An investment in equity shares involves a high degree of risk. The investors should carefully consider all the information in the Draft Red Herring Prospectus, including the risks and uncertainties described below, before making an investment in the Equity Shares. The risks described below are not the only ones relevant to us or our Equity Shares but also to the industry in which we operate or to India and other jurisdictions, in which we operate. Additional risks and uncertainties, not currently known to us or that we currently do not deem material may also adversely affect our business, results of operations, cash flows, and financial condition. If any of the following risks, or other risks that are not currently known or are not currently deemed material, actually occur, our business, results of operations, cash flows, and financial condition could be adversely affected, the price of our Equity Shares could decline, and investors may lose all or part of their investment. In order to obtain a complete understanding of our Company and our business, prospective investors should read this section in conjunction with chapters titled “Industry Overview”, “Our Business”, “Restated Financial Statements” and “Management’s Discussion and Analysis of Financial Conditions and Results of Operations” on pages 124, 138, 218 and 267 respectively, as well as the other financial and statistical information contained in this Draft Red Herring Prospectus. Unless specified or quantified in the relevant risk factors below, we are unable to quantify the financial or other impact of any of the risks described in this section. INTERNAL RISK RELATED TO OUR BUSINESS

1. Our business may be adversely affected if we fail to adapt to rapid technological changes and evolving industry standards, or if we are unable to successfully enhance our existing products and services or develop new offerings

Our success depends substantially on our ability to anticipate and respond to rapid technological changes in the Information Technology industry, develop and upgrade our products and service offerings to meet evolving client needs, maintain and expand our technological capabilities, and effectively manage our strategic technology alliances. The IT industry is characterized by rapid technological advancements, evolving industry standards, changing client preferences and requirements, frequent introduction of new products, features, services and solutions, and emerging disruptive technologies. We may face significant challenges, including our inability to anticipate or respond to technological advances in a timely manner, failure to develop commercially successful products and services, unsuccessful management of new product/service introductions or transitions, difficulties in stimulating customer demand for new and

upgraded products and services, potential technological obsolescence of our products and service offerings, and challenges in maintaining strategic technology alliances. Additionally, our current products or services may become outdated or less competitive, and we may be unable to successfully enhance our existing products or develop new ones in a timely manner.

Our ability to remain competitive and meet client expectations depends on our capacity to adapt to these changes, including the adoption of new technologies, platforms, and marketing strategies. Furthermore, while we continuously evaluate and adapt our business plans based on market research, experience, and technological evolution, we cannot assure that changes to our business model will be successful, new technologies we adopt will prove more efficient or economical, our strategic decisions regarding product development and technology adoption will align with market demands, or investments in new technologies or capabilities will yield expected returns. Our product development initiatives may require significant capital investments, and these investments may not generate the returns we expect or may result in products that are not commercially viable. The success of our new products and services may also depend on various factors beyond our control, including market acceptance, changes in customer preferences, and competitive offerings. Any such failure could result in loss of clients or market share, reduce our competitiveness, adversely affect our pricing power, impact our ability to win new business, and materially and adversely affect our business, financial condition, and results of operations. The materialization of any of these risks could have a material adverse effect on our business, results of operations, financial condition, and prospects.

For further details of our Business, please refer to chapter titled “***Our Business***” beginning on page 138 of the is Draft Red Herring Prospectus.

2. Our non-compliance to statutory obligations relating to the Employees’ Provident Funds and Miscellaneous Provisions Act, 1952 (“EPF Act”) and the Employees’ State Insurance Act, 1948 (“ESI Act”) may subject us to penalties, legal proceedings and regulatory actions.

For the period ended on September 30, 2024, March 31, 2024, March 31, 2023, and March 31, 2022, we have failed to make the mandatory statutory contributions under both acts for our eligible employees. We have outstanding provident fund contributions of ₹43,351/- (Rupees Forty- Three Thousand Three Hundred and Fifty-One only) under the EPF Act and ESI contributions of ₹5,638/- (Rupees Five Thousand Six Hundred and Thirty-Eight only) under the ESI Act, aggregating to ₹48,989/- (Rupees Forty Eight Thousand Nine Hundred and Eighty-Nine only) in statutory dues (“Outstanding Statutory Dues”), excluding any applicable interest and penalties under the respective legislations. This non-compliance exposes us to significant regulatory risks and financial liabilities.

While we have now obtained the requisite registrations, we may be subject to penalties, prosecution, and regulatory actions for historical non-compliance. Under the EPF Act and ESI Act, penalties may include imprisonment and monetary fines, along with payment of accumulated interest and damages on the outstanding dues. Our Promoters and Directors may also face personal liability for such non-compliance. We may need to make significant one-time payments to address these historical dues along with penalties, which could adversely impact our cash flows and profitability.

We cannot assure that no legal proceedings will be initiated against us for past non-compliance, or that any such proceedings will be resolved in our favour. Any adverse action by these authorities could materially and adversely affect our business, financial condition, reputation, and results of operations.

3. We have not complied with certain filing requirements under the Payment of Bonus Act, 1965 (“Bonus Act”), which may subject us to regulatory actions and penalties that could adversely affect our business, results of operations, and financial condition.

Our Company has not fully complied with the procedural requirements of the Payment of Bonus Act with respect to filing of requisite challans and returns for eligible employees. For the Financial Year 2021-22 and 2022-23, we have not filed the necessary returns with the relevant authorities as required under Section 26 of the Bonus Act. While we have not made bonus payments to eligible employees in accordance with the Bonus Act, the non-compliance with these filing and procedural requirements may attract regulatory scrutiny.

Our Company may face prosecution for procedural non-compliance. This may also lead to increased regulatory scrutiny of our labour law compliance and could result in additional compliance requirements or conditions imposed by regulatory authorities.

Any adverse regulatory action or penalty imposed could have a material adverse effect on our business, financial condition, results of operations, and prospects. Moreover, such non-compliance may affect our ability to obtain certain regulatory approvals or licenses in the future, which could impact our ability to expand or conduct our business as planned.

4. We have had negative cash flows in the past. Sustained negative cash flow could adversely impact our business, financial condition, and results of operations.

We have experienced negative cash flows from operating activities and investing activities and may, in the future, experience negative cash flows. The following table sets forth certain information relating to our cash flows for the periods indicated below:

(Rs. In Lakhs)

Particulars	For the period ended on September 30, 2024	For the Financial Year ended on		
		March 31, 2024	March 31, 2023	March 31, 2022
Net cash flow from (used in) investing activities	(413.38)	(655.68)	(698.14)	(163.40)
Net cash flow from (used in) financing activities	107.21	(28.07)	(0.70)	35.93

For further information, see “*Restated Financial Statements*” beginning on page 218.

Negative cash flows over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our business, financial condition and results of operations could be materially and adversely affected.

5. Pending verification of certain tax documents may impact assessment of our tax proceedings.

Our Company, along with certain of its Directors, is currently involved in various tax proceedings, the outcomes of which are uncertain. We cannot provide assurances that these proceedings will result in a favorable outcome. For further details regarding these proceedings, please refer to Chapter “*Outstanding Litigation And Material Developments*”, beginning on page 276.

Additionally, the following documents were not considered in the identification of the tax proceedings listed above:

Entity/Individual	Assessment Year	Documents Overlooked in Identifying the Tax Proceedings
Company	2020-21	1. Intimation order 2018-19: Complete screenshot of dashboard of Traces portal 2. DRC-03 for the demand paid
Satish Kumar	2022-23, 2023-24, 2024-25	1. Screenshot of E-campaign Tab of Compliance portal
Sudhakar Aruchamy	2007-08	1. Status of demand payment
Deepak Gupta	2018-19	1. Intimation order 2. Payment challan for demand
Payal Jain	-	1. Screenshot of E-campaign Tab of Compliance portal
Yamini Chandra Roy	2017-18	1. Intimation order

While we believe that our tax compliance practices are comprehensive and in compliance with applicable regulations, the omission of these documents in the identification of the aforementioned tax proceedings may result in the existence of additional, unidentified tax proceedings against the Company, its Promoters, or its Directors.

Any adverse outcome arising from such unidentified tax proceedings, or the discovery of additional liabilities upon review of the above-mentioned documentation, could have a material and adverse impact on our business, financial condition, results of operations, reputation, and future prospects.

6. We have not entered into formal agreements with some channel partners for joint sales strategies, which could have a material adverse effect on our business, financial condition, and results of operations.

