This Draft Prospectus also contains forward-looking statements that involve risks and uncertainties. We have described the risks and uncertainties that our management believes are material, but these risks and uncertainties may not be the only ones we face. Our actual results could differ materially from those anticipated in these forward looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Prospectus Unless otherwise stated, the financial data in this chapter is derived from our Restated Financial Statements for the year ended March 31, 2025, March 31, 2024 and March 31, 2023 as included in “Financial Information” on page no. 141 of this Draft Prospectus.

INTERNAL RISK FACTORS

- We derive a significant portion of our revenue from the sale of PET plastic bottles and PET Preforms and any reduction in demand or in the manufacturing of such products could have an adverse effect on our business, results of operations and financial condition.***

Our total revenue from operation were Rs. 4,272.20 lakhs, Rs.1,972.37 lakhs and Rs. 1,113.52 lakhs for the period FY 2024-25, FY 2023-24 and FY 2022-23 respectively. We derive a significant portion of our revenue from PET plastic bottles and PET Preforms business. The product wise break up of these goods and their contribution to revenue is entailed below:

(Rs in lakhs)

Particulars	F.Y. 2024-25		F.Y. 2023-24		F.Y. 2022-23	
	Revenue	%	Revenue	%	Revenue	%
PET bottles/ containers	3,424.61	80.16%	1,812.94	91.92%	1,048.83	94.19%

Sub Total	4,272.20	100.00%	1,972.37	100.00%	1,113.52	100.00%

**Others consist of sale of scraps and wastes.*

Our failure to effectively react to demand and supply situations or to successfully introduce new products or services in the markets could adversely affect our business, prospects, results of operations, financial condition, and cash flows. Any factor which affects the demand for our products would lead us to change our manufacturing as well as marketing strategies and set ups and could entail additional cost outlay and losses. Further, any materially adverse social, political or economic development, natural calamities, civil disruptions, regulatory developments or changes in the policies of the

government could adversely affect our manufacturing and distribution activities, further resulting in modification of our business strategy, or require us to incur significant capital expenditure, which will in turn have a material adverse effect on our business, financial condition, results of operations, and cash flows. The occurrence of, or our inability to effectively respond to, any unfavorable events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects.

2. We are dependent on a few suppliers for supply of raw materials and any major disruption to the timely and adequate supplies of our raw materials could adversely affect our business, results of operations and financial condition.

Our Company is dependent on a few suppliers for procuring the raw materials for manufacturing of its products. For the financial year ended March 31, 2025, March 31, 2024, March 31, 2023 our top ten suppliers accounted for approximately 97.79%, 99.94% and 99.93% of our total purchases as given below:

(Rs in lakhs)

Particulars	F.Y. 2024-25		F.Y. 2023-24		F.Y. 2022-23	
	Amount	%	Amount	%	Amount	%
Top 1 Supplier	2,321.46	56.37%	1,793.85	96.87%	923.60	84.73%
Top 5 Supplier	3,815.41	92.65%	1,836.55	99.18%	1,066.17	97.81%
Top 10 Supplier	4,027.10	97.79%	1,850.63	99.94%	1,089.34	99.93%

We believe that the quality of raw materials, the transparent pricing, location advantage, etc. are also some of the major reasons our Company prefers to procure these raw materials from these suppliers. We have not entered into agreement with any of our suppliers. If any of our major suppliers ceases to have business dealings with us or materially reduces the quantity of raw materials supplied to us and we are unable to secure new suppliers for such raw materials to meet the requirements at our manufacturing plants, our production schedule may be delayed and our business, financial condition, results of operations and prospects will be adversely affected. Further our raw material supply and pricing may become volatile due to a number of factors beyond our control, including global demand and supply, general economic and political conditions, transportation and labour costs, labour unrest, natural disasters, competition and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use.

Our Company has developed a robust network chain with our suppliers which has ensured a consistent and reliable flow of goods thereby reducing the risk of stockouts, disruption in supply chain and quality issues. Any failure of the supplier to deliver the raw materials in the necessary quantities or to adhere to delivery schedules or specified quality standards and technical specifications would adversely affect our business operations and our ability to deliver orders on time and at the desired level of quality. As a result, we may lose customers and incur liabilities for failure to execute orders, which could have a material adverse effect on our business financial condition and results of operations.

3. Our company is significantly dependent on few customers for our revenue in a particular financial year. The loss of any one or more of such customers may have a material effect on our business operations and profitability.

The percentage of revenue derived from our top one, top five and top ten customers for financial year 2024-25, 2023-24, 2022-23 are given below:

(Rs. in lakhs)

Particulars	F.Y. 2024-25		F.Y. 2023-24		F.Y. 2022-23	
	Amount	%	Amount	%	Amount	%
Top 1 Customer	1,907.71	44.65%	720.14	36.51%	274.99	24.70%
Top 5 Customer	3,303.71	77.33%	1,491.19	75.60%	946.52	85.00%
Top 10 Customer	3,958.86	92.67%	1,867.62	94.69%	1,066.90	95.81%

Our top customers may vary from period to period depending on the demand and thus the composition and revenue generated from these customers might change as we continue to add new customers in normal course of business. Since our business is dependent among few significant customers, we could experience a reduction in our results of operations, cash flows and liquidity if we lose one or more of these customers or the amount of business we obtain from them is reduced for any reason.

Further, in the event of loss of one or more set of such customers on whom we are dependent for our business, we cannot assure you that we may be able to offset such loss of business by identifying a new customer of our products. Further, we also cannot assure you that the customers which contribute to the major part of our revenue stream will pay us the amounts due to us on time, or at all. In the event any of our significant customers fail to fulfil their respective obligations,

our business, financial condition and results of operations would be adversely affected. Our business operates on a volume-based margin model, meaning our financial performance relies heavily on the volume of business we generate to increase profits in absolute terms. While we believe we have maintained good and long-term relationships with our customers, there can be no assurance that we will continue to have such long-term relationship with them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

4. Trade Receivables, Inventories and other current assets form a substantial part of our Total Assets. Failure to manage our trade receivables and inventories could have an adverse effect on our net sales, profitability, cash flow and liquidity.

Our business is working capital intensive and hence, Trade Receivables, Inventories and other current assets form substantial part of our total assets and details of same are as below:

(Rs. in Lakhs)

Particulars	As at March 31, 2025	As at March 31, 2024	As at March 31, 2023
Trade Receivables	482.68	153.69	290.62
Inventories	896.92	437.53	334.07
Short term loans and advances	452.04	11.50	49.85
Total (A)	1,831.64	602.71	674.54
Total assets	2,705.00	681.45	761.85
% of (A) /Total assets	67.71%	88.45%	88.54%

The results of operations of our business are dependent on our ability to effectively manage our inventory, other current assets and trade receivables. We generally procure materials on the basis of management estimates based on past requirements and future estimates. In case we fail to sell the products, we manufactured based on the specific requirement of our customers, we may be required to write-down our inventory or create additional vendor financing, all of which could have an adverse impact on our income and cash flows. To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. We run a risk to accurately evaluate the credit worthiness of our customers as, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

5. Our business is dependent on operating of our manufacturing facilities, which is concentrated in a single region i.e. Gwalior, Madhya Pradesh, hence we face geographical concentration related risks. Further, the loss or shutdown of our facilities could have a material adverse effect on our business, financial condition and results of operations.

Currently, our Company operates through three manufacturing facilities all located at Gwalior, Madhya Pradesh. Our success depends on our ability to successfully manufacture and deliver our products to execute our scheduled orders. Our manufacturing facilities are susceptible to damage or interruption or operating risks, such as human error, power loss, breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, loss of services of our external contractors, terrorist attacks, acts of war, break-ins, earthquakes, other natural disasters and industrial accidents and similar events. During COVID-19 pandemic, on account of the government-imposed lockdown in India, operations at all of our manufacturing facilities were temporarily shut down and we were required to follow protocols as suggested by regulatory authorities, which impacted our ability to operate our manufacturing facilities at optimum utilizations.

Further, any materially adverse social, political or economic development, civil disruptions, or changes in the policies of the state government or state or local governments in this region could adversely affect our manufacturing operations, and require a modification of our business strategy, or require us to incur significant capital expenditure or suspend our operations. Due to the geographic concentration of our manufacturing operations and the operations of certain of our suppliers, our operations are prone to various hazards both natural and manmade. As on date of this Draft Prospectus, there are no past instances of losses due to such natural/ manmade hazards in our operation, however such disruptions in future could result in the damage or destruction of a significant portion of our manufacturing abilities, significant delays in shipments of our products and/or otherwise materially adversely affect our business, financial condition and results of operations. Further, continuous addition of industries in and around our manufacturing facilities without commensurate growth of its infrastructural facilities may put pressure on the existing infrastructure therein, which may adversely affect our business.

6. Our Company may have potential Conflicts of interest with our Promoter Group Entity/ Company as they are engaged in similar line of business.

Our Promoters have interests in other companies and entities that is engaged in plastic industry and are currently not in direct competitive business with us but may compete with us in future, namely “Diksha Containers Private Limited”, “Diksha Plastics” and “Diksha PET Products” , our group company and proprietorship concerns of the promoters. While all the entities are in plastic sector, but currently there is no direct competition between each other. Diksha Container Private Limited is engaged in manufacturing HDPE Containers which is a different product from us and we are differentiated from it based on the raw materials used, the manufacturing process and the final products manufactured. Further, proprietorship concerns are engaged in pure trading business while we are a manufacturing company. Our Promoters have also promoted other companies and may continue to do so. For details, please refer to the Chapter titled “Our Management” and “Our Promoters and Promoter Group” on page no 120 and 133 respectively of this Draft Prospectus.

Further, our Company has not entered into any non- compete agreement with the group company/entities and hence there can be no assurance of any conflict of interests which may arise in allocating or addressing business opportunities and strategies amongst our Company and our Group Company in circumstances where our interests differ from theirs. In cases of conflict, our Promoter may favour other Companies in which our Promoter has an interest. There is no guarantee that our Promoter or our Group Company or members of the Promoter Group will not compete with our existing business or any future business. Hence, conflict of interest may occur between our business and the businesses of our Group Company which could have an adverse effect on our business, financial condition, results of operations and prospects.

7. Our premises are not owned by us and we have only leasehold rights over such premises. In the event we lose such rights or are required to negotiate it, our cash flows, business, financial conditions and results of operations could be adversely affected.

Our Company uses the premise situated at part of Plot No.33, Industrial Area, Maharajpura, Gwalior for registered office and our manufacturing facility is on lease for 99 years till February 12, 2101 with Governor of Madhya Pradesh, acting through General Manager District trade and Industries Centre Gwalior. Further, manufacturing facility located at part of Plot No.62 Industrial Area Maharajpura Gwalior, is on lease for 30 years from December 06, 2005 for 30 years till December 05, 2035. And manufacturing facility located at part of Plot No.32 (1), Industrial Area, Maharajpura, Gwalior, is on lease for 30 years from October 14, 2014 till October 13, 2044. For further details, see the chapter titled “**Our Business**” beginning on page 97. The lease or license agreement can be terminated, and any such termination could result in any of these office and manufacturing facilities being shifted to a different location. There can be no assurance that we will, in the future, be able to retain, renew or extend the lease for the existing locations on same or similar terms, or will be able to find alternate locations for the office and manufacturing facilities on similar terms favourable to us, in time or at all. Accordingly, we may experience business disruption, and this may materially and adversely affect our business, financial condition and result of operations.

