelve-month basis.

Any non-compliance with business agreements, may result in breach, termination or modification of any of these agreements and may consequently result in an adverse impact on our business, reputation, financial condition, cash flows, and operational results.

The terms of these agreements are such that, these agreements as well as the project assignments received under these master services agreements, typically, are capable of being terminated by our customer upon short notice (30 days) and with or without significant penalties. Upon occurrence of any of such eventuality or any loss of our major customers we may face the risk of reduction in revenue which in turn could adversely affect our business operations and financial conditions.

Though there has been no such material instance in the past, however it cannot be assured that the same will not be repeated in the future.

4. Our Company is exposed to foreign currency exchange risks, which we may not be able to manage effectively. Currency exchange rate fluctuations could adversely affect our financial results

Our exchange rate risk primarily arises from our foreign currency revenues and receivables. As such, our business is highly sensitive to foreign-exchange rates. The foreign exchange fluctuation affects the revenues in absolute terms when converted into Indian Rupees. To this extent, the revenues will be higher or lower depending on the depreciation or appreciation of Indian Rupee in foreign currency terms.

Our Company's Foreign Exchange gain/(loss) for the year ended March 2025, March 2024 and March 2023 were Rs. (12.15 Lakhs), Rs. 33.94 Lakhs and Rs. 8.94 Lakhs respectively. To manage our foreign exchange exposure, we may or may not enter into various derivative/hedging contracts. The Company has not entered into any derivative contracts to hedge the foreign exchange risk.

Therefore, fluctuation in the exchange rate between the Indian Rupee, USD may have a material effect on our revenues and profitability. Our inability to manage foreign currency exchange rate fluctuations effectively could affect our financial results.

5. Success of our business is substantially dependent on our Promoters for the continued success of our business through their continuing services and strategic guidance and Senior Managerial Personnel and our inability to retain them could adversely affect our business and operations

Our success heavily depends on the efforts and abilities of our Senior managerial personnel, along with support of our Promoters. We are dependent on our Promoters and Senior Managerial Persons to manage our current business operations. The loss of any of our Promoter and/or Senior Management Personnel, or failure to recruit suitable or comparable replacements, could have an adverse effect on us. The loss of service of the Promoter and/or Senior Managerial Personnel may lead to loss of technical knowledge which may materially and adversely impact our business, results of operations, and financial condition.

Our senior managerial personnel possess the requisite knowledge for the industry in which our Company operates. Our future performance will depend upon the continued services of these persons. Demand for senior managerial personnel in the industry is intense and our inability to attract and retain senior managerial personnel may affect the operations of our Company.

Thus, success of our business is substantially dependent on our Senior employees and our inability to retain them could adversely affect our business and operations.

6. We operate out of a co-working space and we do not own the business premises where our registered office is situated

The premises used by our Company for our business purpose i.e., our registered office is a co-working space taken on Membership basis. For more details on property taken on membership basis by our Company, see “Our Business” on page 125. If any such membership agreements under which we occupy the premises are not renewed on terms and conditions that are favourable to us, or at all, we may suffer a disruption in our operations which could have a material adverse effect on our business, financial condition and results of operations. If we do not comply with certain conditions of the membership agreements, the owners of such premises may terminate the agreement, which could have an adverse effect on our operations. There can be no assurance that renewal of membership agreements with the owner will be entered into. In the event of non-renewal of membership arrangements, we may be required to shift our business premises to a new location and there can be no assurance that the arrangement we enter into in respect of new premises would be on such terms and conditions as the present one.

7. Our Company’s success depends largely upon its skilled professionals and its ability to attract and retain these personnel. The industry where our Company operates is a highly skilled and technical employee intensive industry.

Our Company has a total of 116 employees on payroll. We have also hired 6 additional retainers on contractual basis and the average attrition rate of the Company for the FY 2024-25 is 2.49%.

Our Company’s ability to execute projects and to obtain new clients depends largely on our ability to attract, train, motivate and retain highly skilled software professionals and other mid - level professionals. The attrition rates in the industry in which we operate have been high due to a highly competitive skilled labor market in India. Our Company invests significant time and money in training the professionals that are hired to perform the services provide to our customers. Our Company believes that there is also a significant competition in our industry among employers to attract these professionals with the skills necessary to perform the services we offer. In addition, our Company may have difficulty in retraining our professionals to keep pace with continuing changes in technology, evolving standards and changing customer preferences. In the event our Company is unable to hire and retain qualified personnel, our ability to obtain new orders or execute existing orders may be impaired. In addition, our Company may not be able to expand its business effectively thereby adversely affecting our revenues

There is intense competition for experienced skilled professionals with technical and industry expertise in our business and if we lose the services of any of these or other key individuals and are unable to find suitable replacements in a timely manner, our ability to realize our strategic objectives could be impaired. The loss of members of our team, particularly to competitors, could have a material adverse effect on our business and results of operations.

8. There have been instances of delay in filing of statutory and regulatory dues in the past with the various Government authorities.

In the past, there have been instances of delay in statutory & regulatory dues with respect to Tax Deduction at Source (TDS) and Goods and Service Tax (GST). The details of the same is as per the tables below:

11. Our Company has made application for registration of logo with Registrar of Trademark; any infringement of our brand name or failure to get it registered may adversely affect our business. Further, any kind of negative publicity or misuse of our brand name could hamper our brand building efforts and our future growth strategy could be adversely affected.

Our Company has not registered its logo “ ICODEX” with the Registrar of Trademark for registration of logo and an application towards the same has been made. If we are unable to register the intellectual property in the future in our name or any objection on the same may require us to change our logo and hence may loose on the goodwill created so far. Further, the same may involve costly litigations and penal provisions if some legal consequences arise if someone from outside use our name and logo of the Company. We believe that our future growth and competitiveness would depend on our ability to establish and strengthen our brand. We cannot guarantee that we will be able to make a lasting brand image with our clients and other people in the absence of a logo. Although, we believe that our present systems are adequate to protect our confidential information and intellectual property, there can be no assurance that our intellectual property data, trade secrets or proprietary technology will not be copied, infringed or obtained by third parties. Further, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. This may lead to litigations and any such litigations could be time consuming and costly and their outcome cannot be guaranteed. Our Company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property, which may adversely affect our business, financial condition and results of operations.

12. Increase in Employee Salaries in India may prevent us from sustaining our competitive advantage and may reduce our profit margin

Our most significant costs are the salaries and related benefits paid to of our operations staff and other employees. Salaries in India have historically been significantly lower than salaries in the USA and Europe for comparably skilled professionals, which has been one of our competitive advantages. However, because of rapid economic growth in India, increased demand for services from India and increased competition for skilled employees in India, salaries for comparably skilled employees in India are increasing, which may reduce this competitive advantage. Any increase in salary in the long term may reduce our profit margins, if we are unable to pass it on to our customers or fail to improve the productivity.

13. Our Company operates in a highly competitive environment. Any failure to compete effectively may have a material adverse effect on our business, financial and results of operations

The markets for publishing solution services are rapidly evolving and highly competitive. Our Company faces competitive pressure from a broad spectrum of Indian and international publishing solution providers. In most markets, we are required to compete with competitors of varying sizes and with ability to perform different kinds of products and services, some or all of which we may or may not be able to offer.

Our Company believes that competition will continue to intensify both through the entry of new players and consolidation of existing players. Some of our competitors may have greater financial resources, technical and marketing resources and generate greater revenues, and therefore may be able to respond better to market changes than we can.

Our Company also believes that our ability to compete depends on a number of factors beyond our control including the ability of our competitors to attract, train, motivate and retain highly skilled employees, the price at which our competitors offer comparable services and the extent of our competitors' responsiveness to customer needs. Our inability to adequately address competitive pressures may have a material adverse effect on our business, prospects and results of operations.

We are constantly required to evaluate and increase our competitive position in each of our markets. As a result, we may have to lower our profitability levels and continue to strive to compete with our competition on all fronts. Our competitive position in a market therefore significantly impacts our market share, business, financial condition, results of operations and prospects.

14. Significant disruptions in our information technology systems, cyber threats or breaches of data security could affect our business and reputation

We may also face cyber threats, wherein fraudsters send unsolicited codes or mails seeking account sensitive information or to infect custom machines to search and attempt ex-filtration of account sensitive information. Cyber threats are evolving and are becoming increasingly sophisticated. Our Company may experience cyber threats from time to time, which pose a risk to the security of our systems and networks and the confidentiality, availability and integrity of our data.

Such threats can be in the nature of –

1. Hacking – wherein expert attackers seek to hack into our infrastructure with the primary intention of causing reputational damage to us by disrupting services;
2. Data theft – This can be internal i.e., by someone who has access to data of our Company or external wherein unconnected expert cyber criminals may attempt to intrude into our network with the intention of stealing our data or information; and
3. Advanced persistent threat – a network attack in which an unauthorized person gains access to our network and remains undetected for a long period of time.

Our systems are may be vulnerable to data security breaches, whether by our employees, or others that may expose sensitive data to unauthorized persons.

We process and transfer data provided to us in the normal course of business. Although we maintain systems and procedures to prevent unauthorized access and other security breaches, it is possible that unauthorized individuals could improperly access our systems, or improperly obtain or disclose sensitive data that we process or handle. Data security breaches could lead to the loss of data or could lead to the public exposure of sensitive information of our clients. Any such security breaches or compromises of technology systems could result in institution of legal proceedings against us and potential imposition of penalties, which may have an effect on our business and reputation.

Significant security breaches in our computer systems and network infrastructure and fraud could impact our business. We seek to protect our computer systems and network infrastructure from physical break-ins as well as security breaches and other disruptive problems. Computers break –ins could affect the security of information stored in and transmitted through these computers systems and networks.