The absence of comprehensive, legally binding contracts with all of our registered channel partners exposes us to potential risks such as uncertain partnership terms, unpredictable sales collaborations, and potential disruptions in our distribution networks. Without formal agreements, we may face challenges in maintaining consistent product positioning and market access through our channel partners. Additionally, the lack of contractual frameworks could limit our ability to negotiate favourable terms and establish long-term strategic alignments with our channel partners. These uncertainties may impact our competitive positioning, revenue predictability, and overall business growth potential in our market segments. Investors should carefully consider these potential risks when evaluating our business prospects and investment potential.

7. We may become liable to our customers and lose customers if we have defects or disruptions in our software products and services. We may also be liable in the event of misuse of our software products and services or platforms.

The services we provide to our clients, including Information Technology Service Management, IT Infrastructure Management, Network Configuration and Content Management, AI For IT Operations, IT Asset Management and Operation Support System involve complex processes that require precise programming, configuration, and technical execution and errors or defects in our software products and services, or a failure of our hosting infrastructure, may make our software products and services unavailable to our customers, potentially disrupting their critical business operations, and could cause significant operational challenges for them.

There may be instances where errors are discovered after deployment of our services at the client's site. If these errors are identified post-deployment, there may be delay in correcting them, resulting in an unsatisfactory experience for our clients and may expose us to additional cost. Additionally, we cannot guarantee that all potential issues will be identified during our service delivery, as some problems may only become apparent when the software or systems are in actual use within the client's environment. The occurrence of such errors or failures could lead to delay in delivery of services, increased costs for remediation, or even rejection of our services by the client.

Although, we conduct testing to ensure that our services meet client requirements and function as expected. However, despite our best efforts, errors may occur during the execution of services, which could negatively impact the performance of the software, leading to unsatisfactory outcomes for our clients. Thus, any direct damages, expenses, costs, or obligations could result in a claim for substantial damages against us, regardless of our responsibility for such failure. Any disruptions in software products and services or other performance problems with our software, whether in connection with the day-to-day operation of our software products and services, upgrades, or otherwise, could damage our customers' businesses.

Due to any errors, defects, or disruptions in software products and services or other performance problems, our customers could elect not to renew our contract, or delay or withhold payments to us, and we could lose future sales. Further, our customers may make claims against us, which could result in an increase in our provision for doubtful accounts, an increase in collection cycles for accounts receivable, or litigation costs. We may in the future experience misuse of our software products and services or platforms. The occurrence of any such events in the future could lead to user dissatisfaction and discourage the use of our software products and services. Such events may also give rise to complaints and actions against us. All these factors could adversely affect our business and results of operation.

8. Our Company requires significant amounts of working capital for a continued growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.

Our business is working capital intensive and requires a significant amount of working capital for smooth functioning. The incremental and proposed working capital requirements and key assumptions with respect to the determination of the same based on *Restated Financial Statements* are mentioned on page no. 218 of this DRHP.

We intend to continue growing by expanding our business operations. The results of operations of our business are dependent on our ability to effectively manage our incremental working capital requirements. We estimate our revenue based on the forecast, demand and requirements and also on the customer specifications. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability. Our growing scale and expansion, if any, may result in increase in the quantum of working capital. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapters titled "*Objects of the Offer*" and "*Management's Discussion and Analysis of Financial Conditions and Results of Operations*" beginning on pages 98 and 267, respectively, of this Draft Red Herring Prospectus.

9. The business practices of our customers with respect to the collection, use and management of personal information could give rise to operational interruption, liabilities or reputational harm as a result of governmental regulation, legal requirements or industry standards relating to consumer privacy and data protection.

The success of our businesses depends in part upon our ability to effectively deploy, implement, and use information technology systems and advanced technology initiatives in a cost-effective and timely manner.

Our information technology systems include multiple applications, coding, configuration, and other systems that allocate resources and facilitate internal and external communications, enabling us to coordinate and make quick decisions across our business.

However, our computer networks may be vulnerable to unauthorized access, computer hacking, computer viruses, worms, malicious applications, and other security problems caused by unauthorized access to, or improper use of, systems by our employees, subcontractors, or third-party vendors. While there have been no instances during the last three financial years of information technology breach or instances of cyber-attack, assertions of misappropriation of confidential information or the intellectual property of our customers against us, if successful, could have a material adverse effect on our business, financial condition, and results of operations. Even if such assertions against us are unsuccessful, they may cause us to incur reputational harm and substantial costs.

Security breaches or lapses, whether by us, our employees, or other ecosystem participants, that result in the release of user data could harm our reputation and brand, consequently affecting our business. Such breaches could also expose us to potential legal liabilities. Legal proceedings or actions stemming from privacy issues may subject us to significant penalties and negative publicity, require changes in our business practices, increase our operational costs, and severely disrupt our business.

Furthermore, the increasing regulatory focus on privacy also poses risks for data collection within our customers' businesses. Evolving global laws may complicate data handling, leading to potential operational, financial, and reputational consequences. Additionally, rapid changes in public perception and standards related to the privacy of personal information can also potentially affect our business operations or influence regulators to enact stricter laws that may limit our ability to provide certain services. Any failure or perceived failure by us to comply with Indian or foreign laws and regulations—including those regulating privacy, data security, or consumer protection—could result in lost or restricted business, legal proceedings, fines, or adverse impacts on our reputation.

10. Our Company's success depends largely upon its skilled professionals and its ability to attract and retain these personnel. The industry where our Company operates is a highly skilled and technical employee intensive industry.

Our ability to thrive hinges significantly on our capacity to attract and retain highly skilled professionals, including engineers, operations managers, and sales and service staff. Given the scarcity of skilled individuals in the services industry and the intense competition in the job market, maintaining our team of personnel is crucial. Increased attrition poses a risk of diminishing the experience level within our team, potentially leading to heightened downtime and operational incidents. This, in turn, could result in reduced revenues and increased costs. The competitive landscape has driven up hiring, training, and retention expenses, creating inflationary pressure.

We incur various employee benefits expenses, including salaries and bonuses, contributions to provident and other funds, and staff welfare expenses. For the period ended September 30, 2024, F.Y. ended March 31, 2024, 2023 and 2022, our employee benefits expense accounted to Rs.1055.83, Rs. 1,876.90, Rs. 1,635.28 and Rs. 1,247.48, (Rs. in Lakhs) respectively, representing 45.15%, 41.15%, 47.46% and 53.93%, respectively, of our Total Income for the respective period/year. For further details, kindly refer to the section titled "**Restated Financial Statements**" beginning on Page 218 of this Draft Red Herring Prospectus.

There is intense competition for experienced skilled professionals with technical and industry expertise in our business, and if we lose the services of any of these or other key individuals and are unable to find suitable replacements in a timely manner, our ability to realize our strategic objectives could be impaired. The loss of members of our team, particularly to competitors, could have a material adverse effect on our

business and results of operations. For further details on the employees of our Company, kindly refer to the section titled “***Our Business***” beginning on page 138 of this Draft Red Herring Prospectus.

11. We are party to certain litigation and claims. These legal proceedings are pending at different levels of adjudication before various forums and regulatory authorities. Any adverse decision may make us liable to liabilities/penalties and may adversely affect our reputation, business, and financial status.

We may be required to devote management and financial resources in the defence or prosecution of such legal proceedings. Should any new developments arise, including a change in Indian laws or rulings against us by the appellate courts or tribunals, we may face losses, and we may have to make further provisions in our financial statements, which could increase our expenses and liabilities. Decisions in such proceedings, adverse to our interests, may have a material adverse effect on our business, cash flows, financial condition, and results of operations. Failure to successfully defend these or other claims, or if our current provisions prove to be inadequate, our business and results of operations could be adversely affected. Even if we are successful in defending such cases, we will be subject to legal and other costs relating to defending such litigation, and such costs could be substantial. In addition, we cannot assure you that similar proceedings will not be initiated in the future. Any adverse order or direction in these cases by the concerned authorities,

even though not quantifiable, may have an adverse effect on our reputation, brand, business, results of operations, and financial condition. For further details, please refer to “**Outstanding Litigation and Material Developments**” on page 276 of this Draft Red Herring Prospectus

12. There have been some instances of delayed filing/ incorrect filings in the past with the Registrar of Companies which may attract penalties.

Our Company has made certain inadvertent inaccuracies, delays, and non-compliances concerning regulatory filings and corporate actions in the past.