8. Our Company has availed unsecured loans which are repayable on demand.

As of March 31, 2025, our Company had availed unsecured loans amounting to ₹ 563.80 lakhs, comprising 31.38% of the total borrowings of our Company. The Company had acquired the running business of the proprietorship firm, M/s. Diksha Packaging, proprietor concern of Anjana Mandelia through Business Transfer Agreement dated September 18, 2024 and availed unsecured loans of Rs. 386.55 lakhs as purchase consideration. The same is interest free and is repayable on demand. Any sudden recall may disrupt our operations and also may force us to opt for funding at higher interest rates, resulting in higher financial burden. Further, if we are unable to raise funds at short notice, it may result in shortage of working capital fund. For further details, please refer to the section “Unsecured Loans” under “Financial Statements” beginning on page no 141 of this Draft Prospectus. Any demand for the repayment of such unsecured loan, may adversely affect our cash flow and financial condition.

9. Our Company, its Promoters, its Directors and our Group Company are parties to certain legal proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.

11. We have reported negative net cash flows in the past and may do so in the future.

The following table sets forth net cash inflow/(outflow) from operating, investing and financing activities for the FY 2024-2025, FY 2023-2024 and FY 2022-2023:

(Rs in lakhs)

Particulars	For the year ended March 31, 2025	For the year ended March 31, 2024	For the year ended March 31, 2023
Net cash from/ (used in) operating activities	(437.72)	8.50	43.89
Net cash from/ (used in) investing activities	(196.06)	(6.06)	(4.97)
Net cash from/ (used in) financing activities	1,281.52	0.10	(37.42)

We have negative cash flows from operating activities, even though there is profits from operating activity before change in working capital during the financial year 2024-25 due to the increase in trade receivables, inventories, and short term advances as the Company is engaged in high working requirement business.

We have negative cash flows from investing activities during the three financial years, since the Company has invested in purchases of plant and machinery and in F.Y 2024-25 we had acquired few machines through BTA with Diksha Packaging during this period.

We have negative cash flows from financing activities during the financial year 2022-23 due of payment of loans and finance cost.

We cannot assure you that our net cash flows will be positive in the future. If our Company is not able to generate sufficient cash flows, our Company may not be able to generate sufficient amounts of cash flow to finance our projects, make new capital expenditure, pay dividends, make new investments or fund other liquidity needs which could have a material adverse effect on our business and results of operations.

12. Our cost of production is exposed to fluctuations in the prices of raw materials required for the manufacture as well as its availability.

Our company is exposed to fluctuations in the prices of various raw materials like polymers, polyethylene terephthalate (PET) as well as its availability and all the above-mentioned raw materials are bought by our Company from suppliers on an order-to-order basis. We may be unable to make adequate provisions for the price fluctuations and, consequently, any adverse fluctuations that we have not factored in or provided for may adversely affect the consolidated results of our operations and our consolidated financial conditions. We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. These factors could adversely affect our business, results of operations, financial condition and cash flows.

13. The deployment of the Net Proceeds from the Fresh Issue are based on management estimates and have not been independently appraised by any bank or financial institution and is not subject to any monitoring by any independent agency and our Company's management will have flexibility in utilizing the Net Proceeds from the Fresh Issue.

The deployment of the funds towards the objects of the Issue is entirely at the discretion of the Board and our Board will monitor the utilization of Net Proceeds. As per SEBI (ICDR) Regulations, 2018, as amended from time to time, appointment of a monitoring agency is required only for issue size above Rs. 5,000 Lakhs. Since this issue size is less than Rs. 5,000 Lakhs, our Company has not appointed any monitoring agency for this issue. The management of our Company will have discretion to use the Net Proceeds from the Issue, and investors will be relying on the judgment of our Company's management regarding the application of the Net Proceeds from the Issue. However, the audit committee of our Board will monitor the utilization of issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015.

Given the dynamic nature of our business, we may have to revise our business plan from time to time and consequently our funding requirements and deployment on account of variety of factors such as our financial condition, business and strategy, including external factors such as market conditions, competitive environment, costs of commodities and interest/ exchange rate fluctuations which may not be within the control of our management. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our operational and financial performance.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the Objects of the Issue, at a price and manner as specified in the SEBI ICDR Regulations. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilization of our Net Proceeds, even if such variation is in our interest. Further, we cannot assure you that our Promoters or the controlling shareholders will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price which may be prescribed by SEBI. Accordingly, prospective investors in the Issue will need to rely upon our management's judgment with respect to the use of Net Proceeds.

18. Our Promoters and Key Managerial Personnel play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that they remain associated with us.

Our Promoters, along with the group key managerial personnel, have over the years build relations with clients, customers, suppliers and other persons who are connected with us. Their inputs and experience are valuable for the development of business and operations and the strategic decisions taken by our Company. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected. Further, our Promoters have also promoted other companies and may continue to do so. If they divert their attention to the other companies, we may not be able to function as efficiently and profitably as before. Our success also depends upon the continued services of our Key Managerial Personnel and our ability to retain them. We may have to incur additional costs to replace the services of our promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and

expand our business

We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires. Any inability to attract and retain talented employees or the resignation or loss of key management personnel, may have an adverse impact on our business, future financial performance and the price of our Equity Shares.

19. Any accidents or mishappenings in the address of Plot 32(1), Industrial Area, Gwalior may adversely affect our operation.

We and our Group Company-Diksha Containers Private Limited have manufacturing facilities at Plot 32(1) in two parts adjoined with each other of one part belonging to us and another to them. We share the same address therefore, any mishappening in the address may affect us. Any accidents in the group Company manufacturing facilities may lead to disruptions in our operations. Though, we have not had any such instance in past, but in case of any such happening in future of the event out of our control, we cannot assure you whether it will be sufficient or not. Further occurrence of such accidents could impact our production schedules, costs, revenue and ability to meet customer demand.

20. Any disruption to the steady and regular supply of workforce for our operations, including due to strikes, work stoppages or increased wage demands by our workforce or any other kind of disputes with our workforce or our inability to control the composition and cost of our workforce could adversely affect our business, cash flows and results of operations.

Our activities are involves workers and may expose us to the risk of industrial action. As of June 30, 2025, we have 18 permanent employees. We may be subject to work stoppages due to strikes industrial unrest, slowdowns, and increased wage costs, which may adversely affect our business, financial conditions, cash flows and results of operations. While we consider our relationship with our employees to be good and there has been no such instance in last three Financial Years of any disruptions in work due to disputes or other problems with our work force, we could experience disruptions in work due to disputes or other problems with our work force in future, which may adversely affect our ability to perform our business operations.

21. Any failure to protect or enforce our rights to own or use trademarks and brand names and identities could have an adverse effect on our business and competitive position.

Our corporate logo “” is registered under the Trademark Act. Further, any kind of negative publicity or misuse of our brand name and our logo could hamper our brand building efforts and our future growth strategy could be adversely affected. Although, we believe that that our present systems are adequate to protect our confidential information and intellectual property, there can be no assurance that our intellectual property data, trade secrets or proprietary technology will not be copied, infringed or obtained by third parties. Further, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. This may lead to litigations and any such litigations could be time consuming and costly and their outcome cannot be guaranteed. We believe that our future growth and competitiveness would depend on our ability to establish and strengthen our brand. Our Company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property, which may adversely affect our business, financial condition and results of operations. For further details pertaining to our intellectual property, please refer to the chapter titled “Our Business” beginning on page no 97 of this Draft Prospectus.

22. Reliance has been placed on Physical Search Report prepared by Practicing Company Secretary dated June 30, 2025 for documents unable to be traced on MCA Portal for data of the Company between March 02, 1999 to September 30, 2004.

We are unable to trace documents for share allotments or transfers of 3,29,000 equity shares of face value 10/- done between March 02, 1999 to September 30, 2004. We are also unable to trace shareholdings of individuals for 3,29,000

shares. Accordingly, the Lead Manager have placed reliance on Physical Search Report prepared by Practicing Company Secretary to disclose such details in this Draft Prospectus and neither we, nor the Lead Manager have been able to independently verify these details in the absence of primary documentary evidence. Therefore, we cannot assure you that all or any of the information relating to the share allotment or transfers of 3,29,000 shares included in “Capital Structure” on page 63 of this Draft Prospectus is accurate.

23. *A significant portion of our sales are concentrated in a single region i.e., Madhya Pradesh and the inability to operate and grow our business in this particular region may have an adverse effect on our business, financial condition, results of operations, cash flows and future business prospects.*

A significant portion of our revenue is derived from Madhya Pradesh, making our business vulnerable to regional economic fluctuations and regulatory changes. Any adverse developments in these states—such as economic downturns, changes in local laws, or increased competition—could lead to a substantial loss of revenue. Additionally, natural disasters or unforeseen events in these regions may further disrupt our operations and impact our financial performance. This geographical concentration poses a risk to our overall business stability, and any significant loss of revenue from these key areas could have a material adverse effect on our financial condition and results of operations.

24. *The market for plastic products is growing and getting competitive.*

We are facing competition in the plastic products from various domestic and multinational companies and also is highly competitive due to the presence of both organized and unorganized players in India. Competition primarily revolves around key factors such as product quality, sales network, pricing, and timely delivery. We expect competition could increase with new entrants coming into the plastic products industry, who may have more flexibility in responding to changing business and economic conditions, and existing players consolidating their positions. Further, expansion of our brand in new markets will require substantial advertising and promotional expenditures and some of our competitors may have access to significantly greater resources, including the ability to spend more on advertising and marketing and hence the ability to compete more effectively. Competitors may, whether through consolidation or growth, present more credible integrated or lower cost solutions than we do, which may have a negative effect on our business. We cannot assure you, that we can continue to compete effectively with our competitors. Our failure to compete effectively, including any delay in responding to changes in the industry and market, together with increased spending on advertising by competitors, may affect the competitiveness of our products, which may affect our business, results of operations, financial condition and cash flows.

25. *Our Company have not obtained any credit rating, which may limit our ability to secure debt financing at competitive terms, potentially affecting our financial condition, results of operations, cash flows, and future growth prospects.*

As on the date of this Draft Prospectus, our Company has not obtained any credit rating. Credit ratings are generally used by financial institutions and capital market participants to assess a company’s creditworthiness and financial stability. In the absence of a credit rating, we may find it difficult to raise debt from financial institutions and we cannot assure you we will be able to finance at competitive interest rates or on easy terms. The lack of a credit rating could adversely affect our ability to raise debt in the future.

26. *Our failure to keep our technical knowledge confidential could erode our competitive advantage. We possess certain technical knowledge about our products.*

Our Key Managerial Personnel possess technical knowledge and has over the time given us access to their knowledge, process, research and development results. This has been resulted from continuous effort and experience of our key managerial personnel in this industry. Goodwill of our company in the manufacturing of plastic products over the years has been rewarded with such technical knowledge that we possess which gives us a competitive edge. Some of our technical knowledge is protected only by secrecy. As a result, we cannot be certain that our technical knowledge will remain confidential in the long run. Even if all reasonable precautions, whether contractual or otherwise, are taken to protect our confidential technical knowledge of our products and business, there is still a danger that certain proprietary knowledge may be leaked, either inadvertently or willfully, at various stages of the production process.