A few of our products and solutions operate on web-based technologies. Our contracts with customers require us to comply with certain security obligations, including maintenance of network security, back-up of data, ensuring our network is virus-free and ensuring the credentials of those employees who work with our customers. Our Company cannot assure that they will be able to comply with all these obligations and not incur any liability. Further, while our Company has implemented industry-standard security measures, our network may still be vulnerable to unauthorized access, computer viruses and other disruptive problems. Anybody who is able to circumvent security measures could misappropriate proprietary information and cause interruptions in our operations. Thus, if we are unable to successfully protect our computer systems from security risks, our business could suffer and we may also be subjected to claims for losses and damages from customers for any loss of data or breach of confidentiality provisions.

Though, no such instances have occurred in the past, there can be no assurance that the same will not happen in future.

15. We are proposing to purchase a new office space with the proceeds from the Fresh issue. Within the parameters as mentioned in the chapter titled “Objects of the Offer” beginning on page 81 of this Red Herring Prospectus, our Company’s management will have flexibility in applying the proceeds of this Offer. The fund requirement and deployment mentioned in the Objects of this Offer have not been appraised by any bank or financial institution.

We intend to use a substantial portion of Net Offer Proceeds from Fresh Offer as capital expenditure towards purchase of new office. In case there is delay in receipt of possession from the builder then the same may have an adverse bearing on our business operations. Though we do not envisage any such delay, however if the same happens then our business will be affected. The other objects for the Offer are to purchase hardware for new office, to meet working capital requirements, and for general corporate purpose. We intend to deploy the entire Net Offer Proceeds from Fresh Offer in financial year 2025-26. Such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Offer may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc. The IPO Funds pending utilization (if any) will be deposited in scheduled commercial bank having credit rating of A or above.

For further details on the use of the Offer Proceeds, please refer chapter titled “*Objects of the Offer*” beginning on page 81 of this Red Herring Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled “*Objects of the Offer*” beginning on page 81 of this Red Herring Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Offer. Our Board of Directors will monitor the proceeds of this Offer.

16. Our business will suffer if we fail to anticipate and develop new services and enhance existing services in order to keep pace with rapid changes in technology and the industries on which we focus.

The Information Technology industry is characterized by rapid technological changes, evolving industry standards, changing client preferences, and new service introductions that could result in technology obsolescence. Our future success will depend on our ability to anticipate these advances, enhance our existing offerings or develop new service offerings to meet client needs, in each case, in a timely manner. We may not be successful in anticipating or responding to these advances on a timely basis, or at all. If we do respond, the services or technologies we develop may not be successful in the marketplace. We may also be unsuccessful in stimulating customer demand for new and upgraded services, or seamlessly managing new service introductions or transitions. Our failure to address the demands of the rapidly evolving IT environment, particularly with respect to emerging technologies, and technological obsolescence, could have a material adverse effect on our business, results of operations and financial condition. In addition, our success also depends on our ability to proactively manage our portfolio of technology alliances. Additionally, during the regular course of operating our business, we may adjust our future plans as a result of our research, experience, technology evolution and market demand. Accepting unforeseen business opportunities may also result in change in business model. We cannot give assurance that any adjustment in our future plans will become successful or be more successful than our current business model. A shift in our plans may result in the use of other technologies. Other technologies may in the future prove to be more efficient and/or economical to us than our current technologies. We cannot give assurance that any change in technology will become successful or be more successful than our current technology.

17. The Promoter Selling Shareholders, will receive the entire proceeds from the Offer for Sale. Our Company will not receive or benefit from any proceeds from the Offer for Sale.

18. Our Company has entered into related party transactions in the past and may continue to enter into related party transactions in the future, which may potentially involve conflicts of interest with the equity shareholders.

Our Company have entered into certain related party transactions with our Promoter and Directors in the past. For details, please see “*Annexure V (Note 23) of Restated Financial Statements*” under the chapter titled “*Restated Financial Statements*” beginning on page 170 of this Red Herring Prospectus. While our Company believes that all such transactions stated in the Restated Financial Statements have been conducted on the arm’s length basis as per in accordance with the Companies Act 2013 and other law if applicable, there can be no assurance that it could not have been achieved on more favorable terms had such transactions not been entered into with unrelated parties. Further, it is likely that we may enter into related party transactions in the future and such transactions may potentially involve conflicts of interest. In terms of the Companies Act, 2013 and SEBI LODR Regulations, we are required to adhere to various compliance requirements such as obtaining prior approvals from our Audit Committee, Board and Shareholders for certain related party

transactions. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

19. Our Promoters do not have prior experience in handling higher business volume. If we are unable to manage our growth effectively and develop our strategic plan effectively, our business and prospects may be materially and adversely affected.

Post IPO due to infusion of IPO proceeds, business volume may increase. The Promoters/Key Managerial personnel may not be able to handle such increase in business volume as they do not have past experience of handling such increase in business.

20. If we are unable to keep abreast with new products and service introductions, and evolving industry standards, our business and financial condition may be adversely affected. Further, we will also incur costs associated with replacing obsolete products and technologies.

The industry in which our Company operates, involves new developments and upgradation of our products and services. One of the factors for the customers to be retained is by providing them quality services. Our continued success depends on our ability to anticipate industry trends and identify, develop and market new value-added products and services that meet customer demands, to continually enhance our services in a timely and cost-effective manner. The change in the industry standard requires to constantly upgrade internal process and procedures and new products. The changes require the additional finance and if we are not able to arrange the finance timely and any delay in procuring the latest products and technologies/machinery, it will affect our business, financial conditions and operation of the Company.

21. We require working capital for our smooth day-to-day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favorable terms may have an adverse effect on our operations, profitability and growth prospects.

Our business demands working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favorable terms, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects. We intend to continue growing by expanding our business operations. This may result in increase in the quantum of our current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled “Objects of the Offer” beginning on page 81 of this Red Herring Prospectus.

The details of our Company’s working capital are derived from Restated Financial Statements are provided in the table below:

22. Our failure to compete effectively against existing and new competitors, could adversely affect our market share, business, financial condition, results of operations and prospects.

We operate in a competitive environment. In most markets, we are required to compete with competitors of varying sizes and with ability to perform different kinds of products and services, some or all of which we may or may not be able to offer. Our ability to compete in a given market is driven significantly by the extent and depth of diagnosis and procedural capabilities of our competitors and the complexities involved. We are constantly required to evaluate and increase our competitive position in each of our markets. As a result, we may have to lower our profitability levels and continue to strive to compete with our competition on all fronts. Our competitive position in a market therefore significantly impacts our market share, business, financial condition, results of operations and prospects.

23. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

Our Company has not paid any dividend to its shareholders in the past. We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors

and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements.

For details, please refer to chapter titled “*Dividend Policy*” on page 169 of this Red Herring Prospectus.

24. Our Promoters and Promoter Group will continue to retain significant control in our Company, which will allow them to influence the outcome of matters submitted to shareholders for approval.

As of the date of this Red Herring Prospectus, our Promoters and Promoter Group hold 88.24 % of pre-offer share capital of our Company. Furthermore, after the completion of this Offer, our Promoters and Promoter Group will control, directly or indirectly our Company and continue to hold substantial percentage of the issued and paid-up equity share capital of our Company. As a result, our Promoters and Promoter Group will continue to exercise significant control over us, including being able to control the composition of our Board and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Promoters and Promoter Group may take or block actions with respect to our business which may conflict with the best interests of our Company or that of minority shareholders. We cannot assure you that our Promoters and Promoter Group will exercise their rights as shareholders to the benefit and best interest of our Company.

25. An inability to maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.

We have obtained an insurance policy in connection with our operations as given in chapter titled “*Our Business – Insurance*” on page 135. While we are of the opinion that the insurance coverage which our Company maintains would be reasonably adequate to cover the normal risks associated with the operations of our business, we cannot assure you that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. Our Company’s insurance policy may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverage. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. Additionally, there may be various other risks and losses for which we are not insured either because such risks are uninsurable or not insurable on commercially acceptable terms. The occurrence of an event for which we are not adequately or sufficiently insured could have an effect on our business, results of operations, financial condition and cash flows. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance or exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial condition may be adversely affected.

26. The implementation process of solutions may in some cases be time consuming, and any failure to satisfy our clients or perform as desired could harm our business, results of operations, and financial condition

Our services are complex and are deployed in a wide variety of environments and devices. Solution designing is a complex and lengthy process since we often customize our services for a client’s requirements and environment. Inability to meet these requirements of our clients may result in client dissatisfaction and/or damage to our reputation, which could materially harm our business. In addition, if our clients do not use our services as intended, inadequate performance or outcomes may result. It is possible that our services may be used by clients with smaller or less sophisticated IT departments, potentially resulting in sub-optimal performance at a level lower than anticipated by the client. As our clients rely on our services, the incorrect or improper use or configuration of our services, or failure to properly provide implementation or analytical or maintenance services to our clients may result in contract terminations or non-renewals, reduced client payments, negative publicity or legal claims against us.

27. In addition to normal remuneration or benefits and reimbursement of expenses, some of our directors and key managerial personnel are interested in our Company to the extent of their shareholding, and dividend entitlement in our Company.

Our directors and/or Key Managerial Personnel are interested in our Company to the extent of remuneration paid to them for services rendered and reimbursement of expenses payable to them. In addition, some of our Directors and KMP may also be interested to the extent of their shareholding and dividend entitlement in our Company.

For further information, see “*Capital Structure*” and “*Our Management*” on pages 69 and 149 respectively, of this Red Herring Prospectus.

28. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.

Our ability to achieve our business objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

29. Our actual results could differ from the estimates and projections used to prepare our financial statements.

The estimates and projections are based on and reflect our current expectations, assumptions and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and/or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

30. If we fail to maintain an effective system of internal controls, we may not be able to successfully manage, or accurately report, our financial risks.

Effective internal controls are necessary for us to prepare reliable and avoid fraud. Moreover, any internal controls that we may implement, or our level of compliance with such controls, may deteriorate over time, due to evolving business conditions. We cannot assure you that deficiencies in our internal controls will not arise in the future, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls. Any inability on our part to adequately detect, rectify or mitigate any such deficiencies in our internal controls may affect ability to accurately report, or successfully manage, our financial risks, and to avoid fraud, which may in turn adversely affect our business, financial condition or results of operations.