- A. Notably, there were cases of delayed filing of statutory forms under the Companies Act with the Registrar of Companies (RoC), which were filed after due date by paying additional fees. These delays occurred due to inadvertent reasons and ranged from 1 to 69 days. The details of Delayed filings are as follows:

Sr. No.	Description of Form	Date of event	Due date	Date of filing	Delay (no. of days)	Reason for delay

- B. Our Company identified errors in certain allotment related statutory filings and subsequently filed GNL-2 form on January 31, 2025, for cancellation of defective forms as provided below:

S. No.	Description of Erroneous Form	Description of Error	Date of Correct Filing	Reason
1.	<div>PAS-3 dated 26.04.2019</div> <div>PAS-3 dated 16.07.2021</div> <div>PAS-3 dated 22.10.2024</div> <div>PAS-3 dated 26.10.2024</div>	Clerical errors were made in the forms.	31.01.2025	The PAS-3 filings dated 26.04.2019, 16.07.2021, 22.10.2024 and 26.10.2024 were deemed defective due to clerical errors.

As of now, our Company has rectified these errors by filing the GNL-2 form. ROC may take cognizance of the same and may impose monetary penalties as per applicable sections or initiate compounding

proceedings. In case any monetary penalties are imposed on us, or any compounding proceedings are initiated against us, it will adversely affect our business operations and financial position and temper our corporate governance.

13. None of the executive director of the Company have experience of a listed company exposing the company to various regulatory and functional risks.

Our Company faces a risk due to the fact that none of our executive director have prior experience managing a listed company. This lack of experience with the regulatory and operational complexities unique to listed entities may impact our ability to effectively navigate the demands of public company governance, compliance, and reporting. The absence of seasoned expertise in this area could pose challenges in meeting regulatory requirements, addressing shareholder expectations, and executing strategic decisions. While we are committed to leveraging the expertise of our board and seeking external advice when needed, there is no assurance that our current management team will successfully overcome these challenges or prevent potential impacts on our operations and financial performance.

14. Our present promoters of the Company are first generation entrepreneurs.

Their experience in managing the business is instrumental in the growth of our Company. The concern is that their limited experience in running a listed company could potentially hinder the company's growth in the future. The statement is being cautious and transparent about this uncertainty, as it cannot assure that the promoters' inexperience won't affect our company's success.

15. We will continue to be controlled by our Promoter after the completion of the Issue, which will allow them to influence the outcome of matters submitted for approval of our shareholders.

As of the date of this Draft Red Herring Prospectus, our Promoter hold 84.48% of the issued and outstanding paid-up share capital of our Company. As a result, they will have the ability to influence matters requiring shareholders' approval, including the ability to appoint Directors to our Board and the right to approve significant actions at Board and at shareholders' meetings, including the issue of Equity Shares and dividend payments, business plans, mergers and acquisitions, any consolidation or joint venture arrangements, any amendment to our Memorandum of Association and Articles of Association, and any other business decisions. We cannot assure you that our Promoters will not have conflicts of interest with other shareholders or with our Company. Any such conflict may adversely affect our ability to execute our business strategy or to operate our business.

For further details regarding our shareholding, please refer to the chapter titled "*Capital Structure*" beginning on page 76 of this Draft Red Herring Prospectus.

16. Failure to offer client support in a timely and effective manner may adversely affect our relationships with our clients.

From time to time, our clients require our support teams to assist them in using our products and services effectively, help them in resolving post-deployment issues quickly and in providing ongoing support. If we do not devote sufficient resources or are otherwise unsuccessful in assisting our clients effectively in a timely manner or at all, it could adversely affect our ability to retain existing clients and could prevent prospective clients from adopting our products and services. We may be unable to respond quickly enough to accommodate short-term increases in demand for client support. We also may be unable to modify the nature, scope and delivery of our client support to compete with changes in the support services provided by our competitors. Increased demand for client support, without corresponding revenue, could increase costs and adversely affect our reputation, business, results of operations and financial condition. Any failure to

maintain high-quality client support, or a market perception that we do not maintain high-quality client support, could adversely affect our reputation, business, results of operations and financial condition.

17. We may be unable to sufficiently obtain, maintain, protect, or enforce our intellectual property and other proprietary rights.

We have made applications for registering our computer software copyright. Our registration of copyright for computer software is currently pending for hearing. There can be no assurance that we will successfully obtain copyright registration for our computer software or resolve any potential objections, which may affect our ability to protect our intellectual property in the future.

If we are unable to complete the copyright registration for various reasons, including potential objections or administrative challenges, we may not be able to claim full legal protection for our computer software. This could potentially impact our ability to seek remedies against unauthorized use or reproduction of our software.

Our efforts to protect our software and other intellectual property rights may not always be comprehensive. Third parties might attempt to replicate or misuse our software and other intellectual property rights, which could potentially erode our business value and reputation. We may face challenges in detecting unauthorized use or taking timely steps to enforce our intellectual property rights. Any significant impairment of our intellectual property rights could harm our business, reduce our competitive advantages, and adversely impact our financial performance.

Our ability to protect and utilize our software and other intellectual property rights are subject to various risks, including potential litigation and challenges beyond our direct control. We cannot guarantee that our software's legal status and other intellectual property rights protection will remain unaffected by external factors or potential disputes.

For further details refer to the chapters titled “*Our Business*” and “*Government and Other Approvals*” on pages 138 and 280, respectively.

18. Our global operations expose us to numerous and sometimes conflicting legal and regulatory requirements, and violation of these regulations could harm our business.

Since we provide services to customers overseas in countries such as UAE, Malaysia and Kenya, we are subject to numerous, and sometimes conflicting, legal requirements on matters as diverse as import/export controls, content requirements, trade restrictions, the environment (including electronic waste), tariffs, taxation, sanctions, government affairs, anticorruption, whistle blowing, internal and disclosure control obligations, data protection and privacy, and labour relations, and certain regulatory requirements that are specific to the jurisdictions we operate.

Non-compliance with these regulations in the conduct of our business could result in fines, penalties, criminal sanctions against us or our officers, disgorgement of profits, prohibitions on doing business, and an adverse impact on our reputation. Gaps in compliance with these regulations in connection with the performance of our obligations to our clients could also result in exposure to monetary damages, fines and/or criminal prosecution, unfavorable publicity, restrictions on our ability to process information, and allegations by our clients that we have not performed our contractual obligations. Due to the varying degree of development of the legal systems of the countries in which we operate, local laws might be insufficient to defend us and preserve our rights. We could also be subject to risks to our reputation and regulatory action on account of any unethical acts by any of our employees, partners, or other related individuals.

We may be subject to risks relating to compliance with a variety of national and local laws, including multiple tax regimes, labour laws, and employee health, safety, wages, and benefits laws. We may, from time to time, be subject to litigation or administrative actions resulting from claims against us by current or former employees individually or as part of class actions, including claims of wrongful terminations, discrimination, misclassification, or other violations of labour law or other alleged conduct.

19. **We derive 96.47%, 88.89%, 91.64% and 93.25% of our revenue from our top 10 key customers for the period ended on September 30, 2024, and for Financial Years ended on March 31, 2024, March 31, 2023, and March 31, 2022, respectively.**

We have developed long- standing relationships with certain key customers. Accordingly, we are dependent on our arrangements with such customers and our business depends on the continuity of our relationship with them. The majority of our revenue is derived from our top 10 and top 5 customers. The contribution to the revenue from operations of our Company by our top ten and top five customers, is as set out below:

(Rs. In Lakhs)

Particulars	For the period ended September 30, 2024		For the Financial Year ended

**Our Company's revenue is primarily generated through distributor.*

Since we largely depend on certain key clients for a significant portion of our services, the loss of any of our key clients or a significant reduction in demand from such clients could have a material adverse effect on our business, financial conditions, results of operations and cash flows.

We might face the risk of the loss of all or any of our clients who engage our services, including on account of delays on our part with respect to the completion of the required services, quality issues in our service delivery and inadequate supply against demand, if such instances occur frequently, it would result in failure to generate new service contracts with one or more of our significant clients; and failure to renegotiate favourable terms with our key clients, all of which could have an adverse effect on our business, financial condition, result of operations and cash flows. Our reliance on limited clients may also constraint margins and financial performance. The deterioration of the financial conditions or business prospects of these clients could reduce their requirements of our services and result in significant decrease in the revenue that we derive from these clients.