A significant number of our employees have access to confidential design and product information and there can be no assurance that this information will remain confidential. Moreover, certain of our employees may leave us and join our various competitors. In the event that the confidential technical information in respect of our products or business becomes available to third parties or to the general public, any competitive advantage that we may have over other companies in this sector could be harmed. If a competitor is able to reproduce or otherwise capitalize on our knowledge,

it may be difficult, expensive or impossible for us to obtain necessary legal protection. Consequently, any leakage of confidential technical information could have an adverse effect on our business, results of operations, financial condition and future prospects.

27. None of our Company's board of directors have any experience of listed Companies.

Our directors lack experience in managing a listed company in India, which may pose challenges in navigating regulatory requirements and reporting obligations. This inexperience could lead to inefficient management of the company's transition, increased time spent on compliance diverting attention from business growth, and insufficient personnel with expertise in accounting policies and internal controls. Consequently, we may incur higher costs for developing and implementing necessary standards and controls, and potentially need to expand our employee base, increasing operating costs. These factors could ultimately impact our ability to effectively manage and grow the company as a listed entity.

28. We have incurred indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations. We may also be unable to obtain future financing to fund our operations, expected capital expenditure and working capital requirements on favorable terms, or at all.

We have provided security in respect of loans / facilities availed by us from our lender bank by creating a chargeover our movable and immovable properties. Details of secured borrowing for financial year ended 2024-25, 2023-24 and 2022-23 are as below:

(Rs in lakhs)

Particulars	For the year ended March 31, 2025	For the year ended March 31, 2024	For the year ended March 31, 2023
Secured Debt	1,232.99	269.99	238.38
Total Debt	1,796.79	447.24	414.57
Secured Debt as a % of Total Debt	68.62%	60.37%	57.50%

In the event we default in repayment of the loans / facilities availed by us and any interest thereon, our properties may be subject to invocation/forfeiture by lenders, which in turn could have significant adverse effect on business, financial condition or results of operations.

Our level of indebtedness has important consequences to us, such as:

- affecting our credit rating;
- limiting our ability to borrow more money both now and in the future;
- Increasing our interest expenditure and adversely affecting our profitability.

Our business requires funding for capital expenditure and working capital requirements. The actual amount and timing of future capital expenditure may depend on several factors, among others, new opportunities, availability of land, regulatory approvals, regulatory changes, economic conditions, technological changes and market developments in our industry. Our sources of additional funding, if required, to meet our capital expenditure may include the incurrence of debt or the issue of equity or debt securities or a combination of both. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations.

In case there is insufficient cash flow to meet our working capital requirement or we are unable to arrange the same from other sources or there is delay in disbursement of arranged funds, or there is any increase in interest rate on our borrowings, it may adversely affect our operations and profitability. These factors may result in an increased amount of short-term borrowings. Continuous increase of our working capital requirements may have an adverse effect on our results of operations and financial condition. Further our ability to arrange for additional funds on acceptable terms is subject to a variety of uncertainties, including future results of operations, financial condition and cash flows; economic, political conditions and market scenario for our products; costs of financing, liquidity and overall condition of financial and capital markets in India; issuance of necessary business/government licenses, approvals and other risks associated with our businesses; and limitations on our ability to raise capital in capital markets and conditions of the Indian and other capital markets in which we may seek to raise funds. Any such inability to raise sufficient funds could have a material adverse effect on our business and results of operations.

Accordingly, investors should read the industry related disclosure in this Draft Prospectus in this context.

30. Our Promoters and directors has extended personal guarantees in connection with certain of our debt facilities.

There can be no assurance that such personal guarantees will be continued to be provided by our Promoters in the future or can be called at any time, affecting the financial. Our Company is susceptible to changes in interest rates and the risks arising there from. Our latest sanction letters dated October 24, 2024 provide for interest at variable rates with a provision for the periodic resetting of interest rates. Further the lenders are entitled to change the applicable rate of interest, which is a combination of a base rate that depends upon the policies of the RBI and a contractually agreed spread, and in the event of an adverse change in our Company's credit risk rating.

For further details of interest payable on our borrowings, please refer to the chapter titled "Financial Indebtedness" on page no 173 of this Draft Prospectus Further, in recent years, the Government of India have taken measures to control inflation, which have included tightening the monetary policy by raising interest rates. As such, any increase in interest rates may have an adverse effect on our business, results of operations, cash flows and financial condition

31. Information relating to our installed capacities and the historical capacity utilization included in this Draft Prospectus is based on various assumptions and estimates and future production and capacity utilisation may vary.

Information relating to be installed manufacturing capacity and the historical capacity utilization included in this Draft Prospectus is based on various assumptions and estimates of our management , assumptions relating to availability and quality of raw materials and assumptions relating to operational efficiencies. Further, we have placed reliance on the certification by Chartered Engineer Prabhat K. Bhargava having Reg. no. F-2095 vide certificate dated August 11, 2025.

For further details, please refer chapter titled "Our Business" on page no. 97 of this Draft Prospectus. These assumptions and estimates include the standard capacity calculation practice of plastic industry after examining the equipment installed at the facilities, the period during which our manufacturing plants operated in a year, expected operations, availability of raw materials, expected utilization levels, downtime resulting from scheduled maintenance activities, unscheduled breakdowns, as well as expected operational efficiencies. Further, the requirements of our customers are not restricted to one type of product and therefore variations in demand for certain types of products also require us to make certain changes in our manufacturing processes thereby affecting our production schedules.

Actual production levels and utilization rates may differ significantly from the estimated production capacities and utilization information of our facilities. Undue reliance should therefore not be placed on our production capacity and utilization information for our existing facilities included in this Draft Prospectus.

32. There may be few delays or non-compliances relating to filing of returns and deposit of statutory dues with the statutory authorities. In case of any delay or default in payment of statutory due in future by our Company, the Regulatory Authorities may impose monetary penalties on us or take certain punitive actions against our Company in relation to the same which may have adverse impact on our business, financial condition and results of operations.

In the past, our Company may at few instances, delayed in filing our ESIC returns and GST Returns, mainly due to timely non-availability of populated data in the portal and technical issue, as a result of which, we may have been required to pay the late filing fees along with interest on delayed deposit of due taxes and statutory dues.

Although the late filing fees levied are not significant, but if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Details of such filings are as below:

33. The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Issue Price.

Our Promoters' average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price which is proposed to be determined through a Fixed Price Process. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled "Capital Structure" on page no. 63 of this Draft Prospectus.

34. Our Company has higher debt-equity ratio which requires significant cash flows to service our debts obligations, and this, together with the conditions and restrictions imposed by our financing arrangements, fluctuations in the interest rates may limit our ability to operate freely and grow our business.

Our ability to meet our debt service obligations and repay our outstanding borrowings will depend primarily on the cash generated from our business, which depends on the timely repayment by our customers. Details of Debt- Equity ratio for restated period are as below:

Particulars	F.Y 2024-25	F.Y 2023-24	F.Y 2022-23
Debt	1,796.79	447.24	414.57
Equity	440.36	177.26	76.11
Debt-Equity Ratio	4.08	2.52	5.45

If our future cash flows from operations and other capital resources become insufficient to pay our debt obligations or our contractual obligations, or to fund our other liquidity needs, we may be forced to sell assets or attempt to restructure or refinance our existing indebtedness. Our ability to restructure or refinance our debt will depend on the condition of the capital markets, our financial condition at such time and the terms of our other outstanding debt instruments. Any refinancing of our debt could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. The terms of existing or future debt instruments may restrict us from adopting some of these alternatives. In addition, any failure to make payments of interest or principal on our outstanding indebtedness on a timely basis would likely result in a reduction of our creditworthiness or credit rating, which could harm our ability to incur additional indebtedness on acceptable terms.

35. Industrial accidents at our manufacturing facilities may adversely affect our operation.

Our manufacturing facilities are subject to operating risk resulting in fatal accidents which can cause injury to the labour and employees of the company and this could also cause damage to the property and plant and machinery situated at the factory which could have an adverse effect on our operations. Though, we take adequate safety measures in order to avoid such mishaps and we have not had any such instance in past, but in case of any such happening in future of the event out of our control, we cannot assure you whether it will be sufficient or not. Further occurrence of such accidents could impact our production schedules, costs, revenue and ability to meet customer demand.

36. Certain key performance indicators for certain listed industry peers included in this Draft Prospectus have been sourced from public sources and there is no assurance that such financial and other industry information is complete.

Pursuant to the requirements of the SEBI ICDR Regulations, we have included certain key performance indicators, comprising financial and operational information, for certain listed industry peers, in the “*Basis for Issue Price*” beginning on page no. 78 of the Draft Prospectus. Although this information is sourced from and relied upon on the consolidated audited financial statements of the relevant listed industry peers as available on the websites of the Stock Exchanges, including the annual reports of the respective companies submitted to Stock Exchanges, there is no assurance that this information with respect to industry peers is either complete. There may be different methodologies and formulas used to compute the various ratios.

37. In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects/ schedule of implementation of this Issue which would in turn affect our revenues and results of operations.

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter “Objects of the Issue” on page no. 74 of this Draft Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business strategies, development and other plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

38. We are dependent on third party transportation providers for the delivery of our products to our customers.

We rely substantially on third party transportation providers for the supply of our products to our customers. We do not have an in-house transportation facility and we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation to our customers. However, we do not enter into any formal agreements with the third parties for our logistics and transportation needs.

Transportation strikes / non-availability of Transportation could have an adverse effect on our ability to deliver the same to our customers. Increase in transportation costs or unavailability of transportation services for our products, as well the extent and reliability of Indian infrastructure may have an adverse effect on our business, financial condition, results of operations and prospects. In addition, transportation costs in India have been steadily increasing over the past several years. While usually the end consumer bears the freight cost, we may not always be able to pass on these costs to our customers. In addition, India's physical infrastructure is less developed than that of many developed nations, and problems with its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity, including delivery of our products to customers by third-party transportation providers. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have a material adverse effect on our results of operations and financial condition.

39. There's a growing public and consumer demand for sustainable practices. Manufacturers who don't adapt to using recycled materials or producing less-polluting polymers risk losing market share.

There is an increased awareness towards controlling pollution and many economies including India have joined in the efforts to ban plastic products. In case any plastic made product manufactured by us is banned in India or in any of the markets where we export our products, it could have a material and adverse effect on our business and results of operations. Plastic takes many years to decompose and is very dangerous for other living beings. Many countries around the world are finding alternatives to the use of plastic products. While none of the measures taken so far have directly impacted our business, our Company cannot assure that future measures will not have a negative impact on our business. If the Government of India legislates against the use of plastic products, it could have a material and adverse effect on our business and results of operations.