31. As of now, our company has not conducted independent Information Technologies Audit (IT Audit) from any certified IT Auditor. Non-adherence of such audit could create threat on our corporate assets and data integrity.

As of now, our company has not conducted independent Information Technologies Audit (IT Audit) from any certified IT Auditor. Currently, our company has no policy of conducting IT audit neither is the same mandatory under any law. However, in order to establish safeguard of assets, maintaining data integrity and allowing organizational goals to be achieved effectively and using resources efficiently, it is advisable to conduct the audit. It helps to determine whether IT controls protect corporate assets, ensure data integrity and are aligned with the business's overall goals. IT auditors examine not only physical security controls, but also overall business and financial controls that involve information technology systems. Our management is planning to adopt such policy of introducing such types of audits in our company.

However, non-adherence of adoption of such audit and our inability to adopt such measures in future could cause loss of data which would emanate financial as well as business reputation loss.

The company is in process to approach certain professionals and take such measures to safeguard the IT infrastructure of company. In coming future, company is also planning to develop in house.

32. Our sales cycles can be long and unpredictable, and our sales efforts require considerable time and expense. As a result, our sales, billings and revenue are difficult to predict and may vary from period to period.

Due to the resource intensive nature of our sales efforts, the length and variability of our sales cycle and the short-term difficulty in adjusting our operating expenses, our results of operations may fluctuate. The length of our sales cycle, from proof of concept to delivery of and payment for our solutions, is typically a few months and may extend for longer durations in certain circumstances. As the length of time required to close a sale varies substantially from client to client, it is difficult to predict exactly when, or even if, we will make a sale with a potential client.

33. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

34. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation and goodwill of our Company. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

We confirm that there have been no such instances of employee misconduct or error in the past.

35. Managing employee benefit pressures in India may prevent us from sustaining our competitive advantage which could adversely affect our business prospects and future financial performance.

Employee benefits represent a major expense for us and our ability to maintain or reduce such costs is critical for our business operations. We may be required to increase employee compensation levels to remain competitive and manage attrition, and consequently we may need to increase the prices of our products and services. An increase in wages/ salaries paid to our employees may result in adverse effect on our profits in the event that we are unable to pass on such increased expenditure to our users or customers without losing their business to our competitors. Likewise, if we are unable to sustain or increase the number of employees as necessary to meet growing demand, our business, financial condition and results of operations could be adversely affected.

36. In the event there is any delay in the completion of the Offer, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Offer which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the Objects of the Offer as has been stated in the Chapter “*Objects of the Offer*” beginning on page 81 of this Red Herring Prospectus. The proposed schedule of implementation of the objects of the Offer is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Offer, we may have to revise our business and development plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

37. We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Offer. Further we have not identified any alternate source of financing the Objects of the Offer. Any shortfall in raising / meeting the same could adversely affect our growth plans, business operations and financial condition

As on date of this Red Herring Prospectus, we have not made any alternate arrangements for meeting our capital requirements for some of the objects of the Offer. We meet our capital requirements through, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Offer or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “*Objects of the Offer*” beginning on page 81 of this Red Herring Prospectus.

38. The requirements of being a public listed company may strain our resources and impose additional requirements.

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange(s) which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

39. Industry information included in this Red Herring Prospectus has been derived from publicly available information. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.

Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to modify the objects of the Offer as prescribed in the SEBI ICDR Regulations. If our shareholders exercise such exit option, our business and financial condition could be adversely affected. Therefore, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Offer, if any, even if such variation is in the interest of our Company, which may restrict our ability to respond to any change in our business or financial condition, and may adversely affect our business and results of operations.

Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Offer Price of the Equity Shares is proposed to be determined through a book building process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

44. There is no guarantee that the Equity Shares issued pursuant to the Offer will be listed on the SME platform of BSE Ltd (BSE SME) in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME platform of BSE Ltd. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

45. Any future issuance of Equity Shares may dilute your shareholding and sale of our Equity Shares by our Promoters or other shareholders may adversely affect the trading price of the Equity Shares.

Any future equity issuances by us, including in a primary offering, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoter or other major shareholders may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares

46. There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

47. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax ("STT") is levied on and collected by an Indian stock exchange on which equity shares are sold. Any capital gain exceeding Rs.125,000, realized on the sale of equity shares held for more than 12 months immediately preceding the date of transfer, which are sold using any other platform other than on a recognized stock exchange and on which no STT has been paid, are subject to long-term capital gains tax in India.

The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020 and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. The Finance Act, 2020, has, among others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, that such dividends not be exempt in the hands of the shareholders, both resident as well as non-resident, and that such dividends likely be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. In cases where the seller is a non-resident, capital gains arising from the sale of the equity shares will be partially or wholly exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Historically, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity shares.

Further, we cannot predict whether any tax laws or other regulations impacting it will be enacted, or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our business, financial condition, results of operations and cash flows. The Government of India had announced the union budget for financial year 2024. There is no certainty on the impact that the Finance Act, 2022 may have on our business and operations or in the industry we operate in.

48. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Offer, there has been no public market for our Equity Shares. Our Company and the Book Running Lead Manager have appointed Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Offer due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

49. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

50. The Company's customers operate in various industry segments/verticals and fluctuations in the performance of the industries in which the customers operate may result in a loss of customers, a decrease in the volume of work undertake or the price at which the company offer its products.

The Company's business operations are exposed to fluctuations in the performance of the industries in which its significant customers operate. Customers may also decide to reduce spending due to a changing economic environment and other factors relating to the industry in which they operate. A loss of any significant customers, a decrease in the volume of work that the company's customers outsource or a decline in prices of the products offered by the company may materially and adversely affect its business, operations, financial condition and results of operations.

51. If we fail to keep our technical knowledge and process know-how confidential, we may suffer a loss of our competitive advantage.

We possess extensive technical knowledge about our products and such technical knowledge has been developed through our own experiences. Our technical knowledge is an independent asset of ours, which may not be adequately protected by intellectual property rights. Some of our technical knowledge is protected only by secrecy. As a result, we cannot be certain that our technical knowledge will remain confidential in the long run. Certain proprietary knowledge may be leaked (either inadvertently or willfully), at various stages of the business process. A significant number of our employees have access to confidential information and there can be no assurance that this information will remain confidential. Moreover, certain of our employees may leave us and join our various competitors. In the event that the confidential technical information in respect of our products or business becomes available to third parties or to the general public, any competitive advantage we may have over other companies in our sector could be compromised. If a competitor is able to reproduce or otherwise capitalize on our technology, it may be difficult, expensive or impossible for us to obtain necessary legal protection. Consequently, any leakage of confidential technical information could have an adverse effect on our business, results of operations, financial condition and future prospects.

EXTERNAL RISK FACTORS

52. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

53. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

54. If there is any change in tax laws or regulations, or their interpretation, such changes may significantly affect our financial statements for the current and future years, which may have a material adverse effect on our financial position, business and results of operations.

The regulatory and policy environment in which we operate is evolving and subject to change. Our business and financial performance could be adversely affected by unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations applicable to us and our business. In such instances, and including the instances mentioned below, our business, results of operations and prospects may be adversely impacted, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. Any political instability in India, such as corruption, scandals and protests against certain economic reforms, which have occurred in the past, could slow the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

Additionally, the Government of India has introduced (a) the Code on Wages, 2019; (b) the Code on Social Security, 2020; (c) the Occupational Safety, Health and Working Conditions Code, 2020; and (d) the Industrial Relations Code, 2020 which consolidate, subsume and replace numerous existing central labour legislations. While the rules for implementation under these codes have not been notified, the implementation of such laws could increase our employee and labour costs, thereby adversely impacting our results of operations, cash flows, business and financial performance.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. For instance, companies can voluntarily opt in favour of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which reduces the rate of income tax payable to 22% subject to compliance with conditions prescribed, from the erstwhile 25% or 30% depending upon the total turnover or gross receipt in the relevant period. Any such future amendments may affect our other benefits such as exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability.

Further, the GoI has announced the union budget for Fiscal 2024, pursuant to which the Finance Bill, 2023 ("Finance Bill"), has introduced various amendments. The Finance Bill has received assent from the President of India on March 30, 2023, and has been enacted as the Finance Act, 2023. We cannot predict whether any amendments made pursuant to the Finance Act, 2023 would have an adverse effect on our business, financial condition and results of operations. Furthermore, changes in capital gains tax or tax on capital market transactions or the sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

There can be no assurance that the GoI will not implement new regulations and policies requiring us to obtain approvals and licenses from the GoI or other regulatory bodies, or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment or change to governing laws, regulation or policy, including by reason of an absence, or a limited body, of

administrative or judicial precedent in the jurisdictions in which we operate may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. It may also have a material adverse effect on our business, financial condition, cash flows and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which could materially harm our results of operations or cash flows. Any unfavorable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

We are unable to determine the impact of any changes in or interpretations of existing, or the promulgation of, new, laws, rules and regulations applicable to us and our business. If that was to occur it could result in us, our business, operations or group structure being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

55. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

56. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

57. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

58. Regulation of greenhouse gas emissions and climate change issues may adversely affect our operations.

Many governments are moving to enact climate change legislation and treaties at the international, national, state, provincial and local levels. Where legislation already exists, regulations relating to emission levels and energy efficiency are generally becoming more stringent. Some of the costs associated with meeting more stringent regulations can be offset by increased energy efficiency and technological innovation. However, if the current regulatory trend continues, meeting more stringent regulations is anticipated to result in increased costs, and this may have a material adverse impact on our financial condition and results of operations. Further, India and many other nations are signatories to international agreements related to climate change including the 1992 United Nations Framework Convention on Climate Change, which is intended to limit or capture emissions of greenhouse gas, such as carbon dioxide and the 2016 Paris Agreement, which extended the potentially binding set of emissions targets to all nations. Our compliance with any new environmental laws or regulations, particularly relating to greenhouse gas emissions, may require significant capital expenditure or result in the incurrence of fees and other penalties in the event of non-compliance. We cannot guarantee that future legislative, regulatory, international law, industry, trade or other developments will not negatively impact our operations and the demand for the products we sell. If any of the foregoing were to occur, our business, financial condition and results of operations may be adversely affected.