We cannot assure you that we will be able to maintain historic levels of business from our significant clients, or that we will be able to significantly reduce concentration in the future. Additionally, our revenues may be adversely affected if there is an adverse change in any of our clients' service strategies or a reduction in their engagement of our offerings, or if our clients decide to choose our competitors over us or if there is a significant reduction in the volume of our business with such clients. Maintaining strong relationships with

our clients is, therefore essential to our business strategy and to the growth of our business. Further, while we have not experienced any such loss of clients in the past.

Additionally, the loss of any key clients may significantly affect our revenues, and we may have difficulty securing comparable levels of business from other clients or may not be able to secure new clients in a timely manner or at all to offset any loss of revenue from the loss of any of our key clients. Additionally, in order to retain some of our significant clients we may also be required to offer terms may reduce our profitability.

20. Our marketing and advertising campaigns may not be successful in increasing the popularity of our product and services. If our marketing initiatives are not effective, this may adversely affect our business and results of operations.

Our revenues are influenced by our marketing plans including advertising. If we adopt unsuccessful marketing and advertising campaigns, we may fail to attract new customers or retain existing customers. If our marketing and advertising strategies are unsuccessful, our business and results of operations could be materially adversely affected. In addition, the support of our employees is also critical for the success of our marketing programmes, such as local marketing and any new strategic initiatives we seek to undertake. While we can mandate certain strategic initiatives, we need the active support of our employees if the implementation of these initiatives is to be successful. The failure of our employees to support our marketing programmes and strategic initiatives could adversely affect our ability to implement our business strategy and harm our business, financial condition, results of operations and prospects.

In addition, increased spending by our competitors on advertising and promotion or an increase in the cost of advertising in the markets in which we operate could adversely affect our results of operations and financial condition. Moreover, a material decrease in our funds earmarked for marketing and advertising or an ineffective advertising campaign relative to that of our competitors could also adversely affect our business and results of operations.

21. We use a trademark owned by our wholly owned subsidiary incorporated in Delaware, United States (USA), and any adverse impact on our rights to use this trademark could materially affect our business, results of operations and financial condition.

Our Company currently uses a trademark that is owned by our wholly owned subsidiary incorporated in Delaware, USA. While the subsidiary is under our control, we cannot assure you that our right to use this trademark will not face any regulatory, legal, or commercial challenges. The ownership and protection of this trademark is governed by the laws of Delaware and federal laws of the United States, which may differ from Indian intellectual property laws. Any adverse development affecting the ownership rights of our wholly owned subsidiary over this trademark, or our rights to use it, could negatively impact our operations and brand value.

We cannot assure you that our current arrangement for using our wholly owned subsidiary's trademark will continue to be effective or feasible in the future. Any restriction on our ability to use this trademark, whether due to regulatory changes in India or the United States, legal challenges in Delaware courts, or other factors, could require us to undergo costly rebranding exercises and could substantially adversely affect our business, reputation, financial condition, results of operations and prospects.

22. Our results of operations and cash flows could be adversely affected if we are unable to collect our dues and receivables from, or invoice our unbilled services to, our clients.

Our business depends on our ability to successfully obtain payment from our clients of the amounts they owe us for work performed. We evaluate the financial condition of our clients and usually bill and collect on relatively short cycles. There is no guarantee that we will accurately assess the creditworthiness of our

clients. Such conditions could cause clients to delay payment, request modifications of their payment terms, or default on their payment obligations to us, all of which could increase our receivables. Timely collection of fees for client services also depends on our ability to complete our contractual commitments and subsequently bill for and collect our contractual service fees. If we are unable to meet our contractual obligations, we might experience delays in the collection of, or be unable to collect, our client balances, and if this occurs, our results of operations and cash flows could be adversely affected. Our results of operations and cash flows could be adversely affected if we are unable to meet our contractual obligations, we might experience delays in the collection of, or be unable to collect, our client balances. In addition, if we experience delays in billing and collection for our services, our cash flows could be adversely affected.

23. Our business models for our products and services including both SaaS and on-premise software solutions, are continuously evolving and we cannot guarantee that we will be able to compete effectively or generate substantial revenue from these offerings.

We offer customers various consumption models for our products and services including SaaS and on-premise software solutions. These business models are continuously evolving, and we cannot guarantee that we will be able to compete effectively or generate significant revenue from our SaaS and on-premise offerings. These products and services require substantial investments in technology, infrastructure, security, and compliance and we cannot assure that our customers will fully adopt these models.

If we fail to compete effectively or if market conditions change unfavorably, our business, financial condition, operational results, and future prospects could be materially and negatively impacted.

24. We incorporate third-party “open source” like data base, operating systems, queuing engine and other similar development tools software into our customer deliverables and our failure to comply with the terms of the underlying open-source software licenses could adversely impact our customers and create potential liability on us.

Our deliverables to customers may incorporate software that is licensed by third parties under “open source” licenses. Occasionally, companies, including ours, that distribute or use open-source software in their products and services have faced claims asserting that such open-source software infringes on the intellectual property rights of the claimants. Consequently, our customers might be subjected to lawsuits by third parties alleging that the open-source software we use infringes on their intellectual property rights, and we are generally obligated to indemnify our customers against such claims contractually. Some customers require us to obtain their consent prior to using open-source software in the services we provide, and there is no assurance that such consents will be granted.

The use of open source software entails greater risks compared to third-party commercial software, as open source licensors typically do not provide warranties or other contractual protections concerning infringement claims or the quality of the code. Additionally, certain open source licenses mandate that the source code of software programs subject to the license be made available to the public and that any modifications or derivative works of such open source software be licensed under the same terms.

Although we diligently monitor our use of open source software to comply with the terms of the applicable open source licenses and to avoid subjecting our customer deliverables to unintended conditions, the terms of many open source licenses have not been interpreted by courts in relevant jurisdictions. Consequently, there is a risk that these licenses could be construed in a manner that imposes unforeseen conditions or restrictions on our customers' ability to use the software we develop for them and operate their businesses as intended. The terms of certain open source licenses may require us or our customers to release the source code of the software we develop and make it available under the applicable open source licenses. Should portions of customer deliverables be determined to be subject to an open source license, we or our customers

could be compelled to publicly release the affected portions of the source code or re-engineer all or part of the software.

25. Intense competition in the market for technology products and services could affect our pricing, which could reduce our share of business from clients and decrease our revenues and profitability.

We operate in a competitive industry that experiences rapid technological developments and changes in customer requirements. Our competitors include the big global system integrators, mid-sized, and several smaller local competitors in the various geographic markets in which we operate. We may face competition from companies that grow in size or scope as the result of strategic mergers or acquisitions, which may result in larger competitors with significant resources that benefit from economies of scale and scope. Such events could have a variety of negative effects on our competitive position and our financial results, including reducing our revenue, increasing our costs, and lowering our gross margin percentage.

If our competitors develop and implement methodologies that yield greater efficiency and productivity, they may be able to issue services similar to ours at lower prices without adversely affecting their profit margins. Even if our offerings address industry and client needs, our competitors may be more successful at selling their offerings. If we are unable to provide our clients with superior services and solutions at competitive prices or successfully market those services to current and prospective clients, our business, results of operations and financial condition may suffer. Further, a client may choose to use its own internal resources rather than engage an outside firm to perform the types of offerings we provide. We cannot be certain that we will be able to sustain our current levels of profitability or growth in the face of competitive pressures, including competition for skilled technology professionals and pricing pressure from competitors employing an on-site/offshore business model.

26. We are dependent on our Senior Management Personnel and Key Managerial Personnel. The loss of or our inability to attract or retain such persons could adversely affect our business, results of operations, financial condition and cash flows.

We rely on the management skills and strategic guidance of our Promoter for developing business strategies, ensuring their successful implementation, and navigating future challenges. Additionally, we significantly depend on the expertise, experience, and continued efforts of our Key Managerial Personnel and Senior Management. Our future performance will largely depend on our ability to retain these key individuals. If one or more of our Key Managerial Personnel or Senior Management are unable or unwilling to continue in their current roles, it could be difficult for us to find suitable or timely replacements, which could adversely impact our business, financial condition, and results of operations.

Moreover, the technical expertise required to deliver our services means that we rely heavily on our ability to attract and retain skilled IT and marketing professionals. If such personnel leave the company, it may take considerable time to hire and train replacements, leading to potential disruptions in our operations. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting and retaining the talent our business requires. The loss of these individuals could have an adverse effect on our business, results of operations, cash flows, and financial condition.