We use i) polyethylene terephthalate for producing 'PET Preforms' and ii) HDPE (High Density Polyethylene) for producing 'Bottle Caps' as raw materials. Both of these materials are one of the safest plastics and can be recycled very easily. Although the probability of PET and HDPE products to be banned is not likely to take place, however if in future any restriction on the use of recyclable PET and HDPE products for packing may adversely affect our business.

40. If we are unable to continue to grow at same rate as in past and manage our growth effectively or raise additional capital, our business, future financial performance and results of operations could be materially and adversely affected.

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. As part of our growth strategy, we aim to, among other things. For details, see "Our Business – Our Business Strategy" on page no. 97 of this Draft Prospectus.

Our Company has been able to consistently achieve abnormal growth in business, revenue, profit and Net Worth with its dedication to serve the best and dive deeper into plastic industry each year Details of rise in percentage term for the key financial indicators are as below:

Particulars	F.Y 2024-25	F.Y 2023-24
Revenue from Operation	4,272.20	1,972.37
Percentage rise in Revenue from Operation year on year	116.60%	
EBITDA	470.84	180.45
Percentage rise in EBITDA year on year	160.92%	

Particulars	F.Y 2023-24	F.Y 2022-23
Revenue from Operation	1,972.37	1,113.52
Percentage rise in Revenue from Operation year on year	77.13%	
EBITDA	180.45	44.01
Percentage rise in EBITDA year on year	310.05%	

We cannot assure you that we will be able to achieve business and grow in same rate in the future. In pursuing our growth strategy, we will require additional capital investments and cash outlays, which may have a material impact on our cash flows and results of operations. Our ability to manage our growth effectively requires us to forecast accurately our sales, growth and manufacturing capacity and to expand funds to improve our operational, financial and management controls, reporting systems and procedures. Moreover, even if we secure the required funding, there is no assurance that we will

be able to successfully implement our strategies. We may also face difficulties in effectively implementing new technologies required in designing, developing and manufacturing new products and may not be able to recover our investments. An inability to implement our future business plan, manage our growth effectively or failure to secure the required funding on favorable terms or at all could have a material and adverse effect on our business, future financial performance and results of operations.

41. *We are subject to quality requirements any failure to comply with such quality standards may lead to cancellation of existing and future orders which may adversely affect our reputation, financial conditions, cash flows and results of operations.*

Our company specializes in manufacturing and supplying (i) PET plastic-based bottles/containers and (ii) PET Preforms. Due to the nature of our products and industry, our customers have high standards for product quality and delivery schedules. Adhering to quality standards is critical to our manufacturing process. Any defects in our products or failure to comply with customer specifications regarding alloy composition may lead to order cancellations. Furthermore, customers may demand price reductions, set off payment obligations, seek indemnification, change their outsourcing strategy, or replace existing products with alternatives, all of which may adversely affect our business, cash flows, results of operations, and financial condition.

42. *If we are unable to manage our growth effectively or raise additional capital, our business, future financial performance and results of operations could be materially and adversely affected.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. As part of our growth strategy, we aim to, among other things. For details, see “Our Business – Our Business Strategy” on page no. 97. This could place significant demands on our operational, credit, financial and other internal risk controls. In pursuing our growth strategy, we will require additional capital investments and cash outlays, which may have a material impact on our cash flows and results of operations

Our ability to manage our growth effectively requires us to forecast accurately our sales, growth and manufacturing capacity and to expand funds to improve our operational, financial and management controls, reporting systems and procedures. Moreover, even if we secure the required funding, there is no assurance that we will be able to successfully implement our strategies. We may also face difficulties in effectively implementing new technologies required in designing, developing and manufacturing new products and solutions and may not be able to recover our investments. An inability to implement our future business plan, manage our growth effectively or failure to secure the required funding on favorable terms or at all could have a material and adverse effect on our business, future financial performance and results of operations.

43. *Our Company may not be able to bring growth or successfully implement our business plan which could have an effect on our business, results of operations and financial condition.*

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. Our growth strategy involves focusing on Optimal Utilization of Resources and to develop relationships with customer and suppliers. For further details, see the section titled “Our Business – Our Strategies” on page no 97 of this Draft Prospectus. Our success in implementing our growth strategies may be affected by:

- Our ability to identify new markets to expand;
- Our ability to maintain the quality of our products;
- Changes in the Indian regulatory environment field;

If our Company is not able to execute our strategy on time and within our estimated budget, any of these factors could impact our results of operations. Further, we expect our growth strategy to place significant demands on our management, financial and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to manage our business and implement our growth strategy could have an effect on our business, financial condition and profitability.

44. *Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect our business prospects, results of operations and financial condition.*

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our operational standards and processes, and improper use of confidential information. It is not always possible to detect or deter such misconduct, and the precautions

we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which we may result in write-off of such amounts and thereby adversely affecting our results of operations. Our Company has not faced any such incidence till date but we cannot guarantee if we will not face any such incidence in future. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions in which case, our reputation, business prospects, results of operations and financial condition could be adversely affected.

45. Changes in technology may render our current technologies obsolete or require us to make substantial investments.

Modernization and technological upgrades are crucial for reducing costs and increasing output. Our machinery and technology may become obsolete if not upgraded in a timely manner, which could hinder our operations and financial standing and lead to loss of competitive edge. While we believe that we have already implemented updated technology, we will continue to strive to keep our technology, plant, and machinery in line with the latest standards. If new technology emerges in plastic components or other products, we may need to implement it or upgrade our machinery and equipment. Furthermore, the costs of upgrading our technology and modernizing the plant and machinery are significant and could have a substantial impact on our finances and operations.

46. We may also be unable to obtain future financing to fund our operations, expected capital expenditure and working capital requirements on favorable terms, or at all.

Our business requires funding for capital expenditure and working capital requirements which are currently met by internal accruals, loan from bank and unsecured borrowings. The actual amount and timing of future capital expenditure may depend on several factors, among others, new opportunities, availability of land, regulatory approvals, regulatory changes, economic conditions, technological changes and market developments in our industry. Our sources of additional funding in future, if required, to meet our capital expenditure may include the incurrence of debt or the issue of equity or debt securities or a combination of both. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations.

In case there is insufficient cash flow to meet our working capital requirement or we are unable to arrange the same from other sources or there is delay in disbursement of arranged funds, or there is any increase in interest rate on our borrowings, it may adversely affect our operations and profitability. These factors may result in an increased amount of short-term borrowings. Continuous increase of our working capital requirements may have an adverse effect on our results of operations and financial condition. Further our ability to arrange for additional funds on acceptable terms is subject to a variety of uncertainties, including future results of operations, financial condition and cash flows; economic, political conditions and market scenario for our products; costs of financing, liquidity and overall condition of financial and capital markets in India; issuance of necessary business/government licenses, approvals and other risks associated with our businesses; and limitations on our ability to raise capital in capital markets and conditions of the Indian and other capital markets in which we may seek to raise funds. Any such inability to raise sufficient funds could have a material adverse effect on our business and results of operations.

47. Key challenges in the global plastic industry such as global slowdown, availability of raw materials and price volatility, Trade barriers and environmental concerns and regulations that are beyond our control may have an adverse effect on our business and results of operations.

We are dependent on domestic, regional and global economic and market conditions prevailing in the regions, from where some of our revenue from operations is generated. There have been periods of slowdown in the global economic growth due to the turbulence in the financial sector, geopolitical tensions, supply chain disruptions, tightening monetary policies, persistent inflation, and hikes in interest rates. The decline in economic activity may lead to reduction in demand for our products may be adversely affected by an economic downturn in domestic and regional economies. Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Further our raw material supply and pricing may become volatile due to a number of factors beyond our control, including global demand and supply, general economic and political conditions, transportation and labour costs, labour unrest, natural disasters, competition and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use.

Therefore, we cannot assure that we will be able to procure adequate supplies of raw materials in the future, as and when we need them on commercially acceptable terms. Moreover, any adverse change in policies, in terms of tariff and non-tariff barriers, import restrictions on trade, and export bans by governments worldwide, may hamper the growth of the

plastic industry, causing disruptions in trade globally and which may negatively impact our profitability. We cannot assure you that in future our costs of complying with current and future environmental laws and other regulations will not adversely affect our business, results of operations or financial condition.

48. *Any delay or defaults in receipt of payments or dues from our customers could result in a reduction of our profits.*

We regularly commit resources prior to receiving payments from our customer. We may be subject to working capital shortages due to delays or defaults in receipt of payments or dues from such customers. If our customers default in their payments or if any order/ assignment in which we have invested significant resources is delayed, cancelled or curtailed, it could have a material adverse effect on our business, financial condition and results of operations.

49. *Any future issuance of Equity Shares may dilute your shareholding and sale of Equity Shares by the Promoter may adversely affect the trading price of the Equity Shares.*

We may be required to finance our growth, whether organic or inorganic, through future equity offerings. Any future equity issuances by us, including a primary offering or through exercise of employee stock options, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us (including under an employee stock option scheme) or disposal of our Equity Shares by the Promoters or any of our other principal shareholders or any other change in our shareholding structure to comply with minimum public shareholding norms applicable to listed companies in India or any public perception regarding such issuance or sales may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. There can be no assurance that we will not issue further Equity Shares or that our existing shareholders including our Promoters will not dispose of further Equity Shares after the completion of the Offer (subject to compliance with the lock-in provisions under the SEBI ICDR Regulations) or pledge or encumber their Equity Shares. Any future issuances could also dilute the value of shareholder's investment in the Equity Shares and adversely affect the trading price of our Equity Shares. Such securities may also be issued at prices below the Offer Price. We may also issue convertible debt securities to finance our future growth or fund our business activities. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares.

50. *Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and restrictive covenants in our financing arrangements.*

Our Company has not paid any dividend in the past and may not pay in future. Our future ability to pay dividends will depend on the earnings, financial condition and capital requirements of our Company. Dividends distributed by us will attract dividend distribution tax at rates applicable from time to time. We cannot assure you that we will generate sufficient income to cover our operating expenses and pay dividends to our shareholders, or at all. Our business is working capital intensive and we may plan to invest additional working capital expenditures to effect purchase of inventory or pay creditors. Our ability to pay dividends could also be restricted under certain financing arrangements that we may enter into. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements for the products proposed to be purchased, financial condition and results of operations.

51. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the EMERGE Platform of NSE in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the EMERGE Platform of NSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

52. *Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure ("ASM") and Graded Surveillance Measures ("GSM") by the Stock Exchange in order to enhance market integrity and safeguard the interest of investors.*

SEBI and the Stock Exchanges, in the past, have introduced various pre-emptive surveillance measures with respect to the shares of listed companies in India (the "Listed Securities") in order to enhance market integrity, safeguard the

interests of investors and potential market abuses. In addition to various surveillance measures already implemented, and in order to further safeguard the interest of investors, the SEBI and the Stock Exchanges have introduced additional surveillance measures (“ASM”) and graded surveillance measures (“GSM”).

ASM is conducted by the Stock Exchanges on Listed Securities with surveillance concerns based on certain objective parameters such as share price, price-to-earnings ratio, percentage of delivery, client concentration, variation in volume of shares and volatility of shares, among other things. GSM is conducted by the Stock Exchanges on Listed Securities where their price quoted on the Stock Exchanges is not commensurate with, among other things, the financial performance and financial condition measures such as earnings, book value, fixed assets, net-worth, other measures such as price-to-earnings multiple and market capitalization and overall financial position of the concerned listed company, the Listed Securities of which are subject to GSM.