59. The ability of Indian companies to raise foreign capital may be constrained by Indian law.

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

60. Financial instability in other countries may cause increased volatility in Indian financial markets.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition. The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have in the past experienced substantial dislocations, liquidity disruptions and market corrections.

61. QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid, and Individual Investors are not permitted to withdraw their Bids after Bid/ Offer Closing Date.

Pursuant to the SEBI ICDR Regulations, Qualified Institutional Buyers and Non-Institutional Investors are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Similarly, Individual Investors can revise or withdraw their Bids at any time during the Bid/ Offer Period and until the Bid/ Offer Closing Date, but not thereafter. Therefore, Qualified Institutional Buyers and Non-Institutional Investors will not be able to withdraw or lower their Bids following adverse developments in international or national monetary policy, financial, political or economic conditions, our business, results of operations or otherwise at any stage after the submission of their Bids.

Rationale for purchase of new office premises

- To support the expanding team base:**

Currently we operate out of a co-working space with two office spaces under one roof aggregating to a seating capacity of 106 seats. Our present employee base is of 116 employees of which, 40 employees are on work from home due to insufficient seating capacity in the current facility.

Our company is expanding its operations and in order to cater to the growing demands of the clients we need to enhance our employee base as well. However, since we are in the process of hiring new employees, we shall need a larger space to operate and we project to build our team to a total of 200 employee by FY 2025-26. The office space proposed to be acquired from the proceeds of the Fresh issue is a larger one and it can accommodate up to 200 employees at one place. Hence, owing to our expansion strategy, we require a new office space to enable the entire team to operate from one roof. A common large office space will also inculcate an on-premise environment for better security and collaboration.

- Alignment with data protection and confidentiality obligation:**

The Company being involved in the business of research paper and journal publishing industry places immense importance on protecting sensitive researcher data. Research papers often contain groundbreaking findings, unpublished data, and intellectual property that are critical to academic and industrial advancements. Their confidentiality is paramount as any leak could lead to severe consequences such as:

- o Loss of intellectual property rights for researchers and institutions.
- o Financial damage due to unauthorized use or replication of findings.
- o Irreparable harm to the credibility and trust of the publisher.

Further, owning a dedicated data center and delivery center will help the Company to –

- **Ensure compliance with data protection standards:** Aligning with the ISMS 27001/2022 standards and other applicable laws requires secure physical and digital infrastructure for data storage and processing. Obtaining ISMS 27001/2022 certification requires adherence to stringent security protocols that are best implemented in owned premises. Co-working spaces or leased offices often fail to meet these requirements due to:

- Limited control over physical access and infrastructure.
- Lack of customization options for implementing advanced security measures

In addition to ISMS certification, other critical certifications essential for the publishing business include:

- SOC 2 (System and Organization Controls) - Focused on data security and privacy controls.
- PCI DSS (Payment Card Industry Data Security Standard) - Essential for secure handling of payments and personal information.
- GDPR Compliance Certification - Ensures data processing aligns with global data protection standards.

These certifications are vital for ensuring compliance and building trust within the publishing ecosystem.

- **Upholding confidentiality and trust:** Maintaining direct control over data security measures in a self-owned premise mitigates the risk of breaches, unauthorized access, and non-compliance with contractual terms. Ownership of data centers ensures control over data security and helps in ensuring enhanced trust among stakeholders.
- **Fulfilling legitimate business purposes:** Hosting a secure on-premises data center directly aligns with the core principle of processing, personal and sensitive data responsibly and ethically, as outlined in our Terms of Use.

Further, in addition to existing operations, the Company is launching new portal catering directly to consumers of publishing industry. For further details about the product, please refer Chapter “*Our Business*” on page 125. Data confidentiality and protection of the data collected for the same will play a vital role for establishing the product in the market. Hence, acquisition of the new office premises becomes vital for the Company for overall gamut of things.

- **Substantial rent savings:** Our current rental expenditure is Rs. 7.70 lakhs per month (aggregating to Rs. 92.4 lakhs annually) with a 6% escalation clause annually. This yearly rent will not be payable once we have our own premises. This substantial saving in cash outflow every year will help us to plough more funds in the business for further growth of the company. Further, we shall be able to use this savings strategically for customer acquisition and R&D activities.
- **Operational efficiencies** – owning an office eliminates uncertainties related to fluctuating rental costs and lease renewals, ensuring smooth and uninterrupted operations.
- **Improved employee sentiments** – A permanent office enhances employee morale and retention. A. Current Assets

Trade Receivables

Particulars	UOM	March 31, 2023 (A)	March 31, 2024 (A)	March 31, 2025 (A)	March 31, 2026 (P)
Trade Receivable	Rs. Lakhs	181.41	137.33	494.10	737.71
Change in Amount	Rs. Lakhs	61.32	(44.08)	356.77	243.61
Trade Receivable	Days	69	48	82	91
Change in Days	Days	15	(21)	34	9

- In FY 2023, the company's collection period stood at 69 days. However, in FY 2024, it decreased by 21 days and in FY 2025, the collection period stood at 82 days. The fluctuation in the collection period is primarily due to ongoing negotiations with customers who are requesting a 90-day credit period, which the company has been trying to negotiate and avoid. As a result, the credit period appears inconsistent.
- Additionally, the company commenced its domestic operations in FY 2024-25, where invoices are raised only upon the completion of services, a process that typically takes between 90 - 120 days. The payment terms for these invoices are flexible, ranging from immediate payment to 30 days post-invoicing. Given this structure, the effective receivable period aligns with a 90-day cycle (60 days for service completion + up to 30 days for payment processing).
- The trade receivables of the Company stood at 48 days in FY 2024 which is increased to 82 days in FY 2025. This increase is due to sales made to new domestic customers of the Company.
- In FY 2023 and 2024, the Company's entire sales was being made to a sole Global Publishing Client and owing to the company's dependency on the sole client it was realising payments at a shorter duration to fund its cash flow cycle. Since FY 2024, the Company has started making sales to few domestic clients as well wherein the invoices are raised only upon the completion of services, which typically takes between 90 - 120 days. Thus, with the changing dynamics of the nature of company's clients the company is estimating to have a receivable period of 91 days for the projected period.
- We are implementing measures to manage and optimize the collection cycle, with a focus on stabilizing trade receivable days within the targeted range of approximately 90 days.
- Our Company projects that the receivable days from current level of 82 days shall increase to 91 days for the projected period in FY 2026. The change in amount from Rs. 494.10 Lakhs in March 2025 to Rs. 737.71 Lakhs in March 2026 suggests overall growth of the company with efficiency in collection of days.

Short Term Loans & Advances

Change in Amount	Rs. Lakhs	6.85	10.83	37.60	87.14

- Short Term Loans and Advances include Security deposits, Advances for office purchase.
- It is expected that the balances in Short Term Loans & Advances will be Rs. 100.00 Lakhs and Rs. 150.00 Lakhs in the FY 2026. This increase is on account of advance that the Company will be required to pay to technology service providers, testers and de-bugging agencies for its business operations. Further, the Company expects to pay advance to marketing agencies for its B2C products promotion.

Other Current Assets

Other current assets (OCA) comprise advances to employees, accrued interest receivable, unbilled revenue, and prepaid expenses. In FY 2023, OCA stood at Rs.10.87 Lakhs and increased to ₹22.31 Lakhs in FY 2024 and further to Rs. 134.14 Lakhs in FY 2025.

The increase in OCA during the FY 2024-25 is because of a rise in unbilled revenue to the tune of Rs 64.82 lakhs and prepaid expenses of Rs 57.11 lakhs.

Bifurcation of OCA is as follows:

Particulars (Rs. Lakhs)	March 31, 2023 (A)	March 31, 2024 (A)	March 31, 2025 (A)

GLOBAL ECONOMY

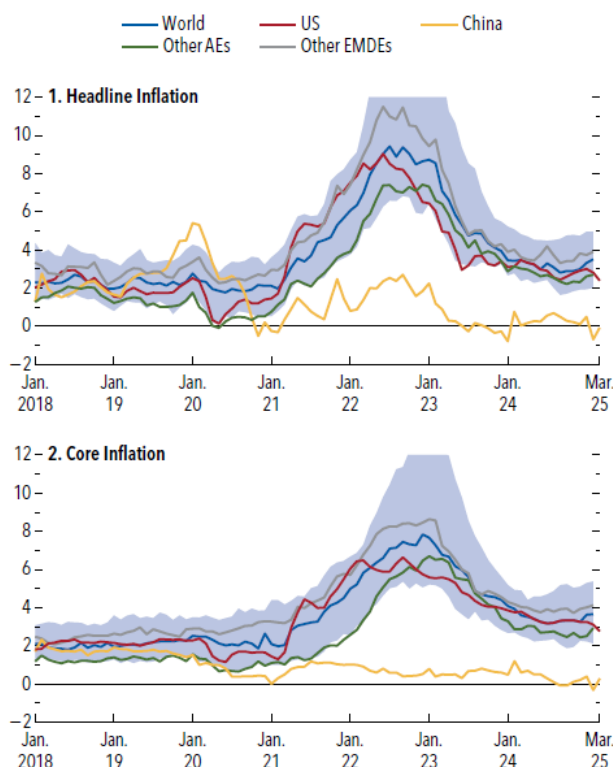

The global economy is at a critical juncture. Signs of stabilization were emerging through much of 2024, after a prolonged and challenging period of unprecedented shocks. Inflation, down from multidecade highs, followed a gradual though bumpy decline toward central bank targets (Figure 1.1). Labor markets normalized, with unemployment and vacancy rates returning to pre-pandemic levels (Figure 1.2). Growth hovered around 3 percent in the past few years, and global output came close to potential (Figure 1.3).