The industry in which we operate is highly competitive, particularly in terms of attracting and retaining management and skilled personnel. There is significant competition for such talent, and it may be challenging to secure the personnel we need in the future. There can be no assurance that our competitors will not offer better compensation packages, incentives, and other benefits to attract these skilled professionals. If we are unable to attract and retain talented employees, experience high attrition levels that are beyond our control, or fail to motivate and retain existing employees, our business, financial condition, and results of operations could be adversely affected. For further information, see “*Our Management*” on page 164 of this Draft Red Herring Prospectus.

27. **We have experienced significant growth in our PAT, there is no assurance that we will be able to sustain this rate of growth in the future.**

Our inability to regularly grow our turnover and effectively execute our key business processes could lead to lower profitability and hence adversely affect our operating results and financial conditions. Our business model is significantly dependent on our ability to successfully scale the sales of our products and services, drive revenue growth, and efficiently manage key operational processes. These processes include, but are not limited to, effective order procurement, timely order fulfilment, robust delivery tracking, and consistent cost management of non-core activities. The table below gives details of the profit after tax based on Restated Financial Statements.

(Rs. in Lakhs)

Particulars	For the period ended on September 30, 2024	For the Financial Year ended on		
		March 31, 2024	March 31, 2023	March 31, 2022
Total Income	2,338.65	4,561.66	3,445.82	2,313.01
PAT as a % of the Total Income	17.62	23.66	15.97	18.70

Our growth strategy is subject to and involves risks and difficulties, many of which are beyond our control and, accordingly, there can be no assurance that we will be able to implement our strategy or growth plans or complete them within the timelines. Further, we operate in a dynamic industry, and on account of changes in market conditions, industry dynamics or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands. For further details regarding the discussions and explanations of our results, please refer to **“Management’s Discussion and Analysis of Financial Conditions and Results of Operations”** on page no. 267 of this Draft Red Herring Prospectus.

28. **We have in past entered into related party transactions and we may continue to do so in the future.**

As of September 30, 2024, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For, further details, please refer to the chapter titled **“Restated Financial Statements”** on page 218. While we believe that all our related party transactions have been conducted on an arm’s length basis, and we confirm that the related party transactions entered into by the company are in compliance with the relevant provisions of Companies Act and other applicable laws, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

29. **If we are unable to manage our growth effectively and further expand into new markets, and secure additional capital resources, our business, financial performance, and results of operations could be materially and adversely affected.**

The success of our business will depend on our ability to effectively implement our business and growth strategy. As part of our growth strategy, we aim to, among other things, continue to grow our businesses as

and when opportunities exist, including by continuing to strengthen our existing offerings with attractive growth and profitability prospects, striving for cost efficiency, attracting and retaining talented employees, and focusing on consistently meeting quality standards.

Our expansion will further depend to an extent on the availability of adequate debt and equity capital. The actual expenditure incurred may be higher than current estimates owing to but not limited to, implementation delays or cost overruns. We may, therefore, primarily try to meet such cost overruns through our internal generations and in case the same is not adequate, we may have to raise additional funds by way of additional term debt from banks/ financial institutions and unsecured loans, which may have an adverse effect on our business and results of operations.

As we continue to grow our business and expand into newer markets, we may face several challenges, including as set forth below:

- A. Acquiring new customers;
- B. Identifying customer requirements and preferences in such markets;
- C. Making accurate assessments of the resources we will require;
- D. Preserving a uniform culture, values, and work environment;
- E. Recruiting, training, and retaining sufficient skilled management, technical and marketing personnel;
- F. Maintaining high levels of customer satisfaction; and
- G. Adhering to expected performance and quality standards.

30. We do not own any premises, including our registered office and use coworking spaces, and rely exclusively on lease agreements for these locations. In the event we lose such rights or are required to negotiate it, our cash flows, business, financial conditions and results of operations could be adversely affected.

Our Company has entered into lease agreements, license agreement and co-working agreements in relation to registered office and other co-working spaces. For further details, please see chapter titled “*Our Business*” beginning on page 138. Any of these lease or license agreements can be terminated, and any such termination could result in any of these offices being shifted. There can be no assurance that we will, in the future, be able to retain, renew or extend the leases for the existing locations on same or similar terms, or will be able to find alternate locations for these offices on similar terms favourable to us, in time or at all. Accordingly, we may experience business disruption, and this may materially and adversely affect our business, financial condition and result of operations.

31. In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business, it may have a material adverse effect on our business.

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals, and permits at state and central government levels for doing our business. The approvals, licenses, registrations, and permits obtained by us may contain conditions. Further, we will need to apply for renewal of certain approvals, licenses, registrations, and permits, which expire or need to update pursuant to a change in name and conversion of the company to a public company.

While we have obtained a significant number of approvals, licenses, registrations, and permits from the relevant authorities, there can be no assurance that the relevant authority will issue an approval or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations, and permits could result in cost and time overruns or could affect our related operations. These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business

and operations, result in increased costs and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalties. For further details, please see chapters titled “**Key Industry Regulations and Policies**” and “**Government and Other Approvals**” at the beginning on pages 151 and 280 respectively of this Draft Red Herring Prospectus.

Furthermore, we cannot assure you that the approvals, licenses, registrations, and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations, and permits that have been or may be issued to us may affect our business and results of operations.

Our company has not filed fresh or renewal application for following material approvals, which would result in relevant authorities initiating penal action against us, restrain our operations, impose fines/ penalties or initiate legal proceedings for our inability to obtain the following approvals in a timely manner or at all.

For further details please see chapters titled “**Government and Other Approvals**” at the beginning on page 151 of this Draft Red Herring Prospectus.

32. The proceeds of the Offer for Sale will not be available to the Company.

The Offer comprises the Fresh Issue and the Offer for Sale by the Selling Shareholders. We will not receive the proceeds from the Offer for Sale component of the Offer which will be remitted to the Selling Shareholders. For further details, see “**The Offer**” and “**Terms of the Offer**” on pages 58 and 300 respectively.

33. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including termination of our contracts, regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and other professionals, agents and / or technicians may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

34. Our ability to pay dividends in the future will depend on our future cash flows, working capital requirements, capital expenditures, and financial condition.

We have declared dividends in the past in financial year 2019-20 however, the declaration, payment, and amount of any future dividends is subject to the discretion of the Board and Shareholders, and will depend upon various factors, inter alia, including financial performance including profits of our Company, present and future capital expenditure plans including organic/inorganic growth opportunities, financial commitments, financial requirements for business expansion and/or diversification, acquisition etc. of new businesses in order to strike an optimum balance between rewarding shareholders through dividend and ensuring that sufficient funds are retained for the growth of our Company.

The external factors on the basis of which our Company may declare the dividend shall inter alia include the state of the economy and capital markets, applicable taxes, and regulatory changes which include the introduction of new or changes in existing tax or regulatory requirements. Any of these factors may thus restrict our ability to pay dividends in the future. Hence, there can be no assurance that we will be able to pay dividends in the future.

- 35. Any failure to accurately estimate the overall risks, revenues, or costs in respect of contracts which may adversely affect our profitability and results of operations. Our actual cost in executing a contract may vary substantially from the assumptions underlying our contract. We may be unable to recover all or some of the additional expenses, which may have a material adverse effect on our results of operations, cash flows, and financial condition.**

Under the terms and conditions of agreements for our contracts, we generally agree to receive from the customers an agreed sum of money, subject to contract variations covering changes in the offerings that are required by our customers. We may enter into agreements for providing additional offerings in the future that may not contain price escalation clauses covering increases in the cost of technical personnel, maintenance, and other factors. Accordingly, our actual expenses in providing our offerings may vary substantially from the assumptions underlying our bid. Our ability to pass on increases in costs may be limited in the case of contracts with limited or no price escalation provisions, and there can be no assurance that these variations in cost will not lead to financial losses for our Company, which could have a material adverse effect on our cash flows, business, financial condition, and results of operations.

- 36. Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject, and this may have a material effect on our business and financial condition.**

While we maintain insurance coverage in amounts that we believe are commercially appropriate, including related to our registered office, and employees, to provide appropriate coverage in relation to intellectual property rights, Reputational Injury Liability, fire, explosions, floods, inundations, earthquakes, and landslides, we may not have sufficient insurance coverage to cover all possible economic losses, including when the loss suffered is not easily quantifiable and in the event of severe damage to our business. Even if we have made a claim under an existing insurance policy, we may not be able to successfully assert our claim for any liability or loss under such insurance policy. Additionally, there may be various other risks and losses for which we are not insured, either because such risks are uninsurable or not insurable on commercially acceptable terms. The occurrence of an event for which we are not adequately or sufficiently insured could have an effect on our business, results of operations, financial condition, and cash flows.