Upon listing, the trading of our Equity Shares would be subject to differing market conditions as well as other factors which may result in high volatility in price, low trading volumes, and a large concentration of client accounts as a percentage of combined trading volume of our Equity Shares. The occurrence of any of the abovementioned factors or other circumstances may trigger any of the parameters prescribed by SEBI and the Stock Exchange for placing our securities under the GSM and/or ASM framework or any other surveillance measures, which could result in significant restrictions on trading of our Equity Shares being imposed by SEBI and the Stock Exchange. These restrictions may include requiring higher margin requirements, requirement of settlement on a trade for trade basis without netting off, limiting trading frequency, reduction of applicable price band, requirement of settlement on gross basis or freezing of price on upper side of trading, as well as mentioning of our Equity Shares on the surveillance dashboards of the Stock Exchange. The imposition of these restrictions and curbs on trading may have an adverse effect on market price, trading and liquidity of our Equity Shares and on the reputation and conditions of our Company. Any such instance may result in a loss of our reputation and diversion of our management’s attention and may also decrease the market price of our Equity Shares which could cause you to lose some or all of your investment.

53. Non-compliance with and changes in, safety, health and environmental laws and other applicable regulations, might adversely affect Our Company’s results of operations and its financial condition.

We are subject to Indian laws and government regulations, including laws in relation to safety, health and environmental protection. These safety, health and environmental protection laws and regulations inter alia impose controls on air and water discharge, noise levels, storage handling, employee exposure to hazardous substances and other aspects of our Company’s operations and products. In addition, our products, including the process of manufacture, storage and distribution of such products, are subject to numerous laws and regulations in relation to quality, safety and health.

For further details, please see “Key Regulations and Policies” on page no 109 of this Draft Prospectus. Failure to comply with any existing or future regulations applicable to us might result in levy of fines, commencement of judicial proceedings and/or third party claims, and might adversely affect our results of operations and financials.

EXTERNAL RISK FACTORS

54. Restrictions on the import of our materials and other regulations could adversely affect our business, results of operations and financial condition.

We manufacture PET plastic products. Currently, we do not import raw materials, but in case in future we import, therefore limitation or withdrawal, if any (in the case, for example, of embargoes or geopolitical conflicts), of the authorization to import the products might have a negative impact on our operations and financial situation. Further, failure to comply with the regulations and requirements could result in contract modifications or termination and the imposition of penalties, fines and withdrawal of authorizations, which could negatively affect our business, results of operations and financial condition. Authorizations can be revoked which may change in response to international conflicts or other political or geopolitical factors. Such factors could have a material adverse effect on our business and results of operations.

55. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

56. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

57. If inflation were to rise in India, we might not be able to increase the prices of our services at a proportional rate thereby reducing our margins.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of wages and other expenses relevant to our business. Further, a rise in inflation in other countries, such as in the United States of America or United Kingdom, and implementation of tariffs may lead to an increase in the interest rates in India and depreciation in the value of the Rupee which in turn make the components imported by our Company costlier. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our customers, whether entirely or in part, and may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase the price of our products to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

58. System failures or inadequacy and security breaches in computer systems may adversely affect our business.

Our business is increasingly dependent on our ability to process, on a daily basis, a large number of transactions. Our financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control, including a disruption of electrical or communication services. We may experience difficulties in upgrading, developing and expanding our systems quickly enough to accommodate our growing customer base and range of services our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could compromise data integrity and security. Any failure to effectively maintain or improve or upgrade our systems in a timely manner could materially and adversely affect our competitiveness, financial position and results of operations. Moreover, if any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes or systems, it could affect our operations or result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation. In addition, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the localities in which we are located.

59. Natural or man-made disasters could adversely affect our business.

Natural disasters (such as cyclones, flooding, and/or earthquakes), epidemics, pandemics and man-made disasters, including acts of war, terrorist attacks, and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn adversely affect our business, financial condition, and results of operations. Our operations may be adversely affected by natural disasters, and/or severe weather, which can result in damage to our property generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic, and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares. A number of countries in Asia, including India, as well as countries in other parts of the world, are susceptible to contagious diseases and another outbreak of the COVID-19 pandemic or future outbreaks of SARS-CoV-2 virus or a similar contagious disease could adversely affect the global economy and economic activity in the region. As a result, any present or future outbreak of a contagious disease could have an adverse effect on our business and the trading price of the Equity Shares.

60. With time we might be liable to other labor laws which were not applicable before leading to increase cost and time to be invested in its compliance.

Employees form the integral part of the operation of our business. Any labor disputes or unrests could lead to lost production, increased costs or delays which could lead to penalties. We are subject to a number of stringent labor legislation that protects the interests of workers and defines our duties and obligations towards them in the capacity of principal employers, including legislations that sets forth detailed procedures for employee removal and dispute resolution and impose financial obligations on us. We are also subject to state and local laws and regulations. If labor laws become more stringent or are more strictly enforced, it may become difficult for us to maintain flexible human resource policies, discharge employees or downsize, any of which could have an adverse effect on our business, results of operations, financial condition and cash flows. Any organizational changes, including changes in salaries and wages and other employee benefits that are, or are perceived to be negative, could result in an increased attrition rate. We cannot assure you that there may not be incidences of labor unrest and absenteeism from work by some of our employees. Labour shortages could increase the cost of labor and hinder our productivity and ability to adhere to our delivery schedules for our projects, which would materially and adversely affect our business, financial condition, results of operations and prospects.

61. Our Company is subject to risk arising from changes in interest rates and banking policies.

Increased interest rates will have a bearing on profitability and credit controls will have an effect on our liquidity and will have serious effects on adequate working capital requirements. We are dependent on various banks for arranging of our working capital requirement etc. Accordingly, any change in the existing banking policies or increase in interest rates may have an adverse impact on profitability of our company.

62. If inflation were to rise in India, we might not be able to increase the prices of our products and services at a proportional rate in order to pass costs on to our customers and our profits might decline.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, raw materials and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and may adversely affect our business, cash flows and financial condition. In particular, we might not be able to reduce our costs or increase the amount of commission to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the Government of India has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

63. We may, from time to time, look for opportunities to enter strategic alliances, acquire businesses or enter into joint venture arrangements. Any failure to manage the integration of the businesses or facilities post such acquisition or joint venture may cause our profitability to suffer.

We may, from time to time, look for opportunities to acquire businesses or enter into strategic partnerships or alliances. Such acquisitions may not contribute to our profitability, and we may be required to incur or assume debt or additional expenses beyond our forecasts or assume contingent liabilities, as part of any acquisition. Further, the acquisitions may give rise to unforeseen contingent risks relating to these businesses that may only become apparent after the merger or the acquisition is finalized. We may also face difficulty in assimilating and retaining the personnel, operations and assets of the acquired company. Further, we may not be able to accurately identify or forge an alliance with appropriate companies in line with our growth strategy. In the event that the alliance does not perform as estimated, or the inability on the part of our joint venture partner to meet the customer requirements may lead to a failure of such an arrangement which may adversely affect our business.

64. A decline in economic growth or political instability nationally or internationally or changes in the Government in India could adversely affect our business.

Our performance and the growth of our business are necessarily dependent on the health and performance of the overall Indian economy. In the recent past, Indian economy has been affected by global economic uncertainties and liquidity crisis, domestic policy and political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, adverse conditions affecting agriculture, rising inflation rates and various other factors. Risk management initiatives by banks and lenders in such circumstances could affect the availability of funds in the future or the withdrawal of our existing credit facilities. The Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a

slowdown or recession in the economic growth of other major countries, especially the United States, have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our business. Any downturn in the macroeconomic environment in India could adversely affect our business, financial condition, results of operation and the trading price of our Equity Shares. Volatility, negativity, or uncertain economic conditions could undermine the business confidence and could have a significant impact on our results of operations. Changing demand patterns from economic volatility and uncertainty could have a significant negative impact on our results of operations.

Further, our performance and the market price and liquidity of the Equity Shares may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India. The GoI has traditionally exercised and continues to exercise a significant influence over many aspects of the economy. Our business, the market price and liquidity of the Equity Shares may be affected by changes in GoI policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India.

65. Any disproportionate increase in labor costs including increase in wage/salary demand, labor unrest or labor claims arising from accidents may adversely affect our business operations and financial conditions.

Our increasing business operations may require our employee strength to increase in future. In the past our Company has not experienced any labor unrest, but there is no assurance that it will not experience the same at any time in the future. Also, there is a possibility that the labour costs increase disproportionately due to increase in wage/salary demand. In this event, if our Company is unable to pass on the increased costs to our customers, our business operations and financial conditions may be adversely affected.

66. Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.

Our Company is engaged in the manufacturing business, which attracts tax liability such as Goods and Service tax and Income tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund, Employee State Insurance and Professional Tax. Any demand or penalty raised by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

67. Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time-to-time experienced instances of civil unrest and hostilities among neighboring countries. Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in the world, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

68. There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.

There is no guarantee that our Equity Shares will be listed on the Stock Exchange in a timely manner or at all and any trading closures at the Stock Exchange may adversely affect the trading price of our Equity Shares. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchange or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of the Equity Shares on the Stock Exchange may fluctuate after listing as a result of several factors, including the following:

- Volatility in the Indian and other Global Securities Markets;
- The performance of the Indian and Global Economy;
- Risks relating to our business and industry, including those discussed in this Draft Prospectus;
- Strategic actions by us or our competitors;

- Investor perception of the investment opportunity associated with our future performance;
- Adverse media reports about us, our shareholders or Group Company;
- Future sales of the Equity Shares;
- Variations in our half-yearly results of operations;
- Differences between our actual financial and operating results and those expected by investors and analysts;
- Our future expansion plans;
- Perceptions about the performance of companies engaged in plastic products manufacturing sector generally;
- Perception in the market about investments in the plastic products manufacturing sector;
- Significant developments in the regulation of the trading and distribution industry in our key trade locations;
- Changes in the estimates of our performance or recommendations by financial analysts;
- Significant developments in India's economic liberalization and deregulation policies; and
- Significant developments in India's fiscal and environmental regulations.

There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share. Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

69. *Investors can be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gains realized on the sale of listed equity shares, which are held for a period exceeding 12 months will be subject to long term capital gains tax in India at the rate of 12.5%. Further, long-term capital gains arising from sale of listed equity shares on which STT has been paid on transfer and at the time of acquisition (unless such acquisition was through a notified transaction) will be exempt up to ₹125,000. Similarly, any gain realized on the sale of listed equity shares held for a period of 12 months or less and on which STT has been paid on transfer will be subject to short-term capital gains tax at a rate of 20%. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

70. *The ability of Indian companies to raise foreign capital may be constrained by Indian law.*

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

71. *Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

72. *Conditions in the Indian securities market and stock Exchange may affect the price and liquidity of our Equity Shares.*

Indian stock Exchange, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock Exchange have from time-to-time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock Exchange and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the

Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchange could adversely affect the trading price of our Equity Shares.

73. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

GLOBAL ECONOMIC OVERVIEW

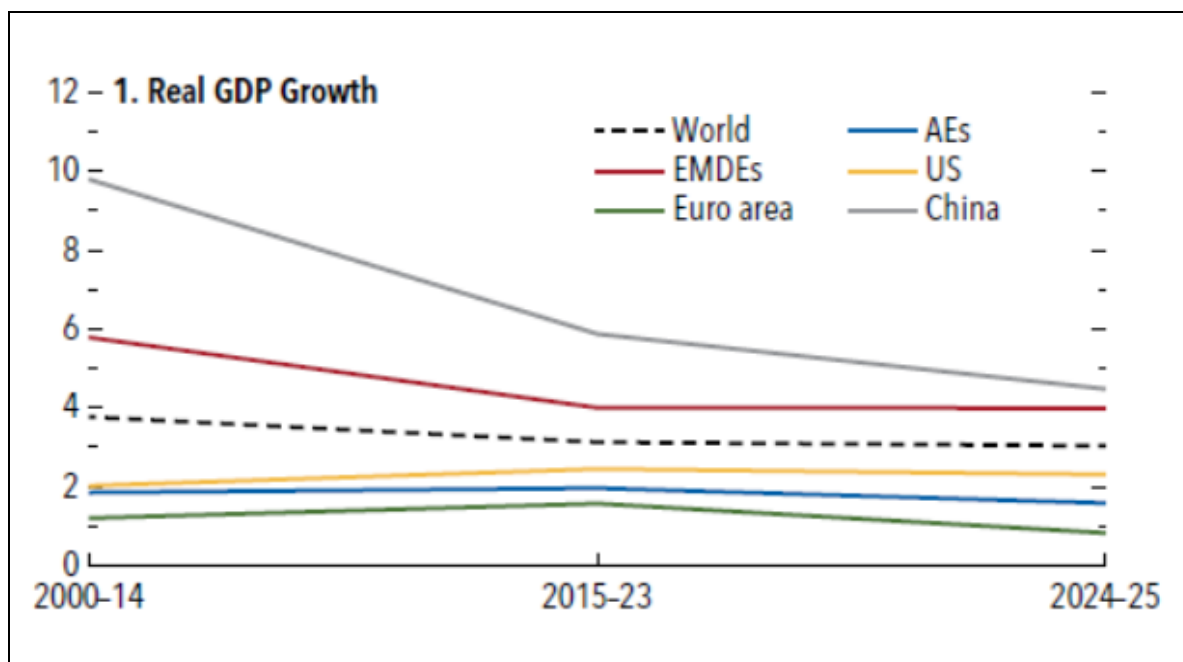

The global economy is at a critical juncture. Signs of stabilization were emerging through much of 2024, after a prolonged and challenging period of unprecedented shocks. Inflation, down from multidecade highs, followed a gradual though bumpy decline toward central bank targets. Labor markets normalized, with unemployment and vacancy rates returning to pre pandemic levels Growth hovered around 3 percent in the past few years, and global output came close to potential. However, major policy shifts are resetting the global trade system and giving rise to uncertainty that is once again testing the resilience of the global economy. Since February, the United States has announced multiple waves of tariffs against trading partners, some of which have invoked countermeasures. Markets first took the announcements mostly in stride, until the United States’ near-universal application of tariffs on April 2, which triggered historic drops in major equity indices and spikes in bond yields, followed by a partial recovery after the pause and additional carve-outs announced on and after April 9.

Despite significant equity market corrections in early March and April, price-to-earnings ratios in the United States remain at elevated levels in historical context, raising concerns about the potential for further disorderly corrections. Uncertainty, especially that regarding trade policy, has surged to unprecedented levels. The degree of the surge varies across countries, depending on exposures to protectionist measures through trade and financial linkages as well as broader geopolitical relationships.

Growth Performance

(Source: IMF staff calculations.)

Rising geopolitical tensions and widening domestic imbalances—in particular, weak demand in China and strong demand in the United States—have renewed concerns about global imbalances. Other nonmarket policies and state interventions could also contribute to external imbalances. The volume of international trade in percent of world GDP has been broadly stable, but structural changes have been taking place nonetheless. Overall, increasingly more trade has been occurring within countries historically aligned with each other rather than between them. Moreover, since 2016–17, China and the United States have diversified their bases of trading partners, decoupling from each other in terms of export and import linkages. In addition, a distinct macroeconomic dimension of trade reallocation has emerged. For example, shifting demand patterns have led Europe to import more from China in general, and from the United States in the energy sector. At the same time, Europe is exporting more to the United States in other sectors. As a result, Europe’s trade exposure to both China and the United States has increased.

Monetary policy projections: The Federal Reserve and the European Central Bank are expected to continue to reduce interest rates in the coming quarters, albeit at different paces from one another. In the United States, the federal funds rate is projected to be down to 4 percent at the end of 2025 and reach its long-term equilibrium of 2.9 percent at the end of 2028. In the euro area, 100 basis points in cuts are expected in 2025 (with three cuts having already occurred this year), representing two more 25 basis point cuts than in the assumptions underlying the October 2024 WEO, bringing the policy rate to 2 percent by the middle of the year. In Japan, policy rates are expected to be lifted at a similar pace as assumed in October 2024, gradually rising over the medium term toward a neutral setting of about 1.5 percent, consistent with keeping inflation and inflation expectations anchored at the Bank of Japan’s 2 percent target.

Fiscal policy projections: Governments in advanced economies on average are expected to tighten fiscal policy in 2025–26 and, to a lesser extent, in 2027. The general government structural-fiscal-balance-to-GDP ratio is expected to improve by 1 percentage point in the United States in 2025. Yet it is worth noting that under current policies, US public debt fails to stabilize, rising from 121 percent of GDP in 2024 to 130 percent of GDP in 2030.

In the near term, under the reference forecast, global growth is projected to fall from an estimated 3.3 percent in 2024 to 2.8 percent in 2025, before recovering to 3 percent in 2026. This is lower than the projections in the January 2025 WEO Update, by 0.5 percentage point for 2025 and 0.3 percentage point for 2026, with downward revisions for nearly all countries. The downgrades are broad-based across countries and reflect in large part the direct effects of the new trade measures and their indirect effects through trade linkage spillovers, heightened uncertainty, and deteriorating sentiment. Fiscal support in some cases (for example, China, euro area) offsets some of the negative growth impact.

After a marked slowdown in 2024, growth in emerging and developing Asia is expected to decline further to 4.5 percent in 2025 and 4.6 percent in 2026. Emerging and developing Asia, particularly Association of Southeast Asian Nations (ASEAN) countries, has been among the most affected by the April tariffs. For India, the growth outlook is relatively more stable at 6.2 percent in 2025, supported by private consumption, particularly in rural

areas, but this rate is 0.3 percentage point lower than that in the January 2025 WEO Update on account of higher levels of trade tensions and global uncertainty.

INDIAN ECONOMY OVERVIEW

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP for FY25 is estimated at Rs. 33.10 lakh crore (US\$ 3.8 trillion) with growth rate of 9.9%, compared to Rs. 30.12 lakh crore (US\$ 3.5 trillion) in FY24. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the second half of FY25. In FY25, India's exports stood at Rs. 37.31 lakh crore (US\$ 433.56 billion), with Engineering Goods (26.88%), Petroleum Products (13.86%) and electronic goods (8.89%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

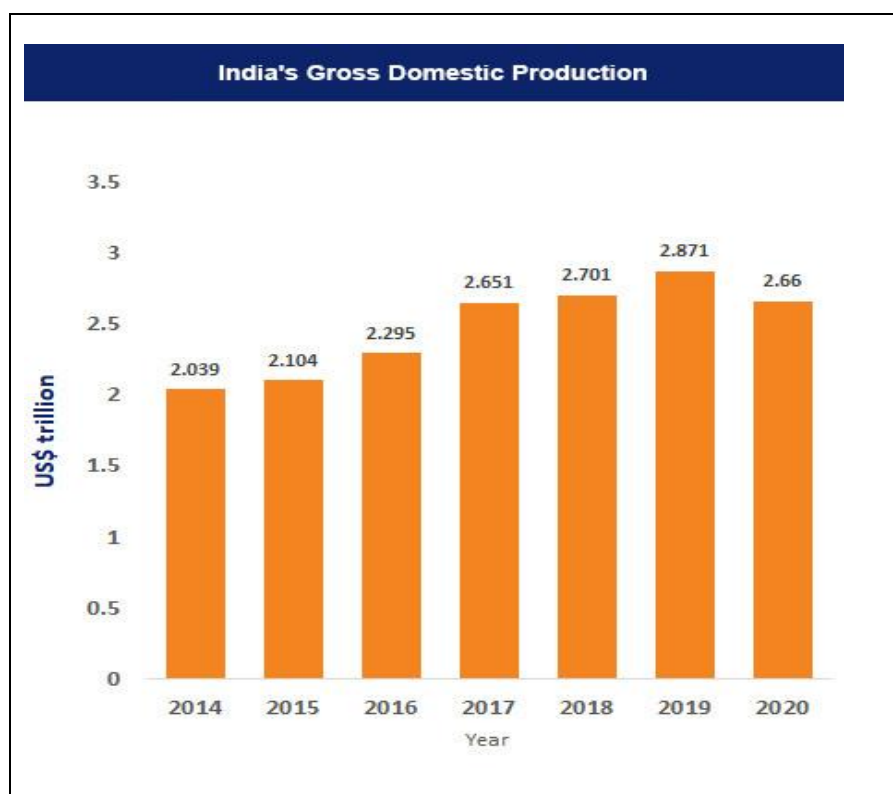

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market Size

Real GDP for FY25 is estimated at Rs. 187.95 lakh crores (US\$ 2.2 trillion) with growth rate of 6.5%, compared to Rs. 176.51 lakh crore (US\$ 2.06 trillion) for FY24. As on Jan 2025, there are 118 unicorn startups in India, with a combined valuation of over Rs. 3.0 lakh crore (US\$ 354 billion). The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time periods. The Current Account Deficit (CAD) stood at Rs. 98,095 crore (US\$ 11.5 billion) for Q3 of FY25 as compared to Rs. 88,712 crore (US\$ 10.4 billion) in Q3 of FY24. This was largely due to increase in merchandise trade deficit.

Recent Developments

- The HSBC India Manufacturing PMI increased to 58.4 in April 2025, up from 58.1 in March 2025, based on preliminary estimates. This rise signifies improved operating conditions and represents the most rapid growth pace observed in the past year. Contributing factors include a notable surge in new export orders, which experienced their most significant increase in over fifteen years, alongside a faster expansion in overall new business activity.
- As of April 18, 2025, India's foreign exchange reserves stood at Rs. 58,57,537 crore (US\$ 686.70 billion).
- India secured 39th position out of 133 economies in the Global Innovation Index 2024. India rose from 81st position in 2015 to 39th position in 2024. India ranks 3rd position in the global number of scientific publications.