However, major policy shifts are resetting the global trade system and giving rise to uncertainty that is once again testing the resilience of the global economy. Since February, the United States has announced multiple waves of tariffs against trading partners, some of which have invoked countermeasures. Markets first took the announcements mostly in stride, until the United States’ near-universal application of tariffs on April 2, which triggered historic drops in major equity indices and spikes in bond yields, followed by a partial recovery after the pause and additional carve-outs announced on and after April 9. Despite significant equity market corrections in early March and April, price-to-earnings ratios in the United States remain at elevated levels in historical context, raising concerns about the potential for further disorderly corrections. Uncertainty, especially that regarding trade policy, has surged to unprecedented levels. The degree of the surge varies across countries, depending on exposures to protectionist measures through trade and financial linkages as well as broader geopolitical relationships. These developments come against an already-cooling economic momentum.

In labor markets, hiring has slowed in many countries, and layoffs have risen. Meanwhile, progress on disinflation has mostly stalled, and inflation has edged upward in some cases, with an increasing number of countries exceeding their inflation targets. Services inflation, though still on a downward trend, remains above levels prior to the inflation surge, and core goods inflation has seen an uptick since November 2024. Trade has held up, but this is mostly because of an increase in Chinese exports and US imports at the end of 2024, with consumers and businesses likely front-loading ahead of tariffs that were anticipated back then and now are in place.

In the backdrop, domestic imbalances and policy gaps give rise to unbalanced growth while opening up potential fragilities. In some countries, such as China, growth in 2024 has been mainly supported by external demand. On the contrary, in the United States, private consumption—traditionally the major contributor to GDP growth—as a share of GDP has reached its highest point during the 2020s, and the fiscal deficit remains historically large. Within-country inequalities in households’ income gains signal another potential vulnerability. In some cases, real GDP has recovered, but real GDP per capita has not.

Most countries are not fully back to their inflation targets yet, but output gaps are more dispersed. In quite a few cases, fiscal policy remains accommodative even as monetary policy maintains a restrictive stance. The US economy was operating above its potential in 2024, relying heavily on strong domestic demand. Private consumption grew at an annual rate of 2.8 percent in 2024, in excess of its 2.4 percent historical (2000–19) average. However, in 2025, signs of a potential reversal have emerged. Consumer spending declined by 0.6 percent in January and remained subdued in February after expanding by 0.6 percent in December 2024, with the decrease likely reflecting a normalization of private consumption toward more sustainable levels and the negative impact of recurring policy shifts on economic sentiment. This signals a deterioration of the cyclical position of the US economy. The euro area has been in a cyclical rebound, but domestic demand has been subdued and, with the exception of Germany, the contribution of consumption growth may have peaked in its largest economies. Weak consumer sentiment and elevated uncertainty have raised precautionary saving while weighing down consumption growth. Manufacturing activity has remained weak on the back of persistently higher energy prices, while services have been the main growth driver, contributing to divergence among European countries, particularly those relying more heavily on these sectors, notably Germany versus Spain. For China, prolonged weakness in the real estate sector and its ramifications, including those for local government finances, have been key. When the pandemic seized the Chinese economy, signs of a downturn in the credit-fueled property market were gathering. This homegrown vulnerability has depressed domestic demand, even as policymakers have searched for measures to tackle property market oversupply and bolster confidence. Indeed, consumer confidence in China, after a decade of moving closely with that in the rest of the world, plunged in early 2022 and has not recovered (Figure 1.7). Rising trade tensions and new tariffs over the past years have also disproportionately affected the Chinese economy.

Tentative signs in early 2023 that the world economy could achieve a soft landing with inflation coming down and growth steady have receded amid stubbornly high inflation and recent financial sector turmoil. Although inflation has declined as central banks have raised interest rates and food and energy prices have come down, underlying price pressures are proving sticky, with labour markets tight in a number of economies. Side effects from the fast rise in policy rates are becoming apparent, as banking sector vulnerabilities have come into focus and fears of contagion have risen across the broader financial sector, including nonbank financial institutions. Policymakers have taken forceful actions to stabilize the banking system. As discussed in depth in the Global Financial Stability Report, financial conditions are fluctuating with the shifts in sentiment. A snapshot of the financial fragilities include –

- Expectations that global disinflation is entering its “last mile” and monetary policy will be easing have driven up asset prices worldwide.
- Many emerging markets have shown resilience, and some frontier economies have taken advantage of buoyant risk appetite to issue international debt.
- The global economy appears increasingly likely to achieve a soft landing, and cracks in the financial system exposed by high interest rates have not ruptured further. Near-term global financial stability risks have receded, according to the IMF’s growth-at-risk framework.
- However, there are several salient risks along the last mile. Growing strains in the commercial real estate sector and signs of credit deterioration among corporates and in some residential housing markets could be exacerbated by adverse shocks.
- Stalling disinflation could surprise investors, leading to a repricing of assets and a resurgence of financial market volatility, which has been low despite considerable economic and geopolitical uncertainty.
- Beyond these more immediate concerns, other medium-term vulnerabilities are building, notably the continued accumulation of debt in both public and private sectors. Some governments may find it difficult to service debt in the future, whereas the private sector’s leveraged exposures to financial assets may foretell elevated financial stability risks in the coming years.

Expectations for a global economic soft landing and continued progress on disinflation have created an environment for households and businesses to obtain financing at lower costs, notwithstanding still-high interest rates. Investors may also be reassured by the fact that the banking turmoil from last year appears to have been contained. A soft landing after a significant rise of global inflation is unusual by historical standards. Since the 1970s, meaningful tightening of monetary policy to reduce inflation has usually been followed by recessions and a tightening of financial conditions. This time around, markets seem to expect resilient, albeit low, growth in most countries as inflation returns to target. A soft landing is also the IMF’s baseline case, as documented by the April 2024 World Economic Outlook. A less favourable financing environment, in turn, would likely exacerbate existing fragilities. As detailed in the Global Financial Stability Report, borrowers in real estate markets, especially certain segments of commercial real estate with weak prospects, could face difficult and costly refinancings of existing loans, like the estimated 600 billion of US commercial real estate debt that is due this year. Defaults would then ensue, putting pressure on lenders with concentrated exposures in these loans. More broadly, default rates in riskier credit markets have been rising in many countries.

ASIA & PACIFIC OUTLOOK

Notwithstanding robust growth and inflation largely returning to targets in 2024, the outlook for the region has been

downgraded in the near-term in tandem with that for the global economy. This is mainly due to the recent tariff announcements by the United States, countermeasures by trading partners, and the unpredictability accompanying these changes. Asia-Pacific is both strongly exposed to the shock and faces a larger shock than other regions. Growth for the region is projected to slow to around 3.9 percent and 4.0 percent in 2025 and 2026, respectively, down from 4.6 percent in 2024 and 4.4 percent in 2025. Lower external demand, a soft tech cycle, and subdued private consumption will weigh on activity. Risks are tilted to the downside in the face of the region's greater vulnerability to the uncertain trade environment and weaker-than-expected global demand as well as asset price volatility increasing the potential for disrupting capital flows and investment. Policy challenges remain acute, requiring a careful balance between near-term support for the economy and external stability, while pressing ahead with fiscal consolidation, stronger domestic demand, productivity gains, and deeper regional integration over the medium term.

With rapid disinflation and resilient growth, Asia and the Pacific is closing in on a soft landing. At the same time, significant heterogeneity has emerged within the region regarding the pace of disinflation, the level and the drivers of growth, and the cyclical position. Hence, policies need to be carefully calibrated to country-specific needs and circumstances. Economic activity in Asia and the Pacific outperformed expectations in the second half of 2023, despite a challenging environment characterized by still-tight monetary policies and muted external demand. The region grew by 5.0 percent last year, 0.4 percentage point stronger than forecast in October. Upside surprises were concentrated in emerging markets, driven primarily by robust domestic demand. Still, headline inflation has continued to decline, especially in emerging Asia, reflecting timely monetary tightening in 2022 and early 2023, retreating commodity prices, lower global manufactured goods price inflation, and supply capacity coming back onstream following the COVID-19 pandemic. The pace and degree of disinflation has differed among Asian economies, however, with some still seeing sustained price pressures and others facing deflationary risks.

Most activity data for early 2024 have been encouraging. For the year as a whole, growth in Asia and the Pacific is projected to slow modestly to 4.5 percent—an upward revision of 0.3 percentage point from last October, reflecting, among other things, carryover from stronger 2023 outturns and policy support. The region is expected to remain the world's most dynamic, contributing about 60 percent of global growth. Provided countries stay the course on macroeconomic policies, inflation trajectories are projected to converge: price pressures would ease in economies where inflation is above target and pick up in economies where inflation is low. Growth in 2025 is projected to moderate further to 4.3 percent, with the structural slowdown in China a key factor.

Near-term risks are now broadly balanced. Retreating inflation and, consequently, the prospect of earlier monetary easing have increased the likelihood of a soft landing, both in Asia and globally. Stronger-than-expected growth in Europe and the United States is an upside risk for Asia's exporters. At the same time, increased geoeconomic fragmentation and geopolitical tensions continue to pose serious downside risks to medium-term growth in the region. In China, a deeper-than-anticipated property sector correction is a downside risk, while greater-than-expected policy support is an upside risk—both could be sources of spillovers to China's neighbors. Japan's exit from negative interest rate policy has proceeded smoothly thus far, easing previous concerns about spillovers from sudden repricing. Central banks should ensure that inflation returns smoothly to target, both in countries experiencing persistent price pressures and in countries facing deflationary risks. Policymakers should continue to focus firmly on domestic price stability and avoid making policy decisions overly dependent on anticipated interest rate moves by the Federal Reserve. Higher debt levels and interest costs weigh on public balance sheets—a renewed effort to advance fiscal consolidation is thus in order, especially as addressing medium-term structural challenges—including from aging populations and climate change—will require additional fiscal space. As the tighter monetary policies of the last two years are still passing through to corporate and household balance sheets, supervisors should continue to vigilantly monitor the buildup of risks.