In addition, in the future, we may not be able to maintain insurance of the types or at levels which we deem necessary or adequate or at rates which we consider reasonable. The occurrence of an event for which we are not adequately or sufficiently insured or the successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductibles or co-insurance requirements), could have an effect on our business, results of operations, financial condition, and cash flows.

- 37. There is no monitoring agency appointed by our Company and the deployment of funds are at the discretion of our Management and our Board of Directors, though it shall be monitored by the Audit Committee.**

As per SEBI (ICDR) Regulations, 2018 appointment of monitoring agency is required only for Issue size above ₹ 10,000 Lakhs. Hence, we have not appointed a monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our finances. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the Designated Stock Exchange and shall also simultaneously make the material deviations/ adverse comments of the audit committee public.

38. Our actual results could differ from the estimates and projections used to prepare our financial statements.

The estimates and projections are based on and reflect our current expectations, assumptions and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and/or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

39. We have not independently verified certain data in this Draft Red Herring Prospectus.

We have not independently verified data from the industry and related data contained in this Draft Red Herring Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

40. Inability to protect, strengthen and enhance our existing reputation could adversely affect our business prospects and financial performance.

Our business reputation is critical to the success of our business. While we have been making consistent efforts to strengthen our image, various factors, some of which are beyond our control, are critical for maintaining and enhancing our reputation and if not managed properly, may negatively affect our brand and reputation. These include our ability to effectively manage the quality of our products and services, increase brand awareness among existing and potential customers, adapt our advertising and promotion efforts to emerging industry standards and protect the intellectual property related to our brand.

Our success in marketing our existing and new products and services depends on our ability to adapt to a rapidly changing marketing and media environment, including our increasing reliance on direct promotional initiatives. There can be no assurance that our marketing efforts will be successful in maintaining our reputation and its perception with customers and/ or result in increased sales in the future. Also, we may not necessarily increase or maintain our sales promotion spending in proportion to our growth in the future, which may result in limited marketing initiatives. Our inability to adapt to evolving marketing trends at the same pace as our competitors may adversely affect our ability to effectively compete in terms of our image value.

Our reputation could also be negatively impacted if we fail to maintain our established standards of quality, or if our products and services fail to meet the expectations of our customers. Any allegations of deterioration in product and service quality even when false or unfounded, could tarnish our image and may cause our customers to choose other competing products and services. Any negative publicity regarding us, our reputation, our products and services or about the technology industry in general could adversely affect our business and our results of operations. Other risks associated with our business include improper disclosure of proprietary information, negative comments about our services or product quality and issues with ancillary services such as delivery, exposure of personally identifiable information, fraud, hoaxes or malicious exposure of false information. Our failure to develop, maintain and enhance our brand may result in

decreased revenue and loss of customers and in turn adversely affect our reputation, business, financial condition, results of operations and cash flows.

41. The schedule of our estimated deployment of Net Proceeds is subject to inherent uncertainties.

The fund requirement and deployment are based on internal management estimates and our Company's current business plan and are subject to change in light of changes in external circumstances or costs, other financial conditions, business or strategy. These estimates have not been appraised by any bank or financial institution. In view of the dynamic nature of the sector and specifically that of our business, we may have to revise our expenditure and fund requirements as a result of variations in cost estimates, exchange rate fluctuations and external factors which may not be within the control of our management. This may entail rescheduling and revising the planned expenditures and fund requirements and increasing or decreasing expenditures for a particular purpose at the discretion of our management, within the objects. For further details refer to "*Objects of the Offer*" beginning on page 98.

EXTERNAL RISK FACTORS

42. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and the results of operations.

Our business and industry are regulated by different laws, rules, and regulations framed by the central and state Governments. These regulations can be amended/ changed on short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

43. Changing laws, rules and regulations, and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

The regulatory and policy environment in India is evolving and subject to change. Such changes in applicable law and policy in India, including the instances described below, may adversely affect our business, financial condition, results of operation, performance and prospects in India, to the extent that we are not able to suitably respond to and comply with such changes. The Government of India implemented a comprehensive goods and service tax ("GST") regime that combines taxes and levies by the central and state governments into a unified rate structure from July 01, 2017, which we believe will result in fundamental changes. However, given its recent introduction, there is no established practice regarding the implementation of, and compliance with, GST. The implementation of the new GST regime has increased the operational and compliance burden for Indian companies and has also led to various uncertainties. Any future increases and amendments to the GST regime may further affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules, and regulations relating to GST, as it is implemented. Further, as GST is implemented, there can be no assurance that we will not be required to comply with additional procedures and/or obtain additional approvals and licenses from the government and other regulatory bodies or that they will not impose onerous requirements and conditions on our operations. Furthermore, the Finance Act, 2023 instituted a number of amendments to the existing direct and indirect tax regime which include the withdrawal of long-term capital gains exemptions on equity shares, long-term capital gains applicability in the hands of foreign institutional investors, and applicability of dividend distribution tax for certain transactions with shareholders, among others.

44. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

45. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the Financial Statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Red Herring Prospectus.

Our Restated Financial Information for the period ended September 30, 2024 and for the financial year ended on March 31, 2024, March 31, 2023, and March 31, 2022 have been prepared and presented in conformity with Indian GAAP. Indian GAAP differs in certain significant respects from U.S. GAAP, IFRS, and other accounting principles with which prospective investors may be familiar in other countries. If our Restated Consolidated Financial Statements were to be prepared in accordance with such other accounting principles, our results of operations, cash flows, and financial position may be substantially different. Prospective investors should review the accounting policies applied in the preparation of our Restated Consolidated Financial Statements and consult their own professional advisers for an understanding of the differences between these accounting principles and those with which they may be more familiar. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Red Herring Prospectus should be limited accordingly.

46. Our international operations are subject to many uncertainties, and we are exposed to foreign currency exchange rate fluctuations.

We may be subject to risks inherently associated with international operations, including risks associated with foreign currency exchange rate fluctuations, which may cause volatility in our reported income, and risks associated with the application and imposition of protective legislation and regulations relating to import or export or otherwise resulting from foreign policy or the variability of foreign economic conditions.

47. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

48. Financial instability in Indian financial markets could adversely affect our Company's results of operations and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial, and market conditions. Any financial turmoil, say in the United States of America, Europe, China, or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor

confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability, and price of its Equity Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

49. If inflation rises in India, increased costs may result in a decline in the profits of our Company. Inflation rates in India have been volatile in recent years, and such volatility may continue in the future.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, raw materials and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our clients, whether entirely or in part, and may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or entirely offset any increases in costs with increases in prices for our products and services. In such case, our business, results of operations, cash flows, and financial condition may be adversely affected. There can be no assurance that Indian inflation levels will not worsen in the future.

50. Investors may have difficulty in enforcing foreign judgments against our Company or our management.

Our Company is a company incorporated under the laws of India. All Directors on the Board of Directors of our Company and our employees are residents of India and a substantial portion of our assets and such persons are located in India. As a result, it may not be possible for prospective investors outside India to effect service of process upon our Company or such persons in jurisdictions outside India, or to enforce judgments obtained against such parties outside India. Furthermore, it is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India or would enforce foreign judgments if that court was of the view that the number of damages awarded was excessive or inconsistent with public policy, or if judgments are in breach or contrary to Indian law. In addition, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI to execute such a judgment or to repatriate outside India any amounts recovered. Further, any judgment or award denominated in a foreign currency would be converted into Indian Rupees on the date of such judgment or award and not on the date of payment.

Recognition and enforcement of foreign judgments are provided for under Section 13 and Section 44A of the Code of Civil Procedure, 1908 ("CPC"). Section 13 of the CPC provides that a foreign judgment shall be conclusive regarding any matter directly adjudicated upon between the same parties or parties litigating under the same title, except (a) where the judgment has not been pronounced by a court of competent jurisdiction; (b) where the judgment has not been given on the merits of the case; (c) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or a refusal to recognize the law of India in cases in which such law is applicable; (d) where the proceedings in which the judgment was obtained were opposed to natural justice; (e) where the judgment has been obtained by fraud; and (f) where the judgment sustains a claim founded on a breach of any law then in force in India. Further, India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, such as the United Kingdom, United Arab Emirates, Singapore and Hong Kong. In order to be enforceable, a judgment from a jurisdiction with reciprocity must meet certain requirements established in the CPC. The CPC only permits the enforcement and execution of monetary

decrees in the reciprocating jurisdiction, not being in the nature of any amounts payable in respect of taxes, other charges, fines or penalties. Judgments or decrees from jurisdictions which do not have reciprocal recognition with India, including the United States, cannot be enforced by proceedings in execution in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be directly enforceable in India. The party in whose favor a final foreign judgment in a non-reciprocating territory is rendered may bring a fresh suit in a competent court in India based on the final judgment within three years of obtaining such final judgment.