- In February 2025, the overall IIP (Index of Industrial Production) stood at 151.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 141.9, 148.6 and 194.0, respectively.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) – Combined inflation was 3.34% in March 2025 against 4.85% in March 2024.
- Foreign Institutional Investors (FII) inflows in FY25 were close to Rs. 1.27 lakh crore (US\$ 14.89 billion), while Domestic Institutional Investors (DII) bought Rs. 6.00 lakh crore (US\$ 70.34 billion) in the same period.

Road Ahead

India's economy grew by 6.2% in Q3 FY25. Signs of recovery are now visible, with growth expected to rise to 7.6% in Q4 FY25—indicating a possible turnaround in the coming months. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of FY24 highlighted the unwavering support the government gave to its capital expenditure, which, in FY24, stood 37.4% higher than the same period last year. In the Union Budget of FY26, capital expenditure took lead by steeply increasing the capital expenditure outlay by 10.0 % to Rs. 11.21 lakh crore (US\$ 131.42 billion) over Rs. 10.18 lakh crore (US\$ 119.34 billion) in FY25. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. India's total exports of goods and services rose by 5.5% to a record Rs. 69.8 lakh crore (US\$ 820.9 billion) in FY25, compared to Rs. 65.8 lakh crore (US\$ 773.0 billion) in FY24. With a reduction in port congestion, supply networks are being restored. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

GLOBAL PET MARKET

The global PET bottle market size reached USD 45.50 Billion in 2024. Looking forward, IMARC Group expects the market to reach USD 60.30 Billion by 2033, exhibiting a growth rate (CAGR) of 3.2% during 2025-2033. The rising demand for PET bottles in the beverage industry, extensive product utilization in the personal care industries, and the growing environmental consciousness among the masses represent some of the key factors driving the market.

PET bottles are used in a variety of industries, including food and beverage, healthcare, personal care, and household cleaning due to their versatility and flexibility. Since they can be molded into various shapes and sizes, and they are lightweight, shatterproof, and resistant to breakage, are raising the demand for PET bottles in various industries. For instance, the growing adoption of PET bottles in the healthcare industry to package pharmaceuticals, vitamins, and other healthcare products is significantly supporting the market. In addition, PET bottles are also utilized to package cleaning agents, such as detergents, bleach, and other cleaning products as they are resistant to chemicals and can withstand high temperatures, which is contributing to the market.

PET Bottle Market Trends:

The escalating demand for PET bottles from the beverage industry majorly drives the global market. This can be supported by the widespread adoption of PET bottles for packaging water, carbonated drinks, juices, and other beverages. Along with this, the extensive product utilization in the personal care industry, for packaging products such as dressings, shampoos, and lotions is significantly supporting the market. With changing lifestyles and rapid urbanization, consumers are seeking convenient and on-the-go packaging options that can be easily carried and consumed. PET bottles, being lightweight and easy to handle, are becoming the preferred choice for such packaging solutions, which is propelling the demand. Apart from this, the rising environmental consciousness among the masses is creating a lucrative opportunity for PET bottles as they are recyclable and reusable. Furthermore, the development of new technologies for PET bottle production, such as lightweight and barrier technologies, are creating a positive market outlook. Some of the other factors driving the market include changing lifestyle patterns of the masses, the emerging e-commerce sector, and extensive research and development (R&D).

Manufacturers widely favour plastic bottles crafted from materials like polyethylene terephthalate, polypropylene, and polyethylene. These materials are lightweight and unbreakable, enhancing the ease of handling. Additionally,

manufacturers lean toward plastic packaging due to its cost-effectiveness. Given the rising reliance on packaged and processed foods and diverse beverages, the market for plastic bottles and containers is poised for growth during the forecast period.

PET has become a vital packaging material among bottle manufacturers across the region. Its versatility in accommodating different shapes and sizes has provided unparalleled alternatives to conventional glass and metal containers, making it a highly desirable choice in the packaging industry.

(Source: <https://www.mordorintelligence.com/industry-reports/plastic-bottles-market>)

THREAT- there is a growing inclination toward other packaging materials that offer environment-friendly properties. The consumption of aluminium cans and glass bottles has been witnessing high adoption rates in the region owing to its eco-friendly nature and high recyclability. Thus, consumers have been increasingly moving toward other materials from plastic.

STRENGTH - the Indian plastic bottle market is estimated to grow steadily, owing to the continually increasing consumption and industrial applications of plastic-made bottles. Further, India is also one of the strong markets in the region with the highest population, and with a developing and trending outlook, there is a significant increase in the consumption of bottled water.

INDIAN PLASTICS INDUSTRY

The timeline of Indian polymer production can be summed up as follow 1957: - Polystyrene, 1959 - LDPE, 1961 - PVC, 1968 - HDPE, and 1978 — Polypropylene. Plastics can be broadly divided into seven categories:

- **PET (Polyethylene terephthalate)** - Often known as polyethylene terephthalate, is the primary material used to make plastics in category one. Because of its vast utility, it is ranked first. Due to its powerful ability to stop oxygen from getting in and tainting the goods within, it is mostly used for food and beverage packaging.
- **HDPE (High-density polyethylene)**- High-Density Polyethylene is a durable resin used for various products, including shampoo bottles, playground equipment, caps, milk jugs, recycling bins, and shopping bags. It is thicker and more rigid than PET because it is formed of long, unbranched polymer chains.
- **LDPE (Low-density polyethylene)**- Unlike HDPE, LDPE is characterized by low-density molecules, giving this resin a thinner and more flexible design.
- **PVC (Polyvinyl chloride)** - PVC is frequently used in buildings and construction to create pipes and profiles for doors and windows.
- **PP (Polypropylene)** - It is tough and durable, can tolerate extreme temperatures, is typically utilized for living hinges because of its high resistance to fatigue (the thin piece of plastic that allows a part of a product to fold or bend from 1 to 180 degrees).
- **PS (Polystyrene)** - Due to its low cost per unit weight and ease of production, this resin is used in a wide variety of products, including disposable tableware, insulation, packaging materials, and drinking cups.
- **Others** - Plastic will be included in group number seven if it cannot be distinguished from the six categories described above. The most well-known polymers in this class are polycarbonates (PC), used to create robust, durable products. In order to protect the eyes, polycarbonate is frequently used to make lenses for safety, sports, and sunglasses.

Due to the enormous potential of the Indian market, local businesses have been encouraged to develop their technical skills, meet high-quality requirements, and expand their capabilities across a wide range of sectors of the growing plastics industry.

There have been phenomenal advancements in the petrochemical industry and combined with the progress in the plastic machinery sector, they have helped forward the plastic processing industry immensely. This has made it easier for plastic processors to increase their capacity to serve both the domestic and international markets.

Currently the Indian plastic processing industry comprises approximately 30,000 units that use injection molding, blow molding, extrusion, and calendaring to create a wide range of products. Plastic material is becoming increasingly important across various industries, and per capita consumption is rising quickly. Traditional materials are being quickly replaced by plastic technology, processing equipment, expertise, and cost-effective manufacturing. The ability to serve international markets results from the skills developed in most of this industry's areas combined with inherent abilities. The Indian plastics industry has advanced significantly over the past few decades, becoming one of the nation's most significant sectors with a considerable base.

The consumption of plastics in India has significant regional variation, with Western India accounting for 47%, Northern India for 23%, and Southern India for 21%. The end-use sectors of automotive, packaging (including bulk packaging), plastics applications, electronic appliances, etc., account for the majority of consumption in Northern India and are located mostly in Uttar Pradesh and Delhi-NCR. However, other regions, including Rajasthan, Punjab, Haryana, Uttarakhand J&K, and Himachal Pradesh, are anticipated to see growth in plastic processing due to increasing feedstock supply and a greater focus on the manufacturing sector.

PLASTIC APPLICATIONS IN VARIOUS INDUSTRIES:

The two main industries where plastic is used in India are the packaging and agricultural industries. The overall application of plastic in India from these two industries comes up to almost 46%. Electronics, home goods, and other industrial uses make up the market for plastic's remaining applications. The building, furniture, and transportation industries together account for the remaining plastic application.

- *Plastic Applications in Agriculture:* Plasticulture is the practice of using plastic materials in horticulture and agriculture. A wide range of plastic agriculture applications promises to revolutionise Indian agriculture and usher in the "Second Green Revolution." Various approaches can be used to maximize the number and quality of crops and other farm products. The following are some of the main uses of plasticulture
- *Plastic Applications in the Food Processing Industry:* Plastics are mostly used in packaging for the processing of food. Plastics are popular because of their qualities and wide range of uses. It is extremely adaptable, lightweight, resistant to corrosion, moisture- proof and mouldable into attractive shapes. Processed foods come in both flexible and rigid packaging. Plastic monolayer or multilayer sheets are the main components of flexible packaging. The most common polymers found in multilayered laminated sheets are PVC, PET, PP, and PE. 62% of the polymers used in the flexible packaging industry are polyethylene and polypropylene. Small and medium-sized enterprises dominate the flexible packaging market, with processed foods being its main use. Additionally, with the introduction of new Indian norms that are closer to international norms, packaging regulations have grown stricter, which is also encouraging the use of plastics in packaging. The food processing industry and the usage of plastics in it are expected to grow rapidly as a result of rising personal income, customer demand for packaged goods, and changing food habits.
- *Plastic Applications in Road Infrastructure:* Plastics are known for their durability, and the material has a long life. Mixing of shredded plastics along with asphalt base creates a strong base and improves the overall quality of the public roads.
- *Plastic Applications in Healthcare Industry:* In recent years, India has been a major destination for medical tourism. As a result, there is more need for products made of polymers, such as syringes, implants, fluid bottles, disposable wear and medical equipment. An improvement in living standards has also raised the demand for sanitary products and infant care items, which has led to arise in the need for polymer.
- *Plastic Applications in Automobile Industry:* Plastics are frequently used in car claddings to reduce weight and prevent corrosion from salt and water on metal surfaces, which helps to increase fuel efficiency. Although plastics have been used both externally and internally for many years, many vehicle manufacturers have turned to producing bioplastics and polymers instead of depending on plastics made from fossil fuels in an effort to reduce their carbon footprint and advance sustainability.

Market Dynamics:

The plastics industry is currently home to about 50,000 industries, most of which are micro, small, and medium-sized enterprises (MSMEs). These enterprises contribute Rs. 3.5 lakh crore (US\$ 42.89 billion) to India's economy and employ more than 50,000 people. The country recycles plastic at a rate of 60%, which is higher than that of developed nations. The "Make in India," "Skill India," "Swachh Bharat," and "Digital India" initiatives of the government are increasing plastic production, and by 2027, it is expected that the plastics industry will generate Rs. 10 lakh billion (US\$ 122.54 billion) annual revenue, with two lakh tonnes of exports.

Given that polymer is a crucial raw ingredient for plastic, the plastic industry in India is closely related to the petrochemicals sector. As a result, both upstream and downstream activities are included in the plastic industry's value chain. While the upstream market is dominated by big firms, the downstream market is far more diversified, with many small and medium-sized businesses engaged in the production of plastic goods. Strong polymer production capabilities support the Indian plastic processing industry, ensuring the supply of raw materials. The majority of the essential raw materials, such as PVC, high-density polyethylene, low-density polyethylene, and polypropylene, are produced domestically.