Growth Outturns in the second half of 2023

Contributions to Growth

As in the rest of the world, growth in Asia and the Pacific has been surprisingly resilient—despite still elevated monetary policy rates, a feeble external environment, and the prospect of spillovers from China’s property sector correction. The region remained the world’s most dynamic in 2023 and contributed nearly two-thirds of global growth, with domestic consumption remaining the main driver of activity, especially in emerging Asia. At the same time, inflation has retreated, helped by timely monetary tightening in 2022 and early 2023 and by falling commodity and goods prices—although the speed of disinflation varied significantly between economies. For most countries, this conjuncture improves the prospects of a “soft landing” in 2024, by strengthening purchasing power and paving the way for possible monetary easing later in the year. This said, some economies are now at risk of undershooting their inflation targets and need to watch potential deflationary pressures.

Growth in Asia and the Pacific surprised on the upside in the second half of 2023, reaching 5.0 percent for the year as whole—significantly stronger than the outcome in 2022 (3.9 percent), and 0.4 percentage point higher than projected in the October 2023 Regional Economic Outlook: Asia and Pacific. Emerging Asia accounted for the bulk of positive growth surprises, including in Malaysia, the Philippines, Vietnam, and, most notably, India. By contrast, growth outturns in advanced economies were mostly in line with October projections, except in New Zealand, which has entered into technical recession.

Factors Shaping the Outlook

Much like in the rest of the world, economies in Asia and the Pacific are expected to benefit from continued disinflation in the near term, as well as from gradually more accommodative monetary and financial conditions. In the medium term, growth in Asia and the Pacific is expected to slow, reflecting aging populations and subdued productivity growth. In 2024, growth in Asia and the Pacific is projected to slow slightly to 4.5 percent an upward revision of 0.3 percentage point relative to the October 2023 Regional Economic Outlook: Asia and Pacific, which partially reflects carryover from strong growth outcomes in the second half of 2023. In China, an upward revision of 0.4 percentage point also reflects stimulus measures announced in October, with public spending forecast to be a significant contributor to growth (Figure 8). Investment remains an important growth driver in India. In emerging Asia outside China, growth is expected to be driven mainly by private consumption. The outlook for exports is improving only gradually, owing to the shift in demand from traded goods to domestically produced services in the aftermath of the COVID-19 pandemic, which constrains trade. For 2025, growth in the region is projected at 4.3 percent unchanged from October.

Emerging Asia

Growth in China is projected to slow from 5.2 percent in 2023 to 4.6 percent in 2024 and further to 4.1 percent in 2025, reflecting continued weakness in the property sector and declining potential growth amid subdued productivity growth and an aging population. India and the Philippines have been the source of repeated positive growth surprises, supported by resilient domestic demand. For 2024, growth projections have been revised upward relative to the October 2023 Regional Economic Outlook: Asia and Pacific by 0.5 percentage point to 6.8 percent for India and by 0.3 percentage point to 6.2 percent in the Philippines. There is substantial heterogeneity in the rest of Association of Southeast Asian Nations economies. Growth is expected to remain strong and steady in Indonesia (at 5.0 and 5.1 percent in 2024 and 2025, respectively) and in Malaysia (at about 4.4 percent), but to be more subdued in Thailand (at 2.7 percent in 2024), where prospects for the implementation of a fiscal stimulus package have dimmed.

INDIA ECONOMIC OVERVIEW

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices for Q1 2024-25 is estimated at Rs. 77.31 lakh crores (US\$ 928.9 billion) with growth rate of 9.7%, compared to the growth of 8.5% for Q1 2023-24. The growth in nominal GDP during 2023-24 is estimated at 9.6% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY24. During the period April-September 2025, India's exports stood at US\$ 211.46 billion, with Engineering Goods (26.57%), Petroleum Products (16.51%) and electronic goods (7.39%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market Size

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Development

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- The HSBC India Manufacturing PMI increased to 58.4 in April 2025, up from 58.1 in March 2025, based on preliminary estimates. This rise signifies improved operating conditions and represents the most rapid growth pace observed in the past year. Contributing factors include a notable surge in new export orders, which experienced their most significant increase in over fifteen years, alongside a faster expansion in overall new business activity.
- In Q1 CY25, private equity (PE) and venture capital (VC) investments stood at Rs. 1,16,861 crore (US\$ 13.7 billion) across 284 deals.
- India saw a robust 10.35% growth in passengers carried by domestic airlines at 431.98 lakh in FY25, from 391.46 lakh in FY24, according to the Directorate General of Civil Aviation (DGCA).
- As of April 18, 2025, India's foreign exchange reserves stood at Rs. 58,57,537 crore (US\$ 686.70 billion).
- India secured 39th position out of 133 economies in the Global Innovation Index 2024. India rose from 81st position in 2015 to 39th position in 2024. India ranks 3rd position in the global number of scientific publications.
- The gross GST (Goods and Services Tax) revenue collection stood at Rs. 1.84 lakh crore (US\$ 21.57 billion) in February 2025.
- Between April 2000–December 2024, cumulative FDI equity inflows to India stood at Rs. 89.88 lakh crore (US\$ 1.05 trillion).
- In February 2025, the overall IIP (Index of Industrial Production) stood at 151.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 141.9, 148.6 and 194.0, respectively.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) – Combined inflation was 3.34% in March 2025 against 4.85% in March 2024.
- Foreign Institutional Investors (FII) inflows in FY25 were close to Rs. 1.27 lakh crore (US\$ 14.89 billion), while Domestic Institutional Investors (DII) bought Rs. 6.00 lakh crore (US\$ 70.34 billion) in the same period.

India's wheat procurement rose 34% YoY, reaching 22.36 MT as of April 28, 2025, with target of 31 MT in sight. Strong MSP, bonuses, and robust crop output boost sales to government agencies, ensuring food security and potential for open market intervention.

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- According to a report by Wood Mackenzie in January 2025, India, the United States, and West Asia are expected to collectively add 100 Gigawatts (GW) of solar capacity by 2025, while China is anticipated to continue its leadership in the solar industry.

Publishing Market Driver

An increase in demand for diversity in content is the key driver of the market. Publishers cater to a diverse range of reader interests and preferences by offering various genres and topics. Charles Darwin's scientific theories, Albert Einstein's groundbreaking discoveries, and Carl Sagan's cosmos explorations continue to inspire educational books. In contrast, fictional genres such as mystery, romance, women's fiction, young adult, and classics captivate readers. Digital publishing platforms, like online portals and local bookshops' online presence, provide convenient access to a vast library of eBooks, including genres like jigsaws, Rubik's cubes, stock market, and housing market books. Diverse subjects, such as those explored by Rachel Carson, Jane Goodall, Bill Nye, and Neil deGrasse Tyson, attract a broader audience.

Furthermore, comics and graphic novels, with their great storytelling and high-quality artwork, have gained popularity among millennials and generation Z. Publishers' ability to cater to these varied interests and preferences expands their reach to reading enthusiasts and potential buyers, driving sales in tangential markets, such as the bookends market and E-books market.

Publishing Market Trends

The rise in number of self-published authors is the upcoming trend in the market. The market has experienced significant growth due to the rise of self-publishing, providing a platform for aspiring authors who may have previously struggled to secure traditional publishing deals. Notable figures such as Charles Darwin, Albert Einstein, Carl Sagan, Richard Dawkins, Bill Nye, Neil deGrasse Tyson, Rachel Carson, and Jane Goodall are among those who have made their mark in the world of publishing through self-publication. This influx of new content caters to diverse subjects and genres, including the mystery genre, jigsaws and Rubik's cubes, stock market and housing market books, and educational material. Traditional publishing once held a monopoly on professional publishing knowledge and controlled printing and retail distribution.

However, the emergence of self-publishing has empowered authors, known as indie authors, to have complete control

over their content and its publishing process. Self-publishing offers numerous advantages over traditional publishing, including time and cost savings for the author and greater profitability. Reading enthusiasts can now access a vast array of fiction and non-fictional books, including romance, women's fiction, young adult, classics, and Western down libraries, through local bookshops, online portals, and local booksellers. The consumer preference for tangential markets, such as E-books and the Bookends market, continues to grow, particularly among millennials and generation Z. The market's prospects remain bright as it continues to adapt to the evolving needs and preferences of its potential buyers.

Publishing Market Challenges

The decreasing market share of traditional publishing is a key challenge affecting the market growth. The market has witnessed significant shifts in consumer behaviour and preferences, with the emergence of digital media outpacing the demand for traditional print publications. Charles Darwin's groundbreaking works on evolution and Albert Einstein's theories on relativity once captivated readers through physical books, but today, intellectual discourse is increasingly consumed in digital formats. The convenience and immediacy of eBooks, audiobooks, online news websites, and social media platforms have attracted a new generation of readers, including millennials and generation Z. Traditional print publications, such as novels by Jane Goodall, Carl Sagan, Richard Dawkins, Bill Nye, and Neil deGrasse Tyson, or educational books on subjects like the housing market or stock market, face stiff competition in the digital realm.

Furthermore, the production and distribution costs associated with physical books, including printing, paper, and distribution expenses, can be substantial. In contrast, digital publications have lower production and distribution costs, allowing for lower prices and wider reach. Local bookshops, once the cornerstone of literary communities, are now facing declining sales as consumers increasingly turn to online portals for their reading needs. Classics, romance, women's fiction, young adult, and diverse subjects are all available in abundance on these platforms, catering to various consumer preferences. The E-books market and the market for educational and non-fictional books have shown particularly strong growth. Despite these challenges, traditional publishing still holds value for reading enthusiasts who prefer the tactile experience of a physical book. Local booksellers and Western Down Libraries continue to serve their communities, providing a space for readers to discover new titles and engage with one another. The market, with its tangential markets like jigsaws, Rubik's cubes, and mystery genre books, remains a vibrant and evolving industry, adapting to consumer preferences and the ever-changing media landscape.

The India publishing market is a rapidly growing and lucrative industry. It is estimated to grow at a CAGR of 10.3% during the forecast period 2020-2026. The Indian publishing sector has been in existence for centuries, and continues to be an important part of the cultural landscape today. Traditional publishing houses in India have seen significant growth over recent years due to the increased demand for books in regional languages as well as a rise in digital content consumption across various platforms such as e-books, videos, audio books etc., which are made available online through major Indian publishers like Amazon Kindle, Flipkart Books, among others.