51. Natural calamities and force majeure events may have an adverse impact on our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

52. QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after the submission of their Bid, and Retail Individual Bidders are not permitted to withdraw their Bids after the Bid/Offer Closing Date.

Pursuant to the SEBI ICDR Regulations, QIBs and Non - Institutional Bidders are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Bidders can revise their Bids during the Bid/Offer Period and withdraw their Bids until the Bid/ Offer Closing Date. While we are required to complete Allotment, within six working days from the Bid/Offer Closing Date or such other period as may be prescribed by the SEBI, events affecting the investors' decision to invest in the Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows or financial condition may arise between the date of submission of the Bid and Allotment. We may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Bidders ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

53. A slowdown in economic growth in India or global economic instability could result in an adverse effect on our business, financial condition, and results of operations.

We currently operate in India, which is generally viewed as a jurisdiction with a developing economy, that may not have as firmly established legal and regulatory systems as other countries and is dependent on domestic, regional, and global economic and market conditions. Our performance and growth and the market price of our Equity Shares are and will be dependent to a large extent on the overall performance of the Indian economy, the GDP growth rate in India, and the economic cycle in India. In prior periods, India experienced a slowdown in economic growth due to a variety of factors, including the COVID-19 pandemic, unsustainably high current account deficit, capital outflows and consequent exchange rate pressures. Despite the recent signs of an economic turnaround in the Indian economy, there is no assurance that growth will not slow down again or that inflation will not increase further in the future. A slowdown in the Indian economy could adversely affect our business and our customers and contractual counterparties, especially if such a

slowdown were to be continued and prolonged. In periods of high rates of inflation, our operating expenses may increase, which could have an adverse effect on our cash flows and results of operations.

54. The outbreak and after-effects of COVID-19, or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition, cash flows and results of operations.

The outbreak of any severe communicable disease, as seen in the recent outbreak and aftermath of COVID-19, could materially and adversely affect business sentiment and environment across industries. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration, and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. During the lockdown period in response to the COVID-19 pandemic, our Company had certain interim measures in place to ensure business and operational continuity. Our employees worked remotely. Although we continue to devote resources and management focus, there can be no assurance that these programs will operate effectively.

55. A third party could be prevented from acquiring control of us because of anti-takeover provisions under Indian laws.

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that the interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our Shareholders, such a takeover may not be attempted or consummated because of SEBI (SAST) Regulations, 2011.

56. Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time taken for such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Shareholders. For example, the exchange rate between the Indian Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the returns on our Equity Shares, independent of our operating results.

57. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in the developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems, or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy; disrupt the transportation of goods and supplies, and costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

58. Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, that are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

59. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Draft Red Herring Prospectus.

While facts and other statistics in the Draft Red Herring Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various web site data and BFSI that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “*Industry Overview*” beginning on page 124 of this Draft Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

60. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under the current Indian tax laws and regulations, capital gains arising from the sale of Equity Shares in an Indian company are generally taxable in India. A Securities Transaction Tax (“STT”) is levied both at the time of transfer and acquisition of the equity shares (unless exempted under a prescribed notification) and collected by an Indian stock exchange on which equity shares are sold. Any gain realized on the sale of equity shares held for more than 12 months, which are sold using any other platform other than on a recognized stock exchange and on which no STT has been paid, are subject to long-term capital gains tax in India. Such long-term capital gains exceeding ₹ 1,25,000 (Rupees One Lakh Twenty-Five Thousand) arising from the sale of listed equity shares on the stock exchange are subject to tax at the rate of 12.5% (plus applicable surcharge and cess). Unrealized capital gains earned on listed equity shares up to January 31, 2018, continue to be tax-exempt in such cases. Further, STT will be levied on and collected by an Indian stock exchange if the equity shares are sold on a stock exchange. Short-term capital gains, arising from the sale of such equity shares on a stock exchange would be subject to tax at the rate of 15% (plus applicable surcharge and cess). The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020, and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of the sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. As such, there is no certainty on the impact that the Finance Act, 2019 may have on our Company’s business and operations. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. In cases where the seller is a non-resident, capital gains

arising from the sale of the equity shares will be partially or wholly exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident.

Additionally, the Finance Act, 2020 does not require dividend distribution tax to be payable in respect of dividends declared, distributed, or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident. Historically, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity shares. Our Company cannot predict whether any tax laws or other regulations impacting it will be enacted or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our Company's business, financial condition, results of operations and cash flows.

Provided below are the details of the holding levels (days) considered for financial years ending March 31, 2024, March 31, 2023, and March 31, 2022, and estimated holding levels for financial years ending March 31, 2025, and March 31, 2026:

(no. of days)

Particulars	For the year ended March 31, 2026	For the year ended March 31, 2025	For the year ended March 31, 2024	For the year ended March 31, 2023	For the year ended March 31, 2022
Current Assets					
Trade Receivables	210	221	205	160	116
Current Liabilities					
Trade Payables	12	18	53	50	36

Note:

- 1) Trade Receivable Day is calculated as 365 divided by trade receivable turnover ratio, where trade receivable turnover ratio is calculated as Revenue from Operations divided by average trade receivables.
- 2) Trade Payable day is calculated as 365 divided by trade payable turnover ratio, where trade payable turnover ratio is calculated as Net Credit Purchase (purchase + other expenses – corporate social responsibility expense – bad debt written off) divided by average trade payables.

The key assumptions for working capital projections made by the Company and justification for the holding period are as set out below:

Particulars	Assumptions and Justifications
Current Assets	
Trade receivables	The Trade Receivables holding period for fiscal years 2022, 2023, and 2024 were 116 days, 160 days, and 205 days, respectively. The estimated holding periods for fiscal years 2025 and 2026 are 221 and 210 days, respectively. The increase in the holding period from 205 days in fiscal year 2024 to 221 days in fiscal year 2025 and 210 days in fiscal year 2026 reflects the company's strategic emphasis on securing contracts with large corporations. These contracts typically feature extended project timelines, negotiated credit terms, and milestone-based payments, which often range from 200 to 230 days in line with industry standards for larger clients. This shift allows the company to build stronger relationships with high-value clients enhancing its market position and supporting long-term growth, while the

	extended credit terms align with the company's commitment to meeting the needs of prominent corporate clients.
Current Liabilities	
Trade payables	The Trade Payable holding period for fiscal years 2022, 2023 and 2024 were 36 days, 50 days, and 53 days, respectively. The estimated holding periods for fiscal years 2025 and 2026 are 18 days and 12 days, respectively. The year-over-year decrease in trade payables from 53 days in fiscal 2024 to 12 days in fiscal 2026 reflects the company's proactive cash flow management strategy. To support its growing operations and fund larger projects, the company plans to negotiate shorter payment terms with suppliers. This approach will help strengthen relationships with key suppliers by ensuring timely payments, securing favourable terms, and maintaining a consistent supply.

Note: The above funding of working capital requirement is certified pursuant to the certificate dated February 05, 2025, issued by the Statutory Auditor M/s CGSS & Associates LLP, Chartered Accountants, UDIN 25204458BMONTN4661.

1. Solution

IT operations and service management (ITOSM) solution includes two scopes: IT Operations Management (ITOM) and IT Service Management (ITSM). ITOM is an essential component that helps IT businesses ensure their system is secure, reliable, and compliant with industry regulations and best practices. It helps them streamline processes and reduce manual labor, allowing the business to focus on other crucial business goals and productive tasks. The common functions of ITOM include IT help desk, laptop provisioning, device management, network infrastructure management, and server management, among others. ITSM solution helps manage processes and activities involved in various services such as developing or procuring software, which must be secure and managed, along with laptops and mobile devices. ITSM also helps in delivering these services efficiently to end users. ITSM framework includes problem management, service level management, and asset management, among others.