PET Bottles and containers- PET Bottles or containers are used for storage of beverage and various liquid as per user requirements.

Manufacturing Process for PET Preforms and PET Bottles/Containers

➤ Raw Material Preparation

PET Resin Pellets: Raw PET material (in the form of pellets) is sourced from suppliers.

Additives: Additives such as colourants, UV stabilizers, and flame retardants are mixed in at this stage.

➤ Injection Moulding (Preform Formation)

Processing-Loading:

The process of forming begins with the supply of raw material, typically in the form of plastic pellets. These pellets are fed into a drying unit positioned above the injection moulding machine through a connecting pipe. This ensures a consistent and controlled feed of material into the processing line.

**Drying:**

Inside the dryer, the pellets are thoroughly dried to remove any residual moisture content. This step is essential because the presence of moisture can lead to several quality defects, such as whitening, deformation, or structural weaknesses in the finished preforms. The drying process prepares the material for uniform heating and moulding in subsequent stages.

Heating:

Once adequately dried, the pellets are transferred to a heater connected below the dryer. Here, the pellets are exposed to high temperatures, typically ranging between 250°C to 300°C, depending on the material type, causing them to melt into a uniform, viscous paste suitable for injection moulding.

Injection Moulding:

The molten plastic is then injected into a multi-cavity mould using an injection moulding system. The mould is designed to form multiple preforms simultaneously in a single cycle. As the molten plastic fills the mould cavities, chilled water continuously circulates through the mould to rapidly cool and solidify the plastic, ensuring each preform accurately takes the intended shape and dimensions.

Collection:

After solidification, the formed preforms are automatically ejected into a collection tray positioned beneath the moulding section. These preforms are then manually gathered and allowed to cool to ambient temperature. This cooling period stabilises the preforms, enhancing their mechanical strength. Once this process is complete, the preforms are ready for subsequent use in bottle and jar blowing operations.

➤ **Preform Inspection**

Inspection: Preforms are inspected for defects such as cracks, deformities, or contamination.

➤ **Blow Molding (Bottle Formation)**

The preforms produced through the injection moulding process are manually loaded onto holders attached to a moving chain system within the heating unit. This chain moves in a continuous circular motion, ensuring a steady and systematic feed of preforms into the heating section for uniform preheating.

Heating:

As the chain advances, the preforms pass through the heating unit, where they are uniformly preheated to reach the required softened state. This stage is critical, as the correct degree of softness allows the preforms to be effectively stretched and blown into their final container shapes. The heating process is carefully regulated, since overheating can lead to defects such as whitening or deformation, rendering the preforms unsuitable for further processing.

Blow Moulding:

Once the preforms exit the heater in a softened condition, they are manually transferred into blow moulds that open and close via operator-controlled buttons. After securely placing the preform, the mould closes tightly around it. A stretch rod descends into the preform to elongate it, while simultaneously, high-pressure air — supplied through pipes connected to an air compressor — is injected into the preform. This combination of stretching and blowing forces the material to expand and conform precisely to the contours of the mould, forming the desired bottle or jar. Chilled water circulates through the moulds to quickly cool and solidify the plastic, ensuring dimensional accuracy and structural integrity.

Collection:

Following the blow moulding process, the newly formed bottles and jars are removed from the moulds. These finished containers are collected for subsequent quality checking and sorting.

Inspection:

At this stage, each bottle or jar undergoes a thorough quality inspection to detect any defects such as cracks, uneven wall thickness, deformities, or whitening. Additionally, critical dimensions — including height, diameter, neck size, and thickness — are verified to ensure compliance with production standards. Defective units are identified and separated from the acceptable ones.

Packing:

The bottles and jars that pass the inspection process are organised and packed into bundles. The number of units per bundle depends on the volume and size of the specific container produced. These packed bundles are then prepared for storage, dispatch, or further downstream processing.

➤ **Labeling (Optional)**

Label Application: Bottles can be labeled with stickers or printed directly using machines.

➤ **Packaging**

Packing: Finished PET bottles are packed into bundles or cartons for shipping and distribution.

➤ **Storage & Distribution**

Storage: Finished products are stored in warehouses.

Shipping: PET bottles are shipped to manufacturers, wholesalers, or retail outlets for use.

Revenue is reported net of trade discounts, if any.

i) Other operational revenue

Other operational revenue represent income earned from the activities incidental to the business and is recognized when the right to receive the income is established as per the terms of the contract.

j) Interest

Interest income is recognized on a time proportion basis by considering the amount outstanding and rate applicable.

h) Retirement and employee benefits

Short term benefits such as salary, bonus and other benefits are accounted on accrual basis. Defined contribution plans includes company's contributions towards state plans for the employees, such as ESIC etc. where contributions made towards such plans are charged to revenue as and when they become due to the company.

i) Borrowing cost

As per AS 16, borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

j) Income taxes

Current tax

Current tax comprises taxes on income and measured at the amount expected to be paid to the tax authorities, using the applicable tax rates. Advance taxes and provisions for current income taxes are presented in the balance sheet after off-setting advance tax paid and income tax provision arising in the same tax jurisdiction for relevant tax paying units and where the Company is able to and intends to settle the asset and liability on a net basis.

Deferred tax

Deferred tax expense or benefit is recognised on timing differences being the difference between taxable income and accounting income that originate in one period and is likely to reverse in one or more subsequent periods. Deferred tax assets are recognised only to the extent there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. In situations where the Company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that they can be realised against future taxable profits. Deferred tax assets are reviewed for the appropriateness of their respective carrying amounts at each balance sheet date. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. The Company offsets deferred tax assets and deferred tax liabilities if it has a legally enforceable right and these relate to taxes on income levied by the same governing taxation laws.

k) Earnings per share

The Company reports basic and diluted earnings per share (EPS) in accordance with Accounting Standard - 20. The basic/ diluted earnings per share is computed by dividing the net profit/loss attributable to equity shareholders for the year by the weighted average number of equity shares outstanding during the year. The Company has no potentially dilutive equity shares outstanding during the period. Therefore Basic and Diluted number of shares and EPS is same.

l) Provisions and contingent liabilities

The Company recognizes a provision when there is a present obligation arising from a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made.

m) Foreign currency transactions

Income and expense in foreign currencies are converted at exchange rates prevailing on the date of the transaction. Foreign currency monetary assets and liabilities other than net investments in non-integral foreign operations are translated at the exchange rate prevailing on the balance sheet date and exchange gains and losses are recognised in the statement of profit and loss. Exchange difference arising on a monetary item that, in substance, forms part of an enterprise's net investments in a non-integral foreign operation are accumulated in a foreign currency translation reserve. Non monetary items are measured at cost, therefore there are no foreign exchange translation effect.

n) Segment Reporting

The Company operates in a single primary business segment of manufacturing plastic bottles. Since, it is the only reportable segment as envisaged in Accounting Standard 17 'Segment Reporting', no separate information / disclosure is required to be made in the financial statements of the Company. The Company operates in one Geographical Segment namely "within India" and hence, no separate disclosure is required.

Looking forward, IMARC Group expects the market to reach USD 60.30 Billion by 2033, exhibiting a growth rate (CAGR) of 3.2% during 2025-2033. The rising demand for PET bottles in the beverage industry, extensive product utilization in the personal care industries, and the growing environmental consciousness among the masses represent some of the key factors driving the market.

India's economy grew by 6.2% in Q3 FY25. Real GDP for FY25 is estimated at Rs. 187.95 lakh crores (US\$ 2.2 trillion) with growth rate of 6.5%, compared to Rs. 176.51 lakh crore (US\$ 2.06 trillion) for FY24. India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnership

BUSINESS OVERVIEW

Our Company is engaged in business of manufacturing of plastic products such as PET bottles/ containers and PET Preforms. We sell our products in Business-to-Business Model (B2B), to the manufacturer/traders who use our product as packaging materials for their products. We operate through three manufacturing facilities located at Gwalior, Madhya Pradesh. Our facilities spans 26,879 sq. ft on total basis and are equipped with the latest technology and has state of the art machinery. Our presence in these locations allows us to have easy access to raw materials and end users both which helps us overcome significant entry barriers in comparison with our competitors.

Our total income as restated were ₹ 4,272.80 lakhs, ₹ 1,972.37 lakhs and ₹ 1,113.52 lakhs for the Financial Year 2024-25, 2023-24 and 2022-23 respectively. Further, our Profit after Tax had been recorded at ₹ 263.10 lakhs, ₹ 101.15 lakhs and ₹ 4.86 lakhs for the financial year 2024-25, 2023-24 and 2022-23 respectively.

Significant Developments after March 31, 2025 that may affect our Future Results of Operations

The Directors confirm that there have been no events or circumstances since the date of the last financial statements as disclosed in the Draft Prospectus which materially or adversely affect or is likely to affect the profitability of our Company, or the value of our assets, or our ability to pay liabilities within next twelve months.

FACTORS AFFECTING OUR RESULT OF OPERATIONS

Economic conditions in the markets in which we operate

Our results of operations are dependent on the overall economic conditions in the markets in which we operate, including India. Any change in macro-economic conditions in these markets, including changes in interest rates, government policies or taxation and political, economic or other developments could affect our business and results of operations. The plastic industry in India may perform differently and be subject to market and regulatory developments that are dissimilar to the markets in other parts of the world. While stronger economic conditions tend to result into higher demand for our products, weaker economic conditions tend to result into lower demand. Change in demand in the market segments we currently supply or improvement/deterioration in the market or a change in regulations, customs, taxes or other trade barriers or restrictions could affect our operations and financial condition.

Relationship with key customers

We have historically derived, and may continue to derive, a significant portion of our income from our top 5 customers. In F.Y. 2024-25, F.Y. 2023-24 and F.Y. 2022-23, our top 5 customers represented 77.33%, 75.60% and 85.00% of our total revenues from operations respectively in such periods. Any reduction in orders from our top five customers would adversely affect our income. The demand from our key customers, in particular our top 5 customers, determines our revenue levels and results of operations, and our sales are directly affected by the production and inventory levels of our customers. Our customers in turn are dependent on budget, economic condition of country, demand and growth in plastic industry sector. Over the years, we have developed strong relationships with a number of domestic and international corporations through which we have been able to expand our product offerings and also our geographic reach. Our business depends on the continuity of our arrangements with these customers. Our sales to such customers are typically conducted on the basis of purchase orders that they place with us from time to time.

Our ability to successfully implement its strategy and its growth and business expansion plans

Our revenue and our business operations have grown in recent years. Although we plan to continue to expand our scale of operations, we may not be able to sustain these rates of growth in future periods due to a number of factors, including, among others, our execution capability, our ability to retain, maintain & enter into new distribution agreement, our ability to maintain customer satisfaction, our ability to mobilise sufficient working capital, macroeconomic factors beyond our control such as decline in global economic conditions, availability of cheaper imported / domestic products / brands, competition within each product category from players in the organized and unorganized segments, the greater difficulty of growing at sustained rates from a larger revenue base, our inability to control our expenses and the availability of resources for our growth. There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing business operations. Our strategy and revenue plan may not work and might have adverse affect on financials.

Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three working days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Individual Applicants into the UPI Mechanism.

Further, in the event of transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules.