Evolution and Growth

With a population of over 1.4 billion, 22 major languages and dialects hardwired in the Indian Constitution itself (with ongoing demands to include 38 more¹), 77.07% literacy rate, almost 1.5 million schools, 1,113 registered universities and 43,796 colleges⁴, the overall demand and importance of the publishing industry in the country is higher than ever. At present in the year 2024, the domestic publishing industry (whether completely domestic concerns or international publishers' Indian subsidiaries) is premised to build upon the already impressive contribution to the economy

For instance, as reported by the World Intellectual Property Organization (WIPO) in 2022, India ranks as number 3 globally in 2022, for total number of books sold and sales revenue generated and has been positioned at number 4 for number of ISBN (International Standard Book Number) registered in 2022, which stands at 281,091 number of ISBN registrations. In 2021, E&Y had reported that the estimated value of the Indian publication industry in 2019 was over 6 Billion USD, with a growth projection of over 9 Billion USD by 2024. From an employment perspective, the industry provides employment to over 1.2 million people in India. The sheer scale and size of the Indian publishing industry is also indicated by the staggering number of players involved— for instance, over 9,000 publishers and over 21,000 retailers.

Recognition of India's publishing Industry at global platforms:

It is notable to mention that India was the guest of honour at the 2006 Frankfurt Book Fair and also at the Beijing International Book Fair in 2010. The Graph Expo 2007 in Chicago had an "India Day". More recently, India also became the first Asian country to participate as a 'Guest of Honour' in the Guadalajara International Book Fair in December 2019.

India: Emerging Outsourcing Destination

The Indian publishing industry, which in 2019 itself was worth over 6 Billion USD, is becoming the preferred destination for firms outsourcing their work. Latest figures indicate that approximately 60% of global publishing outsourcing is based in India and that India is now exporting books and outsourcing publishing services to 120 countries.

Of the total outsourced work to India, 60 % are books by the academic publishers, followed by educational publishing

segment, magazines, corporate and business-to-business newsletters etc. It is estimated that the outsourcing industry engages over 35,550 people in direct employment.

In addition to outsourcing, the publishing industry is estimated to grow at an average annual growth rate of 15 %. Indian publishing industry is exporting its books and publishing services to over 120 countries and the export market is estimated to be worth \$ 550 million.

The publishing industry, over the past decade has not only undergone a revolutionary change but has also had to adopt extreme measures to keep up with the ever-changing digital era. Amidst the vastly spread technologically advanced ways of content consumption, continues to persevere the conventional publishing industry in the COVID stricken economy. It is noteworthy to mention that only two decades ago, India had witnessed a boon in the books and publishing industry in lieu of the increase in enrolment rates in institutions, government initiatives on education, and a surge in the overall education expenditure. Coming back to the ongoing digital age, the publishing industry is being forced to undergo a landscape change to keep up with the needs and demands of the digital era. While this shift has been extremely beneficial for the new age content consumers owing to ease of access to the content, the publishing industry presently is facing major roadblocks, namely copyright and piracy issues. Even though the Indian laws have been adequately amended to tackle the new age problems of e-piracy, precautionary as well robust measures are required to be adopted by the publishing industry to safeguard itself from new age dilemmas i.e. content theft and unauthorized modification.

The Advent of the Legal and Regulatory Framework in India

The literature of a country is no doubt an index of the opinion and condition of its people, and therefore it is inevitable for good governance that the rulers of a country should possess such an index. The said need had been recognized even during the British rule, and the 20th century saw the enactment of stringent anti- press laws, particularly when the freedom movement gained momentum. British government wanted to curb the activities of revolutionaries and censor the newspapers to report anti British propagandas whereby reporting was closely monitored and comments against government were not tolerated. However, with the advent of freedom and speech of expression and the same being recognized as a fundamental right in the Constitution of India, the laws have now little to no importance in the modern India, but the same have played a major role in shaping today's publishing industry.

Trademarks and their Importance in the Publishing Industry

Trust, reliability, responsiveness and recognition are engendered by famous brands. A trademark is a sign that individualizes the goods of a given enterprise and distinguishes them from the goods of its competitors, to obtain finances and is a vital component of franchising agreement. The purpose of this facet of intellectual property is to protect the name of the product rather than the invention or idea behind it. The fierce competition among the firms trading in more than one country has increased the significance of trademarks. Since the consumer identifies the goods, its quality and value with a trademark, it is beyond any doubt that a trademark is a potent marketing tool that aids in communication with the consumers.

Exhibit

Since its inception in the late 18th century, the Indian print media continues to be one of the oldest and largest media of the world. Driven by the robust economic reforms, favourable macro-economic factors, and increase in literacy and purchasing power, the Indian publishing sector is beyond any doubt a lucrative option for overseas print, publishing and media houses and is expected to grow in the years to come. Considering the rapid advancement of technology, it is imperative to take into account digital modes of publications while discussing the growth of the publishing industry in India. In order to keep pace with dynamics of consumer preferences, the Indian publishing industry is consistently diving into innovating modes of publishing formats and business structures.

The last few decades have witnessed an unprecedented use of technology and the recent advent of artificial intelligence tools marks a paradigm shift in the Printing Revolution pioneered by Gutenberg almost 500 years ago. It has radically transformed the traditional methods of printing, publishing and distribution of work and has given new dimensions to the knowledge and creative economy. Hence, the book publishing and reading landscape has significantly transformed the way we read, write, publish and distribute our publications. The digital landscape while on one hand opens up new avenues for distributors and authors to directly interact with the readers, it presents an ambivalent situation for the publication houses leaving them with no alternatives but to adapt and evolve with the digital era.

The Digital transformation for sure has revolutionized the traditional method of business and is encouraging the companies to try the untested waters. The huge paradigm shift that we are witnessing has led to numerous experiments and explorations in the eBook market. With unprecedented penetration of the internet and accessibility of smart phones, the dynamics of publishing and reading has completely changed and now with the advent of artificial technology we are witnessing new platforms for online reading every day.

The Launch of Kindle by Amazon, Nook by Barnes & Noble and Sony eReader goes on to substantiate this. The traditional role of publishers in processing and distributing the content has also been modified in the current era where they are now entrusted with the task of managing and distributing the content on digital platforms as well. Additionally, it opens up new avenues for them to generate income by adopting strategies such as putting a single chapter for sale or incorporating advertisements between chapters.

As far as authors are concerned, they may adopt a self-marketing model and can directly distribute their books bypassing agents and publishers. Greg Bear (American science fiction and mainstream author), David Morrell (Canadian American Novelist), Stephen King (American author of contemporary horror, suspense and science fiction), Paulo Coelho (Brazilian lyricist and novelist), Stephen Covey (American author and educator) have all self-published their books on one or the other online and digital platforms. The Amazon's Kindle Direct Publishing program, Sony Corp.'s online Reader Store as well as Barnes & Noble's Pubit allows authors to directly sell their books online retaining a percentage of the list price. Through Pubit the independent publishers and authors can upload their e-Books and make them available for sale through the Barnes & Noble eBook stores. Similarly, the Amazon's Kindle Direct Publishing allows the authors to reach global market by publishing in multiple languages within 5 minutes allowing them to earn 70 percent royalty. Like with Pubit, the e-books thus published through this program are available on Kindle devices and on free Kindle apps.

The future trends in the publishing industry in India represents different trend in each segment. A brief overview of these trends:

A **Literature Search** is a systematic process of finding and organising existing data/information and knowledge about a particular topic. It is a process of finding and reviewing already published materials, like articles, research papers, etc. on a specific topic or question which is available in public domain like - libraries, online databases, or search engines. Peer review is the process where experts in the same field evaluate a manuscript or research work to ensure its quality, accuracy, and relevance before publication. This helps maintain high standards, validate findings, and improve the overall content through constructive feedback.

Accept/Reject decisions are typically made by the journal's **editor** or **editorial board** after reviewing the manuscript.

- If **accepted**, the manuscript proceeds to production.
- If **rejected**, authors can:
 - Address the feedback and revise the manuscript for resubmission.

Our Strategies

i. To Empower India's Research Ecosystem

We at Icodex aim to bridge the infrastructure gap in Indian Research Publishing. India, despite its global reputation as a hub for services, has long struggled to establish itself as a leader in scholarly publishing. Unlike international institutions, Indian universities, research societies, and academic institutions lack the necessary infrastructure and advanced technology to create and sustain globally reputed journals. As a result, Indian researchers, including students, PhD scholars, and professional researchers, often find themselves aspiring to publish their work with international publishers, perceiving it as a mark of prestige. This reliance on external platforms underscores a critical gap: Indian institutions are not equipped to support their researchers effectively, limiting their ability to build and manage globally recognized journals.

ii. To Revolutionize Research Publishing with Technology

At Icodex, we aim to transform this narrative by providing Indian institutions with cutting-edge technology that empowers them to become self-reliant in research and publishing. Our flagship solutions—iCAPP and PaperPerfect—are designed to address the core challenges faced by Indian researchers and institutions, enabling them to compete on a global stage.

iCAPP: The Comprehensive End-to-End Publishing Platform

iii. Creating a Self-Reliant Research Ecosystem for India

For decades, India has been recognized as a service hub for international publishers, but this has not translated into building a robust local publishing infrastructure. At Icodex, we are disrupting this paradigm by providing technology that enables Indian institutions to:

- Establish and manage globally reputed journals.
- Operate self-sufficiently with integrated, automated systems.
- Transition from a service-based model to a leadership role in global research.

With iCAPP and PaperPerfect, we are empowering India to move beyond outsourcing, fostering a self-reliant ecosystem that attracts and supports researchers globally.

These property rights allow the holder to exercise a monopoly on the use of the item for a specified period.