Businesses are widely adopting unified ITOSM solutions, which is further fueling the IT Operations and Service Management (ITOSM) market. Automating IT functions and workflow helps businesses gain a competitive advantage. For example, in April 2024, Nutanix (NASDAQ: NTNX), a leader in hybrid multi cloud computing, announced the findings of its sixth annual global Public Sector Enterprise Cloud Index (ECI) survey and research report—which measures enterprise progress with cloud adoption in the industry. The research showed that Public Sector IT leaders expect substantial near-term adoption of multiple IT operating models (87%), with current usage (57%) being slightly lower than the average compared to other industries (60%). Public sector organizations are eager to modernize their IT infrastructure and lay the foundation to adopt innovative technologies to deliver better services.

Future Growth of IT Operation and Service Management Market in India

In terms of value, the IT operations and service management market in India was valued at US\$ 1,011.55 million in 2023 and is projected to reach US\$ 2,665.58 million by 2031; it is expected to register a CAGR of 12.9% from 2023 to 2031.

The IT Operations and Service Management (ITOSM) market in India is experiencing growth owing to a rapidly expanding digital landscape and an increasing focus on technological advancements. The Bring Your Own Device (BYOD) culture has gained significant traction in India, as it offers employees flexibility and convenience. In India, 75% of workers are highly interested in BYOD policies. This demonstrates and inspires other countries that have yet to adopt the practice and contributes to the widespread use of BYOD in many businesses.

BUSINESS-SPECIFIC LEGISLATIONS

A. The Information Technology Act, 2000 (“IT Act”)

IT Act regulates and governs the communications made and services provided in the electronic form. It provides legal recognition to transactions carried out by means of electronic data interchange and other means of electronic communication. The IT Act prescribes punishment for publication of, obscene and offensive materials through electronic means. The Information Technology (Amendment) Act, 2008, which amended the IT Act, gives recognition to contracts concluded through electronic means, creates liability for failure to protect sensitive personal data and gives protection to intermediaries in respect of third-party information liability.

Further, under Section 69A of the IT Act and the Information Technology (Procedure & Safeguards for Blocking for Access of Information by Public) Rules, 2009, directions can be issued by the Government or intermediary, blocking public access to any information generated, transmitted, retrieved, stored or hosted in any computer resource.

B. The Information Technology (Reasonable Security Practices and Procedures and Sensitive Personal Data or Information) Rules, 2011

The Department of Information Technology under the Ministry of Communications & Information Technology, Government of India notified the Information Technology (Reasonable security practices and procedures and sensitive personal data or information) Rules, 2011 in respect of section 43A of the Information Technology Act, 2000. The said rules are dealing with the protection of sensitive personal data or information and the security practices and procedures to be followed. The Personal Data Protection Rules prescribe directions for the collection, disclosure, transfer and protection of sensitive personal data by a body corporate or any person acting on behalf of a body corporate (the “Body Corporate”). The Personal Data Protection Rules further require the Body Corporate to provide a privacy policy for handling and dealing on personal information, including sensitive personal data. Such policy is required to be published on the website of the Body Corporate. In addition, the information or data so collected is required to be kept secured and used for the purposes for which it has been collected. Further, the disclosure of such information to any third party requires the prior consent of the provider of the information, unless such disclosure has been contractually agreed upon between the Body Corporate and the provider of information or in the event disclosure is necessary for the purpose of legal compliance. Additionally, the Body Corporate is required to put in place a security programme and information security policy, so as to ensure compliance with reasonable securities practices and procedures, as prescribed under the Personal Data Protection Rules.

C. Digital Personal Data Protection Act, 2023

This act was first introduced as a bill in 2019 as the Personal Data Protection Bill, 2019. The Digital Personal Data Protection Act, 2023 (“DPDP Act”) received the assent of the President on the August 11, 2023, and it will come into force upon government notification. The DPDP Act aims to provide for protection of the privacy of individuals relating to their personal data, specify the flow and usage of personal data, create a relationship of trust between persons and entities processing the personal data, protect the fundamental rights of individuals whose personal data are processed, to create a framework for organizational and technical measures in processing of data, laying down norms for social media intermediary, cross-border transfer, accountability of entities processing personal data, remedies for unauthorized and harmful processing, and to establish a Data Protection Authority of India for the said purposes and for matters connected there with or incidental thereto. The DPDP Act would become applicable upon government notification and will repeal the Information Technology (Reasonable security practices and procedures and sensitive personal data or information) Rules, 2011.

D. The Telecommunications Act, 2023

The Telecommunications Act of 2023 is a comprehensive legislative update that replaces the Indian Telegraph Act of 1885 and the Indian Wireless Telegraphy Act of 1933. It aims to modernize India’s telecommunications framework by consolidating laws related to the development, expansion, and operation of telecommunication services and networks. Notably, the Act brings over-the-top (OTT) services under the same regulatory umbrella as traditional telecom services. It grants the government extensive powers, including the ability to suspend or prohibit the use of telecom equipment for national security reasons and to manage telecommunication services or networks. Additionally, the Act introduces a new system for allocating spectrum for satellite broadband services, which is expected to benefit rural areas and help bridge the digital divide. Consumer rights and data privacy are also emphasized, with provisions to protect these areas. The Act promotes research and development in the telecom sector and facilitates the deployment of new technologies like 5G. The license requirement has been renamed as ‘authorization,’ extending the scope of services requiring authorization. However, there are concerns about potential government overreach and content censorship due to the broad powers granted by the Act. B. Goods and Services Tax Act, 2017

The Goods and Services Tax Act, 2017 (“GST”) is one of the most significant tax reforms introduced in the history of the Indian fiscal evolution. The central and state governments will levy GST simultaneously, on a common taxable value, on the supply of goods and services. However, in the case of imports and inter- state supplies, an Integrated Goods and Service Tax (“IGST”) shall be levied by the central government, proceeds of which will be shared by the central and the recipient state government. IGST is an Indian innovation which would help tax move along with goods/services, across states and therefore reduce refund situations at state borders. GST is expected to bring a significant shift from origin-based taxation to a destination-based tax structure. This is likely to impact not only the operating business models but also the revenues of the centre/states. It has the potential to impact cash flow, pricing, working capital, supply chain and IT systems and hence provides an opportunity to transform your business. GST allow equal opportunity to the centre and the state to tax all supplies of goods and services. The single GST replaced several former taxes and levies which includes central excise duty, services tax, additional customs duty, surcharges, state-level value added tax and octroi.

B. The Copyright Act, 1957 (“Copyright Act”)

Any act of this nature entitles the copyright owner to obtain relief from a court of law including injunction, damages and accounts of profits. Further, copyright registration is not a prerequisite for acquiring or enforcing a copyright in an otherwise copyrightable work and once registered, copyright protection remains valid until expiry of sixty years from the demise of the author. Reproduction of a copyrighted software for sale or hire or commercial rental, offer for sale or commercial rental, issuing copy(is) of the computer programme or making an adaptation of the work without consent of the copyright owner amount to infringement of the copyright. However, the Copyright Act prescribes certain fair use exceptions which permit certain acts, which would otherwise be considered copyright infringement.

PHASED IMPLEMENTATION OF UPI FOR BIDS BY RETAIL INDIVIDUAL BIDDERS AS PER THE UPI CIRCULAR

SEBI has issued the UPI Circulars in relation to streamlining the process of public offer of, among others, equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for Bids by UPI Bidders through Designated Intermediaries with the objective to reduce the time duration from public offer closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure a complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

1. **Phase I:** This phase was applicable from January 1, 2019, until March 31, 2019, or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Bidder had the option to submit the ASBA Form with any of the Designated Intermediaries and use his / her UPI ID for the purpose of blocking of funds. The time duration from public offer closure to listing continue to be 6 (six) Working Days.
2. **Phase II:** This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, SEBI, vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice. Under this phase, submission of the ASBA Form by UPI Bidders through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and replaced by the UPI Mechanism. However, the time duration from public offer closure to listing continues to be six Working Days during this phase.
3. **Phase III:** This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023, and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public offer closure to listing has been reduced to three working days. The Offer shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarifications or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for Bids that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted Bids, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked not later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

The Offer will be made under UPI Phase III of the UPI Circulars (on a mandatory basis).

Our Company will be required to appoint one or more of the SCSBs as a Sponsor Bank(s) to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Investors.

The processing fees may be released to the remitter banks (SCSBs) only after a Bid cum Application is made by the SCSBs to the BRLM with a copy to the Registrar, and such Bid cum Application shall be made only after (i) unblocking of application amounts for each Bid cum Application received by the SCSB has been fully completed, and (ii) applicable compensation relating to investor complaints has been paid by the SCSB.