The Copyright Act, 1957

The Copyright Act, 1957, along with the Copyright Rules, 2013 (“Copyright Laws”) governs copyright protection in India. The Copyright Laws protect the legal rights of the creator of an ‘original work’ by preventing others from reproducing the work in any other way. The intellectual property protected under the Copyright Laws includes literary works, dramatic works, musical works, artistic works, cinematography, and sound recordings. Even while copyright registration is not a prerequisite for acquiring or enforcing a copyright in an otherwise copyrightable work, registration under the Copyright Laws acts as prima facie evidence of the particulars entered therein and helps expedite infringement proceedings and reduce delay caused due to evidentiary considerations. The Copyright Laws prescribe a fine, imprisonment or both for violations, with enhanced penalty on second or subsequent convictions. Upon registration, the copyright protection for a work exists for a period of 60 years following, the demise of the author. Reproduction of a copyrighted work for sale or hire, issuing of copies to the public, performance, or exhibition in public, making a translation of the work, making an adaptation of the work, and making a cinematograph film of the work without consent of the owner of the copyright are all acts which expressly amount to an infringement of copyright.

The Trademarks Act, 1999 (the “Trademarks Act”)

Trademarks enjoy protection under both statutory and common law and Indian trademark law permits the registration of trademarks for both goods and services. The Trademarks Act governs the statutory protection of trademarks and the prevention of the use of fraudulent marks in India. Under the provisions of the Trademarks Act, an application for trademark registration may be made before the Trademark Registry by any person claiming to be the proprietor of a trade mark, whether individual or joint applicants, and can be made on the basis of either actual use or intention to use a trademark in the future. Once granted, a trademark registration is valid for 10 years unless cancelled, subsequent to which, it can be renewed. If not renewed, the mark lapses and the registration is required to be restored. The Trademarks Act

prohibits registration of deceptively similar trademarks and provides for penalties for infringement, falsifying and falsely applying trademarks. Further, pursuant to the notification of the Trademark (Amendment) Act, 2010 simultaneous protection of trademark in India and other countries has been made available to owners of Indian and foreign trademarks. The Trademark (Amendment) Act, 2010 also seeks to simplify the law relating to transfer of ownership of trademarks by assignment or transmission and to conform Indian trademark law with international practice.

The Patents Act, 1970 (the “Patents Act”)

The Patents Act recognises both product and process patent and prescribes eligibility criteria for grant of patents, including the requirement that an invention satisfy the requirements of novelty, inventive step and industrial applicability in order for it to avail patent protection. However, the Patents Act also provides that patent protection may not be granted to certain specified types of inventions and materials even if they satisfy such criteria. Application by an Indian resident to any foreign authority in respect of an invention made outside India is prohibited without first making an application for the invention in India. Once granted, a patent remains valid for a period of twenty years from the date of filing of the patent application, subsequent to which it can be renewed. While the Patents Act prohibits patentability of a ‘computer programme’ as such, computer programmes in combination with a novel hardware are patentable. Computer programmes on their own are excluded from patent protection and are protected as a literary work under the Copyright Act, 1957. In terms of the Patent Act, the patentee holds the exclusive right to prevent third parties from the using, offering for sale, selling or importing for such purposes, the patented product or product obtained directly by a process patented in India.

During the financial year 2023-24, the revenue from operations has increased to INR 1,040.07 Lakhs as against INR 953.67 Lakhs in 2022-23 showing an increase of 9.06%. This increase of 9% is normal business growth for providing related services to the sole international client.

Expenditure:**Employee Benefits Expenses**

During the year 2023-24, the manpower cost has decreased by 14.87%. This reduction is because the company has capitalised a part of its employee benefit expenses under Intangible assets due to development of a software which was undertaken during the year.

Employee cost to the tune of Rs 135.33 Lakhs was booked as Intangible assets for development of HTML - OPS Version (Software of the Company) which was undertaken during the year, the benefit of which will be realised in future years. During the FY 2024, core members of the product team including the Promoters were also working on OPS Version (Software of the Company) for a substantial portion of their time.

The details of expenses against the capitalization for software development is as hereunder for the FY 2024:

III. Bonus to specified employees	2.28
TOTAL AMOUNT CAPITALISED	285.09

Depreciation and Amortization Expenses

During the year 2023-24, the depreciation has been Rs. 36.06 Lakhs as against Rs. 27.67 Lakhs in 2022-23 showing an increase of 30.32% due to increase in Fixed Assets of the Company by Rs. 20.16 Lakhs during the year.

Profit after Tax

1. The PAT for the year 2023-24 is Rs. 439.70 Lakhs as against Rs. 181.18 Lakhs in 2022-23 showing an increase of 142.68%. The increase in PAT for the financial year ended March 31, 2024 is on account of increase in revenue from operations from Rs. 953.67 lakhs to Rs. 1,040.07 lakhs and reduction in manpower expenses during the said period and also on account of economies of scale.
2. During the year 2023-24, the employee benefit expense has been Rs. 517.04 Lakhs as against Rs. 607.36 Lakhs in 2022-23 showing a decrease of 14.87%. This reduction in employee cost is because the company has capitalized employee cost to the tune of Rs 135.33 Lakhs and booked as Intangible assets for development of HTML - OPS Version (Software of the Company) which was undertaken during the year, the benefit of which will be realised in future years. During the FY 2024, core members of the product team including the Promoters were also working on OPS Version (Software of the Company) for a substantial portion of their time.

Further, other expenses directly attributable to the development of HTML - OPS Version (Software of the Company) were also capitalized.

Particular	24-25	23-24	22-23
Employee Cost	547.89	492.73	520.83
Retainers	277.99	98.75	91.07
Directors Remuneration	57.00	48.00	38.00
Statutory Payments and Staff Welfare	15.38	12.90	9.96
Total Remuneration paid	898.26	630.77	659.86
Less Transfer to Intangible under Development	301.88	135.33	52.50
Net Manpower cost	596.39	517.04	607.36
Revenue from Operations	2,187.74	1,040.07	953.67
Manpower cost as % of revenue from operations	27.26%	49.71%	63.69%

**As certified by JMMK & Co., Chartered Accountants pursuant to their certificate dated July 19, 2025.*

Reason for variance –

1. The revenue from operations for the financial year ended March 31, 2025 has increased substantially as compare to revenue from operations for the FY 2024. Hence the manpower cost as percentage of revenue has come down.
2. During the FY 2024, core members of the product team including the directors were working on OPS Version (Software of the Company) for more than 50% of their time, cost of which has been capitalized to the tune of Rs. 135.33 Lakhs by the Company as compared to Rs. 52.50 for FY2023.
3. Further, in the month of January 2024, 65 employees were given increment on an average of 10-12%. The impact of this increment was booked during the FY 2024 for 3 months (January 2024, February 2024, March 2024) whereas the impact of the above increment was for 12 months ended March 31, 2025.

B. ANALYSIS OF OTHER EXPENSES FOR THE YEARS ENDED FY 2025, FY 2024 and FY 2023 (Based on Restated Financial Statements)

Particular	24-25	23-24	22-23
Other Expenses	248.35	96.94	151.50
Major items in the above other expenses			
Administrative Expenses	21.83	6.07	8.86
Dues and subscription expenses	19.84	7.99	10.17
Professional fees	18.62	9.55	8.26
Rent	73.77	32.95	30.29
Server, hosting and domain expenses	31.35	24.43	51.88
Travelling & Conveyance	48.44	3.85	3.64

Reason for variance –

1. The increase in Administrative Expenses during the financial year ended March 31, 2025 as compared to FY 2024 is on account of business promotion expense and server co-location expenses.
2. The increase in dues and subscription during the financial year ended March 31, 2025 as compared to FY 2024 is on account of increase in multiple software subscriptions for business purposes like Chat GPT, AIML software, Microsoft service offerings, and anti-viruses.
3. The increase in professional fees during the financial year ended March 31, 2025 as compared to FY 2024 is on account of availing management consultancy services during the said period.
4. The increase in rental expenses during the financial year ended March 31, 2025 as compared to FY 2024 were on account of capitalization of rental expenses to the extent of Rs 26.02 Lakhs for the development of HTML-OPS Version 3 during FY24, however, no rental expenses have been capitalized for the financial year ended March 31, 2025.
5. The variance in server, hosting and domain expenses for the financial year ended March 31, 2025 as compared to FY 2024 is on account of increased business and the company has been able to save some cost by availing only cloud-based servers with third parties compared to owning and managing some servers in-house helping to reduce the expense.
6. The increase in travelling & conveyance expenses from Rs. 3.85 Lakhs during the financial ended march 31, 2024 to Rs 48.44 lakhs for the financial year ended March 31, 2025 is primarily attributable to the execution of an IT support services project requiring on-site implementation across multiple client locations, including Mumbai, Pune, Nashik, Nagpur, and Sambhajinagar. The project scope involved installation of hardware and peripherals, technical documentation, and provision of ongoing support services, necessitating the deployment of technical teams to client premises. In addition to the above, the company, during the year, initiated the process of raising funds through public offer for which multiple visits were undertaken by company officials to meet investors, auditors, merchant banker and other stakeholders. These engagements collectively contributed to the increase in travelling expenses incurred during the year.

Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares and convertibles by introducing an alternate payment mechanism using UPI. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by IBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019, until March 31, 2019, or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a IB had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Subsequently, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, extended the timeline for implementation of UPI Phase II till further notice. Under this phase, submission of the ASBA Form by IBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and replaced by the UPI Mechanism.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and has become applicable on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 (to the extent not rescinded by the SEBI ICDR Master Circular in relation to the SEBI ICDR Regulations) ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Offer is being made under Phase III of the UPI (on a mandatory basis).

The processing fees for applications made by UPI Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such SCSBs provide a written confirmation, in compliance with the SEBI RTA Master Circular in a format as prescribed by SEBI, from time to time, and such payment of processing fees to the SCSBs shall be made in compliance with circulars prescribed by SEBI and applicable law. Such application shall be given only after (i) unblocking of application amounts for each application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB. The Offer will be made under UPI Phase III of the UPI Circular. All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI. Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Bidders using the UPI Mechanism. Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is a delay in the redressal of the investors' complaints, the relevant SCSB as well as the post-Offer BRLM will be required to compensate the concerned investor.
